What is this product?

Type:

The Fund is a sub-fund of Oaktree (Lux.) Funds (the "SICAV"), an investment company with variable capital structured as an umbrella fund offering a range of sub-funds.

Term:

This product is not subject to any fixed term.

Objectives:

The investment objective of the Fund is to achieve an attractive total return from a combination of current income and capital appreciation by investing in a diversified portfolio of U.S. and non-U.S. convertible securities and high income securities. The Fund is actively managed with reference to the benchmark Thomson Reuters CV Gl. Focus (TR) (USD-Hgd).

While the Fund has a reference benchmark, it is actively managed by implementing the investment philosophy and process described herein and has an ample degree of freedom to deviate from the benchmark. There is no requirement that any security be rated "investment grade" by any rating agency. The relative allocation of the Fund's NAV will be: 10-90% U.S. convertible securities (including high income securities, which are predominately U.S.) and 10-90% non-U.S. convertible securities.

The precise allocation within these ranges will vary from time to time based on market fluctuations, the relative availability of attractive opportunities and other factors that the Investment Manager may consider in its discretion. To achieve this objective, the Fund will seek to invest in a diversified portfolio of convertible securities, which individually, and therefore collectively, may capture a higher percentage of their underlying stocks' gains than the percentage losses that they will reflect.

The Fund may invest up to 10% of its NAV in Distressed Securities. The Fund may use derivatives for hedging purposes.

Intended retail investor:

The Fund may be appropriate for investors who want to invest in convertible securities issued by issuers globally. It is designed for long-term investors who understand and accept the risks of the Fund, and are able and prepared to sustain losses.

Depository Bank

The Fund's Depository Bank is State Street Bank International GmbH, Luxembourg Branch.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for a minimum of 3 Years. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

Be aware of currency risk. In certain jurisdictions you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Fund's risk indicator does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. The fund will invest in and will actively trade securities and other financial instruments using strategies and investment techniques with significant risk characteristics, including risks arising from the volatility of the global equity, currency, and fixed income markets, the risks of leverage, the potential illiquidity of derivative instruments and other portfolio investments and the risk of loss from counterparty defaults. For a description of each risk factor please refer to the Fund's Prospectus.

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What happens if FundRock Management Company S.A., Luxembourg is unable to pay out?

In the event of the insolvency of FundRock Management Company S.A. the Fund's assets will not be affected as the manufacturer of this product does not hold assets of the Fund. The assets of the Fund are held in safekeeping by its Depositary, State Street Bank International GmbH, Luxembourg Branch in line with applicable regulations. In the event of the Depositary's insolvency, the Fund may suffer a financial loss, however, this risk is mitigated to a certain extent by the fact the Depositary is required by law to segregate its own assets from the assets of the Fund. There is no investor compensation or guarantee scheme in place which may offset, all or part, of this loss.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods: We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment 10 000 EUR	If you exit after 1 Year	If you exit after 3 Years
Total costs	393 EUR	814 EUR
Annual Cost Impact*	3.93 %	2.57 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.93% before costs and 1.36% after costs.
