Dividends may be paid more or less frequently as deemed appropriate from time to time by the board of directors of the Company. Accumulation Shares accumulate net income received from the Fund's investments, meaning it is kept in the Fund and its value is reflected in the price of the Shares in the Classes.

Hedged Classes aim to provide you with the performance returns of the Fund's investments in the Fund's base currency by reducing the effects of exchange rate fluctuations between the relevant Class currency and the Fund's base currency.

Investment Strategy

At least two-thirds of the Fund (excluding cash) will be invested in bonds in various currencies issued by companies worldwide. A maximum of 20% of the Fund can be invested in bonds issued by governments and government agencies.

Investing on a global basis allows investors to benefit from the best opportunities available around the world, and does not limit the Fund to a single region or market.

The Fund may also invest in other financial instruments and hold cash on deposit. **Financial derivative instruments may be used to achieve the investment objective and to reduce risk or manage the Fund more efficiently.**

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment.

Refer to Para 7 on page 102-104 of the Prospectus for further information on risks of the product.

Market and Credit Risks

You are exposed to market risk.

- The value of investments by the Fund may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation.

Refer to Para 7.1 on page 102 of the Prospectus for further information.

Liquidity Risks

You are exposed to liquidity risk.

- There is no secondary market for the Fund. All redemption requests should be made to the distributor of the Fund through whom you originally purchased the Shares. The liquidity of the Fund may be limited if a significant portion of the assets of the Fund is to be sold to meet redemption requests on a short time frame. During this period, the portfolio allocation may be modified to prioritise liquidity.

Refer to the "Important Information" section and Para 7.1 and 10.1 on page 102 and 110 of the Prospectus for further information.

Product-Specific Risks

You are exposed to debt securities risk

- A security issuer may not be able to meet its obligations to make timely payments of interest and principal. This will affect the credit rating of those securities.

Refer to Para 7.1 on page 102 of the Prospectus for further information.

You are exposed to counterparty risk

- If a counterparty to a financial derivative contract were to default, the unrealised profit on the contract and its market exposure may be lost.

You are exposed to derivatives risk.

- The Fund may use financial derivative instruments as part of the investment process. The use of futures, options, warrants, forwards, swaps or swap options involves increased risk. The Fund's ability to use such instruments successfully depends on the Investment Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Investment Manager's predictions are wrong, or if the financial derivative instruments do not work as anticipated, the Fund could suffer greater losses than if the Fund had not used such instruments.

You are exposed to asset-backed / mortgage-backed securities risk.

- Mortgage or asset-backed securities may not receive in full the amounts owed to them by underlying borrowers.

You are exposed to distribution policy risk (only applicable to Distribution Classes)

- In respect of a Distribution Class with fixed dividends, fixed dividends may be paid out of capital if investment income is less than the fixed dividend amount.
- In respect of a Distribution Class with variable dividends, the dividends are paid out of capital rather than out of investment income. Capital growth will be reduced and in periods of low growth, capital erosion may occur.
- Where dividends are paid out of capital of a Distribution Class, this will reduce the net asset value of the Distribution Class.

You are exposed to operational risk.

- The Fund's operations depend on third parties and it may suffer disruption or loss in the event of their failure.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You may redeem Shares by completing a share redemption form ("Redemption Request") and submitting it to the relevant distributor through whom you originally purchased the Shares.

The directors of the Company reserve the right not to accept instructions to redeem (or switch) of more than 10% of the total value of the Shares in issue of the Fund on a Dealing Day. In these circumstances, the redemption of part or all Shares in excess of 10% will be deferred until the next Dealing Day.

The redemption proceeds are usually paid to you within 6 Business Days following the receipt of the Redemption Request by the Management Company or its administrative agent provided that the directors of the Company reserve the right to extend the period of payment of the redemption proceeds to such period, not exceeding 30 Business Days.

Your exit price is determined as follows:

- If you submit the Redemption Request by 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the relevant Dealing Day, you will be paid a price based on the net asset value per Share on that Dealing Day.
- If you submit the Redemption Request after 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the next relevant Dealing Day, you will be paid a price based on the net asset value per Share on the next relevant Dealing Day.

The redemption proceeds that you will receive will be the exit price multiplied by the number of Shares redeemed. An example is as follows:

$$\begin{array}{rclcl} 1000 \text{ Units} & \times & \text{S\$}11.00 & = & \text{S\$}11,000.00 \\ \text{(Number of Shares)} & & \text{(Net Asset Value per Share)} & & \text{(Redemption Proceeds)} \end{array}$$

No cancellation period is available, and you cannot cancel your subscription for Shares of any Class of the Fund.
