KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in a stand-alone unit trust constituted in Singapore that aims to achieve long-term capital growth primarily through investment in securities of companies listed on the Singapore Exchange Securities Trading Limited. The portfolio of the Fund will be broadly diversified with no specific industry or sectoral emphasis.

In respect of the Class SGD A Dis Units, the Manager intends to declare quarterly distributions at a variable percentage per annum, of the NAV per Unit to Holders on or around 31 March, 30 June, 30 September and 31 December (subject to the Manager's right to review and change such policy from time to time). In respect of the Class SGD A Acc Units and Class USD A Acc Units, the Manager currently does not intend to declare any distributions.

Refer to Clauses 1, 10, 11 and 37 of the Prospectus for further information on features of the product.

Investment Strategy

The Manager's investment approach is based on the belief that fundamental analysis of companies using its local research resources provides it a competitive advantage and that companies with consistent above average growth produce superior stock market returns.

The net asset value of the Fund is likely to have high volatility due to its investment policies or portfolio management techniques.

Refer to Clause 12 of the Prospectus for further information on the investment strategy of the Fund.

¹ The Prospectus is available for collection from the offices of Schroder Investment Management (Singapore) Ltd or any of its appointed distributors during usual office hours.

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	Refer to Clauses 15, 16 and 37 of the Prospectus for further information on risks of the Fund.
Market and Credit Risks	
You are exposed to market risk <ul style="list-style-type: none"> The Fund is exposed to the market risk in the regions in which it invests. The value of investments by the Fund may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation. 	Refer to Clause 16(a) of the Prospectus for further information.
Liquidity Risks	
<ul style="list-style-type: none"> There is no secondary market for the Fund. All realisation requests should be submitted to the Manager or its appointed distributors. 	Refer to Clause 15 of the Prospectus for further information.
Product-Specific Risks	
You are exposed to equity risk <ul style="list-style-type: none"> The Fund may invest in stocks and other equity securities and their derivatives which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. The Fund may also invest in convertible instruments which may be converted into equity. A convertible instrument tends to yield a fairly stable return before conversion, but its price usually has a greater volatility than that of the underlying equity. You are exposed to financial derivatives risk <ul style="list-style-type: none"> The Fund may use financial derivatives. The use of futures, options, warrants, forwards, swaps or swap options involves increased risks. The Fund's ability to use such instruments successfully depends on the Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's predictions are wrong, or if the financial derivatives do not work as anticipated, the Fund could suffer greater losses than if the Fund had not used the financial derivatives. You are exposed to currency risk <ul style="list-style-type: none"> The assets and liabilities of the Fund may be denominated in currencies other than the base currency of the Fund or the currency of denomination of the relevant Class (the "Class Currency") (as the case may be) and the Fund may be affected favourably or unfavourably by exchange control regulations or changes in the exchange rates between the base currency of the Fund or the relevant Class Currency (as the case may be) and such other currencies. If the currency in which a security is denominated appreciates against the base currency of the Fund or the relevant Class Currency (as the case may be), the value of the security would increase. Conversely, a decline in the exchange rate of the base currency of the Fund or the relevant Class Currency (as the case may be) would adversely affect the value of the security. You are exposed to risks relating to distributions <ul style="list-style-type: none"> The Manager has the absolute discretion to determine whether a distribution is to be declared. The Manager has the discretion to review and make changes to the distribution policy from time to time. Where the income generated by the Fund is insufficient to pay distributions as declared, the Manager may at its discretion make such distributions out of the capital of the relevant Class(es). Distributions out of capital may only be made with the Trustee's consent. You should note that in the circumstances where distributions are paid out of the capital of the relevant Class(es) of the Fund, the NAV of the relevant Class(es) of the Fund will be reduced and this may lead to a reduction of the original amount you invested. 	Refer to Clauses 16(b), 16(c), 16(d) and 37 of the Prospectus for further information.
