Benefits

The fund is actively managed and offers the investor straightforward and convenient access to UBS House View, which draws on the professional insights of UBS investment specialists worldwide.

Investors benefit globally from diversified market opportunities in the area of bonds and equities. In addition to high-quality bonds, investments can also be made in other bond segments. The weighting of the different asset classes is maintained within a specific range in order to take account of the fund's risk profile.

The fund is attractive for investors who see risks as opportunities too. The fund aims to generate interest and dividend income as well as capital gains.

Risks

The fund invests in equities, bonds of varying credit quality and money market securities on a global basis, and may therefore be subject to high fluctuations in value. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing. For a definition of financial terms refer to the glossary available at www.ubs.com/glossary.
