<p>equities and equity-related securities (excluding bond to equities convertibles and bond with warrants attached) of issuers within the Sub-Fund's benchmark's market capitalisation range at the time of purchase, domiciled in or exercising the predominant part of their commercial activities in Latin America. Within the remaining one-third, it may invest in transferable securities not meeting the above market capitalisation requirements.</p> <ul style="list-style-type: none"> The Sub-Fund may use FDI for EPM (including hedging) and for investment purposes. It will not use FDI extensively for any purpose. 	<p>Prospectus for further information on the investment strategy of the product.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Manager is PineBridge Investments Ireland Limited, who has appointed PineBridge Investments LLC as investment manager for the Sub-Fund. The Trustee and Custodian is State Street Custodial Services (Ireland) Limited. 	<p>Refer to the "<u>Management Structure and Other Parties</u>" section of the Singapore Prospectus for further information on their role and responsibilities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? Investment involves risks. The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses. All financial markets and therefore the value of the Sub-Fund may at times be adversely affected by changes in political, economic and social conditions and policies including without limitation, foreign exchange control policies. Please refer to the Singapore Prospectus for details.</p>	<p>Refer to the "<u>Risk Factors</u>" section of the Singapore Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<p>You have exposure to market risks of an equity fund, particularly in the Latin America markets</p> <ul style="list-style-type: none"> The value of equity and equity-related securities are affected by economic, political, market and issuer-specific changes. Such fluctuations can adversely impact the Sub-Fund's performance. The Sub-Fund concentrates its investments in equity and equity-related securities of companies incorporated or whose assets, products or operations are in Latin America. This concentration may lead to a greater degree of volatility and risk than a portfolio which is diversified across different geographical regions. <p>You are exposed to Emerging Markets risk</p> <ul style="list-style-type: none"> Investing in 'emerging' or 'developing' countries/markets involves a greater risk and speculation due to adverse economic developments resulting in substantial depreciation/instability of currency, and the lack of developed legal structures, internationally comparable accounting, auditing and reporting standards, and information transparency. <p>You are exposed to market volatility risk</p> <ul style="list-style-type: none"> All investment and markets are subject to volatility based on prevailing economic conditions. Price trends are affected by financial market trends and economic development of issuers. Some markets or exchanges may be highly volatile from time to time. 	
Liquidity Risks	
<p>The Sub-Fund is not listed on the Singapore Exchange and you can redeem only on Dealing Days. There is no secondary market for the Sub-Fund. All redemption requests should be made to the Manager's authorised distributors or through other sales channels, where applicable.</p>	
Product-Specific Risks	
<p>You are exposed to liquidity risk</p> <ul style="list-style-type: none"> Not all securities may be listed or rated and consequently liquidity may be low. The accumulation and disposal of holdings may be time consuming and may need to be conducted at unfavourable prices. 	

You are exposed to FDI risk

- Certain risks may render hedging ineffective, including the ability to predict price and interest rate movements, imperfect correlation of instruments to the securities/markets being hedged, skill in using hedging strategy, illiquidity, possible impediments to EPM or ability to redeem, legal risks (e.g. enforceability and limitation of contract terms), settlement risks (as the Sub-Fund's liability may be unlimited until the position on certain FDI is closed) and counterparty risks.
- Certain FDI may involve the assumption of obligations as well as rights and assets. Assets deposited as margin with brokers may not be held in segregated accounts and may be available to the broker's creditors in the event of insolvency.

You are exposed to CFD risk

- As CFDs are traded over the counter, it is subject to FDI risk, notably counterparty risk, liquidity risk, market volatility risk because of the high leverage as well as margin risk similar to futures.

You are exposed to currency risk

- The Sub-Fund may invest in holdings denominated in currencies other than its base currency and it is exposed to risks in currency movements and exchange control regulations.

You are exposed to country selection risk

- The Sub-Fund may allocate its investments to certain countries for greater opportunities and potential for capital appreciation, but this may subject the Sub-Fund to higher risks of loss.

You are exposed to risks associated with investments in small and/or mid capitalised companies

- Investing in small and mid-capitalised companies or markets involve greater risk as they trade in lower volumes. The quality, reliability, transparency and availability of information on such companies are limited. Corporate governance may be less stringent which may increase investment risk and lessen investor protection. Such investments may be more illiquid and volatile than investments in larger, more established companies.

You are exposed to distributions from capital risk

- Payment of dividends out of capital amounts to a return of part of your original investment or capital gains attributable to it. Capital erosion may continue until all capital is depleted.
