- * Eligible for CPFIS-OA investments
- ** Eligible for both CPFIS-OA and SA investments

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the CPF Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. The interest rate for the Special and Medisave Accounts (SMA) is pegged to the 12-month average yield of 10-year Singapore Government Securities (10YSGS) plus 1%. The interest rate to be credited to the Retirement Account (RA) will be the weighted average interest of the entire portfolio of Special Government Securities (SSGS) which the RA savings are invested in, which earn a fixed coupon equal to the 12-month average yield of the 10YSGS plus 1% at the point of issuance. As announced on 27 September 2018, the government will maintain the 4% per annum minimum rate for interest earned on all SMA and RA monies until 31 December 2019, subject to updates from the CPF board. The CPF Board will pay an extra interest rate of 1% per annum on the first \$\$60,000 of a CPF member's combined balances, including up to \$\$20,000 in the OA. In addition, CPF members aged 55 and above will also earn an additional 1% extra interest on the first \$30,000 of their combined balances (with up to \$20,000 from the OA). Only monies in excess of \$\$20,000 in the OA and \$\$40,000 in the Special Account can be invested.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

Class A	Sub-Fund %	Benchmark %
3-mths	2.1	-0.7
6-mths	9.3	10.0
1-year	3.5	-1.0
3-years	7.1	12.0
5-years	7.0	6.9
10-years	9.1	7.4
Since Inception - 26 November 1999 (Calculated since date of first valuation)	1.4	0.4

Note: The Sub-Fund invests all or substantially all of its asset in the First State Asia Opportunities Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is MSCI AC Asia ex Japan Index. It was changed from MSCI AC Asia Information Technology Index from 1 December 2008. The new benchmark is intended to be more consistent with the new investment scope of the Underlying Fund which took effect on 1 December 2008.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 30 November 2008 : MSCI AC Asia Information Technology Index
- From 1 December 2008: MSCI AC Asia ex Japan Index

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI AC Asia ex-Japan Index increased by 10.7% in US dollar terms in the six months to the end of June 2019. Thailand and Hong Kong outperformed, while South Korea and India posted more modest returns. On a sector level, Real Estate and Consumer Discretionary gained the most, while Health Care and Materials were weaker.

Performance

Key contributors to performance included **Newcrest Mining**, which strengthened as growing risk aversion and lower interest rates boosted the gold price. **Haw Par** continued to do well on sales of both classic Tiger Balm and its various new products, which include medicated plasters, active sports gels, mosquito repellents and a junior range. On the negative side, **Dairy Farm International** weakened as its Southeast Asian food business struggled amid increased competition among supermarkets and high operating costs. **Bosch India** decreased on falling sales. The ongoing slowdown in the automobile sector has been detrimental to Bosch, as it represents the majority of its sales.

Transactions

Over the six-month period, significant purchases included **Uni-President China (UPC)**, after valuations fell to an attractive level. Although unlikely to return to its previous high-growth era, margin improvement (from a higher-end product mix) and steady revenue growth could revive the company's prospects. The Fund also bought **CK Asset Holdings**, which operates in Hong Kong and mainland China, on attractive valuations. The management plans to rebuild the company's original structure, as their current set-up was designed for a cycle of rising interest rates and falling asset prices, which has not materialised.

The Fund disposed of **Delta Electronics Thailand**, tendering shares in response to an offer from its parent company, Delta Electronics. Profits were also taken in **Ramsay Health Care**, to raise cash for higher quality ideas.

Outlook

As recent volatility has demonstrated, the contradictions and instability of a global system piled high with debt means that yet another crushing loss of market confidence would not be so surprising. But, these shocks provide us with good opportunities to recycle capital from our more defensive franchises to the benefit of our overall absolute returns.

Our investment process remains unchanged, however, despite the vagaries of the market. We continue to invest on a company-by-company basis, all the time worrying most about capital preservation and focusing on absolute returns. If we can still do that in a disciplined fashion, our longer-term returns should continue to compound respectably.

Others

As at 30 June 2019, the Sub-Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Asia Opportunities Fund Class I shares, constituting 99.08% of the Sub-Fund's Net Asset Value and at a market value of S\$26,421,021. In addition, the Sub-Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Sub-Fund.

Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

Commission Sharing Arrangement

There were no commission sharing arrangement in place during the period or at the period end 30 June 2019 or at the period end 30 June 2018.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund	Benchmark
	%	%
3-mths	2.4	-0.7
6-mths	9.3	10.0
1-year	5.1	-1.0
3-years	7.9	12.0
5-years	6.9	6.9
10-years	8.1	7.4
Since Inception – 10 October 1984	7.4	n/a
(Calculated since date of first valuation)		

Note: The Sub-Fund invests all or substantially all of its asset in the First State Asian Growth Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the MSCI AC Asia ex Japan Index. It was changed from MSCI All Country Far East ex Japan Index from 2 November 2005 in order to include India in the benchmark to be more consistent with the Sub-Fund's investment scope.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 1 November 2005: MSCI All Country Far East ex Japan Index
- From 2 November 2005: MSCI AC Asia ex Japan Index

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI AC Asia ex-Japan Index increased by 10.7% in US dollar terms in the six months to the end of June 2019. Thailand and Hong Kong outperformed, while South Korea and Malaysia posted more modest returns. On a sector level, Real Estate and Consumer Discretionary gained the most, while Utilities and Materials were weaker.

Performance

Key contributors to performance included **Newcrest Mining**, which strengthened as growing risk aversion and lower interest rates boosted the gold price. **Tata Consultancy Services** outperformed amid a growing transition to digital services. On the negative side, **Dairy Farm International** weakened as its Southeast Asian food business struggled amid increased competition among supermarkets and high operating costs. Naver declined, as losses from Line, its Japan-based mobile messaging unit, hit operating profits.

Transactions

Over the six-month period, significant purchases included **Uni-President China (UPC)**, after valuations fell to an attractive level. Although unlikely to return to its previous high-growth era, margin improvement (from a higher-end product mix) and steady revenue growth could revive the company's prospects. The Fund also bought **CK Asset Holdings**, which operates in Hong Kong and mainland China, on attractive valuations. The Management plans to rebuild the company's original structure, as their current set-up was designed for a cycle of rising interest rates and falling asset prices, which has not materialised.

The Fund disposed of **Delta Electronics Thailand**, tendering shares in response to an offer from its parent company, Delta Electronics. Meanwhile, profits were taken in **Hanssem**.

Outlook

As recent volatility has demonstrated, the contradictions and instability of a global system piled high with debt means that yet another crushing loss of market confidence would not be so surprising. But, these shocks provide us with good opportunities to recycle capital from our more defensive franchises to the benefit of our overall absolute returns.

Our investment process remains unchanged, however, despite the vagaries of the market. We continue to invest on a company-by-company basis, all the time worrying most about capital preservation and focusing on absolute returns. If we can still do that in a disciplined fashion, our longer-term returns should continue to compound respectably.

MANAGER'S REPORT

Asian credit market got off to a flying start rebounding strongly from an oversold position at the end of 2018. The bullish sentiments were largely due to positive development in the trade discussion between US and China along with China's commitment to prop up its slowing economy through various fiscal and liquidity measures. The rally continued all the way till May at which the US-China trade war took a turn for the worse with Trump increasing the tariffs on Chinese exports and issuing an executive order that restricts US companies from doing business with Huawei. Nevertheless, the sell-off was short-lived. Amid the highly uncertain global environment, the Fed and ECB both came out sounding ever more dovish in June, helping spreads to recover strongly. JACI Investment grade index delivered an impressive 7.53% return for this period. Index spread tightened 24 bps to 190bps while 10 year US treasury yield rallied 68 bps to 2.0%. Despite the heightened uncertainty, new issuance market remained buoyant. Year to date issuance at USD 155b is a 54% increase over the same period last year.

Outlook

Financial markets entered the second half of the year on a sanguine beat following the resumption of trade talks between the US and China, coupled with dovish rhetoric from both the Fed and the ECB. While the search for yield in the bond market will likely persist for a while as the lower for longer theme re-emerges, global growth outlook continues to deteriorate. Amongst the world's 16 largest economies, 11 now have a PMI reading of under 50, the largest number since April 2011. With the slowdown in exports, exports oriented countries such as South Korea and Singapore have both lowered their growth forecasts. Even economies with a strong domestic story such as Indonesia and Philippines are facing slower growth too. Just like the developed economies, inflation across Asia remains very benign. This gives Asian central banks the flexibility to cut rates if they need to. In fact Malaysia, India and Philippines have already done so, with South Korea and Indonesia likely to follow suit in the coming months. That said, with fixed income markets delivering extraordinary returns year to date; many of which have exceeded double digits by the half year mark, it pays to be cautious as we navigate the murky path for the rest of the year.

Others

As at 30 June 2019, the Sub-Fund did not hold any bonds or other unit trusts, other than the First State Asian Quality Bond Fund Class I shares (constituting 97.60% of the Sub-Fund's Net Asset Value and at a market value of S\$9,292,601). The Sub-Fund holds forward currency contracts with market value of unrealised gain of S\$7,674 (constituting 0.08% of the Sub-Fund's Net Asset Value) as at end of the period, and realised gain of S\$29,516 for the period. In addition, the Sub-Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings or material information that would adversely impact the valuation of the Sub-Fund.

Financial Derivative Instruments

a. Global Exposure

The global exposure relating to derivative instruments is calculated using the commitment approach which is calculated as the sum of:

- i) the absolute value of the exposure of each individual financial derivative not involved in netting or hedging arrangements;
- ii) the absolute value of the net exposure of each individual financial derivative after netting or hedging arrangements; and
- iii) the sum of the values of cash collateral received pursuant to:
 - (a) the reduction of exposure to counterparties of OTC financial derivatives; and
 - (b) EPM techniques relating to securities lending and repurchase transactions, and that are reinvested.

The global exposure of each Sub-Fund to financial derivatives or embedded financial derivatives will not exceed 100% of that Sub-Fund's net asset value at any time.

b. Collateral

Nil for the period ended 30 June 2019.

c. Securities Lending or Repurchase Transactions

Nil for the period ended 30 June 2019.

Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

Commission Sharing Arrangement

There were no commission sharing arrangement in place during the period or at the period end 30 June 2019 or at the period end 30 June 2018.

Note: The Sub-Fund invests all or substantially all of its assets in the First State Asian Equity Plus Fund, a Dublin-domiciled fund (in relation to the equity portion) and the First State Asian Quality Bond Fund, a Dublin-domiciled fund (in relation to the fixed income portion).

Performance for 1 year and above has been annualised.

The benchmark is calculated by First State Investments comprising 50% MSCI AC Asia Pacific ex Japan Index (Unhedged) and 50% JP Morgan Asia Credit Investment Grade Index (Hedged to SGD). There has been a change in the data source for the JP Morgan Asia Credit Investment Grade Index which was computed internally by the Manager based on the index in USD as the SGD hedged version of the index was not available when the Sub-Fund was launched. With effect from 1 November 2012, the benchmark data for the JP Morgan Asia Credit Investment Grade Index (Hedged to SGD) will be sourced directly from the index compiler JP Morgan.

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI AC Asia Pacific ex-Japan Index increased by 12.3% in US dollar terms in the six months to the end of June 2019. Thailand rose with the election of former junta leader Prayuth Chan-ocha as Prime Minister, after the country's first general election since the 2014 military coup. Australia strengthened on the unexpected re-election of conservative Prime Minister Scott Morrison. On the negative side, Malaysia weakened as the government continued its endeavours to lower the deficit by tightening economic policy. South Korea also fell as currency depreciation led to outflows from overseas investors.

On the Asian fixed income side, Asian credit market got off to a flying start, rebounding strongly from an oversold position at the end of 2018. The bullish sentiments were largely due to positive development in the trade discussion between US and China along with China's commitment to prop up its slowing economy through various fiscal and liquidity measures. The rally continued all the way till May at which the US-China trade war took a turn for the worse with Trump increasing the tariffs on Chinese exports and issuing an executive order that restricts US companies from doing business with Huawei. Nevertheless, the sell-off was short-lived. Amid the highly uncertain global environment, the Fed and ECB both came out sounding ever more dovish in June, helping spreads to recover strongly. JACI Investment grade index delivered an impressive 7.53% return for this period. Index spread tightened 24 bps to 190bps while 10 year US treasury yield rallied 68 bps to 2.0%. Despite the heightened uncertainty, new issuance market remained buoyant. Year to date issuance at USD 155b is a 54% increase over the same period last year.

Outlook

As recent volatility has demonstrated, the contradictions and instability of a global system piled high with debt means that yet another crushing loss of market confidence would not be so surprising. But, these shocks provide us with good opportunities to recycle capital from our more defensive franchises to the benefit of our overall absolute returns.

Central bank balance sheets have swelled, with government paper (bonds) on the asset side, matched by growing cash and bank reserves on the liability side, as funds are injected into the banking system. The price of money goes down and assets generally escalate in a virtuous and seemingly never-ending spiral. Simplistically, free capital broadly erodes returns; and we would argue that overall quality, as well as balance sheets, have become ever more important in our bottom-up assessment of companies.

Our investment process remains unchanged, however, despite the vagaries of the market. We continue to invest on a company-by-company basis, all the time worrying most about capital preservation and focusing on absolute returns. If we can still do that in a disciplined fashion, our longer-term returns should continue to compound respectably.

For Asian fixed income side, financial markets entered the second half of the year on a sanguine beat following the resumption of trade talks between the US and China, coupled with dovish rhetoric from both the Fed and the ECB. While the search for yield in the bond market will likely persist for a while as the lower for longer theme re-emerges, global growth outlook continues to deteriorate. Amongst the world's 16 largest economies, 11 now have a PMI reading of under 50, the largest number since April 2011. With the slowdown in exports, exports oriented countries such as South Korea and Singapore have both lowered their growth forecasts. Even economies with a strong domestic story such as Indonesia and Philippines are facing slower growth too. Just like the developed economies, inflation across Asia remains very benign. This gives Asian central banks the flexibility to cut rates if they need to. In fact Malaysia, India and Philippines have already done so, with South Korea and Indonesia likely to follow suit in the coming months. That said, with fixed income markets delivering extraordinary returns year to date; many of which have exceeded double digits by the half year mark, it pays to be cautious as we navigate the murky path for the rest of the year.

Others

As at 30 June 2019, the Sub-Fund did not hold any bonds or other unit trusts, other than the First State Asian Equity Plus Fund Class I (Dist) Shares (constituting 49.41% of the Sub-Fund's Net Asset Value and at a market value of S\$991,686,096) and First State Asian Quality Bond Fund Class I shares (constituting 49.59% of the Sub-Fund's Net Asset Value and at a market value of S\$995,188,418). The Sub-Fund holds forward currency contracts with market value of unrealised gain of S\$7,419,319 (constituting 0.37% of the Sub-Fund's Net Asset Value) as at end of the period, and realised loss of S\$3,967,092 for the period. In addition, the Sub-Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings or material information that would adversely impact the valuation of the Sub-Fund.

Financial Derivative Instruments

a. Global Exposure

The global exposure relating to derivative instruments is calculated using the commitment approach which is calculated as the sum of:

- i) the absolute value of the exposure of each individual financial derivative not involved in netting or hedging arrangements;
- ii) the absolute value of the net exposure of each individual financial derivative after netting or hedging arrangements; and
- iii) the sum of the values of cash collateral received pursuant to:
 - (a) the reduction of exposure to counterparties of OTC financial derivatives; and
 - (b) EPM techniques relating to securities lending and repurchase transactions, and that are reinvested.

The global exposure of each Sub-Fund to financial derivatives or embedded financial derivatives will not exceed 100% of that Sub-Fund's net asset value at any time.

b. Collateral

Nil for the period ended 30 June 2019.

c. Securities Lending or Repurchase Transactions

Nil for the period ended 30 June 2019.

Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

Commission Sharing Arrangement

There were no commission sharing arrangement in place during the period or at the period end 30 June 2019 or at the period end 30 June 2018.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund	Benchmark
	%	%
3-mths	1.8	0.7
6-mths	9.8	11.5
1-year	3.6	0.3
3-years	12.0	11.8
5-years	9.7	6.2
10-years	10.1	7.6

(Calculated since date of first valuation)		

Note: The Sub-Fund invests all or substantially all of its assets in the First State Asian Equity Plus Fund, a Dublin-domiciled fund.

Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the MSCI AC Asia Pacific ex Japan Index.

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI AC Asia Pacific ex-Japan Index increased by 12.3% in US dollar terms in the six months to the end of June 2019. Australia and Thailand outperformed, while the Malaysia and South Korea were among the weakest. On a sector level, Real Estate and Consumer Discretionary gained the most, while Health Care and Communication Services posted more modest returns.

Performance

Key contributors to performance included **Shanghai International Airport**, as revenue was boosted by strong duty-free sales. **HDFC Bank** reported strong growth in core earnings, as it continued to expand its dominant retail franchise. HDFC Bank has grown at around 22% CAGR for the past four years, well above the industry growth rate, with improved profitability and stable asset quality. On the negative side, **Dairy Farm International** weakened as its Southeast Asian food business struggled amid increased competition among supermarkets and high operating costs. **Baidu** declined on slower growth in its core business and increased competition for advertising expenditure.

Transactions

The Fund invested in Korean cosmetics business, **Amorepacific Corp**, one of Korea's leading cosmetics companies, as it had fallen to attractive valuations – its share price had been penalised due to geopolitical issues and weakening sales from China. Having owned this in the past; it is considered to be a high quality business, with strong brand value and a track record of innovation.

The Fund disposed of **Ambuja Cement**, after disappointing management meetings, poor board appointees, and concern about the number of fatalities in recent years. **Nippon Paint** was also sold, as growth slowed in both Japan and China. In addition, it seemed that the company overpaid for its acquisition of Dulux this year, and overall had become too expensive.

Outlook

As recent volatility has demonstrated, the contradictions and instability of a global system piled high with debt means that yet another crushing loss of market confidence would not be so surprising. But, these shocks provide us with good opportunities to recycle capital from our more defensive franchises to the benefit of our overall absolute returns.

Our investment process remains unchanged, however, despite the vagaries of the market. We continue to invest on a company-by-company basis, all the time worrying most about capital preservation and focusing on absolute returns. If we can still do that in a disciplined fashion, our longer-term returns should continue to compound respectably.

There were no commission sharing arrangement in place during the period or at the period end 30 June 2019 or at the period end 30 June 2018.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund	Benchmark %
	%	
3-mths	3.1	3.7
6-mths	5.9	11.3
1-year	2.6	5.5
3-years	4.6	8.0
5-years	4.6	6.3
10-years	4.8	7.1
Since Inception – 4 January 1999 (Calculated since date of first valuation)	2.4	4.3

Note: The Sub-Fund invests all or substantially all of its assets in the Stewart Investors Worldwide Leaders Sustainability Fund Class I, a Dublin-domiciled fund (in relation to the equity portion) and the First State Global Bond Fund, a Dublin-domiciled fund (in relation to the fixed income portion). Between 18 October 2002 to 23 February 2014, the Underlying Funds were the First State Global Opportunities Fund (in relation to the equity portion) and the First State Global Bond Fund (in relation to the fixed income portion). Due to the revision of investment policy of the Underlying Fund, Stewart Investors Worldwide Leader Fund has been renamed to Stewart Investors Worldwide Leaders Sustainability Fund with effect from 23 January 2019.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is a composite comprising 60% MSCI AC World Index and 40% FTSE World Government Bond Index (Unhedged). It was renamed from 60% MSCI AC World Index and 40% Citigroup World Government Bond Index (Unhedged) with effect from 31 July 2018.

The First State Global Balanced Fund was previously known as the "Fortune Fund" with original inception date of 13 March 1995. With the liberalisation of the CPF investment guidelines in 1998, and our communication to all unitholders, the "Fortune Fund" changed its investment objective and strategy from an Asia-focused strategy to a global balanced strategy with effect from 4 January 1999.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 31 December 2001: 50% MSCI World Index and 50% Citigroup World Government Bond Index (Unhedged)
- From 1 January 2002 to 23 February 2014: Composite comprising 60% MSCI World Index and 40% Citigroup World Government Bond Index (Unhedged)
- From 24 February 2014: Composite comprising 60% MSCI AC World Index and 40% Citigroup World Government Bond Index (Unhedged)
- From 31 July 2018: Composite comprising 60% MSCI AC World Index and 40% FTSE World Government Bond Index (Unhedged)

^{*} Source: Lipper, First State Investments, No initial charges with income reinvested in Singapore dollars,

MANAGER'S REPORT

Global equity markets rose in US dollar terms over the first half of 2019.

The US bond market finished the six month period very strongly. The US ten-year Treasury yield peaked in November 2018 at 3.23% and finished June barely above 2.00%. Unsurprisingly, in Europe and the UK, bond yields followed the lead of the US with ten-year yields of all major economies heading lower. German bunds started the year only modestly positive at 0.24% and rallied consistently through the period to finish deeply negative at -0.32%.

Outlook

For equity markets, we continue to face record low rates of interest, rising corporate leverage and financial engineering, mediocre growth, uncertain political environments and expensive valuations. Many of our favourite quality companies continue to be fully priced in this context. We continue to guard against going down the quality curve in search of ostensibly cheaper valuations.

For bond markets, Federal Reserve Board members appear determined to sustain the ongoing economic expansion in the US. Investors have become increasingly sure that interest rates will be lowered to support activity levels in the economy. By the end of June, an 85% probability of a 0.25% rate cut in July had been priced into markets. Inflation in the US remains well below the Federal Reserve's 2.0% target, which prompted one Committee member to vote for a rate cut at June's meeting.

The UK's new Prime Minister faces a challenging period once appointed in late July. The new leader must address a worrying economic slowdown and seek to negotiate a revised Brexit deal before the revised deadline of 31 October 2019.

The bond market continues to point to inflation not meeting expectations, a slowing global economy and poor sentiment compounded by the trade war. We continue to expect to see yields edge lower as the outlook for the economy remains uncertain.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund	Benchmark
	%	%
3-mths	4.6	4.4
6-mths	17.0	17.6
1-year	11.2	15.5
3-years	7.9	10.3
5-years	7.4	9.1
10-years	8.8	10.1
Since Inception – 3 March 2008	4.7	5.3
(Calculated since date of first valuation)		

Note: The Sub-Fund invests all or substantially all of its assets in Class A shares of the First State Global Listed Infrastructure Fund (a sub-fund of the England and Wales domiciled umbrella fund known as First State Investments ICVC).

Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the FTSE Global Core Infrastructure 50-50 Index. It was changed from UBS Global Infrastructure and Utilities 50-50 Index with effect from 1 April 2015 as the new benchmark is more representative of the Sub-Fund.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 31 May 2008: S&P Global Infrastructure Index
- From 1 June 2008 to 31 March 2015: UBS Global Infrastructure and Utilities 50-50 Index
- From 1 April 2015: FTSE Global Core Infrastructure 50-50 Index

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

Global Listed Infrastructure delivered strong positive returns during the first half of 2019, supported by robust earnings numbers, increasingly dovish central bank rhetoric and falling bond yields.

Performance

The First State Global Listed Infrastructure Fund is actively managed, and integrates the assessment of material Environmental, Social and Governance factors into its investment process. The largest positive contributor to Fund performance was **TC Energy** (Canada: Pipelines). The company rallied on better than expected March quarter earnings; and reports that it was seeking to sell midstream assets to fund new, higher growth projects. **Transurban** (Australia: Toll Roads) pushed higher, supported by a healthy earnings growth outlook and lower interest rates. **Kinder Morgan** (US: Pipelines) gained as the company's corporate credit rating was upgraded by S&P, who cited a "continued focus on strengthening its balance sheet".

The largest detractor from Fund performance was **PG&E** (US: Electric Utilities) which declared bankruptcy following a series of wildfires in its service territory. **CenterPoint Energy** (US: Multi-Utilities) lagged after March quarter earnings disappointed, owing to lower earnings from its small Energy Services business segment. **Tokyo Gas** (Japan: Gas Utilities) underperformed on lingering concerns that mounting competitive pressure could weigh on medium term earnings growth.

Transactions

A position was initiated in **ENN Energy** (China: Gas Utilities) which is well positioned to benefit from the strong growth trajectory of the Chinese gas distribution market, which is being driven by a national clean energy drive and growing market penetration. The Fund also added **Magellan Midstream Partners** (US: Pipelines) after a period of underperformance relative to peers moved the stock higher within the value/quality rankings of our investment process.

PG&E (US: Electric Utilities) was sold from the portfolio. The stock faces high volatility as it works through bankruptcy and litigation proceedings, presenting a risk / return profile inconsistent with our clients' expectations. **Southern Company** (US: Electric Utilities) was sold as the market became more comfortable with the execution risks involved in the construction of the Vogtle power plant in Georgia, and the company's mispricing reduced.

Outlook

The Fund invests in a range of global listed infrastructure assets including toll roads, airports, ports, railroads, utilities, pipelines and mobile towers. These sectors share common characteristics, like barriers to entry and pricing power that can provide investors with inflation-protected income and strong capital growth over the medium term.

The Fund is positioned with toll roads as its largest sector overweight. We are attracted to their reasonable valuation multiples and well-supported mid-single digit dividend yields. Growing urbanisation and worsening traffic congestion are likely to underpin long term demand. The Fund is underweight multi/electric utilities. A number of high quality US names continue to trade at valuations that we find difficult to justify based on company fundamentals.

(Calculated since date of first valuation)		

Note: With effect from 17 January 2014, the Sub-Fund was converted to a feeder fund and invests all or substantially all of its asset in the First State Global Property Securities Fund (a Dublin-domiciled fund).

The performance prior to 17 January 2014 is in relation to the First State Global Property Investment Class A (Distribution) before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

First State Global Property Investment Class A (Accumulation) was incepted on 14 September 2015.

The benchmark of the Sub-Fund is the FTSE EPRA/Nareit Developed Index. It was renamed from FTSE EPRA/NAREIT Developed Index with effect from 3 September 2018.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 29 February 2008: Citigroup BMI World Property Index
- From 1 March 2008 to 16 January 2014: UBS Global Real Estate Investors Index
- From 17 January 2014: FTSE EPRA/NAREIT Developed Index
- From 03 September 2018: FTSE EPRA Nareit Developed Index

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The FTSE EPRA/NAREIT Developed Index (USD) rose 14.5% in 1H19, marginally underperforming the broader equity market.

Global REITs were propelled by falling treasury yields during the half, as central banks turned increasingly dovish. Trade tensions, political uncertainty and fears around slowing economic growth remain key concerns for global listed property markets.

Performance

The largest positive contributors to performance were overweight holdings in US single-family rental home REIT, **Invitation Homes** and Finnish urban-housing REIT, **Kojamo**. During the half, Invitation Homes delivered a strong Q1 result, which exceeded expectations and resulted in the REIT raising its FY19 operating outlook. Kojamo reported strong Q1 results, while also raising its FFO guidance for FY2019.

The largest detractors from the Fund's performance were overweight positions in German residential REIT, **ADO Properties** and Australian retail REIT, **Vicinity Centres**. The German residential market recently experienced a major correction as the Berlin Senate introduced a proposal to freeze residential rents, causing ADO Properties to underperform significantly. Vicinity Centres has been impacted by the challenging vendor market for retail assets, which is contributing to subdued earnings.

Transactions

The Fund established a position in **Mid-America Apartment Communities**, a Class B+ multifamily REIT, given it's improved near term growth trajectory and discounted valuation relative to comparable peers. A position was also initiated in **HCP Inc.**, a US diversified healthcare REIT, which has 31% exposure to senior housing, 32% exposure to medical offices, 24% position to life science and 5% exposure to hospitals

The Fund exited from its position in **Simon Property Group**, given the ongoing challenges and headwinds faced by traditional brick and mortar retailers, which were highlighted in the company's underwhelming Q1 results, which also outlined a tepid outlook for the remainder of 2019. The Fund also reduced its exposure to **Equity Residential**, following the US apartment REIT's strong share price performance, coupled with its premium valuation.

Outlook

The Fund continues to be constructive on US REITs given modest US economic growth and attractive interest rates. Major sector exposures include apartments, single-family rentals, industrial/logistics, healthcare, student housing and self-storage.

In Europe, the Fund is positioned primarily in shopping centres across Europe as well as French and German offices. In the UK, the outlook for the UK remains highly dependent on the outcome of Brexit; the Fund's UK exposure remains in the relatively insulated student accommodation sector, as well as in the industrial and retail sectors

Within Asia, the strategy is to have a balanced portfolio with exposure to both quality defensive names and stocks with strong growth potential in the region.

3-years	16.0	14.1
5-years	9.2	9.0
10-years	9.4	7.5
Since Inception – 1 November 1993 (Calculated since date of first valuation)	8.5	4.6

Note: The Sub-Fund invests all or substantially all of its assets in the First State Greater China Growth Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the MSCI Golden Dragon Index. It was changed from CLSA China World Index and CLSA China B Index with effect from 2 January 2001 as the previous benchmark was not reflective of the Sub-Fund's investment scope. It did not have any weighting in Taiwan.

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI Golden Dragon Index rose by 13.0% in US dollar terms over the period. Hong Kong was the best performer, up 16.8% over the period, followed by China, which increased by 13.1%, and Taiwan, which rose 10.2%.

Performance

On portfolio holdings, **AIA Group** strengthened on the news that China's foreign ownership limits on domestic insurance ventures are to be lifted in 2020, a year earlier than anticipated. **Shanghai International Airport** increased, as revenue was boosted by strong duty-free sales. On the negative side, **Baidu** declined on slower growth in its core business and increased competition for advertising expenditure. **Dairy Farm International** weakened, as its Southeast Asian food business struggled amid increased competition among supermarkets and high operating costs.

Transactions

The Fund initiated a position in **Zhejiang Chint**, one of the leading low voltage electrical equipment (LVEE) manufacturers in China. The company has a stable business and a dominant market share in the low to medium end of the market, with superior profitability and operational efficiency due to economies of scale. Another purchase was **Accton Technology**, a Taiwanese manufacturer of high-speed switches used in networking and communications systems. The company is well-positioned to benefit from the long-term trend of increased connectivity, cloud computing and the 'Internet of Things'.

The Fund exited **E.Sun Financial** on valuation concerns. Profits were taken in **Haier Smart Home** to fund other ideas.

Outlook

We cannot predict which side will triumph in the trade war, or how long negotiations will continue; but, having invested in China equities over numerous cycles and market scares, we believe that our bottom-up stock selection and focus on quality should continue to deliver positive returns over the long term. While our portfolios have not been immune to market volatility, the companies we own have tended to preserve capital better during downturns.

On a longer-term basis, we believe that the trade war will have limited impact on our portfolios, as many of the businesses we own have proven that they are able to develop new capabilities, innovate and remain competitive in response to challenging headwinds. Meanwhile, China's growth story remains intact and the structural trends of consumption upgrading and healthcare spending should persist as incomes continue to rise.

As at 30 June 2019, the Sub-Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Greater China Growth Fund Class I shares, constituting 99.55% of the Sub-Fund's Net Asset Value and at a market value of S\$481,133,632. In addition, the Sub-Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Sub-Fund.

Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

Commission Sharing Arrangement

There were no commission sharing arrangement in place during the period or at the period end 30 June 2019 or at the period end 30 June 2018.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund %	Benchmark %
3-mths	-0.1	0.4
6-mths	1.7	6.9
1-year	-2.7	7.1
3-years	8.7	10.7
5-years	12.5	7.2
10-years	13.4	5.8
Since Inception – 22 August 1994 (Calculated since date of first valuation)	9.1	6.7

Due to the increase in the investment management fee of the Underlying Sub-Fund, the annual management fee for units of the Regional India Fund will also increase from 1.50% to 1.75% effective from 1 July 2016.

With effect from 1 April 2016, the Sub-Fund is open for subscriptions again.

Note: The Sub-Fund invests all or substantially all of its assets in the First State Indian Subcontinent Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the MSCI India Index.

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI India Index increased by 7.7% in US dollar terms over the six months to 30 June 2019, amid a general improvement in global market sentiment and positive developments in the trade dispute between the US and China. The first half of 2019 saw uncertainty ahead of May's general election, which eventually saw Narendra Modi's Bharatiya Janata Party re-elected for a second five-year term. The result sparked optimism that further economic reform could be on the horizon, and markets responded favourably. Towards the end of the period, investors once again became cautious on the economy, as political dust began to settle and attention shifted to the forthcoming Union Budget.

Performance

Key contributors to performance included **HDFC Bank**, which reported strong growth in core earnings, as it continued to expand its dominant retail franchise. HDFC Bank has grown at around 22% CAGR for the past four years, well above the industry growth rate, with improved profitability and stable asset quality. **Bharti Airtel** added to performance, as its strategy of cutting costs, managing debt sensibly and building content partnerships has started to show in improved numbers. On the negative side, **Jyothy Laboratories** fell, due to disappointing sales and higher costs, combined with increased competition. **Godrej Consumer Products** fell, as unorganised players gained market share in household insecticides by using illegal ingredients in popular incense sticks.

Transactions

Significant new positions over the period included **ICICI Bank**, a leading private bank in India with a solid retail presence and strong deposit franchise. The bank has a promising new CEO, Sandeep Bakshi, whose strategy is retail-led, countercyclical and returns-focused. The Fund bought diagnostics chain, **Metropolis Healthcare**, at its IPO. Metropolis has built a strong position in an attractive industry and is now the second-largest organised sector operator. Since most of the industry currently is unorganised, there is shift towards better-quality organised diagnostics chains, which implies steady growth potential for Metropolis over the medium term.

The Fund disposed of **Housing Development Finance** and reinvested the capital into the portfolio's banks, which have better prospects over the longer term. Another sale was **Shopper's Stop**, on high valuations and fading conviction.

Outlook

After Mr Modi's resounding win at the election ballots, it is 'business as usual' in India. Regardless, we strongly believe that election results – whatever the outcome – should have little bearing on the long-term investment case for Indian equities. We do not invest in companies whose prospects are affected by political change, nor industries which are highly regulated or prone to political interference.

Our focus is on identifying strong business franchises run by honest and competent managers, in under-penetrated industries. These companies should prosper irrespective of which political party is in power. Given the large universe of high quality companies operating in under-penetrated industries in India and the consistency of reform across governments, we believe returns from Indian equities should remain attractive over the long term.

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund	Benchmark
	%	%
3-mths	2.1	4.6
6-mths	6.5	7.9
1-year	1.7	3.9
3-years	6.0	7.4
5-years	2.1	1.4
10-years	9.2	6.0
Since Inception – 28 July 1969	8.3	2.6
(Calculated since date of first valuation)		

Note: The Sub-Fund invests all or substantially all of its assets in the First State Singapore and Malaysia Growth Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the market capitalisation weighted of MSCI Singapore Index and MSCI Malaysia Index. It was changed from DBS 50 Index and KLCI with effect from 1 December 2001 due to the discontinuation of the DBS 50 Index.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 30 November 2001: DBS 50 Index and KLCI
- From 1 December 2001: Market cap weighted of MSCI Singapore Index and MSCI Malaysia Index

^{*} Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

The MSCI Singapore and Malaysia Index increased by 8.7% over the six months to the end of June.

Performance

On portfolio holdings, **Haw Par** continued to do well on sales of both classic Tiger Balm and its various new products, which include medicated plasters, active sports gels, mosquito repellents and a junior range. **DBS Group** outperformed on expectations of improving margins and a robust profit outlook for 2019. On the negative side, **Dairy Farm International** weakened as its Southeast Asian food business struggled amid increased competition among supermarkets and high operating costs. **Jardine Matheson** fell, largely due to weaknesses at subsidiaries, Hongkong Land and Dairy Farm International.

Transactions

The Fund initiated a position in **Venture Corp**, which had launched several innovative devices in recent years, including genome sequencing machines and next-generation consumer devices. Recent results suggested that it could be returning to growth, after falling significantly last year. Another addition was **Ace Hardware**, a hardware/homeware retailer that has been growing strongly. The company believes it can double in scale over the next decade, as hardware seems less susceptible to the onslaught of ecommerce.

The Fund divested **Delta Electronics Thailand**, tendering shares in response to an offer from its parent company, Delta Electronics. **Kasikornbank** was also sold after a disappointing meeting with management. Fee income continues to decline; and it may be difficult to improve return on assets, given the weak macro.

Outlook

As Singapore's economic growth is largely dependent on external factors, slowing global growth and weakening demand would imply a challenging environment for equities in the year ahead. As such, we maintain our cautious approach and remain resolutely-focused on quality (of management, franchise and financials), which has helped our Asian portfolios remain relatively defensive amidst the market volatility. While we understand that such periods are worrying for clients, they provide us with opportunities to top up our holdings and buy into quality companies at cheaper prices – thus contributing to better long-term absolute returns.

Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the MSCI Emerging Markets Index.

^{*} Source: Lipper, Stewart Investors. No initial charges with income reinvested in Singapore dollars.

Semi-Annual Report for the period from 1 January to 30 June 2019 Stewart Investors Global Emerging Markets Leaders Fund

MANAGER'S REPORT

The MSCI Emerging Market Index rose by 10.7% in sterling terms over the six months to 30 June 2019. Egypt and Argentina were among the best performing markets, while Pakistan and Mexico posted more modest returns. On a sector basis, Consumer Discretionary and Information Technology outperformed, while Health Care and Industrials were weaker.

Performance

Key contributors to performance included **MercadoLibre**, which outperformed on solid earnings results, with particularly strong growth in its payments business. In mid-2015, the company started to distribute mobile point-of-sale devices to small, micro businesses and independent professionals (such as Uber drivers) which has shown huge potential for growth. **HDFC Bank** reported strong growth in core earnings, as it continued to expand its dominant retail franchise. HDFC Bank has grown at around 22% CAGR for the past four years, well above the industry growth rate, with improved profitability and stable asset quality. On the negative side, **Alsea**, the franchise operator of restaurant chains such as Starbucks and Domino's Pizza in Mexico and South America, declined on weaker than expected earnings. Although group sales were in line with estimates, its South American business was penalised by the depreciation of the Argentine peso. **PriceSmart** lagged, on account of an outstanding class action lawsuit and a change in their long-standing CEO.

Transactions

Significant purchases over the period included **Godrej Consumer Products**, a leading Indian FMCG company with a growing business in Africa. The Fund invested in **Tsingtao Brewery** on attractive valuations. The company has a strong brand franchise, a solid balance sheet and generates high levels of free cash flow. Shareholder reforms and the potential introduction of management incentives add to the company's long-term investment case.

The Fund divested **Natura Cosmeticos** on valuation concerns; and sold **Grupo Supervielle** in favour of Grupo Financiero Galicia, which seems the stronger franchise between the two.

Outlook

As recent volatility has demonstrated, the instability of a global system piled high with debt means that yet another crushing loss of market confidence would not be so surprising. But, these shocks provide us with good opportunities to recycle capital from our more defensive franchises to the benefit of our overall absolute returns.

Our investment process remains unchanged, however, despite the vagaries of the market. We continue to invest on a company-by-company basis, all the time worrying most about capital preservation and focusing on absolute returns. If we can still do that in a disciplined fashion, our longer-term returns should continue to compound respectably.

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

Commission Sharing Arrangement

There were no commission sharing arrangement in place during the period or at the period end 30 June 2019 or at the period end 30 June 2018.

(formerly known as Stewart Investors Worldwide Leaders Fund)

MANAGER'S REPORT for the period from 1 January to 30 June 2019

Historical performance*

in Singapore dollars

	Sub-Fund	Benchmark %
	%	
3-mths	3.1	3.7
6-mths	7.0	15.7
1-year	1.7	5.5
3-years	7.5	12.4
5-years	6.8	8.5
10-years	8.1	10.4
Since Inception – 24 August 1998	2.9	4.5
(Calculated since date of first valuation)		

Note: The Sub-Fund invests all or substantially all of its assets in the Stewart Investors Worldwide Leaders Sustainability Fund, a Dublin-domiciled fund. Due to the revision of investment policy of the Underlying Fund, Stewart Investors Worldwide Leader Fund has been renamed to Stewart Investors Worldwide Leaders Sustainability Fund with effect from 23 January 2019.

The performance prior to 18 October 2002 is in relation to the Sub-Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Sub-Fund is the MSCI AC World Index. With effect from 24 February 2014, the benchmark was changed from MSCI World Index due to the change to the investment policy and approach of the underlying fund.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 23 February 2014: MSCI World Index
- From 24 February 2014: MSCI AC World Index

^{*} Source: Lipper, Stewart Investors. No initial charges with income reinvested in Singapore dollars.

MANAGER'S REPORT

We are long-term investors and seek to invest in high quality companies that contribute to and benefit from sustainable development. We strive to deliver risk-adjusted absolute returns in the long-term and view risk as the risk of a permanent loss of capital rather than deviation from any benchmark.

Performance

The fund has provided a positive return over 3, 5 and 10 years. It also provided a positive return over the six months to 30 June 2019. The fund's long-term performance has been satisfactory in the context of expensive valuations of our favourite quality companies, historically low rates of interest and slowing global growth. Our funds usually lag fast-rising markets while we would hope to protect capital on the downside.

Transactions

Major purchases over the period included **A.O. Smith** (US: Industrials), a family-owned company which makes highend, energy efficient water heaters and purifiers, and **Packaging Corporation of America** (US: Materials), a significant player in containerboard and corrugated products. We also bought **Schindler Holding** (Switzerland: Industrials), a 145-year old family-owned elevator and escalator business headquartered in Switzerland.

We completely sold out of **Intel** (US: Information Technology), **Wabtec** (US: Industrials) and **Berkshire Hathaway** (US: Financials) during this period. Our conviction in the stewardship at Intel was dented by the response of the management and board around quality issues in their chips. The risk/reward payoff at Wabtec became unfavourable after the merger with GE Transportation, especially as it comes along with senior management changes as well as substantial debt. We also sold Berkshire Hathaway because their portfolio of assets continues to face rising sustainability headwinds and we lacked conviction in long-term management succession.

Outlook

We continue to face record low rates of interest, rising corporate leverage and financial engineering, mediocre growth, uncertain political environments and expensive valuations. Many of our favourite quality companies continue to be fully priced in this context. Such conditions have led us to hold high cash positions over the last few years in our funds. We continue to guard against going down the quality curve in search of ostensibly cheaper valuations.

The expense ratios have been computed based on the guidelines laid down by the Investment Management Association of Singapore ("IMAS"). This is the sum of the Sub-Funds' expense ratio and the weighted average of the underlying funds' unaudited expense ratio.

The calculation of the Sub-Funds' expense ratios at financial period end was based on total operating expenses divided by the average net asset value respectively for the year. The total operating expenses do not include (where applicable) brokerage and other transaction costs, performance fee, interest expense, distribution paid out to unitholders, foreign exchange gains/losses, front or back end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. The Sub-Funds do not pay any performance fee. The average net asset value is based on the daily balances.

The unaudited expense ratio of the Underlying Funds are obtained from the Underlying Funds' Manager.

Total operating expenses, average net asset value and weighted average of the underlying Funds' unaudited expense ratio are as below:

	First State Asia Opportunities Fund			
	Class A - Accumulation		Class B - Acc	cumulation
