BNY MELLON
INVESTMENT MANAGEMENT

BNY MELLON REAL RETURN FUND

INSTITUTIONAL SHARES W (INCOME) (ISIN: GB00B7W36529)

A SUB-FUND OF BNY MELLON INVESTMENT FUNDS

THIS FUND IS MANAGED BY BNY MELLON FUND MANAGERS LIMITED

OBJECTIVES AND INVESTMENT POLICY

OBJECTIVE

To achieve a rate of return in sterling terms that is equal to or above a minimum return from cash (1 month GBP LIBOR) + 4% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, capital is in fact at risk and there is no guarantee that this will be achieved over that, or any, time period.

POLICY

The Fund will:

- invest anywhere in the world;
- follow a broad 'multi-asset' portfolio approach (e.g. company shares (i.e. equities) and similar investments, bonds and similar debt investments and cash);
- invest in bonds, issued by governments and companies, with high and low credit ratings (i.e. investment grade and/or sub-investment grade bonds as rated by Standard and Poor's or similar agencies);
- gain exposure to currencies, commodities (e.g. gold, agriculture) and property through stock exchange listed investments and/or derivatives;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income;

- limit investment in other collective investment schemes to 10%; and
- be actively managed, which means the investment manager has discretion to invest in the investments described in the investment policy as disclosed in the Prospectus. 1 month GBP LIBOR + 4% per annum over five years before fees is used as a target against which to measure the performance of the Fund. The ACD believes in typical market conditions that it represents a target that will be equal to or greater than UK inflation rates over the same period and is commensurate with the Investment Manager's approach.

The Fund may:

- invest in emerging markets;
- invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body; and
- invest significantly in cash and cash-like investments.

Treatment of income: income from investments will be paid to shareholders semi-annually on or before 30 September and 28 February.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each working day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 10,000,000.

RISK AND REWARD PROFILE

Lower risk Potentially lower reward Higher risk Potentially higher reward

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 3 because its historical value has shown moderately low volatility. With a Fund of category 3, you have a moderately low risk of losing money but your chance for gains is also moderately low.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate.

When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Liquidity Risk:** The Fund may not always find another party willing to purchase an asset that the Fund wants to sell which could impact the Fund's ability to sell the asset or to sell the asset at its current value.
- **Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- **Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") risk:** The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

CHARGES

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.
