

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ROSENBERG EQUITIES

AXA Rosenberg All Country Asia Pacific Ex-Japan Equity Alpha Fund

A Sub-Fund of AXA Rosenberg Equity Alpha Trust

Unit: AXA Rosenberg All Country Asia Pacific Ex-Japan Equity Alpha Fund A Capitalisation EUR (ISIN: IE00BD007M18)

This Sub-Fund is managed by AXA Rosenberg Management Ireland Limited, part of the AXA Group

Objective and Investment Policy

Investment Objective

The aim of the Sub-Fund is to provide long-term capital growth above that of the MSCI AC Asia Pacific Ex-Japan Index on a rolling three year basis.

The MSCI AC Asia Pacific Ex-Japan Index is designed to measure the performance of shares of companies listed on stock exchanges in the Asia Pacific region (excluding Japan). The index's composition is available on www.msci.com.

Investment Policy

The Sub-Fund invests primarily in shares of companies listed on stock exchanges in the Asia Pacific region (excluding Japan). The fund manager uses a proprietary systematic stock selection model to identify companies that it believes to be attractive investment opportunities, relative to their industry peers, based on analysis of their valuation and earnings prospects. In constructing the Fund's portfolio, the fund manager references the index which means that, while the fund manager has discretion to select the investments for the fund, the fund's divergence from the index is controlled. The Sub-Fund may use derivatives (financial instruments that derive their value from the value of other assets) in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income (known as Efficient Portfolio Management - EPM). The fund manager may also lend shares held by the Sub-Fund to third parties to generate additional income for the Sub-Fund. Please note that an investment in this Sub-Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within three years.

Income

Net income earned by the Sub-Fund is accumulated and reinvested on behalf of the Unitholders holding accumulation type unit classes.

Net income earned by the Sub-Fund may be declared and paid out to Unitholders holding distributing type unit classes, in line with the distribution policy set-out in the Prospectus.

Sub-Fund Currency

The reference currency of the Sub-Fund is USD.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent, no later than 1 p.m. Irish time one business day before the relevant Dealing (business) Day. Orders will be processed at the Net Asset Value calculated for that Dealing Day.

Please note that there may be additional processing time if your order is placed via intermediaries such as platforms, financial advisors or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Minimum initial investment: EUR 100,000

Minimum subsequent investment: EUR 5,000

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

Additional Risks

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives) with the Sub-Fund to meet its obligations may adversely affect the value of the fund. The Sub-Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Sub-Fund.

Derivatives: derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Sub-Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

Emerging market Risks: emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. As a result, investments in such countries may cause greater fluctuations in the Sub-Fund's value than investments in more developed countries. In addition the reliability of trading, settlement and custody systems in some emerging market countries may not be equal to more developed countries and result in greater operational and liquidity risk.

Operational Risk: the Sub-Fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of the Sub-Fund's assets.

Risk linked to Method and Model: attention is drawn to the fact that the Sub-Fund's strategy is based on the utilisation of a proprietary share selection model. The effectiveness of the model is not guaranteed and the utilisation of the model may not result in the investment objective being met.

Stock Lending: the Sub-Fund may enter into securities lending agreements and as a result be subject to increased counterparty risk. Should the counterparty fail financially, the securities received will be called upon. However in the event of significant market volatility at the time of default the value of those securities received could fall below the value of the lent securities. In this instance the manager would not have sufficient cash to purchase the equivalent value of securities lent out which could result in a significant negative impact on the Sub-Fund's value.

Further explanation of the risks associated with an investment in this Sub-Fund can be found in the prospectus.

ROSENBERG EQUITIES

AXA Rosenberg All Country Asia Pacific Ex-Japan Equity Alpha Fund

Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	0.97%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fees	none
------------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

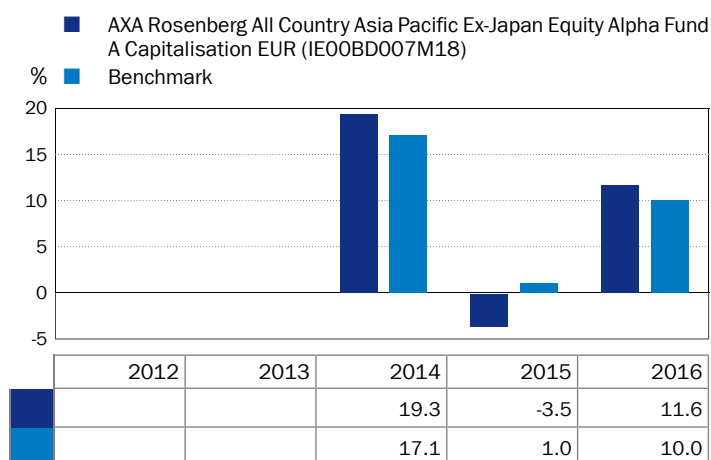

The ongoing charges figure is based on expenses for the twelve month period ending April 2017.

This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking

For more information about charges, please refer to the Charges section of the prospectus which is available at www.axa-im-international.com.

Past Performance

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Sub-Fund was launched on 28/02/2005 and the unit in 2013.

Past performance has been calculated in EUR and is expressed as a percentage change of the Sub-Fund's Net Asset Value at each year end.
