Fund manager's report

- Asia Pacific equities retreated in September as fresh Covid-19 outbreaks in Europe and parts of Asia dampened hopes of a faster global recovery. Meanwhile, geopolitical tensions ratcheted higher, with relations between China and Australia, India and the US worsening.
- The US-China tech spat escalated, with internet giant Tencent remaining in the US crosshairs. Although a US court blocked a ban on its WeChat app, regulators are scrutinising its video-game investments on the grounds of data security.
- In Australia, Rio Tinto's CEO and two senior executives resigned over the mining giant's destruction of sacred Aboriginal sites. This came after investors said the board's earlier decision to cut their short-term bonuses was inadequate. It also followed our call with the chairman on the board review, which we found lacking in accountability details. That marked our third engagement with the group on this issue.
- In portfolio activity, we introduced Samsung Biologics, the world's largest biopharmaceutical contract manufacturer, a high-quality business in a fast-growing sector. Though it entered the industry just eight years ago, it now matches leading players in scale and technological know-how, with a clear cost advantage.

The CPF interest rate for the Ordinary Account ('OA') is based on the legislated minimum interest of 2.5% per annum, or the 3-month average of major local banks' interest rates, whichever is higher. In addition, the CPF Board pays an extra interest rate of 1% per annum on the first \$60,000 of a CPF member's combined balances (with up to \$20,000 in the OA). CPF members aged 55 and above will also earn an additional 1% extra interest on the first \$30,000 of their combined balances (with up to \$20,000 in the OA). This is paid over and above the current extra 1% interest that is earned on the first \$60,000 of their combined balance. The first \$20,000 in the OA will not be allowed to be invested under the CPF Investment Scheme.
