Aberdeen Standard SICAV I - China A Share Equity Fund

Important information

Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
- The Sub-Fund's exposure to a single country market, which may be subject to particular political and economic risks, may cause the sub-fund to be more volatile than more broadly diversified funds.
- The Fund may invest directly or indirectly in Chinese domestic securities markets via various channels, including the Shanghai-Hong Kong Stock Connect programme or through any similar acceptable securities trading and clearing linked in relation to which the Fund may suffer difficulties or delays in proving it owns the China shares or enforcing its rights given that the legal and regulatory rules in each of Shanghai and Hong Kong are very different. Use of these channels therefore bring additional risks as further described in the Fund's Prospectus under "Investing in China".
- The Fund may invest all its assets in securities in Mainland China. In such circumstances all the assets of the Fund may be maintained by the PRC Custodian.
- The Fund may invest in companies through a domestic legal structure (i.e. Variable Interest Entity or "VIE"), in order to gain access to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- Investors are reminded that there is no segregation of liability between Share Classes in the same Fund, so there is a remote risk that under certain circumstances, other Share Class holders of the same Fund will be exposed to liabilities arising from currency exposure transactions undertaken for a Base Currency Exposure Share Class which negatively impacts the Net Asset Value of these other Share Classes. Base Currency Exposure Share Classes contain additional risks which are set out in this Prospectus under the "General Risk Factors" heading.
