The Running Yield reflects the income related to the Coupons of the instruments held in the portfolio as a percentage of their market value. The figure shown is a market value weighted average for the whole portfolio. It does not include any preliminary charge and investors may be subject to tax on distributions.

Investment Objective and Policy

The fund aims to provide capital growth and income by investing in bonds denominated in Euro issued by companies worldwide. The fund invests at least two-thirds of its assets in bonds denominated in euro by governments, government agencies, supra-nationals and companies worldwide. The fund may invest up to 30% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds); up to 20% of its assets in sovereign government bonds; up to 20% of its assets in asset-backed securities and mortgage-backed securities; and up to 20% exposure to of its assets in convertible bonds (including up to 10% of its assets in contingent convertible bonds. The fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may also hold cash.

Performance Analysis

Performance (%)	1 month	3 months	6 months	YTD	1 year	3 years	5 years	10 years
Fund	-0,6	-0,1	-0,1	-0,3	2,9	13,3	27,1	75,0
Benchmark	-0,0	0,4	0,3	0,5	2,7	9,8	20,3	59,5

Annual Performance (%)	2017	2016	2015	2014	2013
Fund	6,5	7,2	1,0	8,9	4,1
Benchmark	4,1	5,8	-0,1	8,3	2,4

Performance over 5 years (%)

The return received may rise or fall as a result of currency fluctuations.

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

The fund is managed with reference to a benchmark and its performance may be measured accordingly, but the manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable.

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. In January 2007 the ICE Bank of America Merrill Lynch Euro Corporate Bond Index replaced the Barclays Euro Aggregate Credit Index. The full track record of the previous index has been kept and chain linked to the new one. The fund currency may differ from that of your country of residence and the analysis of performance can differ when expressed in different currencies. For an explanation of the financial terms included in this factsheet visit www.schroders.co.uk/glossary.

* The index has been hedged by Schroders to reflect the currency of the share class.

Schroder International Selection Fund EURO Corporate Bond

Risk Considerations

- **ABS and MBS risk:** Mortgage or asset-backed securities may not receive in full the amounts owed to them by underlying borrowers.
- **Capital risk / contingent convertible bonds:** The fund may be significantly invested in contingent convertible bonds. If the financial strength of a bond's issuer (typically a bank or an insurance firm) falls in a prescribed way the bond may suffer substantial or total losses of capital.
- **Capital risk / distribution policy:** Because the fund intends to pay dividends regardless of its performance, a dividend may include a return of part of your original investment.
- **Capital risk / negative yields:** When interest rates are very low or negative, the fund's yield may be zero or negative, and you may not get back all of your investment.
- **Counterparty risk:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.
- **Counterparty risk / money market & deposit:** A failure of a deposit institution or an issuer of a money market instrument could create losses.
- **Credit risk:** A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.
- **Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.
- **Derivatives risk:** A derivative may not perform as expected, and may create losses greater than the cost of the derivative.
- **High yield bond risk:** High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.
- **Interest rate risk:** A rise in interest rates generally causes bond prices to fall.
- **Leverage risk:** The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.
- **Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.
- **Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.
- **Capital risk / distribution policy:** the expenses of this share class are paid out of capital rather than out of investment income. Capital growth will be reduced and in periods of low growth capital erosion may occur.
- **Currency risk / hedged share class:** Changes in exchange rates will affect the returns on your investment. The aim of this hedged share class is to provide you with the performance returns of the fund's investments by reducing the effects of exchange rate fluctuations between this currency and the fund's base currency.

Holdings Analysis

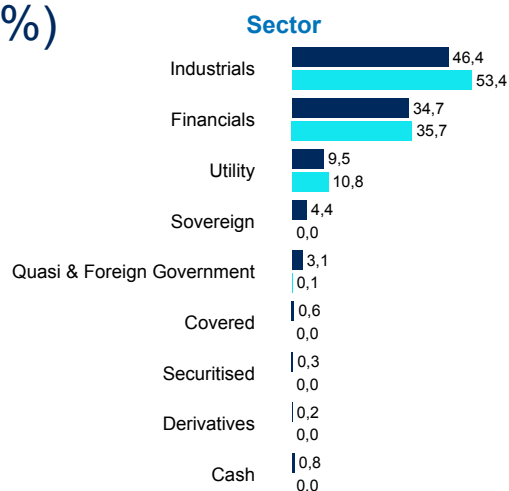

The holdings have been aggregated by name.

Top 10 Holdings	Sector	% NAV
1. Germany Government Bond	Sovereign	2,8
2. Barclays	Financials	2,6
3. UBS Group Funding Switzerland	Financials	2,1
