This Products Highlights Sheet is an important document.

- It highlights the key terms and risks of the Low Volatility Equity Portfolio (the "Portfolio"), a portfolio of AB¹ (the "Fund"), and complements the prospectus for the Fund (the "Prospectus") and the Singapore prospectus (the "Singapore Prospectus", together with the Prospectus, the "Singapore Offering Documents").²
- It is important to read the Singapore Offering Documents before deciding whether to purchase shares in the Portfolio ("Shares"). If you do not have a copy, please contact us to ask for one.
- You should not invest in the Portfolio if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase Shares³, you will need to make an application in the manner set out in the Singapore Prospectus.

under certain circumstances as set out in the Singapore Prospectus.	
Product-Specific Risks	
You are exposed to Derivatives Risks. The Portfolio is entitled to use FDIs	
as an alternative to investing directly in underlying instruments, for hedging	
and EPM purposes which may involve additional risks different from, and, in	
certain cases, greater than, the risks presented by more traditional investments. Some of the risks associated with FDIs are market risk,	
management risk, credit risk, liquidity risk and leverage risk. In adverse	
situations, the Portfolio's use of FDIs may become ineffective in hedging or	
EPM and the Portfolio may suffer significant losses. The Portfolio will use FDIs	
for investment purposes and for the purpose of meeting its investment	
objective. The Portfolio's investment in FDIs may involve additional risks, for example, counterparty default risk or insolvency risk, risk involved with effective	
management of derivative strategies, risk of mispricing or improper valuation of	
derivatives, risk of embedded leverage through investment in a derivative that	
is itself leveraged, risk of higher volatility, risk of illiquidity in the market for	
certain derivative strategies and risk of loss greater than the amount invested in	
the FDI, and may expose the Portfolio to significant losses. The failure of a counterparty to a derivative contract to comply with the terms of the derivative	
contract could cause the Portfolio to suffer a loss.	
You are exposed to Equity Securities Risks. The value of underlying equity	
investments of the Portfolio may fluctuate in response to the activities and	
results of individual companies, or because of general market and economic conditions and changes in currency exchange rates.
