Investment Strategy	
<ul style="list-style-type: none"> The investment objective of the Sub-Fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies, at least 90% of which have assets, products or operations based in the United States and are included in the Russell 1000 Index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing. Portfolio selection will adhere to an optimisation process that favours stocks ranked highly through the Investment Manager's growth categorisation process and then configures those into a portfolio in a manner to very tightly control the portfolio's tracking error to the Standard & Poor's 500 Index. The Sub-Fund may use FDI for hedging and (subject to the CPF Board's approval) EPM. It will not use FDI extensively for any purpose. 	Refer to the " Investment Objectives, Focus and Approach " section of the Singapore Prospectus for further information on the investment strategy of the product.
Parties Involved	
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> The Manager is PineBridge Investments Ireland Limited, who has appointed PineBridge Investments LLC and PineBridge Investments Europe Limited as investment manager for the Sub-Fund. The Trustee and Custodian is State Street Custodial Services (Ireland) Limited. 	Refer to the " Management Structure and Other Parties " section of the Singapore Prospectus for further information on their role and responsibilities.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? Investment involves risks. The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses. All financial markets and therefore the value of the Sub-Fund may at times be adversely affected by changes in political, economic and social conditions and policies including without limitation, foreign exchange control policies. Please refer to the Singapore Prospectus for details.	Refer to the " Risk Factors " section of the Singapore Prospectus for further information on risks of the product.
Market and Credit Risks	
You have exposure to market risks of an equity fund, particularly in the United States market <ul style="list-style-type: none"> The value of equity and equity-related securities are affected by economic, political, market and issuer-specific changes. Such fluctuations can adversely impact the Sub-Fund's performance. The Sub-Fund concentrates its investments in equity and equity-related securities of companies at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 Index. This concentration may lead to a greater degree of volatility and risk than a portfolio which is diversified across different geographical regions. You are exposed to market volatility risk <ul style="list-style-type: none"> All investment and markets are subject to volatility based on prevailing economic conditions. Price trends are affected by financial market trends and economic development of issuers. Some markets or exchanges may be highly volatile from time to time. 	
Liquidity Risks	
The Sub-Fund is not listed on the Singapore Exchange and you can redeem only on Dealing Days. There is no secondary market for the Sub-Fund. All redemption requests should be made to the Manager's	

authorised distributors or through other sales channels, where applicable.																															
Product-Specific Risks																															
<p>You are exposed to FDI risk</p> <ul style="list-style-type: none"> Certain risks may render hedging ineffective, including the ability to predict price and interest rate movements, imperfect correlation of instruments to the securities/markets being hedged, skill in using hedging strategy, illiquidity, possible impediments to EPM or ability to redeem, legal risks (e.g. enforceability and limitation of contract terms), settlement risks (as the Sub-Fund's liability may be unlimited until the position on certain FDI is closed) and counterparty risks. Certain FDI may involve the assumption of obligations as well as rights and assets. Assets deposited as margin with brokers may not be held in segregated accounts and may be available to the broker's creditors in the event of insolvency. <p>You are exposed to country selection risk</p> <ul style="list-style-type: none"> The Sub-Fund may allocate its investments to certain countries for greater opportunities and potential for capital appreciation, but this may subject the Sub-Fund to higher risks of loss. <p>You are exposed to distributions from capital risk</p> <ul style="list-style-type: none"> Payment of dividends out of capital amounts to a return of part of your original investment or capital gains attributable to it. Capital erosion may continue until all capital is depleted.
