LETTER FROM THE CHAIR

Dear Shareholders:

Central banks around the world tightened monetary policy considerably through the third quarter of 2023 before pausing. The pace of US Federal Reserve tightening was nearly the fastest ever, and the European Central Bank raised rates to the highest level in its nearly 25-year history. Additionally, policymakers reduced the size of their institutions' balance sheets, further constraining financial conditions. Those actions helped bring inflation down sharply, though it remains above policymakers' 2% target.

Despite tighter financial conditions, economic growth has held up better than many observers expected, particularly in the United States amid solid consumer demand, still-low levels of unemployment, a steady economic tailwind from government outlays on infrastructure and other projects, and corporations reshoring some production to make supply chains more resilient. Growth in Europe stagnated late in 2023, though it showed modest signs of improvement in early 2024. Europe continues to adjust to higher energy costs after reconfiguring energy supply chains to exclude Russia. Growth in China remains disappointing as the country's beleaguered property sector continues to be an economic drag while low levels of investor confidence persist.

Equity market performance has been solid, although most of the gains in major indices have been linked to companies with exposure to artificial intelligence. The utilization of large language models has quickened the pace of AI adoption by businesses and households and boosted demand for specialized semiconductors. Makers of anti-obesity medications have also been standout performers. Against a backdrop of relatively tight labor markets, tighter global financial conditions and volatile materials prices, investors appear more concerned that corporate profit margins outside the tech sector may be past peak for this cycle. However, low levels of unemployment across developed markets and the hope that inflation has crested have been supportive factors for the macroeconomic backdrop.

As a result of the ongoing war in Ukraine and Hamas' attack on Israel, investors have had to contend with an unsettled geopolitical environment, which has at times increased market volatility.

During times of market transition, it is important to have a deep understanding of company fundamentals, and we have built our unique global research platform to do just that.

At MFS[®], we put our clients' assets to work responsibly by carefully navigating increasingly complex global capital markets. Our investment team is guided by a commitment to long-term fundamental investing. Our global investment platform — combining collective expertise, long-term discipline and thoughtful risk management — seeks to uncover what we believe are the best, most durable investment ideas in markets around the world, enabling us to potentially create value for investors.

Respectfully,

A handwritten signature in black ink, appearing to read 'M. Freestone', written over a light grey background.

Mitchell Freestone
Chair of the Board
MFS Investment Management Company (Lux) S.à r.l

(a) The performance is for the period from the inception date through the stated period end. See Note 18 for additional information.

(c) The commencement of operations of the sub-fund was 13 September 2023.

NOTES TO PERFORMANCE TABLE

Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please contact your financial consultant.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers, the sub-funds' performance results would have been less favorable. Please see the prospectus and financial statements for details. All results are historical and assume the reinvestment of dividend and capital gain distributions, if any.

Total returns do not include the applicable sales charges. If these charges had been included, the results would have been lower.

Changes in currency exchange rates may affect the net asset values per share and the performance of share classes denominated in currencies other than a sub-fund's base currency.

Performance results do not include adjustments made for financial reporting purposes.

Performance results include the impact of swing pricing, if applicable. See Note 3 of the Notes to Financial Statements for additional information.

From time to time the sub-funds may receive proceeds from litigation settlements, without which performance would be lower.

GENERAL INFORMATION

Audited annual and unaudited semiannual financial statements are available at the registered office of the fund and at meridian.mfs.com.

Notices of general meetings are published in the *Mémorial – Journal Officiel du Grand-Duché de Luxembourg* and in other newspapers circulating in jurisdictions in which the fund is registered or in other publications as determined by the directors.

The list of changes in the portfolios for the period ended 31 January 2024 is available, free of charge, at the registered office of the fund.

Information concerning the sub-funds' net asset values and purchases and sales of securities is available at the registered office of the fund.

The Articles of Incorporation are lodged at the office of the Chief Registrar of the District Court of Luxembourg (Greffé du Tribunal d'Arrondissement de et à Luxembourg), at meridian.mfs.com, and at the registered office of the fund where they are available for inspection and where copies thereof may be obtained upon request.

The fund's most recent offering documents, including the Key Information Documents (KIDs), Key Facts Statements (KFS) for Hong Kong investors, and prospectus, contain information on the sub-funds' investment objectives, charges, expenses and risks. The offering documents, Articles of Incorporation and financial reports and other information about the sub-funds are available to investors at no cost at the fund's registered office, from your financial intermediary, or on the web at meridian.mfs.com. Please read them carefully before you invest. Please note that not all of the sub-funds or classes may be registered or authorized for distribution in every jurisdiction. In certain jurisdictions, investments may only be made by qualified investors and/or through authorized intermediaries on a limited private placement basis subject to applicable laws and regulations in the country of distribution. In particular, please note that as of 31 January 2024 the Contrarian Value Fund, Diversified Income Fund, Emerging Markets Debt Local Currency Fund, Emerging Markets Equity Research Fund, Euro Credit Fund, Global Credit Fund, Global Equity Income Fund, Global Intrinsic Value Fund, Global Listed Infrastructure Fund, Global New Discovery Fund, Global Opportunistic Bond Fund, Global Strategic Equity Fund, Managed Wealth Fund, Prudent Capital Fund, U.S. Corporate Bond Fund, and U.S. Growth Fund were not registered in Hong Kong and these sub-funds shall not be offered to the public in this jurisdiction.

CORPORATE GOVERNANCE

ALFI CODE OF CONDUCT

The fund is committed to corporate governance standards relating to its management. In connection therewith, the fund adheres to the ALFI (Association of the Luxembourg Fund Industry) Code of Conduct for Luxembourg Investment Funds, which was issued in September 2009 and updated and re-issued in 2022. This Code sets forth principles regarding qualified and experienced personnel, conflicts of interests and serving the best interests of fund shareholders, due diligence and oversight, compliance with applicable laws and risk management processes.

SHAREHOLDER COMPLAINTS OR INQUIRIES

If you wish to make a complaint about any aspect of the service you have received, you may contact your local agent in your respective country, or contact the funds' transfer agent at State Street Bank International GmbH, Luxembourg Branch, by mail, phone or email.

Mail: MFS Meridian Funds c/o State Street Bank International GmbH, Luxembourg Branch
49 Avenue J.F. Kennedy

You may find more information on the fund's complaint handling process at meridian.mfs.com.

CERTAIN RISK MANAGEMENT DISCLOSURES (unaudited)

Information Regarding Global Exposure Under The Funds' Risk Management Program

The fund's Management Company must employ a risk management process which enables it to monitor and measure at any time the risk of the positions in the sub-funds' portfolios and their contribution to the overall risk profile of their portfolios. The global exposure relating to financial derivative instruments may be calculated through the "commitment approach" or through a Value-at-Risk ("VaR") methodology. Generally, a sub-fund that uses derivatives more extensively or as part of its investment objective will utilize the VaR methodology, and a sub-fund that uses derivatives less extensively will utilize the commitment approach.

For each sub-fund except the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, Global Opportunistic Bond Fund, and Managed Wealth Fund, the commitment approach methodology is used to calculate global exposure. The commitment approach is based, in part, on the principle of converting the exposure to derivative instruments into equivalent positions of the underlying assets and quantifying the exposure in absolute value of the total commitments (which may account for hedging and netting).

For the Managed Wealth Fund, an absolute Value-at-Risk ("VaR") approach is used and for the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, and Global Opportunistic Bond Fund, a relative VaR approach is used, to measure global exposure. VaR provides a measure of the potential minimum loss that could arise over a given time interval under normal market conditions, and at a given confidence level. The sub-funds' risk management program limits the maximum VaR that the sub-fund can have relative to its net asset value for absolute VaR or relative to its benchmark for relative VaR, as determined by the sub-fund taking into account its investment policy and risk profile. For the Managed Wealth Fund, the absolute VaR cannot be greater than 20% of its respective net asset value. For the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, and Global Opportunistic Bond Fund, the relative VaR cannot be greater than 200% of its current benchmark. The VaR approach used by each of these sub-funds is based upon an historical model. The VaR is measured daily at the 99% level of confidence based on a one month (20 day) holding period. The underlying data set encompasses one year of data (minimum of 250 observations).

For the Emerging Markets Debt Local Currency Fund, the expected level of leverage may vary between 0% and 375% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Euro Credit Fund, the expected level of leverage may vary between 0% and 275% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Global Credit Fund, the expected level of leverage may vary between 0% and 275% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Global Opportunistic Bond Fund, the expected level of leverage may vary between 0% and 400% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 200% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Managed Wealth Fund, the expected level of leverage may vary between 0% and 200% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 100% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

The sum of notional value is the sum of the absolute values of the full underlying exposures of our derivative positions. The sum of notional value is based upon the full notional exposure with no netting or hedging. Under both levels of leverage methodologies, the sum of the absolute exposures is calculated in order that exposures of opposite signs to unrelated assets do not offset each other in the final result.

Please see the table below for summary information regarding the daily VaR and leverage results for the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, Global Opportunistic Bond Fund, and Managed Wealth Fund beginning 1 February 2023 through the year ended 31 January 2024:

1 February 2023 - 31 January 2024	Emerging Markets Debt Local Currency Fund	Euro Credit Fund	Global Credit Fund	Global Opportunistic Bond Fund
Lowest Relative VaR	99.26%	75.67%	89.79%	71.32%
Highest Relative VaR	142.08%	134.45%	120.74%	119.05%
Average Relative VaR	113.52%	101.83%	105.70%	97.72%
Lowest Leverage Level (Sum of Notional Value)	63.67%	43.50%	52.03%	139.32%
Highest Leverage Level (Sum of Notional Value)	236.84%	120.28%	147.37%	354.65%
Average Leverage Level (Sum of Notional Value)	126.99%	69.56%	81.85%	195.06%
Lowest Leverage Level (Commitment Approach)	50.13%	22.82%	29.73%	49.27%
Highest Leverage Level (Commitment Approach)	119.96%	46.15%	50.63%	78.62%
Average Leverage Level (Commitment Approach)	86.93%	34.35%	39.56%	64.15%

1 February 2023 - 31 January 2024	Managed Wealth Fund
Lowest Absolute VaR	1.55%
Highest Absolute VaR	3.27%
Average Absolute VaR	2.34%
Lowest Leverage Level (Sum of Notional Value)	76.42%
Highest Leverage Level (Sum of Notional Value)	101.76%
Average Leverage Level (Sum of Notional Value)	86.15%
Lowest Leverage Level (Commitment Approach)	63.29%
Highest Leverage Level (Commitment Approach)	83.21%
Average Leverage Level (Commitment Approach)	73.38%

EU SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR")(unaudited)

Effective as of the date of this report, the following MFS Meridian Funds sub-funds were designated as meeting the criteria of Article 8 under SFDR:

Blended Research European Equity	European Value Fund	Limited Maturity Fund
Continental European Equity Fund	Global Concentrated Fund	Managed Wealth Fund
Contrarian Value Fund	Global Credit Fund	Prudent Capital Fund
Diversified Income Fund	Global Equity Fund	Prudent Wealth Fund
Emerging Markets Debt Fund	Global Equity Income Fund	U.K. Equity Fund
Emerging Markets Debt Local Currency Fund	Global Intrinsic Value Fund	U.S. Concentrated Growth Fund
Euro Credit Fund	Global Listed Infrastructure Fund	U.S. Corporate Bond Fund
European Core Equity Fund	Global Opportunistic Bond Fund	U.S. Growth Fund
European Research Fund	Global Research Focused Fund	U.S. Total Return Bond Fund
European Smaller Companies Fund	Global Strategic Equity Fund	U.S. Value Fund
	Global Total Return Fund	

These sub-funds promote the MFS Low Carbon Transition Characteristic. Further information on the characteristic is contained in the respective SFDR website disclosure which can be accessed at meridian.mfs.com (select location and applicable Article 8 fund for the 'SFDR Article 8 Fund Disclosure' document).

The extent to which each sub-fund met the underlying climate criteria as of the date of this report is available in the SFDR Annex attached to this report and available at meridian.mfs.com (select location and applicable Article 8 fund for the 'SFDR Article 8 Fund Disclosure' document).

Neither the MFS Meridian Article 8 funds listed above, nor the other sub-funds of MFS Meridian Funds, take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and portfolio alignment with such Taxonomy Regulation is not calculated.

The other sub-funds are currently classified under Article 6 of SFDR and do not take into account the EU criteria for environmentally sustainable economic activities.

Footnotes to Schedules of Investments:

Taxable: Security not exempt from United States federal taxes

- (b) Securities traded on other regulated markets.
- (c) Other transferable securities, currently not traded on a regulated market. Classified as illiquid securities, refer to Note 17.
- (d) In default.
- (g) All or a portion of the security has been segregated as collateral for open forward foreign currency exchange contracts.
- (i) Interest only security for which the sub-fund receives interest on notional principal (Par amount). Par amount shown is the notional principal and does not reflect the cost of the security.
- (k) As of 31 January 2024, the following sub-funds held securities that were fair valued in accordance with the policies adopted by the Board of Directors:

Sub-Fund	Market Value	% of Total Sub-Fund Market Value	Number of Securities
Asia Ex-Japan Fund	\$ 24,910,805	73.68%	39

- (l) A portion of this security is on loan. See Note 4 for additional information.
- (p) Payment-in-kind (PIK) security for which interest income may be received in additional securities and/or cash.
- (v) The rate quoted is the annualized seven-day yield of the fund at period end and may be negative (i.e., the costs and expenses of the fund may exceed the income and gains of its portfolio).
- (y) The rate shown represents an annualized yield at time of purchase.

The following abbreviations are used in this report and are defined:

ADR	American Depositary Receipt
AGM	Assured Guaranty Municipal
CDO	Collateralized Debt Obligation
CLO	Collateralized Loan Obligation
CPI	Consumer Price Index
ETC	Exchange-Traded Commodity
ETF	Exchange-Traded Fund
FLR	Floating Rate. The period-end rate reported may not be the current rate.
GDR	Global Depositary Receipt
IEU	International Equity Unit
REIT	Real Estate Investment Trust
TBA	To Be Announced
TIPS	Treasury Inflation Protected Security
UMBS	Uniform Mortgage-Backed Security

Currency abbreviations have been used throughout this report. A list of abbreviations is shown below:

AUD	Australian Dollar
BRL	Brazilian Real
CAD	Canadian Dollar
CHF	Swiss Franc
CLP	Chilean Peso
CNH	Chinese Yuan Renminbi (Offshore)
CNY	China Yuan Renminbi
COP	Colombian Peso
CZK	Czech Koruna
DKK	Danish Krone
EUR	Euro
GBP	British Pound
HUF	Hungarian Forint
IDR	Indonesian Rupiah
INR	Indian Rupee
ISK	Iceland Krona
JPY	Japanese Yen
KRW	South Korean Won
MXN	Mexican Peso
MYR	Malaysian Ringgit
NOK	Norwegian Krone
NZD	New Zealand Dollar
PEN	Peruvian Nuevo Sol
PHP	Philippine Peso
PLN	Polish Zloty
RON	Romanian New Leu
SEK	Swedish Krona
SGD	Singapore Dollar
THB	Thai Baht
TRY	Turkish Lira
TWD	Taiwan Dollar
USD	United States Dollar
UYU	Uruguayan Peso
ZAR	South African Rand

Note 1: The Fund

The MFS Meridian Funds (the “fund” or the “Company”) is an open-ended investment company incorporated under the laws of the Grand Duchy of Luxembourg on 4 February 1992. It is organised under Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment, as amended, as a Société Anonyme qualifying as a “Société d’Investissement à Capital Variable” (“SICAV”). The fund is registered with the Registre de Commerce et des Sociétés de Luxembourg, under number R.C.S. B 39346. On 31 October 2014, MFS Investment Management Company (Lux) S.à r.l. (“MFS Lux”) was appointed by the fund to act as Management Company.

The fund is organised as an “umbrella fund” comprising separate sub-funds each of which relates to a separate portfolio of securities with specific investment objectives. At 31 January 2024, it comprises 39 sub-funds, each relating to a separate investment portfolio consisting of securities, cash, and other instruments. Each sub-fund may offer various types of classes of shares, which may differ in the minimum subscription amount, minimum holding amount, currency and/or eligibility requirements, the fees and expenses, and the dividend policy applicable to them. The fund may be offered for sale in European Economic Area (“EEA”) states, subject to notification in countries other than the Grand Duchy of Luxembourg, and in certain jurisdictions subject to local offering requirements. Please note that not all of the sub-funds or classes may be registered or authorized for distribution in every jurisdiction. Share classes available for each sub-fund at 31 January 2024 can be found under “Statistical Information” in this report.

Note 2: Summary of Significant Accounting Policies

The financial statements have been prepared in accordance with Luxembourg legal and regulatory requirements applicable to investment funds. A reconciliation of the impact on net investment income for those impacted sub-funds arising from accounting differences between Luxembourg legal and regulatory requirements for investment funds and Generally Accepted Accounting Principles (“GAAP”) used in the United States is provided in Note 16.

- A) *Use of Estimates* – The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the reporting period. Actual results may differ from those estimates.
- B) *Financial Instrument Valuations* – Equity securities are generally valued at the last sale or official closing price on their primary market or exchange as provided by a third-party pricing service. Equity securities, for which there were no sales reported that day, are generally valued at the last quoted daily bid quotation on their primary market or exchange as provided by a third-party pricing service.

Debt instruments and floating rate loans are generally valued at an evaluated or composite bid as provided by a third-party pricing service.

Exchange-traded options are generally valued at the last sale or official closing price on their primary exchange as provided by a third-party pricing service. Exchange-traded options for which there were no sales reported that day are generally valued at the last daily bid quotation on their primary exchange as provided by a third-party pricing service. For put options, the position may be valued at the last daily ask quotation if there are no trades reported during the day. Options not traded on an exchange are generally valued at a broker/dealer bid quotation. Foreign currency options are generally valued at valuations provided by a third-party pricing service.

Futures contracts are generally valued at the last posted settlement price on their primary exchange as provided by a third-party pricing service. Futures contracts for which there were no trades that day for a particular position are generally valued at the closing bid quotation on their primary exchange as provided by a third-party pricing service.

Swap agreements are generally valued using valuations provided by a third-party pricing service, which for cleared swaps includes an evaluation of any trading activity at the clearinghouses.

Forward foreign currency exchange contracts are generally valued at the mean of bid and asked prices for the time period interpolated from rates provided by a third-party pricing service for proximate time periods.

Short-term instruments with a maturity at issuance of 60 days or less may be valued at amortized cost, which approximates market value.

Open-end investment companies are generally valued at their net asset value per share excluding redemption fees (if any).

Securities and other assets generally valued on the basis of information from a third-party pricing service may also be valued at a broker/dealer bid quotation.

Values obtained from third-party pricing services can utilize both transaction data and market information such as yield, quality, coupon rate, maturity, type of issue, trading characteristics, and other market data. The values of securities and other assets and liabilities expressed in non-base currencies are converted to the base currency of the sub-fund based upon exchange rates provided by a third-party source.

The Management Company has delegated primary responsibility for determining or causing to be determined the value of the sub-fund’s investments (including any fair valuation) to Massachusetts Financial Services Company (“MFS”), the Investment Manager, pursuant to valuation policies and procedures approved by the Board of Directors of the Company and under the oversight of the Board of Directors. In carrying out the valuation policies and procedures, the Investment Manager provides instructions to State Street Bank International GmbH, Luxembourg Branch (“State Street”) as the Central Administration Agent on an ongoing basis. If the Investment Manager determines that reliable market quotations are not readily available, investments are valued at fair value as determined in good faith by the Investment Manager in accordance with such procedures under the oversight of the Board of Directors.

Under the valuation policies and procedures applicable to the sub-funds, investments may be valued at fair value if the Investment Manager determines that an investment’s value has been materially affected by events occurring after the close of the exchange or market on which the investment is principally traded (such as a foreign exchange or market) and prior to the determination of the sub-fund’s net asset value, or after the halt of trading of a specific security where trading does not resume prior to the close of the exchange or market on which the security is principally traded. Events that occur after markets close (such as developments in foreign markets) and prior to the determination of the sub-fund’s net asset value may be deemed to have a material effect on the value of securities traded in these markets. Accordingly, the sub-fund’s non-U.S. (“foreign”) equity securities may often be valued at fair value. The Investment Manager may rely on third-party pricing services or other information (such as the correlation with price movements of similar securities in the same or other markets; the type, cost and investment characteristics of the security; the business and financial condition of the issuer; and trading and other market data) to assist in determining whether to fair value and at what value to fair value an investment. The value of an investment for

purposes of calculating the sub-fund's net asset value can differ depending on the source and method used to determine the value. When fair valuation is used, the value of an investment used to determine the sub-fund's net asset value may differ from quoted or published prices for the same investment. There can be no assurance that the sub-fund could obtain the fair value assigned to an investment if it were to sell the investment at the same time at which the sub-fund determines its net asset value per share.

- C) *Dividends and Interest* – Dividends received in cash are recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded when the sub-fund is informed of the dividend if such information is obtained subsequent to the ex-dividend date. Interest income is recorded on the accrual basis. Each sub-fund generally accretes discounts on debt securities as adjustments to interest income. The sub-funds do not amortize premiums on debt securities. Dividend and interest payments received in additional securities are recorded on the ex-dividend or ex-interest date in an amount equal to the value of the security on such date. Debt obligations may be placed on non-accrual status or set to accrue at a rate of interest less than the contractual coupon when the collection of all or a portion of interest has become doubtful. Interest income for those debt obligations may be further reduced by the write-off of the related interest receivables when deemed uncollectible.

The sub-funds may receive proceeds from litigation settlements. Any proceeds received from litigation involving portfolio holdings are reflected in the Statements of Operations and Changes in Net Assets in net realized gain (loss) on investments, derivatives, and currency transactions if the security has been disposed of by the sub-fund or in net change in unrealized gain (loss) on investments, derivatives, and currency translation if the security is still held by the sub-fund. Any other proceeds from litigation not related to portfolio holdings are recorded as net realized gain, in the Statements of Operations and Changes in Net Assets.

- D) *Foreign Currency Translation* – Purchases and sales of foreign investments, income, and expenses initially expressed in foreign currencies are converted each business day into each sub-fund's base currency based upon currency exchange rates prevailing on the respective dates of such transactions or on the reporting date for foreign denominated receivables and payables. The base currency for the Blended Research European Equity Fund, Continental European Equity Fund, Euro Credit Fund, European Core Equity Fund, European Research Fund, European Smaller Companies Fund, and European Value Fund is EUR. The base currency for the U.K. Equity Fund is GBP. Effective 7 June 2022, the base currency of the Japan Equity Fund was changed from USD to JPY. The base currency for all the remaining sub-funds is USD. Gains and losses attributable to foreign currency exchange rates on sales of securities and foreign exchange rate movements on receivables, payables, income, and expenses are recorded for financial statement purposes as net realized gain (loss) on investments, derivatives, and currency transactions. The portion of both realized and unrealized gains and losses on investments that results from fluctuations in currency exchange rates is not separately disclosed.

- E) *Cost of Securities Sold* – In determining the cost of securities sold, each sub-fund uses the identified cost basis.

- F) *Derivative Collateral Requirements* – Derivative counterparty credit risk is managed through formal evaluation of the creditworthiness of all potential counterparties. On certain, but not all, uncleared derivatives, the sub-fund attempts to reduce its exposure to counterparty credit risk, whenever possible by entering into an International Swaps and Derivatives Association ("ISDA") Master Agreement on a bilateral basis, at the sub-fund level. The ISDA Master Agreement gives each party to the agreement the right to terminate all transactions traded under such agreement if there is a specified deterioration in the credit quality of the other party. Upon an event of default or a termination of the ISDA Master Agreement, the non-defaulting party has the right to close out all transactions traded under such agreement and to net amounts owed under each agreement to one net amount payable by one party to the other. This right to close out and net payments across all transactions traded under the ISDA Master Agreement could result in a reduction of the sub-fund's credit risk to such counterparty equal to any amounts payable by the sub-fund under the applicable transactions, if any. These netting rights may be stayed or limited in the event the counterparty becomes insolvent. However, absent an event of default by the counterparty or a termination of the agreement, the ISDA Master Agreement does not result in an offset of reported balance sheet assets and liabilities across transactions between the sub-fund and the applicable counterparty.

Collateral and margin requirements differ by type of derivative. Margin requirements are set by the clearing broker and the clearinghouse for cleared derivatives (e.g., futures contracts, cleared swaps, and exchange-traded options). Collateral terms are contract specific for uncleared derivatives (e.g., forward foreign currency exchange contracts, uncleared swap agreements, and uncleared options). For derivatives traded under an ISDA Master Agreement, which contains a collateral support annex, the collateral requirements are netted across all transactions traded under such counterparty-specific agreement and an amount is posted from one party to the other to collateralize such obligations. Cash that has been segregated or delivered to cover the sub-fund's collateral or margin obligations under derivative contracts, if any, will be reported separately in the Statements of Assets and Liabilities as "Restricted cash" for uncleared derivatives and/or "Deposits with brokers" for cleared derivatives. Securities pledged as collateral or margin for the same purpose, if any, are noted in the Schedules of Investments. The sub-funds may be required to make payments of interest on uncovered collateral or margin obligations with the broker. Any such payments are included in "Interest expense and similar charges" in the Statements of Operations

and Changes in Net Assets. Collateral received consists of cash and/or high quality government debt, which is not reported in the Statements of Assets and Liabilities or Schedules of Investments. At 31 January 2024, the following sub-funds had segregated cash or received cash and/or high quality government debt as collateral for open cleared and uncleared derivatives.

Sub-Fund	Cash Segregated by the Sub-Fund (Restricted Cash)	Collateral Received by the Sub-Fund	Deposits with brokers for futures	Deposits with brokers for swaps
Diversified Income Fund	\$—	\$—	\$79,350	\$—

U.S. Government Bond Fund	\$—	\$—	\$1,657,426	\$—
U.S. Total Return Bond Fund	\$—	\$—	\$1,823,650	\$—

G) *Forward Foreign Currency Exchange Contracts* – Each sub-fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of the contract. Certain sub-funds may enter into forward foreign currency exchange contracts for efficient portfolio management, hedging, or for investment purposes. For efficient portfolio management purposes, the sub-fund may enter into contracts to deliver or receive foreign currency it will receive from or require in its normal investment activities. For hedging purposes, the sub-fund may use contracts in a manner intended to protect foreign currency denominated securities from declines in value due to unfavorable exchange rate movements. For investment purposes, certain sub-funds may enter into contracts with the intent of changing the relative exposure of the sub-fund's portfolio of securities to different currencies to take advantage of anticipated exchange rate changes. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any unrealized gains or losses are recorded as a receivable or payable for forward foreign currency exchange contracts until the contract settlement date. On contract settlement date, any gains or losses are recorded as realized gain (loss) on investments, derivatives, and currency transactions in the Statements of Operations and Changes in Net Assets. Collateral, in the form of cash or securities, is held in segregated accounts with the sub-fund's depository in connection with these agreements. Details of the forward foreign currency exchange contracts outstanding are listed in Note 10.

H) *Hedged Share Classes* – Certain sub-funds offer classes with the aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class ("Hedged Share Classes" with the exception of the BRL-Hedged Share Classes as discussed below) and the unhedged base currency class of the relevant sub-fund. Brown Brothers Harriman Investor Services Limited ("BBH"), as delegated provider of currency hedging services for Hedged Share Classes, engaged in hedging transactions for such Hedged Share Classes. The terms and conditions applicable to the Hedged Share Classes are the same as those which apply for the same classes of shares offered in the base currency, the difference being the hedging of the Hedged Share Class to the base currency of the sub-fund. BBH may execute such hedging transactions by using various hedging techniques and instruments, including forward foreign currency exchange contracts, foreign exchange swap contracts, currency futures, written call options, and purchased put options. The gains/losses and expenses of the hedging process will be borne by the Hedged Share Classes. Given that there is no segregation of liabilities between share classes of the sub-funds, there is a risk that, under certain circumstances, currency hedging transactions in relation to one share class (e.g. a Hedged Share Class) could result in liabilities which might affect the net asset value of the other share classes of the same sub-fund. For example, if a currency hedging transaction in respect of a Hedged Share Class were to result in liabilities that the Hedged Share Class has insufficient assets to cover, assets attributable to the other share classes of the sub-fund may be used to cover the liabilities. Further, collateral posting requirements, which may become more burdensome in light of recent regulatory developments, may require the sub-fund to maintain a larger allocation to cash and cash-equivalent instruments than the Investment Manager would otherwise determine to hold. This could negatively affect performance for the sub-fund as a whole, even where the corresponding derivative transactions are in respect of the Hedged Share Classes alone. Details of the class-specific forward foreign currency exchange contracts outstanding are listed in Note 11.

BRL-Hedged Share Classes seek to systematically convert the value of net assets to the Brazilian Real ("BRL") through the use of derivatives. BRL-Hedged Share Classes are similar in terms of characteristics and risks to the other Hedged Share Classes as described above, except that they are not denominated in BRL (due to currency trading restrictions on BRL) but in the base currency of the respective Fund. BRL-Hedged Share Classes are designated with an "R" (e.g., IH1R (USD)). References to "Hedged Share Classes" throughout this document otherwise include the BRL-Hedged Share Classes.

- I) *Written Options* – In exchange for a premium, each sub-fund may write call options on securities for which it anticipated the price would decline and also write put options on securities for which it anticipated the price would increase. At the time the option was written, the sub-fund believed the premium received exceeded the potential loss that could result from adverse price changes in the options' underlying securities. In a written option, the sub-fund as the option writer grants the buyer the right to purchase from, or sell to, the sub-fund a specified number of shares or units of a particular security, currency or index at a specified price within a specified period of time. The premium is initially recorded as a liability in the Statements of Assets and Liabilities. The option is subsequently marked-to-market daily with the difference between the premium received and the market value of the written option being recorded as unrealized appreciation or depreciation. When a written option expires, the sub-fund realizes a gain equal to the amount of the premium received. The difference between the premium and the amount paid on effecting a closing transaction is considered a realized gain or loss. When a written call option is exercised, the premium received is offset against the proceeds to determine the realized gain or loss. When a written put option is exercised, the premium reduces the cost basis of the security purchased by the sub-fund. Collateral, for uncleared options, in the form of cash or securities, is held in segregated accounts with the sub-fund's depository in connection with these agreements.

At the initiation of the written option contract, for exchange traded options, the sub-fund is required to deposit securities or cash as collateral with either the depository for the benefit of the broker or directly with the clearing broker, based on the type of option. For uncleared options, the sub-fund may post collateral subject to the terms of an ISDA Master Agreement as generally described above if the market value of the options contract moves against it. The sub-fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option. Losses from writing options can exceed the premium received and can exceed the potential loss from an ordinary buy and sell transaction. Although the sub-fund's market risk may be significant, the maximum counterparty credit risk to the sub-fund is equal to the market value of any collateral posted to the broker. For uncleared options, this risk is mitigated in cases where there is an ISDA Master Agreement between the sub-fund and the counterparty providing for netting as described above.

- J) *Purchased Options* – Each sub-fund may purchase call or put options for a premium. Purchased call and put options entitle the holder to buy or sell a specified number of shares or units of particular security, currency or index at a specified price at a specified date or within a specified period of time. Purchasing call options may be used to hedge against an anticipated increase in the cost of securities or currency to be acquired or to increase the sub-fund's exposure to an underlying instrument. Purchasing put options may hedge against an anticipated decline in the value of portfolio securities or currency or decrease the sub-fund's exposure to an underlying instrument. The premium paid is initially recorded as an investment in the Schedules of Investments. That investment is subsequently marked-to-market daily with the difference between the premium paid and the market value of the purchased option being recorded as unrealized appreciation or depreciation. Premiums paid for purchased call and put options which have expired are treated as net realized loss on investments in the Statements of Operations and Changes in Net Assets. Upon the exercise or closing of a purchased option, the premium paid is either added to the cost of the security or financial instrument in the case of a call option, or offset against the proceeds on the sale of the underlying security or financial instrument in the case of a put option, in order to determine the net realized gain or loss on investments, derivatives, and currency transactions. Whether or not the option is exercised, the sub-fund's maximum risk of loss from purchasing an option is the amount of premium paid. All option contracts involve credit risk if the counterparty to the option contract fails to perform. For uncleared options, this risk is mitigated in cases where there is an ISDA Master Agreement between the sub-fund and the counterparty providing for netting as described above and, where applicable, by the posting of collateral by the counterparty to the sub-fund to cover the sub-fund's exposure to the counterparty under such ISDA Master Agreement.

- K) *Swap Agreements* – Certain sub-funds may enter into swap agreements. A swap agreement is generally an exchange of cash payments, at specified intervals or upon the occurrence of specified events, between the sub-fund and another party. Swaps may be centrally cleared ("cleared swaps") or uncleared ("uncleared swaps"). In a cleared swap transaction, the ultimate counterparty to the transaction is a clearinghouse (the "clearinghouse"). The contract is transferred and accepted by the clearinghouse immediately following execution of the swap contract with an executing broker. Thereafter, throughout the term of the cleared swap, the sub-fund interfaces indirectly with the clearinghouse through a clearing broker and has counterparty risk to the clearing broker as well. Net cash payments are exchanged at specified intervals and the expected income or expense is recorded on the accrual basis. The swap agreement is recorded at value and adjusted daily and the change in value is recorded as unrealized appreciation or depreciation in the Statements of Operations and Changes in Net Assets. The value of the swap agreement, which is adjusted daily, is recorded in the Statements of Assets and Liabilities, as "Swaps, at value" for uncleared swaps. For cleared swaps, payments (variation margin) are made or received by the sub-fund each day, depending on the daily fluctuations in the value of the cleared swap, such that only the current day net receivable or payable for variation margin is included in "Receivable due from brokers" or "Payable due to brokers" as reported in the Statement of Assets and Liabilities. Amounts paid or received at the inception of the swap agreement are disclosed as premiums paid or received in Note 14 and are amortized using the effective interest method over the term of the agreement. A liquidation payment received or made upon early termination is recorded as a realized gain or loss in the Statements of Operations and Changes in Net Assets. In most instances, collateral for uncleared swaps, in the form of cash or securities, is held in segregated accounts with the sub-fund's depository in connection with these agreements. Collateral may also be posted directly with certain counterparties. Collateral for cleared swaps, in the form of cash or securities, is posted by the sub-fund directly to the clearing broker.

Risks related to swap agreements include the possible lack of a liquid market, unfavorable market and interest rate movements of the underlying instrument and the failure of the counterparty to perform under the terms of the agreements. The sub-fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparty over the contract's remaining life, to the extent that the amount is positive, plus any collateral posted directly to the counterparty. To address counterparty risk, uncleared swap agreements are limited to only highly-rated counterparties. Risk is further reduced by having an ISDA Master Agreement between the sub-fund and its counterparty providing for netting as described above and, where applicable, by the posting of collateral by the counterparty to the sub-fund to cover the sub-fund's exposure to the counterparty under such ISDA Master Agreement. The sub-fund's counterparty risk due to cleared swaps is mitigated by the fact that the clearinghouse is the true counterparty to the transaction and the regulatory safeguards in the event of a clearinghouse or clearing broker bankruptcy. Certain sub-funds

may enter into swaps for efficient portfolio management. Certain sub-funds may also enter into swaps for investment purposes. For efficient portfolio management purposes, the sub-fund may use swaps to reduce its exposure to interest and foreign exchange rate fluctuations. For investment purposes, certain sub-funds may use swaps to take a position on anticipated changes in the underlying financial index.

Interest Rate Swaps – Interest rate swap agreements involve the periodic exchange of cash flows, between the sub-fund and a counterparty, based on the differences between two interest rates applied to a notional principal amount. The two interest rates exchanged may either be a fixed rate and a floating rate or two floating rates based on different indices. The net receivable or payable associated with these payments is accrued daily and recorded as an unrealized gain or loss, and any payments received or made are recorded as realized gain or loss, in the Statements of Operations and Changes in Net Assets. Details of the interest rate swaps outstanding are listed in Note 14.

Credit Default Swaps – Credit default swaps are agreements to manage a sub-fund's exposure to the market or certain sectors of the market, to reduce a sub-fund's credit risk exposure to defaults of corporate and sovereign issuers or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. In a credit default swap, the protection buyer can make an upfront payment and will make a stream of payments to the protection seller based on a fixed percentage applied to the contract notional amount in exchange for the right to receive a specified return upon the occurrence of a defined credit event on the reference obligation (which may be either a single security or a basket of securities issued by corporate or sovereign issuers) and, with respect to the cases where physical settlement applies, the delivery by the buyer to the seller of a defined deliverable obligation. Although agreement specific, credit events generally consist of a combination of the following: bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium, each as defined in the 2003 ISDA Credit Derivatives Definitions as amended by the relevant contract. Restructuring is generally not applicable when the reference obligation is issued by a North American corporation and obligation acceleration, obligation default, or repudiation/moratorium are generally only applicable when the reference obligation is issued by a sovereign entity or an entity in an emerging markets country. Upon determination of the final price for the deliverable obligation (or upon delivery of the deliverable obligation in the case of physical settlement), the difference between the value of the deliverable obligation and the swap's notional amount is recorded as realized gain or loss in the Statements of Operations and Changes in Net Assets. As discussed earlier in this note, collateral requirements for these swaps, if uncleared, are based generally on the market value of the swap netted against collateral requirements for other types of uncleared derivatives traded under each counterparty's ISDA Master Agreement. Details of the credit default swaps outstanding are listed in Note 14.

- L) *Futures Contracts* – The sub-funds may enter into futures contracts which may be used to hedge against or obtain broad market exposure, interest rate exposure, currency exposure, or to manage duration. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into a futures contract, the sub-fund is required to deposit with the broker either in cash or securities an initial margin in an amount equal to a certain percentage of the notional amount of the contract, which subjects the sub-fund to counterparty risk to the clearing broker and possibly the clearinghouse with respect to such collateral. Subsequent payments (variation margin) are made or received by the sub-fund each day, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the sub-fund until the contract is closed or expires at which point the gain or loss on futures contracts is realized. Upon entering into such contracts, the sub-fund bears the risk of interest or exchange rates or securities' prices moving unexpectedly, in which case, the sub-fund may not achieve the anticipated benefits of the futures contracts and may realize a loss. Details of the futures contracts outstanding are listed in Note 13.
- M) *Combined Statements* – The combined Statements of Assets and Liabilities and Statements of Operations and Changes in Net Assets are presented in EUR at the exchange rate at 31 January 2024. The currency translation adjustment relates to the retranslation of the opening Net Asset Values at this exchange rate. The currency exchange rates (USD to EUR) for 31 January 2024 and 31 January 2023 were 0.925326 and 0.919836, respectively. The currency exchange rates (GBP to EUR) for 31 January 2024 and 31 January 2023 were 1.172666 and 1.134019, respectively. The currency exchange rates (JPY to EUR) for 31 January 2024 and 31 January 2023 were 0.006287 and 0.007067, respectively. In connection with the Japan Equity Fund's 7 June 2022 base currency conversion, the fund's opening Net Asset Value was translated from USD to JPY using the 3 June 2022 conversion date exchange rate of 130.855000 resulting in a currency translation adjustment of ¥70,774,425.
- N) *Negative Interest* – Each sub-fund may be charged interest ("negative interest") on cash balances. Any such payments are included in "Interest expense and similar charges" in the Statements of Operations and Changes in Net Assets.
- O) *Distributions* – The income allocated to Roll-up shares (A1, C1, I1, N1, S1, P1, W1, and Z1, if offered) of each sub-fund shall be included in the portion of the net assets corresponding to such shares. Each sub-fund distributes to shareholders of Income shares (A2, A4, C2, I2, N2, and W2, if offered) substantially all of the net investment income attributable to such shares. For Gross Income shares (I3 if offered), the dividend is calculated at the discretion of the Board of Directors on the basis of the total investment income attributable to such shares, with relevant expenses of the class deducted after such distribution. See the fund's prospectus for additional details.
- P) *Repurchase Agreements* – Each sub-fund may enter into repurchase agreements, some of which may be novated to the clearing agency, Fixed Income Clearing Corporation (FICC). Each repurchase agreement is recorded at cost. For certain repurchase agreements, collateral posted by the counterparty is held by the sub-funds' depository or its agent, while for others it may be held with a third-party agent. In the latter case, the sub-funds are exposed to additional counterparty risk with respect to such collateral due to the possibility of insolvency of the third-party agent. Under Luxembourg regulations, the sub-funds' depository has established procedures to monitor collateral held with such third-party agent on behalf of the sub-funds. Each sub-fund monitors, on a daily basis, the value of the collateral to ensure that its value, including accrued interest, is greater than amounts owed to each sub-fund under each such repurchase agreement. In the event of default, the settlement of a cleared repurchase agreement is guaranteed by FICC. Interest income earned on the sub-fund's investment in repurchase agreements are reflected in "Income on repurchase agreements" in the Statements of Operations and Changes in Net Assets. Details of the repurchase agreements including various counterparties and collateral amounts relating to such agreements outstanding are listed in Note 12. For the year ended 31 January 2024, the following sub-funds had transaction costs for repurchase agreements. These amounts are included in the total transaction costs in Note 15.

Sub-Fund	Transaction Costs
Asia Ex-Japan Fund	\$885
Contrarian Value Fund	\$885

Sub-Fund – (continued)	Transaction Costs
Diversified Income Fund	\$885
Emerging Markets Debt Fund	\$885
Emerging Markets Debt Local Currency Fund	\$860
Emerging Markets Equity Fund	\$885
Emerging Markets Equity Research Fund	\$805
Global Concentrated Fund	\$855
Global Credit Fund	\$890
Global Equity Fund	\$860
Global Equity Income Fund	\$890
Global High Yield Fund	\$890
Global Intrinsic Value Fund	\$880
Global Listed Infrastructure Fund (c)	\$145

U.S. Total Return Bond Fund	\$870
U.S. Value Fund	\$880

(c) The commencement of operations of the sub-fund was 13 September 2023.

Q) *Inflation-Adjusted Debt Securities* – Certain sub-funds may invest in inflation-adjusted debt securities issued by the U.S. Treasury. Certain sub-funds may also invest in inflation-adjusted debt securities issued by U.S. Government agencies and instrumentalities other than the U.S. Treasury and by other entities such as U.S. and foreign corporations and foreign governments. The principal value of these debt securities is adjusted through income according to changes in the Consumer Price Index or another general price or wage index. These debt securities typically pay a fixed rate of interest, but this fixed rate is applied to the inflation-adjusted principal amount. The principal paid at maturity of the debt security is typically equal to the inflation-adjusted principal amount, or the security's original par value, whichever is greater. Other types of inflation-adjusted securities may use other methods to adjust for other measures of inflation.

Note 3: Swing Pricing

Large transactions into or out of a sub-fund can create "dilution" of the sub-fund's assets because the price at which an investor buys or sells shares may not entirely reflect the trading and other related costs that arise when the Investment Manager trades securities to accommodate the large inflows and outflows. Therefore, the Company has adopted procedures such that a sub-fund's net asset value may be adjusted upward or downward (otherwise known as "swing pricing") in order to reduce the impact of such costs to existing shareholders of that sub-fund. Under these procedures, in the usual course of business, the adjustment will be triggered whenever the net subscriptions, exchanges, and redemptions in shares of all classes on a particular business day exceed a certain percentage of the sub-fund's assets as set by the Board of Directors of the Company or Management Company from time to time. In case of a large amount of net purchases, the net asset value per share will be adjusted upward and purchasers of sub-fund shares on that valuation date will effectively contribute an additional amount to offset the related transaction costs. Conversely, net asset value per share will be adjusted downward with a large amount of net redemptions. The adjusted net asset value will be applicable to all purchases, exchanges, or redemptions in shares of all classes on that valuation day. As a sub-fund's net purchases, redemptions, and exchanges vary from business day to business day, it is not possible to predict how frequently a sub-fund's net asset value will be adjusted. Based on these adjustments, the volatility of a sub-fund's net asset value may not fully reflect the true performance of the sub-fund's underlying assets. The published/dealing NAV per share, as adjusted in accordance with Luxembourg legal and regulatory requirements relating to

the preparation and presentation of the financial statements, is disclosed in Statistical Information and may include a swing pricing adjustment. This adjustment is not recognized in either the Statements of Assets and Liabilities or the Statements of Operations and Changes in Net Assets. At 31 January 2024, no sub-funds included a swing pricing adjustment. A swing pricing historical activity report for the period is available at meridian.mfs.com.

Any adjustment to a sub-fund's net asset value (the "swing factor") will generally not exceed 2% of the net asset value of the relevant sub-fund on the relevant valuation date. However, under extraordinary conditions and when necessary in light of the best interests of investors, the Board of Directors may determine to use a swing factor in excess of 2% for a sub-fund. Such a decision must be notified to the CSSF, and investors will be informed via notice published in a Luxembourg newspaper and in another newspaper of more general circulation, as well as on meridian.mfs.com.

Note 4: Securities Loaned

Goldman Sachs Agency Lending ("GSAL"), as lending agent, may loan the securities of certain sub-funds to certain qualified institutions (the "Borrowers") approved by the fund. The loans are collateralized by high quality government debt in an amount at least equal to the market value of the securities loaned marked-to-market on a daily basis; such collateral held in custody with the depositary may be held with a sub-custodian within the depositary's network of sub-custodians. GSAL provides the applicable sub-fund with indemnification against Borrower default, including failure to deliver to the sub-fund any applicable distributions with respect to securities on loan or to return to the applicable sub-fund securities on loan in accordance with the lending agreement. On loans collateralized by high quality government debt, a fee is received from the Borrower, and is allocated between the sub-fund and the lending agent (which is not a related party to the fund, Management Company, Investment Manager or Depositary). Under the current securities lending agreement, the Company has agreed to pay the lending agent 15% of income generated up to \$4 million from securities lending transactions and 12.5% of income exceeding \$4 million from securities lending transactions. A nominal account maintenance and per-transaction fee is also paid to the Depositary Trust Clearing Corporation in connection with collateral maintenance. Income and expense from securities lending is separately reported in the Statements of Operations and Changes in Net Assets. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income as disclosed in Note 2. The market value of securities loaned and collateral outstanding at 31 January 2024 for the applicable sub-funds were as follows:

Sub-Fund	Market Value of Securities Loaned	Market Value of Collateral
European Smaller Companies Fund	€ 1,196,290	€ 1,324,864
European Value Fund	€38,953,394	€43,824,620
U.S. Value Fund	\$ 633,180	\$ 736,434

Note 5: Related Party Transactions

A) *Management Company Fee* – The Board of Directors of the fund has appointed MFS Investment Management Company (Lux) S.à r.l. pursuant to a Management Company Agreement to carry out the functions of management of the fund as prescribed under Luxembourg regulations. The Management Company is responsible for the fund's investment management, administration and distribution and marketing functions. The Management Company has been permitted by the fund to delegate, under the Management Company's supervision and control, certain administrative, distribution and investment management functions to affiliates or third party service providers. The Management Company has appointed MFS, an affiliate, as the Investment Manager and Administrative Services Agent.

Each sub-fund pays the Management Company an annual fee approved by the fund's Board of Directors, which is intended to cover the expenses of services the Management Company provides in connection with its mandate, plus a target profit margin. These expenses include fees paid to the Management Company's independent Conducting Persons and Managers of the Management Company, legal, regulatory and operational costs of the Management Company as well as fees paid by the Management Company to third parties to provide certain administrative, risk management and reporting services to the Management Company, including the administrative support services provided by MFS. The fund also reimburses the Management Company for out-of-pocket expenses related to its services. The management company fee is computed daily and is allocated such that each sub-fund pays a fixed fee of \$20,000 (or currency equivalent) plus an asset-based fee based on average daily net assets over \$40 million and up to \$4 billion (or currency equivalent) for each sub-fund. The management company fee incurred by each sub-fund for the year ended 31 January 2024 was equivalent to the following annual effective rates of each sub-fund's average daily net assets:

Sub-Fund	% of Average Daily Net Assets
Asia Ex-Japan Fund	0.0497%
Blended Research European Equity Fund	0.2280%
Continental European Equity Fund	0.0445%
Contrarian Value Fund	0.0359%

U.S. Value Fund	0.0338%

(c) The commencement of operations of the sub-fund was 13 September 2023.

B) *Investment Management Fee* – The Management Company has an investment management agreement with MFS to provide investment management services for the sub-funds. The investment management fee is computed daily and paid monthly at the following annual rates as of 31 January 2024 based on average daily net assets of each share class for the sub-funds below:

Sub-Fund	Class A	Class C	Class I	Class IF(a)	Class N	Class S	Class W
Asia Ex-Japan Fund	1.05%	1.05%	0.75%	—	1.05%	1.05%	0.80%

U.S. Value Fund	1.05%	1.05%	0.75%	—	1.05%	1.05%	0.80%

(a) See Note 18 for additional information.

(c) The commencement of operations of the sub-fund was 13 September 2023.

(e) WSH1 (EUR), WSH1 (CHF), and WS1 (USD) have an investment management fee of 0.60%.

(f) ISB1 (EUR) has an investment management fee of 0.37%.

Class P shares pay fees for investment management and distribution services as a single combined annual management charge. The annual management charge is computed daily and paid monthly at the following annual rates as of 31 January 2024 based on average daily net assets of each share class for the sub-funds below:

Sub-Fund	Class P
Blended Research European Equity Fund	1.35%
Contrarian Value Fund	1.75%(a)
Diversified Income Fund	1.35%
Emerging Markets Debt Fund	1.40%
Emerging Markets Equity Fund	1.90%
European Research Fund	1.80%
Global Concentrated Fund	1.90%
Global Equity Fund	1.80%
Global Intrinsic Value Fund	1.75%

Sub-Fund – (continued)	Class P
Global New Discovery Fund	1.75%(a)
Global Opportunistic Bond Fund	1.05%
Global Total Return Fund	1.70%
Managed Wealth Fund	1.75%
Prudent Capital Fund	1.80%
U.S. Value Fund	1.80%

(a) See Note 18 for additional information.

The investment management fee for Class Z shares will be administratively levied and will be paid directly by the shareholder, in relation to investment management services provided by MFS to the sub-fund, and the payment of such fee is not charged to or paid by the sub-fund.

- C) *Distribution and Service Fees* – The Management Company is also responsible for oversight of the distribution and marketing function with respect to the fund. All distribution and service fees are being paid to the Management Company or its affiliate. The Management Company or its affiliates may pay all or a portion of such fees to financial intermediaries. The Management Company may engage certain of its affiliates (including MFS International Limited) to provide distribution support to the Management Company.

The fund has adopted a distribution plan, which provides that each sub-fund pays the Management Company or its affiliate an annual distribution and/or service fee paid on a monthly basis. Each sub-fund pays a distribution fee annually of average daily net assets of Class A, Class C, and Class N shares at the following rates:

Sub-Fund	Class A	Class C	Class N
Asia Ex-Japan Fund	0.75%	1.00%	1.25%
Blended Research European Equity Fund	0.75%	1.00%	1.25%

U.S. Value Fund	0.75%	1.00%	1.25%

(c) The commencement of operations of the sub-fund was 13 September 2023.

In consideration for the distribution fees, the Management Company or its affiliate pays expenses on behalf of these sub-funds related to the marketing and distribution of their shares, including a fee paid to financial intermediaries or institutions.

The service fee paid to the Management Company or its affiliate is established at the annual rate of 0.50% of average daily net assets attributable to the Class C shares of each sub-fund.

Class A shares are subject to a front-end load of up to 6.00% of the net asset value of such shares. With respect to each sub-fund, certain large purchases of Class A shares may be purchased without a front-end load. Class N shares and Class P shares are subject to a front-end load of up to 3.00% of the net asset value of such shares. Class C shares are subject to a back-end load up to a maximum of 1.00% in the event of a shareholder redemption within twelve months following the purchase. Front-end loads may be paid to the Management Company or its affiliate (all or a portion of which may be paid as a commission by the Management Company or its affiliate to the applicable financial intermediary upon the sale of Class A shares) or may be deducted from the applicable purchase amount directly by the financial intermediary upon the purchase of Class A shares. The Management Company or its affiliate receives all back-end loads, which are generally intended to recapture sales commissions paid by the Management Company or its affiliate to financial intermediaries upon the purchase of the applicable class.

The Management Company has voluntarily agreed to rebate a portion of the service fee for Class C shares and a portion of the distribution fee for Class A shares, Class N, and Class P shares to the respective share class attributable to accounts for which there is no broker-dealer or other financial intermediary designated except for accounts attributable to MFS or its affiliates' seed money. The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets.

- D) *Directors' Fees* – The fund pays no compensation directly to Directors of the fund who are employees of the Management Company, Investment Manager or its affiliates (other than fund related out-of-pocket expenses). As of the date of this report, all Directors of the fund are employees of the Management Company, MFS Investment Management or its affiliates, except for Thomas Bogart and James R. Julian Jr., whose compensation, paid by the sub-funds in aggregate amounted to \$100,000 during the reporting period, before taxes. Thomas Bogart and James R. Julian Jr., also received reimbursement for out-of-pocket expenses, paid by the sub-funds. These fees are included in the "Miscellaneous" expenses in the Statements of Operations and Changes in Net Assets. For the year ended 31 January 2024, there were out-of-pocket expenses of \$775 paid by the sub-funds.
- E) *Expense Cap Arrangement* – Each sub-fund has entered into a temporary expense cap agreement whereby MFS has agreed in writing to bear certain of the sub-fund's "Other Expenses," excluding taxes (other than the Luxembourg tax d'abonnement), certain tax reclaim recovery expenses (including contingency fees), and expenses associated with the sub-fund's investment activities such as interest expense, such that these expenses do not exceed the rates of average daily net assets of Class A, Class C, Class I, Class N, Class P, Class W, and Class Z noted in the table below.

"Other Expenses" generally include all direct sub-fund expenses other than investment management, distribution and service fees. "Other Expenses" include fees paid to the Management Company, Depository and Transfer Agent, legal and audit fees, share class hedging expenses, certain expenses associated with the sub-fund's investment activities including interest, and expenses in connection with the sub-fund's operation and central administration in Luxembourg, among others. "Other Expenses" do not include brokerage commissions and transaction costs or currency conversion costs and the fee paid to the securities lending agent.

For Class S, each sub-fund has entered into a temporary expense cap agreement whereby MFS has agreed in writing to bear certain direct expenses, excluding taxes (other than the Luxembourg tax d'abonnement), certain tax reclaim recovery expenses (including contingency fees), and expenses associated with the sub-fund's investment activities such as interest expense, such that the "Total Expense Ratio" does not exceed the rates of average daily net assets noted in the table below.

To the extent the "Total Expense Ratio" (in the case of Class S) or "Other Expenses" (in the case of other classes) exceeds the expense cap rate, the difference is attributable to certain other expenses that are excluded from the expense cap arrangement, such as interest expenses associated with the sub-fund's investment activities, brokerage commissions and transaction costs, currency conversion costs, or the fee paid to the securities lending agent.

For Class IS and Class WS, the Management Company reserves the right to offer a partial waiver of the investment management fee and/or an arrangement to bear "Other Expenses." The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets.

Sub-Fund	Class A	Class C	Class I	Class N	Class P	Class S	Class W	Class Z

(a) See Note 18 for additional information.

(c) The commencement of operations of the sub-fund was 13 September 2023.

(e) WSH1 (EUR), WSH1 (CHF), and WS1 (USD) have an other expense cap rate of 0.05%.

(f) ISB1 (EUR) has an other expense cap rate of 0.10%.

The reductions under these agreements are included in “Expenses reimbursed by related parties” in the Statements of Operations and Changes in Net Assets. These expense cap agreements are in place until 31 January 2025, at which time the arrangements may or may not be continued. All transactions entered into between the fund and MFS have been entered into in the ordinary course of business and on normal commercial terms. The fund has not entered into any transactions through a broker who is a connected person, nor has the fund entered into any transactions which are outside the ordinary course of business or not on normal commercial terms.

Note 6: Depositary Fees

Each sub-fund will pay State Street Bank International GmbH, Luxembourg Branch ("State Street"), the fund's depositary and global custodian (the "Depositary"), a fee based on the monthly net asset value of the month-end holdings by foreign markets of the sub-funds plus a fee based upon the trading activity of each sub-fund. The Depositary and the Management Company or MFS, on behalf of the fund, shall determine the level of the fee from time to time in light of market rates applicable in Luxembourg. The fee is approved by the fund's Board of Directors. Reasonable disbursements and out-of-pocket expenses incurred by the Depositary or by other banks and financial institutions to which safekeeping of assets of the sub-funds is entrusted are in addition to the Depositary's fee. The Management Company and the fund have also entered into agreements with State Street to serve as the Registrar, Transfer Agent, Luxembourg Paying Agent, Central Administration Agent, and Fund Accounting Agent. The fund pays State Street fees for such services at commercial rates agreed upon between the parties, together with reasonable out-of-pocket expenses. The fees paid to State Street for these services are part of each sub-fund's operating expenses which are capped by MFS as described in Note 5.

Note 7: Commission Sharing

The Investment Manager and its affiliates (the "MFS Global Group") utilize a global investment platform built on the principle of close collaboration among members of its investment team, where research and investment ideas are shared. MFS Global Group investment professionals rely on their own internal research in making investment decisions even though they utilize external research provided by brokers or other research providers to help develop investment ideas. External research is also used to help understand market consensus, sentiment or perception, and identify relative inefficiencies more quickly and effectively.

The MFS Global Group makes decisions on the procurement of external research separately and distinctly from decisions on the selection of brokers that execute transactions for client accounts. The MFS Global Group will only execute a transaction with a broker who provides external research when, in the MFS Global Group's judgment, the broker is capable of providing best execution for that transaction.

However, as permitted by Section 28(e) of the U.S. Securities Exchange Act of 1934, as amended ("Section 28(e)"), which governs the Investment Manager, the MFS Global Group may cause certain clients to pay a broker that provides "brokerage and research services" (as defined in Section 28(e)) to the MFS Global Group an amount of commission for effecting a securities transaction for clients in excess of the amount other brokers would have charged for the transaction if the MFS Global Group determines in good faith that the greater commission is reasonable in relation to the value of the brokerage and research services provided viewed in terms of the MFS Global Group's overall responsibilities to its clients. The brokerage and research services received may be useful and of value to the MFS Global Group in serving both the accounts that generated the commissions and other clients of the MFS Global Group. Accordingly, not all of the research and brokerage services provided by brokers through which client securities transactions are effected may be used by MFS in connection with the client whose account generated the brokerage commissions.

The MFS Global Group has undertaken to bear the costs of external research for all accounts it advises, either by paying for external research out of its own resources, or by voluntarily reimbursing clients from its own resources for excess commissions paid to obtain external research. For accounts subject to a regulatory prohibition on the payment of excess commissions for research, including accounts that are directly or indirectly subject to the Markets in Financial Instruments Directive in the EU or U.K. ("MiFID II accounts"), the MFS Global Group will pay for external research out of its own resources. For all other accounts, the MFS Global Group operates a commission sharing arrangement that generates commission "credits" for the purchase of external research from commissions on equity trades in a manner consistent with Section 28(e). Under this arrangement the MFS Global Group may cause a client to pay commissions in excess of what the broker or other brokers might have charged for certain transactions in recognition of brokerage and research services provided by the executing broker. The MFS Global Group has voluntarily undertaken to reimburse clients from its own resources in an amount equal to all commission credits generated under this arrangement.

The research services obtained by the MFS Global Group through the use of commission credits may include: access to corporate management; industry conferences; research field trips to visit corporate management and/or to tour manufacturing, production or distribution facilities; statistical, research and other factual information or services such as investment research reports; access to analysts; a small number of expert networks; reports or databases containing corporate, fundamental, technical and political analyses; ESG-related information; portfolio modelling strategies; and economic research services, such as publications, chart services, and advice from economists concerning macroeconomics information, and analytical investment information about particular corporations.

Through the use of eligible brokerage and research services acquired with commission credits, the MFS Global Group initially avoids the additional expenses that it would incur if it developed comparable information through its own staff or if it purchased such services with its own resources. As a result, clients may pay more for their account transactions in the first instance than if the MFS Global Group caused clients to pay execution only rates. However, because the MFS Global Group has voluntarily undertaken to reimburse clients from its own resources for commission credits generated from client brokerage, the MFS Global Group ultimately assumes the additional expenses that it would incur if it purchased external research with its own resources.

Although the MFS Global Group generally bears the costs of external research, it generally does not pay, and therefore does not reimburse clients with respect to research that is made available by a broker to all of its customers and that the MFS Global Group generally considers to be of de minimis value, or for external research provided by executing brokers in fixed income transactions that incur mark-ups, mark-downs, and other fees rather than commissions. With respect to fixed income, the MFS Global Group believes that executing brokers in fixed income transactions do not charge lower mark-ups, mark-downs, commission equivalents or other fees if clients forego research services. Consequently, the MFS Global Group does not believe it pays higher mark-ups, mark-downs, commission equivalents or other fees to brokers on fixed income transactions than it would if it did not receive any research services from brokers. However, MiFID II generally considers research to be an inducement and therefore the MFS Global Group pays for certain categories of fixed income research received by the relevant affiliates out of its own resources.

Note 8: Taxation

The fund is subject to Luxembourg law with respect to its tax status. Under legislation and regulations currently prevailing in Luxembourg, the fund is subject to a "taxe d'abonnement" on its net assets at an annual rate of 0.05% for Class A, Class C, Class N, Class P, and Class W and 0.01% for Class I, Class S, and Class Z. The "taxe d'abonnement" is calculated and payable quarterly on the basis of the net assets at the end of each calendar quarter. Interest and dividend income, and gains on securities, may be subject to non-recoverable withholding taxes deducted at source in the countries of origin.

The fund is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with current regulations.

United Kingdom Tax Considerations – The Company has received “reporting fund” status for certain sub-funds and share classes for the fiscal year ended 31 January 2024. More information can be found at www.mfs.com.

Note 9: Line of Credit

Each sub-fund and other funds managed by MFS participate in an unsecured committed line of credit, subject to a \$250 million sublimit provided by a syndicate of banks under a credit agreement. Borrowings may be made for temporary financing needs. Interest is charged to each sub-fund, based on its borrowings, generally at a rate equal to the highest of 1) Daily Simple SOFR (Secured Overnight Financing Rate) plus 0.10%, 2) the U.S. Federal Funds Effective Rate, or 3) the Overnight Bank Funding Rate, each plus an agreed upon spread. A commitment fee, based on the average daily unused portion of the committed line of credit, is allocated among the participating sub-funds. The line of credit expires on 13 March 2025 unless otherwise extended or renewed. In addition, each sub-fund and other funds managed by MFS have established a \$200 million unsecured uncommitted borrowing arrangement with its depository bank for temporary financing needs. Interest is charged to each participating sub-fund, based on its borrowings, at rates equal to customary reference rates plus an agreed upon spread. Any interest fees are reflected in “Interest expense and similar charges” and any commitment fees are reflected in “Miscellaneous” expense in the Statements of Operations and Changes in Net Assets. None of the sub-funds had any borrowings outstanding under these arrangements at 31 January 2024.

Note 10: Open Forward Foreign Currency Exchange Contracts

At 31 January 2024, the sub-funds had outstanding the following forward foreign currency exchange contracts. Each sub-fund had sufficient cash and/or other securities to cover any commitments under these derivative contracts.

Total						\$3,006,185
(a) Net unamortized premiums received by the sub-fund amounted to \$1,741.						
(b) Net unamortized premiums received by the sub-fund amounted to \$10,967.						

The following abbreviations are used in this report and are defined:

BUBOR	Budapest Interbank Offered Rate
BZDIOVRA	Brazil Cetip Interbank Deposit Rate
CFRR	China Fixing Repo Rate
CLOIS	Sinacofi Chile Interbank Rate Average
KLIBOR	Kuala Lumpur Interbank Offered Rate
PRIBOR	Prague Interbank Offered Rate
SOFR	Secured Overnight Financing Rate
THBFX	Thai Baht Floating Rate Fixed
TIE	Interbank Equilibrium Interest Rate
USA-CPI-U	Consumer Price Index for all Urban Consumers
WIBOR	Warsaw Interbank Offered Rate

Note 15: Transaction Costs

For the year ended 31 January 2024, the sub-funds incurred transaction costs which have been defined as brokerage commissions (which may include costs related to Research, see Note 7) in respect of the purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets, and fees charged by the Depository for the execution of the sub-funds' transactions. Brokerage commissions are included in Identified Cost in the Schedules of Investments or in Net Realized Gain (Loss) on Investments, Derivatives, and Currency Transactions in the Statements of Operations and Changes in Net Assets. The reimbursement of Research by MFS, if any, is included in "Other" in the Statements of Operations and Changes in Net Assets. Fees charged by the Depository are disclosed as part of the Depository fee in the Statements of Operations and Changes in Net Assets.

Sub-Fund	Transaction Costs
Asia Ex-Japan Fund	\$96,796

(c) The commencement of operations of the sub-fund was 13 September 2023.

Note 16: Summary of accounting differences between Luxembourg legal and regulatory requirements for investment funds and accounting principles generally accepted in the United States

The fund's financial statements are prepared in accordance with Luxembourg legal and regulatory requirements for investment funds. These requirements differ in the manner in which discount is accreted and premium is amortized into income for certain fixed income securities from accounting principles generally accepted in the United States ("U.S. GAAP"). These differences do not change the total results of operations but may impact amounts reported for

net investment income and change in realized and unrealized gain (loss) for investments, derivatives, and currency translation. These differences have no impact on the net assets of the sub-funds. A description of the material differences and the financial statement impact for those impacted sub-funds are as follows:

	Luxembourg legal and regulatory requirements	U.S. GAAP	
Fixed income securities	Premium on fixed income securities is not required to be amortized to income on a daily basis. Discount on interest only securities is not required to be accreted to income on a daily basis.	Premium on fixed income securities is amortized to income on a daily basis. Discount on interest only securities is accreted to income on a daily basis.	
Sub-Fund	Total net investment income in accordance with Luxembourg legal and regulatory requirements	Net adjustment for amortization of premium and accretion of discount on certain fixed income securities	Total net investment income in accordance with U.S. GAAP

Note 17: Russia and Ukraine Conflict

The market disruptions, which began in late February 2022, associated with geopolitical events related to the conflict between Russia and Ukraine may adversely affect the value of the sub-funds' assets and thus the sub-funds' performance. In addition, the Diversified Income Fund, Emerging Markets Debt Fund, Emerging Markets Equity Fund, Emerging Markets Equity Research Fund, Global Equity Income Fund, and Global Total Return Fund invest in securities and/or derivative instruments that are economically tied to Russia and/or Ukraine. Escalation of the conflict between Russia and Ukraine in late February 2022 caused market volatility and disruption in the tradability of Russian securities, including closure of the local securities market, temporary restriction on securities sales by non-residents, and disruptions to clearance and payment systems. To the extent that the sub-funds are unable to sell securities, whether due to market constraints or to the sanctions imposed on Russia by the United States and other countries, those securities will be considered illiquid and the value of those securities will reflect their illiquid classification. This may negatively impact the sub-funds' performance and/or ability to achieve their investment objectives. Management continues to monitor these events and to evaluate the related impacts, if any, to the sub-funds.

Note 18: Share Class Events

Effective 24 February 2023, the following MFS Meridian Fund's share classes commenced operations:

Global Opportunistic Bond Fund IS1 (USD), ISH1 (EUR), ISH2 (GBP), WS1 (USD), WSH1 (EUR), WSH2 (GBP)

Effective 31 March 2023, the following MFS Meridian Fund's share class commenced operations:

U.S. Total Return Bond Fund IS1 (USD)

Effective 24 April 2023, the following MFS Meridian Funds' share classes commenced operations:

Blended Research European Equity Fund IF1 (EUR)
 Continental European Equity Fund IF1 (EUR), IF1 (GBP)
 Euro Credit Fund IF1 (EUR)
 Global Credit Fund IF1 (USD)

Global Equity Income Fund	IF1 (USD)
Global New Discovery Fund	IF1 (USD)
Global Strategic Equity Fund	IF1 (USD)

Effective 1 August 2023, the following MFS Meridian Fund's share classes commenced operations:

Global High Yield Fund	IS1 (USD), ISH1 (EUR), ISH2 (GBP)
------------------------	-----------------------------------

Effective 28 August 2023, the following MFS Meridian Funds' share classes commenced operations:

Contrarian Value Fund	P1 (EUR)
European Research Fund	ISD1 (EUR)
Global High Yield Fund	IS2 (USD), WS1 (USD), WSH1 (EUR), WS2 (USD), WSH2 (EUR), WSH2 (GBP)
Global New Discovery Fund	P1 (EUR)
Global Opportunistic Bond Fund	IH1 (CHF), WS2 (USD), WSH2 (EUR)
Limited Maturity Fund	IH1 (EUR)

Effective 13 September 2023, MFS Meridian Funds - Global Listed Infrastructure Fund commenced operations.

Effective 27 September 2023, the following MFS Meridian Funds' share classes were liquidated and closed:

Blended Research European Equity Fund	CH1 (USD)
Euro Credit Fund	A2 (EUR)

Effective 16 November 2023, the following MFS Meridian Fund's share class commenced operations:

Contrarian Value Fund	IS1 (EUR)
-----------------------	-----------

Effective 11 January 2024, the following MFS Meridian Funds' share classes were liquidated and closed:

Continental European Equity Fund	A1 (GBP)
Diversified Income Fund	AH2 (EUR), AH4 (EUR)
Emerging Markets Debt Fund	A1 (GBP), AH2 (EUR), WH2 (EUR), WH2 (GBP)
European Core Equity Fund	CH1 (USD)
European Research Fund	CH1 (USD), I3 (EUR)

Prudent Capital Fund	AH4 (EUR), WH1 (CHF)
U.K. Equity Fund	A1 (GBP), W2 (GBP)

Note 19: Subsequent Events

Effective 1 February 2024, the following MFS Meridian Funds' share classes commenced operations:

Euro Credit Fund	P1 (EUR)
European Value Fund	P1 (EUR)

Effective 28 March 2024, the following MFS Meridian Funds' share classes commenced operations:

Contrarian Value Fund	Z1 (JPY)
European Value Fund	WS1 (EUR)
Global High Yield Fund	ISH2 (EUR)

ADDENDUM

EXPENSE RATIOS (audited)

For the twelve months ended 31 January 2024:

The following expense ratio has been calculated in accordance with the Swiss Funds & Asset Management Association Guidelines on the calculation and disclosure of the Total Expense Ratio of collective investment schemes 16 May 2008 (Version of 20 April 2015).

Emerging Markets Debt Fund

Class Z1 (USD)	0.05%
----------------	-------

REMUNERATION POLICY (unaudited)

The Management Company has adopted a remuneration policy and implements related procedures and practices which are consistent with and promote sound and effective risk management in a manner appropriate to the Management Company's size, internal organization, and the nature, scope and complexity of its activities. The remuneration policy of the Management Company is administered and overseen by a remuneration committee composed of members of MFS executive management and its human resources team and is reviewed and approved by the remuneration committee and Board of Managers of the Management Company each financial year.

Further details on the remuneration policy, including a description of how remuneration and benefits are calculated, are available by referring to meridian.mfs.com (and clicking the link "Information on MFS' Remuneration Policy"), and a paper copy of such details is available upon request of the registered office of the Management Company without charge.

As of the Company's fiscal year end, the Management Company identified staff who performed activities in respect of the Company consisted of 69 individuals, inclusive of the independent Managers of the Management Company and certain delegated investment manager staff. The total amount of remuneration paid by the Management Company and its delegates to identified staff in respect of the Company during the Company's fiscal year was €34,611,291, which consisted of €2,405,801 in fixed remuneration and €32,205,490 in variable remuneration. Information on the remuneration paid during the year to identified staff is available upon request at the registered office of the Management Company based on the demonstration of a satisfactory need for such information.

None of the remuneration paid by the Management Company for the Company's financial year was paid directly by the Company or any sub-fund, or resulted from performance fees.

SECURITIES FINANCING TRANSACTIONS REGULATION (unaudited)

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") requires disclosure detailing the Company's use of securities financing transactions in the Company's annual and semiannual reports.

A securities financing transaction ("SFT") is defined per Article 31(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction;
- a margin lending transaction.

The SFTR also extends the disclosure requirements to total return swaps.

The disclosure requirements are presented in the tables below. For additional information regarding the sub-funds' usage of SFTs and total return swaps, refer to the following Notes within the Notes to Financial Statements:

- Repurchase Agreements: Note 2 and Note 12
- Securities Loaned: Note 4
- Total Return Swaps: Note 2 and Note 14

At 31 January 2024, the sub-funds had the following amounts of securities on loan as proportion to total lendable assets:

Sub-Fund	Market Value of Securities Loaned	Market Value as % of Total Lendable Assets (a)
European Smaller Companies Fund	€ 1,196,290	0.65%
European Value Fund	€38,953,394	1.28%
U.S. Value Fund	\$ 633,180	0.03%

(a) Total Lendable Assets is defined as "Investments, at value" on the Statements of Assets and Liabilities which excludes cash and cash equivalents.

At 31 January 2024, the sub-funds had the following amounts of assets engaged in each type of SFT and as a percentage of the sub-fund's net assets:

Sub-Fund	Market Value of Securities Loaned	% of Net Assets	Market Value of Repurchase Agreements	% of Net Assets
	Bi-Lateral		Cleared	
Settlement/clearing for each type of SFT:				
Asia Ex-Japan Fund	\$—	0.00%	\$702,449	2.06%
Contrarian Value Fund	\$—	0.00%	\$55,456,704	8.00%

Sub-Fund	Market Value of Securities Loaned	% of Net Assets	Market Value of Repurchase Agreements	% of Net Assets

Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors:

The sub-funds are not permitted to sell, reinvest or pledge collateral received in the form of securities. To the extent the sub-funds receive cash as collateral, such cash collateral would only be placed on deposit with credit institutions allowed under Luxembourg law, and if applicable may only be reinvested in high-quality government bonds, reverse repurchase transactions (provided the transactions are with credit institutions subject to prudential supervision and the sub-fund is able to recall at any time the full amount of cash on accrued basis) or short-term money market funds allowed by Luxembourg law in order to mitigate the risk of losses on reinvestment. The sub-funds did not receive cash collateral for SFTs or total return swaps at 31 January 2024.

Safekeeping of collateral received by the sub-funds as part of SFTs, number and names of custodians and the amount of the collateral assets safe-kept by each of the custodians:

To the Shareholders of
MFS Meridian Funds
4, rue Albert Borschette
L-1246, Luxembourg
Grand Duchy of Luxembourg

Opinion

We have audited the financial statements of MFS Meridian Funds (the "Fund") and of each of its sub-funds, which comprise the statements of assets and liabilities and the schedules of investments as at 31 January 2024, and the statements of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 January 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITOR'S REPORT

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

R.C.S. Luxembourg B 47 771
TVA LU 16063074

To the Shareholders of
MFS Meridian Funds
4, rue Albert Borschette
L-1246, Luxembourg
Grand Duchy of Luxembourg

Opinion

We have audited the financial statements of MFS Meridian Funds (the "Fund"), which comprises the statements of assets and liabilities, including the schedules of investments, as of 31 January 2024, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of MFS Meridian Funds at 31 January 2024, and the results of its operations and changes in net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of the Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements, and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by the Board of Directors, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

REPORT OF INDEPENDENT AUDITORS

Other Information

The Board of Directors is responsible for the other information. The other information comprises the Letter from the Chair, Performance Table, General Information, Corporate Governance, Certain Risk Management Disclosures, Statistical Information, Addendum, Shareholder complaints or inquiries, and SFDR disclosure/Annex but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Blended Research European Equity Fund ("MFS Blended Research European Equity Fund")
Legal entity identifier: 54930067ZHQOV0SGFJ15

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 22 November 2022, the MFS Blended Research European Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Blended Research European Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 93.10% of the equity securities in the portfolio of the MFS Blended Research European Equity Fund met at least one of the climate criteria, which represented 91.91% of the total assets. Equity securities represented 98.71% of the assets of the MFS Blended Research European Equity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	82.44	81.38
31 January 2023	70.46	70.20
31 October 2022	69.51	69.01

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	74.59	73.64
31 January 2023	62.73	62.50
31 October 2022	63.81	63.36

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
31 October 2022	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	93.10	91.91
31 January 2023	87.33	87.01
31 October 2022	87.33	86.71

● **... and compared to previous periods?**

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Blended Research European Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Blended Research European Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment

process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
ASML Holding NV	Information Technology	3.85	Netherlands

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS Blended Research European Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Blended Research European Equity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 98.71% of the total assets of the portfolio of the MFS Blended Research European Equity Fund; the remaining investments of 1.29% of the portfolio included cash and /or cash equivalent instruments; 93.10% of the equity securities in the portfolio of the MFS Blended Research European Equity Fund met at least one of the climate criteria, which represented 91.91% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 8.09% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Financials	16.35
Health Care	15.02
Industrials	14.85
Consumer Discretionary	12.07
Consumer Staples	11.70
Information Technology	7.42
Energy	6.39
Materials	6.14
Utilities	4.50
Communication Services	3.28
Real Estate	1.38
Cash & Cash Equivalents	0.77
Other	-0.11

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Blended Research European Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

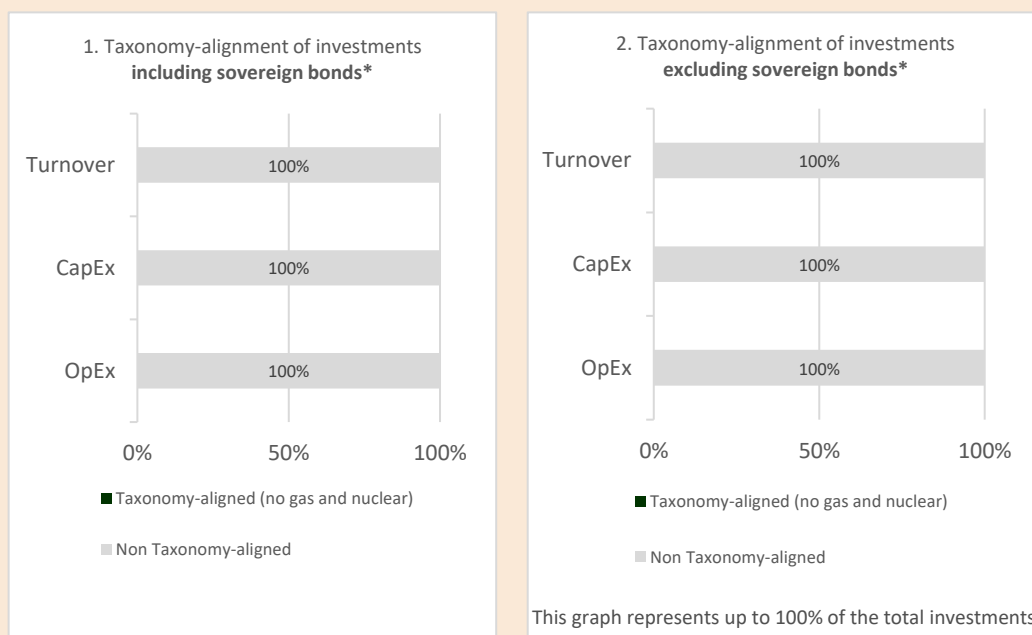

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In fossil fuel In nuclear energy

No. The MFS Blended Research European Equity Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

● **What was the share of investments made in transitional and enabling activities?**

Zero. The MFS Blended Research European Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
31 October 2022	0%	0%	0%

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Zero. The MFS Blended Research European Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Blended Research European Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered ‘achieving net zero’.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company’s progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS’ second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company’s or portfolio’s climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Blended Research European Equity Fund

During the reporting period, MFS investment professionals conducted 8 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Erste Group, GEA Group, Glencore, Iberdrola, Rolls Royce Holdings PLC, and Schneider Electric. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives, and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Schneider Electric SE, Shell Plc, UBS Group AG and TotalEnergies SE. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore Plc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Shell Plc, Glencore Plc and TotalEnergies SE.

How did this financial product perform compared to the reference benchmark?

Not applicable.

---	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Continental European Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Continental European Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 97.58% of the equity securities in the portfolio of the MFS Continental European Equity Fund met at least one of the climate criteria, which represented 93.70% of the total assets. Equity securities represented 96.02% of the assets of the MFS Continental European Equity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	93.86	90.12
31 January 2023	80.26	78.10
30 November 2021	75.14	73.56

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	90.58	86.97
31 January 2023	77.42	75.33
30 November 2021	72.70	71.19

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	97.58	93.70
31 January 2023	92.67	90.17
30 November 2021	90.79	88.88

● **... and compared to previous periods?**

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Continental European Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Continental European Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
Schneider Electric SE	Industrials	6.55	France
Nestle SA	Consumer Staples	6.38	Switzerland
SAP SE	Information Technology	5.99	Germany
Roche Holding AG	Health Care	5.64	Switzerland
LVMH Moët Hennessy Louis Vuitton SE	Consumer Discretionary	5.29	France
Linde PLC	Materials	5.14	United States
Novartis AG	Health Care	4.83	Switzerland
Capgemini SE	Information Technology	4.36	France
EssilorLuxottica SA	Health Care	3.25	France
Amadeus IT Group SA	Consumer Discretionary	2.93	Spain

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 10 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

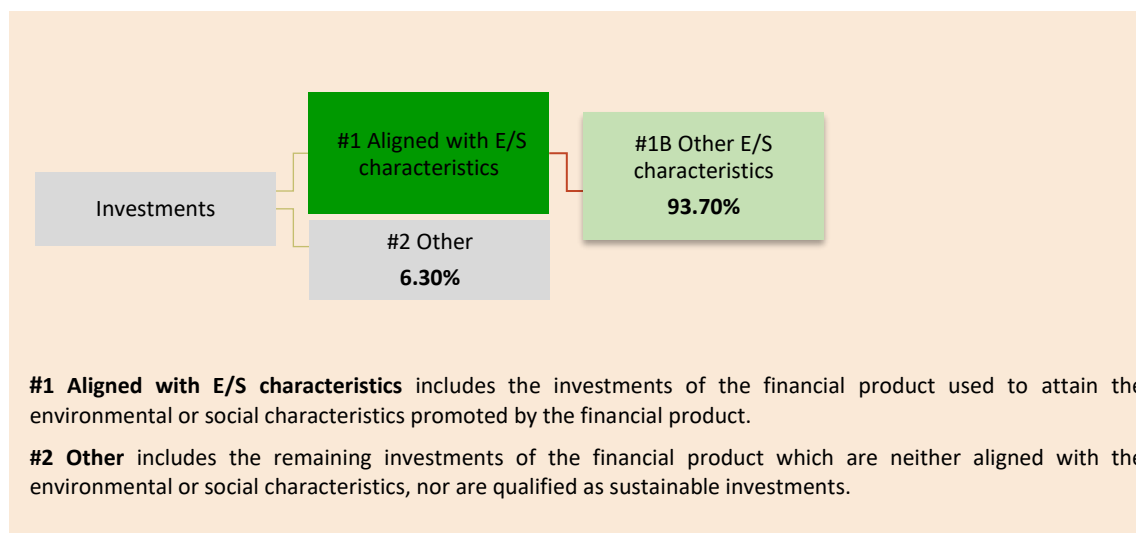

What was the proportion of sustainability-related investments?

The MFS Continental European Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Continental European Equity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 96.02% of the total assets of the portfolio of the MFS Continental European Equity Fund; the remaining investments of 3.98% in the portfolio included cash and / or cash equivalent instruments; 97.58% of the equity securities in the portfolio of the MFS Continental European Equity Fund met at least one of the climate criteria, which represented 93.70% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 6.30% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

In which economic sectors were the investments made?

Sectors	% Average weight
Health Care	21.08
Consumer Staples	14.51
Consumer Discretionary	13.69
Information Technology	13.53
Industrials	13.51
Financials	12.56
Materials	7.25
Communication Services	2.43
Energy	2.10
Utilities	0.55
Cash & Cash Equivalents	-1.93

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Continental European Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

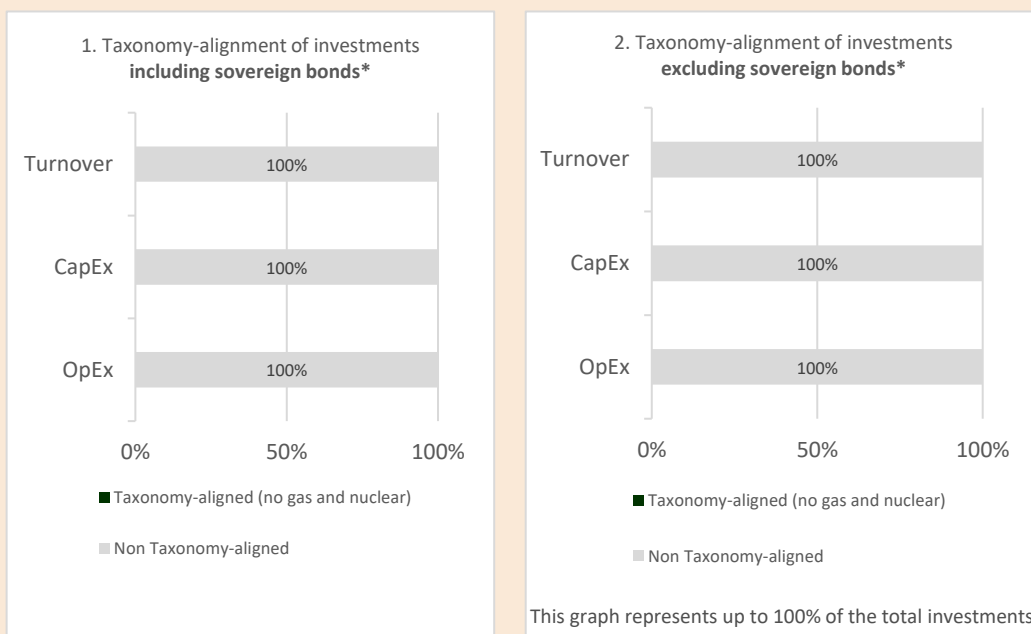

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:

In fossil fuel In nuclear energy

 No. The MFS Continental European Equity Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Continental European Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Continental European Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Continental European Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like

natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Continental European Equity Fund

During the reporting period, MFS investment professionals conducted 4 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Erste Group, GEA Group, Sika AG and Schneider Electric. Topics engaged on include identification of climate change risk and, Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Schneider Electric SE.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Contrarian Value Fund ("MFS Contrarian Value Fund")
Legal entity identifier: 549300MK0DQR28Y1H769

<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Contrarian Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Contrarian Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 96.75% of the equity securities in the portfolio of the MFS Contrarian Value Fund met at least one of the climate criteria, which represented 88.40% of the total assets. Equity securities represented 91.37% of the assets of the MFS Contrarian Value Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	86.58	79.11
31 January 2023	60.45	57.04
30 November 2021	63.88	60.44

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	77.37	70.69
31 January 2023	72.79	68.68
30 November 2021	56.70	53.62

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	96.75	88.40
31 January 2023	94.01	88.70
30 November 2021	81.29	76.91

● ***... and compared to previous periods?***

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Contrarian Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Contrarian Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

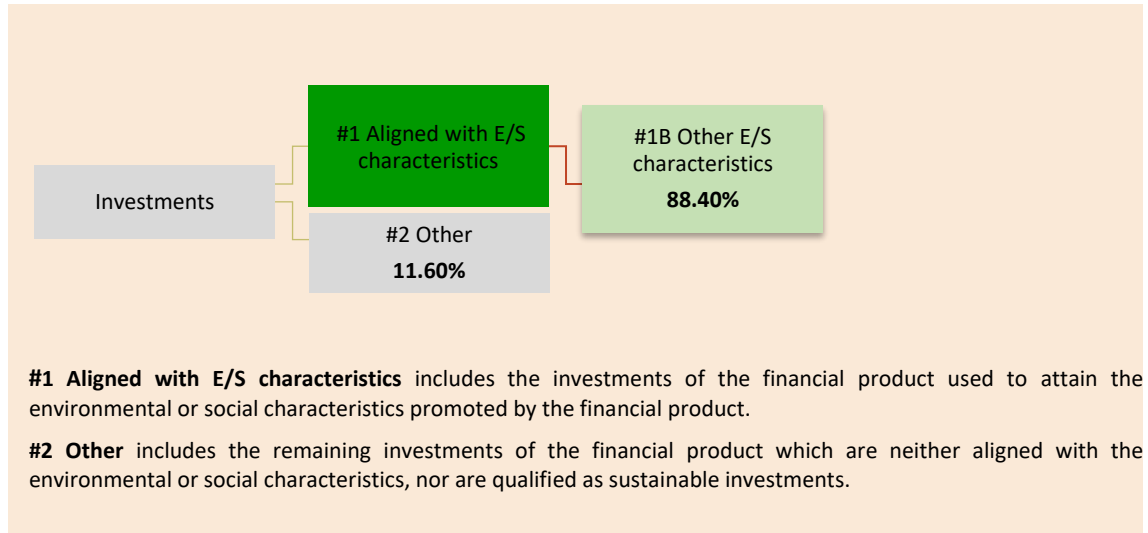

What was the proportion of sustainability-related investments?

The MFS Contrarian Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Contrarian Value Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

As of 31 January 2024, equity securities represented 91.37% of the total assets of the portfolio of the MFS Contrarian Value Fund; the remaining investments of 8.63% the portfolio included cash and / or cash equivalent instruments; 96.75% of the equity securities in the portfolio of the MFS Contrarian Value Fund met at least one of the climate criteria, which represented 88.40% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 11.60% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Contrarian Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

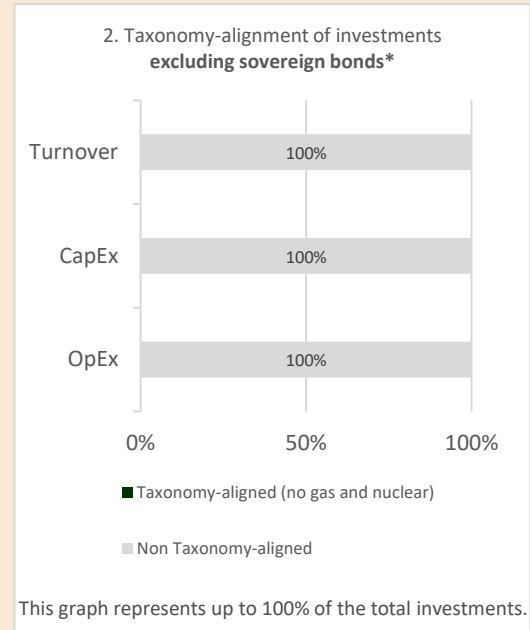

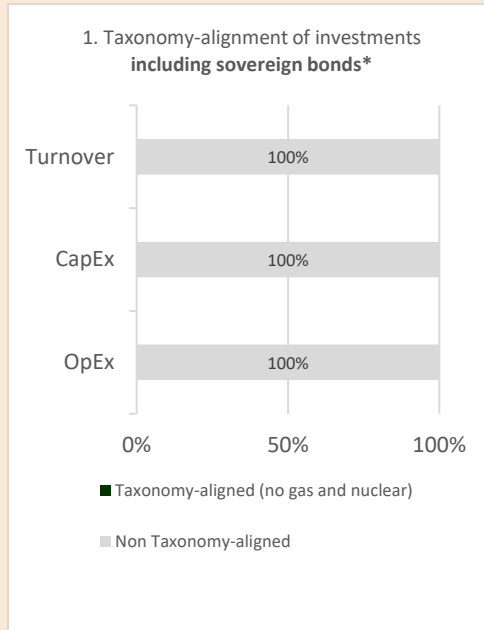

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel In nuclear energy

 No. The MFS Contrarian Value Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Contrarian Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Contrarian Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Contrarian Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like

natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Contrarian Value Fund

During the reporting period, MFS investment professionals conducted 5 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: ArcelorMittal, Bank of America Corp, National Grid PLC and Samsung Electronics Co Ltd. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives, and climate scenario analysis. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Bank of America Corporation and Citigroup Inc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Diversified Income Fund ("MFS Diversified Income Fund")
Legal entity identifier: 549300Y5OY3WDN3PCL65

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 30 November 2022, the MFS Diversified Income Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Diversified Income Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 76.93% of the equity securities in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 23% of the total assets; 58.69% of the corporate debt instruments in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 23.68% of total assets. Equity securities represented 29.90% and corporate debt instruments represented 40.35% of the assets of the MFS Diversified Income Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	66.65	19.93
31 January 2023	49.86	15.41
31 October 2022	60.65	18.71

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	51.50	20.78
31 January 2023	54.02	21.43
31 October 2022	54.28	22.30

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	52.48	15.69
31 January 2023	55.09	17.03
31 October 2022	54.57	16.83

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	20.89	8.43
31 January 2023	16.31	6.47
30 November 2022	17.19	7.19

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2022	0	0

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2022	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities

or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	1.78	0.72
31 January 2023	2.14	0.85
30 November 2022	2.33	0.96

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	76.93	23.00
31 January 2023	66.56	20.57
30 November 2022	71.60	22.08

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	58.69	23.68
31 January 2023	61.13	24.25
30 November 2022	62.39	25.63

● ***... and compared to previous periods?***

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Diversified Income Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Diversified Income Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

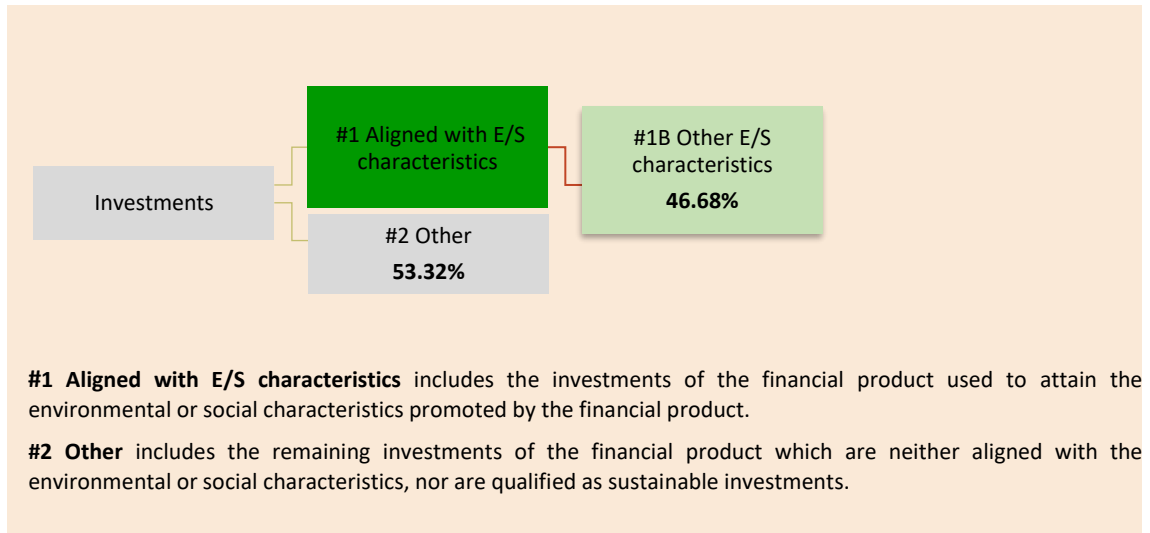

The MFS Diversified Income Fund aims to have at least 50% of the equity securities and 50% of the corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Diversified Income Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, equity securities represented 29.90% and corporate debt instruments represented 40.35% of the total assets of the portfolio of the MFS Diversified Income Fund; the remaining investments 29.75% of the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 76.93% of the equity securities in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 23.00% of the total assets of the portfolio; 58.69% of the corporate debt instruments in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 23.68% of the total assets of the portfolio; 46.68% of the total assets of the portfolio attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 53.32% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting

Asset allocation describes the share of investments in specific assets.

purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio’s value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. (“S&P Global Market Intelligence”). GICS is a service mark

Taxonomy-aligned activities are expressed as a shareof:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Diversified Income Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

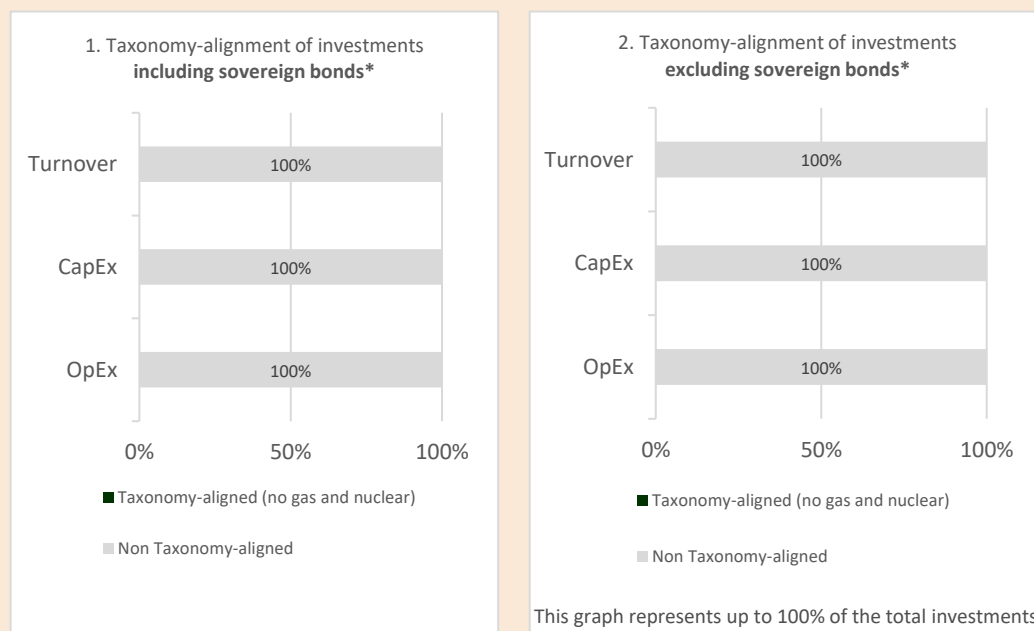

In fossil fuel

In nuclear energy

No. The MFS Diversified Income Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments made in transitional and enabling activities?**

Zero. The MFS Diversified Income Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Diversified Income Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Diversified Income Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives") Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the

limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Diversified Income Fund

During the reporting period, MFS investment professionals conducted 28 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA Group, Bank of America Corp, Becton Dickinson & Co, Diageo PLC, Duke Energy Corp, Edison International, Enel SpA, Erste Group Bank AG, Glencore PLC, Iberdrola SA, Omnicom Group Inc, Plains All American Pipeline LP, ProLogis REIT, Rayonier Inc REIT, Samsung Electronics Co Ltd, Sasol Ltd, Saudi Arabian Oil Co, Southern Co, Suncor Energy Inc, Thermo Fisher Scientific Inc, Toronto-Dominion Bank, Valero Energy Corp, Volkswagen AG, Vulcan Materials Co and Westinghouse Air Brake Technologies Corp. Topics engaged on include identification of climate change risk, physical risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: TotalEnergies SE. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore Plc. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Coterra Energy Inc, Texas Roadhouse, Inc. and Exxon Mobil Corporation. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Suncor Energy Inc., Valero Energy Corporation, The Hartford Financial Services Group, Inc, Glencore Plc, Total Energies SE, Comcast Corporation, Exxon Mobil Corporation and Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Euro Credit Fund ("MFS Euro Credit Fund ")
Legal entity identifier: 549300DZGNNNNMSY602

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Euro Credit Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Euro Credit Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 78.79% of the corporate debt instruments in the portfolio of the MFS Euro Credit Fund met at least one of the climate criteria, which represented 68.57% of the total assets. Corporate debt instruments represented 87.03% of the assets of the MFS Euro Credit Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

● How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	61.93	53.90
31 January 2023	57.53	41.73
30 November 2021	56.13	48.72

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	50.23	43.72
31 January 2023	49.91	36.20
30 November 2021	44.04	38.23

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	6.73	5.86
31 January 2023	8.18	5.93
30 November 2021	6.92	6.0

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	78.79	68.57
31 January 2023	79.06	57.34
30 November 2022	76.48	66.39

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Euro Credit Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Euro Credit Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact

indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

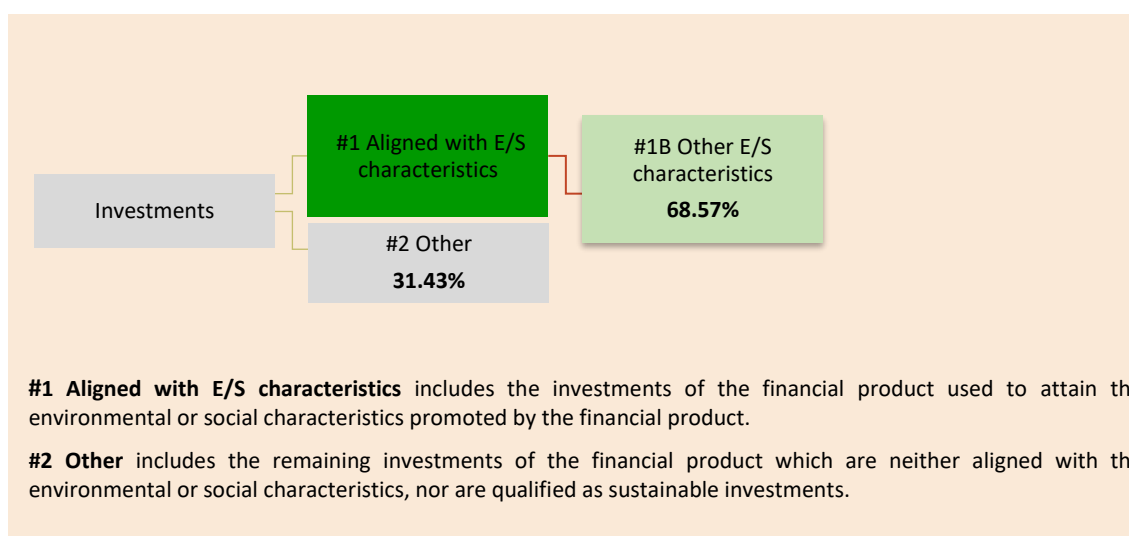

The MFS Euro Credit Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Euro Credit Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

As of 31 January 2024, corporate debt instruments represented 87.03% of the total assets of the portfolio of the MFS Euro Credit Fund; the remaining investments of 12.97% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments. As of 31 January 2024, 78.79% of the corporate debt instruments in the portfolio of the MFS Euro Credit Fund met at least one of the climate criteria, which represented 68.57% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 31.43% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

Taxonomy-aligned activities are expressed as a shareof:

- **turnover**

reflecting the share of revenue from green activities of investee companies

- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

reflecting green operational activities of investee.

● In which economic sectors were the investments made?

Sectors	% Average weight

Government-Related-Sovereign	0.66
Securitized-ABS	0.20
Derivatives-OTC	-2.59

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Euro Credit Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:
 In fossil fuel In nuclear energy

No. The MFS Euro Credit Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Euro Credit Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Euro Credit Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Euro Credit Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements - MFS Euro Credit Fund

During the reporting period, MFS investment professionals conducted 14 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA group, Duke Energy Corp, E. ON. SE, Enel, SpA, Engie SA, Erste Group, Glencore PLC, National Grid PLC, RAC Bond, Thermo Fisher Scientific Inc, Toronto-Dominion Bank, and Volkswagen AG. Topics engaged on include identification of climate change risk, physical risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – European Core Equity Fund ("MFS European Core Equity Fund ")
Legal entity identifier: 6Y75067IIDSWFOENA317

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Core Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Core Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date")

As of 31 January 2024, 90.85% of the equity securities in the portfolio of the MFS European Core Equity Fund met at least one of the climate criteria, which represented 90.40% of the total assets. Equity securities represented 99.50% of the assets of the MFS European Core Equity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - –ensuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	76.56	76.19
31 January 2023	65.35	64.58
30 November 2021	66.92	66.17

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	80.03	79.64
31 January 2023	71.72	70.88
30 November 2021	68.00	67.26

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	90.85	90.40
31 January 2023	85.52	84.52
30 November 2021	87.20	86.22

...and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Core Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Core Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”)” At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	3.88	France
Schneider Electric SE	Industrials	3.76	France
Linde PLC	Materials	3.55	United States

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS European Core Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Core Equity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 99.50% of the total assets of the portfolio of the MFS European Core Equity Fund; the remaining investments of 0.50% of the portfolio included cash and / or cash equivalent instruments; 90.85% of the equity securities in the portfolio of the MFS European Core Equity Fund met at least one of the climate criteria, which represented 90.40% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 9.60% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

Sectors	% Average weight
Industrials	17.13
Consumer Staples	16.72
Financials	16.60
Consumer Discretionary	16.02
Health Care	13.26
Materials	9.81
Communication Services	3.89
Real Estate	3.01
Information Technology	2.45
Cash & Cash Equivalents	0.95
Equity Warrants	0.05
Other	-0.04

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS European Core Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?***

Yes:

In fossil fuel

In nuclear energy

No. The MFS European Core Equity Fund does not commit to make investments aligned with the EU Taxonomy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS European Core Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS European Core Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Core Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered ‘achieving net zero’.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company’s progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS’ second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company’s or portfolio’s climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details

regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS European Core Equity Fund

During the reporting period, MFS investment professionals conducted 5 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Diageo PLC, Erste Group, GEA Group, Rolls-Royce Holdings PLC and Schneider Electric SE. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Aena S.M.E. SA, Schneider Electric SE and UBS Group AG.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – European Research Fund ("MFS European Research Fund")
Legal entity identifier: S9K235E4P9KO3JXU6G54

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Research Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Research Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 96.75% of the equity securities in the portfolio of the MFS European Research Fund met at least one of the climate criteria, which represented 94.82% of the total assets. Equity securities represented 98.00% of the assets of the MFS European Research Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **How did the sustainability indicators perform?**

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	85.89	84.18
31 January 2023	65.87	64.84
30 November 2021	60.91	60.43

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	84.47	82.79
31 January 2023	66.02	64.98
30 November 2021	68.20	67.71

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	96.75	94.82
31 January 2023	87.20	85.84
30 November 2021	86.71	86.03

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Research Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Research Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

Largest investments	Sector	Asset %	Country
Nestle SA	Consumer Staples	4.37	Switzerland
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	4.08	France
Roche Holding AG	Health Care	3.49	Switzerland
Schneider Electric SE	Industrials	3.10	France
ASML Holding NV	Information Technology	3.08	Netherlands
Linde PLC	Materials	3.02	United States
TotalEnergies SE	Energy	2.43	France
Wolters Kluwer NV	Industrials	2.35	Netherlands
Diageo PLC	Consumer Staples	2.22	United Kingdom
BNP Paribas SA	Financials	2.04	France
British American Tobacco PLC	Consumer Staples	1.85	United Kingdom
Iberdrola SA	Utilities	1.84	Spain
Experian PLC	Industrials	1.79	United Kingdom
Cie Financiere Richemont SA	Consumer Discretionary	1.74	Switzerland
Novartis AG	Health Care	1.74	Switzerland

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023 and 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

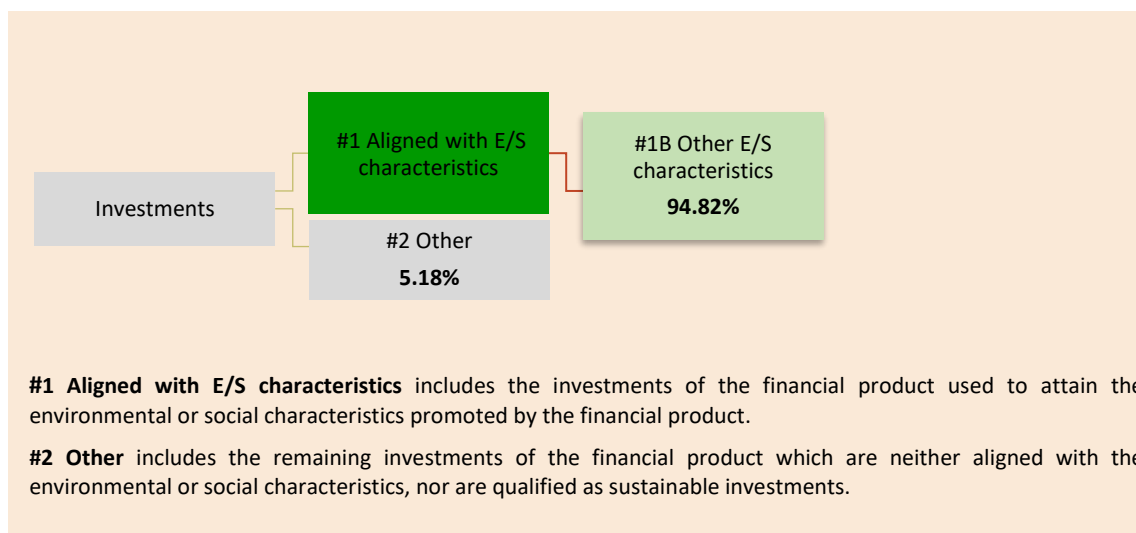

What was the proportion of sustainability-related investments?

The MFS European Research Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Research Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 98.00% of the total assets of the portfolio of the MFS European Research Fund; the remaining investments of 2.00% in the portfolio included cash and / or cash equivalent instruments; 96.75% of the equity securities in the portfolio of the MFS European Research Fund met at least one of the climate criteria, which represented 94.82% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 5.18% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Financials	17.61
Consumer Discretionary	14.48
Industrials	13.44
Health Care	11.56
Consumer Staples	11.53
Materials	7.47
Energy	6.04
Utilities	5.54
Information Technology	5.18
Communication Services	4.33
Cash & Cash Equivalents	1.62
Real Estate	0.74
Equity Warrants	0.07
Other	-0.07

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS European Research Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel

In nuclear energy

No. The MFS European Research Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Zero. The MFS European Research Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS European Research Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Research Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data.

In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS European Research Fund

During the reporting period, MFS investment professionals conducted 10 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Diageo PLC, E. ON SE, GEA Group, Glencore PLC, Iberdrola SA, National Grid PLC, Rolls-Royce Holdings PLC and Schneider Electric SE. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: UBS Group AG, Schneider Electric SE and TotalEnergies SE. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore Plc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Danske Bank A/S, Glencore Plc and TotalEnergies SE.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – European Smaller Companies Fund ("MFS European Smaller Companies Fund")

Legal entity identifier: VOCTT9HXYER2M74L6515

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Smaller Companies Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Smaller Companies Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 87.13% of the equity securities in the portfolio of the MFS European Smaller Companies Fund met at least one of the climate criteria, which represented 86.27% of the total assets. Equity securities represented 99.01% of the assets of the MFS European Smaller Companies Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	76.12	75.37
31 January 2023	49.08	45.41
30 November 2021	52.85	50.03

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	63.25	62.63
31 January 2023	57.31	53.03
30 November 2021	46.70	44.20

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	87.13	86.27
31 January 2023	75.56	69.91
30 November 2021	69.43	65.72

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Smaller Companies Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Smaller Companies Fund

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
Cranswick PLC	Consumer Staples	4.81	United Kingdom

Legrand SA	Industrials	1.78	France

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS European Smaller Companies Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Smaller Companies Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, equity securities represented 99.01% of the total assets of the portfolio of the MFS European Smaller Companies Fund; the remaining investments of 0.99% in the portfolio included cash and / or cash equivalent instruments; 87.13% of the equity securities in the portfolio of the MFS European Smaller Companies Fund met at least one of the climate criteria, which represented 86.27% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 13.73% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Other	-0.06

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS European Smaller Companies Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

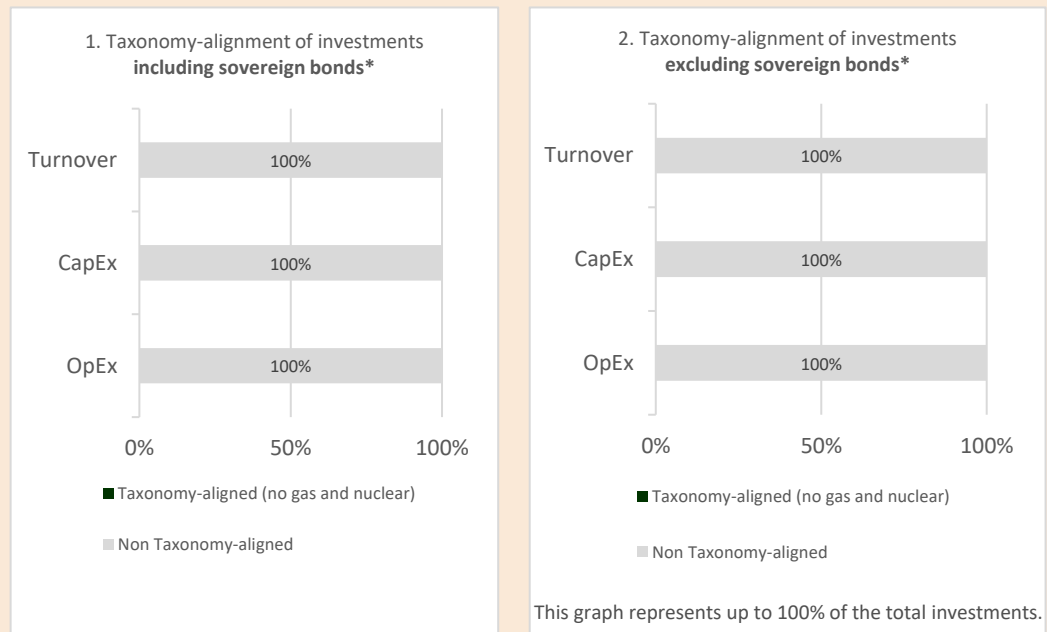

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:
 In fossil fuel In nuclear energy

No. The MFS European Smaller Companies Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

Zero. The MFS European Smaller Companies Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS European Smaller Companies Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Smaller Companies Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed

a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS European Smaller Companies Fund

During the reporting period, MFS investment professionals conducted 2 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Forterra PLC, GEA Group. Topics engaged on include identification of climate change risk. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Corticeira Amorim SGPS SA.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – European Value Fund ("MFS European Value Fund")
Legal entity identifier: FOW0N0ZBCI2YVLH77334

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

 No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 98.10% of the equity securities in the portfolio of the MFS European Value Fund met at least one of the climate criteria, which represented 95.07% of the total assets. Equity securities represented 96.90% of the assets of the European Value Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	88.66	85.91
31 January 2023	66.20	64.28
30 November 2021	67.00	66.07

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	88.09	85.37
31 January 2023	81.02	78.68
30 November 2021	72.60	71.63

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	98.10	95.07
31 January 2023	93.32	90.62
30 November 2021	87.30	86.09

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

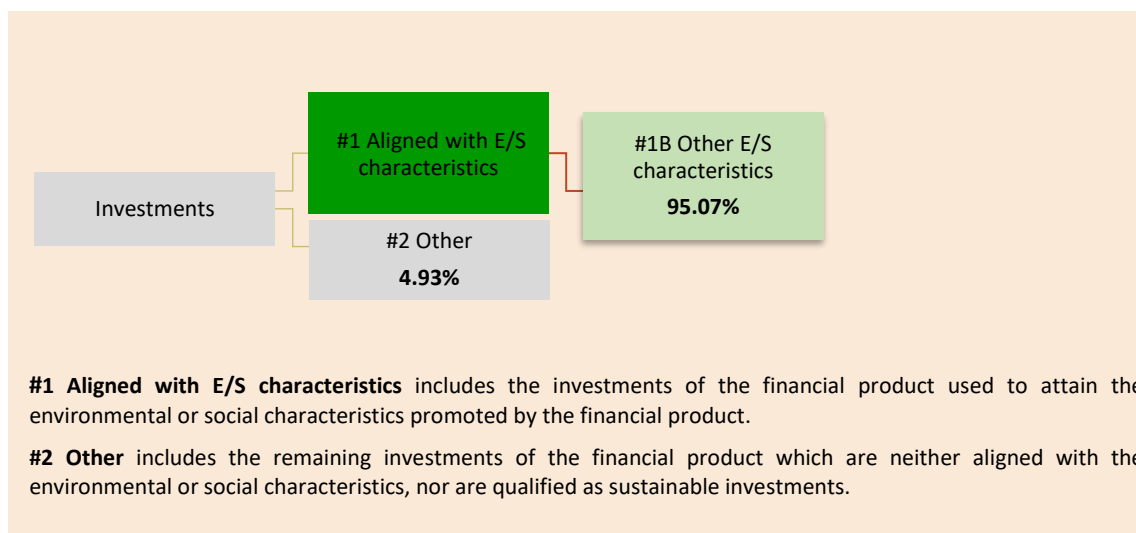

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS European Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Value Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, equity securities represented 96.90% of the total assets of the portfolio of the MFS European Value Fund; the remaining investments of 3.10% in the portfolio included cash and / or cash equivalent instruments; 98.10% of the equity securities in the portfolio of the MFS European Value Fund met at least one of the climate criteria, which represented 95.07% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 4.93% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS European Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

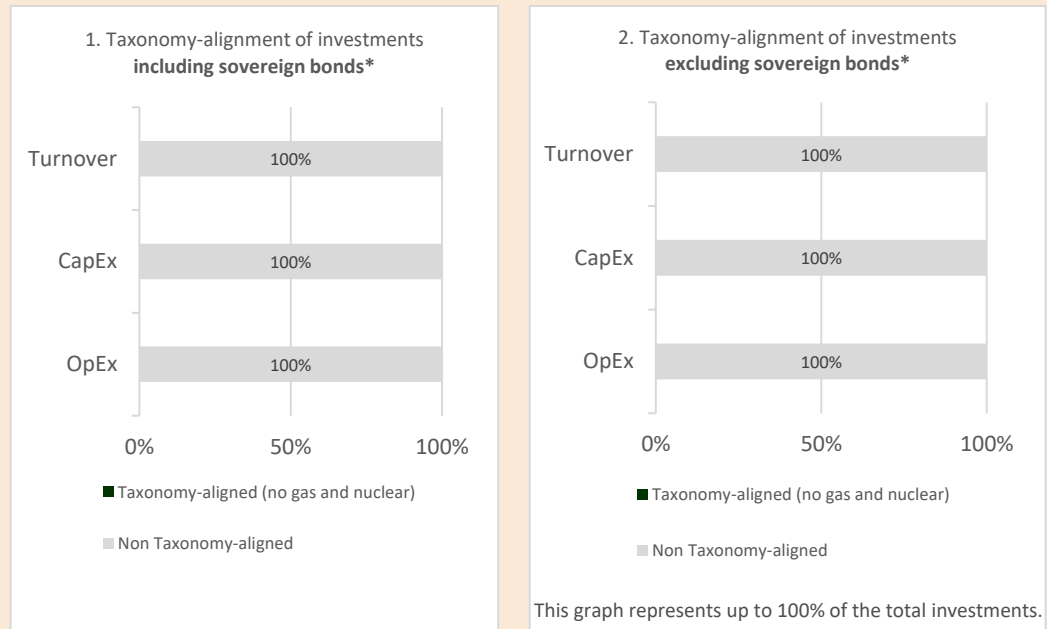

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:
 In fossil fuel In nuclear energy

No. The MFS European Value Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

● Zero. The MFS European Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Zero. The MFS European Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting – MFS European Value Fund

During the reporting period, MFS investment professionals conducted 7 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Diageo PLC, E. ON SE, Erste Group, GEA Group, Iberdrola SA, National Grid PLC and Schneider Electric SE. Topics engaged on include identification of climate change risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Schneider Electric SE and UBS Group AG.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Emerging Markets Debt Fund ("MFS Emerging Markets Debt Fund")

---	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 28 August 2023, the MFS Emerging Markets Debt Fund promoted the MFS Emerging Markets Sovereign Characteristic and the MFS Low Carbon Transition Characteristic in respect of which MFS assessed issuers of government and government related issuers of debt instruments (“sovereign debt issuers”) and corporate debt issuers (where applicable) against the indicators or criteria of the applicable characteristic. In particular, the MFS Emerging Markets Debt Fund will have at least 50% of the combined sovereign and corporate debt instruments (the “Eligible Assets”) in the portfolio invested in sovereign debt issuers that meet at least one of the five indicators of the MFS Emerging Markets Debt Characteristic; and / or corporate debt issuers that meet at least one of the four climate criteria of the MFS Low Carbon Transition Characteristic.

As of 31 January 2024, 84.05% of Eligible Assets in the portfolio of the MFS Emerging Markets Debt Fund met at least one of the indicators or climate criteria, which represented 76.14% of the total assets (of which 63.78% represented sovereign debt instruments and 12.36% represented corporate debt instruments). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The following periodic disclosure relates to the period from 28 August 2023 to 31 January 2024 on the MFS Emerging Market Sovereign Characteristic or the MFS Low Carbon Transition Characteristic (“MFS Characteristics”).

MFS Characteristics	% of Eligible Assets in the portfolio meeting the MFS Characteristics	% of total assets in the portfolio meeting the MFS Characteristics
31 January 2024	84.05	76.14

The following periodic disclosure relates to the period from 28 August 2023 to 31 January 2024 on the MFS Emerging Market Sovereign Characteristic. Please note that corporate issuers wholly owned by a sovereign entity are treated as assets eligible for consideration within this characteristic.

The Legatum Prosperity Index™ Education Pillar Country Indicator (the ‘Legatum Education Pillar’) – the percentage (%) of sovereign debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator in accordance with the methodology set out in the website disclosure (see link below). The Legatum Prosperity Index is the property of Legatum Institute Limited.

Legatum Education Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	59.72	54.10

The Legatum Prosperity Index™ Health Pillar Country Indicator (the ‘Legatum Health Indicator’) – the percentage (%) of sovereign debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator in accordance with the methodology set out in the website disclosure (see link below). The Legatum Prosperity Index is the property of Legatum Institute Limited.

Legatum Health Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	39.64	35.91

The average corruption score (Principal Adverse Impact Indicator 21) based on the Control of Corruption indicator of the World Bank Worldwide Governance Indicators (‘WGI’) – the percentage (%) of corporate debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator in accordance with the methodology set out in the website disclosure (see link below).

WGI Control of Corruption Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	26.47	23.98

The average political stability score (Principal Adverse Impact Indicator 23) based on the Political Stability and Absence of Violence / Terrorism indicator of the WGI – the percentage (%) of corporate debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator in accordance with the methodology set out in the website disclosure (see link below).

WGI Political Stability and Absence of Violence / Terrorism Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	45.95	41.63

The average rule of law score (Principal Adverse Impact Indicator 24) based on the WGI on Rule of Law indicator – the percentage (%) of corporate debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator accordance with the methodology set out in the website disclosure (see link below).

WGI Rule of Law Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	37.10	33.79

Compliance with indicators – measuring the percentage (%) of sovereign debt instruments in the portfolio that complied with at least one of one of the five indicators above in accordance with the methodology set out in the website disclosure (see link below).

MFS Emerging Market Sovereign Indicators	% of sovereign debt instruments in the portfolio meeting any indicator	% of total assets in the portfolio meeting any indicator
31 January 2024	70.40	63.78

The following periodic disclosure relates to the period from 28 August 2023 to 31 January 2024 on the MFS Low Carbon Transition Characteristic

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	9.99	9.05

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	3.52	3.19

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	3.39	3.07

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	13.64	12.36

● **... and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Emerging Markets Debt Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Emerging Markets Debt Fund.

The MFS Emerging Markets Sovereign Characteristic incorporates the following governance principal adverse indicators applicable to sovereigns:

- Average corruption score;
- Average political stability score;

- Average rule of law score.

Climate Criterion 1 of the MFS Low Carbon Transition Characteristic is measured using the following greenhouse gas emissions principal adverse indicators:

- GHG emissions (scope 1 and 2, and 3 where available);
- GHG intensity of investee companies.

To complement the promotion of the MFS Low Carbon Transition Characteristic, MFS makes available to MFS Investment Professionals the following additional greenhouse gas emissions principal adverse indicators:

- carbon footprint;
- exposure to companies active in the fossil fuel sector;
- share of non-renewable energy consumption;
- production and energy consumption intensity per high impact climate sector;
- (collectively, the "Additional Emissions Indicators").

MFS also makes available the following social principal adverse indicators:

- violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises;
- board gender diversity.

MFS Investment Professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with the MFS global stewardship team and team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate). Information on how principal adverse impacts on sustainability (ESG) factors were considered will be made available in the annual report.

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 28 August 2023 to 31 January 2024.

What were the top investments of this financial product?

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

The MFS Emerging Markets Debt Fund aims to have at least 50% of the Eligible Assets meeting the MFS Characteristics from the effective date of 28 August 2023 and therefore aligned with the E/S characteristics promoted by the MFS Emerging Markets Debt Local Currency Fund (i.e. # 1) from the effective date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, Eligible Assets represented 90.59% of the total assets of the portfolio of the MFS Emerging Markets Debt Fund (of which 63.78% represented sovereign debt instruments and 12.36% represented corporate debt instruments); the remaining investments of 26.81% in the portfolio included derivatives, cash and / or cash equivalent instruments; 84.05% of the Eligible Assets in the portfolio of the MFS Emerging Markets Debt Fund met at least one of the climate criteria, which represented 76.14% of the total assets of the portfolio that attained the MFS Emerging Market Sovereign Characteristic or MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 23.86% of the total assets were not aligned with the MFS Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

Sectors	% Average weight
Government-Related-Sovereign	45.32
Government-Related-Agency	19.13

Corporate-Financial Institutions	3.19
Government-Related-Local Authority	0.18
Government-Related-Supranational	0.09
Derivatives-OTC	0.02
Other	-0.19

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Emerging Markets Debt Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?***

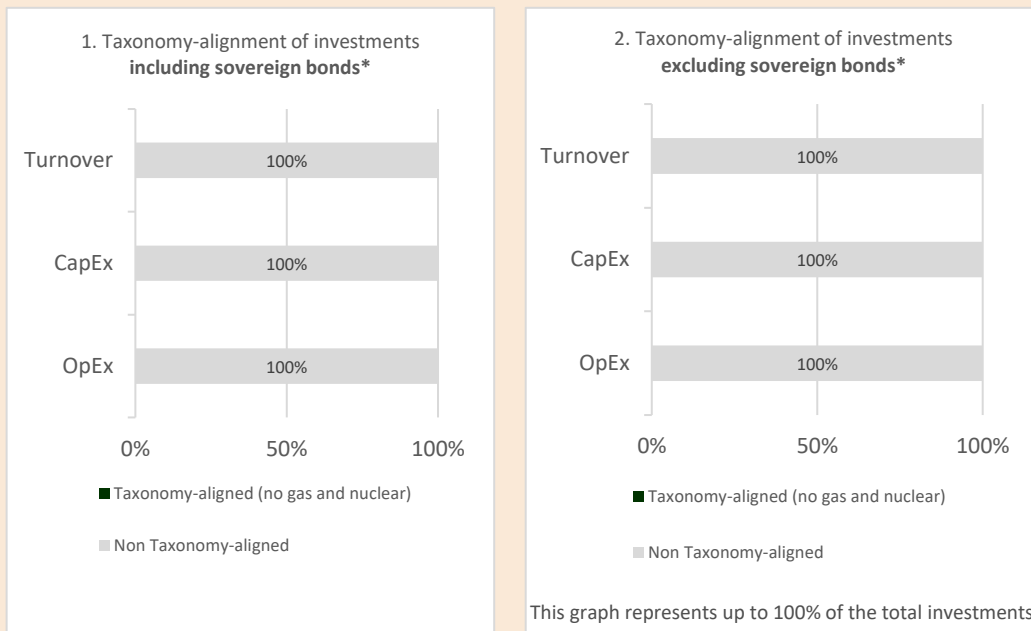

Yes:
 In fossil fuel In nuclear energy

No. The MFS Emerging Markets Debt Fund does not commit to make investments aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Emerging Markets Debt Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Emerging Markets Debt Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt assets that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Carbon Transition Characteristic which may include cash and cash equivalent instruments and currency derivatives which did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Emerging Markets Debt Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements - MFS Emerging Markets Debt Fund

During the reporting period, MFS investment professionals conducted 4 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Enel Spa, Engie SA, Sasol Ltd and Saudi Arabian Oil Co. Topics engaged on include identification of climate change risk, physical risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Emerging Markets Debt Local Currency Fund ("MFS Emerging Markets Debt Local Currency Fund")
Legal entity identifier: UQHM30IE5XP13N5F8C87

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes **No**

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 28 August 2023, the MFS Emerging Markets Debt Local Currency Fund promoted the MFS Emerging Markets Sovereign Characteristic and the MFS Low Carbon Transition Characteristic in respect of which MFS assessed issuers of government and government related issuers of debt instruments ("sovereign debt issuers") and corporate debt issuers (where applicable) against the indicators or criteria of the applicable characteristic. In particular, the MFS Emerging Markets Debt Local Currency Fund will have at least 50% of the combined sovereign and corporate debt instruments (the "Eligible Assets") in the portfolio invested in sovereign debt issuers that meet at least one of the five indicators of the MFS Emerging Markets Debt Characteristic; and / or corporate debt issuers that meet at least one of the four climate criteria of the MFS Low Carbon Transition Characteristic.

As of 31 January 2024, 97.12% of Eligible Assets in the portfolio of the MFS Emerging Markets Debt Local Currency Fund met at least one of the indicators or climate criteria, which represented 86.65% of the total assets (of which 85.00% represented sovereign debt instruments and 1.65% represented corporate debt instruments). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The following periodic disclosure relates to the period from 28 August 2023 to 31 January 2024 on the MFS Emerging Market Sovereign Characteristic or the MFS Low Carbon Transition Characteristic (“MFS Characteristics”).

WGI Control of Corruption Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	33.26	29.67

The average political stability score (Principal Adverse Impact Indicator 23) based on the Political Stability and Absence of Violence / Terrorism indicator of the WGI – the percentage (%) of sovereign debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator in accordance with the methodology set out in the website disclosure (see link below).

WGI Political Stability and Absence of Violence / Terrorism Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	63.55	56.70

The average rule of law score (Principal Adverse Impact Indicator 24) based on the WGI on Rule of Law indicator – the percentage (%) of sovereign debt instruments invested in the portfolio invested in sovereign debt issuers that met this indicator accordance with the methodology set out in the website disclosure (see link below).

WGI Rule of Law Indicator	% of sovereign debt instruments in the portfolio meeting this indicator	% of total assets in the portfolio meeting this criterion
31 January 2024	55.37	49.40

Compliance with indicators – measuring the percentage (%) of sovereign debt instruments in the portfolio that complied with at least one of one of the five indicators above in accordance with the methodology set out in the website disclosure (see link below).

MFS Emerging Market Sovereign Indicators	% of sovereign debt instruments in the portfolio meeting any indicator	% of total assets in the portfolio meeting any indicator
31 January 2024	95.28	85.01

The following periodic disclosure relates to the period from 28 August 2023 to 31 January 2024 on the MFS Low Carbon Transition Characteristic. Please note that corporate issuers that are not wholly owned by a sovereign entity are treated as assets eligible for consideration within this characteristic.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	1.84	1.65

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0.34	0.30

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	1.84	1.65

● **... and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Emerging Markets Debt Local Currency Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Emerging Markets Debt Local Currency Fund.

The MFS Emerging Markets Sovereign Characteristic incorporates the following governance principal adverse indicators applicable to sovereigns:

- Average corruption score;

- Average political stability score;
- Average rule of law score.

Climate Criterion 1 of the MFS Low Carbon Transition Characteristic is measured using the following greenhouse gas emissions principal adverse indicators:

- GHG emissions (scope 1 and 2, and 3 where available);
- GHG intensity of investee companies.

To complement the promotion of the MFS Low Carbon Transition Characteristic, MFS makes available to MFS Investment Professionals the following additional greenhouse gas emissions principal adverse indicators:

- carbon footprint;
- exposure to companies active in the fossil fuel sector;
- share of non-renewable energy consumption;
- production and energy consumption intensity per high impact climate sector;
- (collectively, the "Additional Emissions Indicators").

MFS also makes available the following social principal adverse indicators:

- violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises;
- board gender diversity.

MFS Investment Professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with the MFS global stewardship team and team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate). Information on how principal adverse impacts on sustainability (ESG) factors were considered will be made available in the annual report.

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

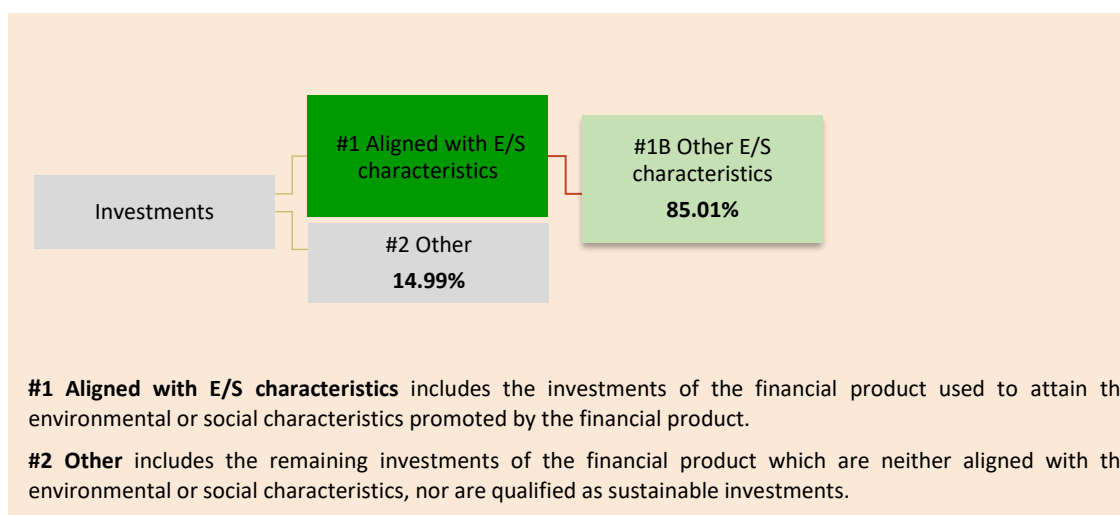

The MFS Emerging Markets Debt Local Currency Fund aims to have at least 50% of the Eligible Assets meeting the MFS Characteristics from the effective date of 28 August 2023 and therefore aligned with the E/S characteristics promoted by the MFS Emerging Markets Debt Local Currency Fund (i.e. # 1) from the effective date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, Eligible Assets represented 89.22% of the total assets of the portfolio of the MFS Emerging Markets Debt Local Currency Fund (of which 85.01% represented sovereign debt instruments and 3.80% represented corporate debt instruments); the remaining investments of 19.53% in the portfolio included derivatives, cash and / or cash equivalent instruments; 97.12% of the Eligible Assets in the portfolio of the MFS Emerging Markets Debt Local Currency Fund met at least one of the climate criteria, which represented 85.01% of the total assets of the portfolio that attained the MFS Emerging Market Sovereign Characteristic or MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 14.99% of the total assets were not aligned with the MFS Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a shareof:
 - **turnover** reflecting the share of revenue from green activities of investee companies
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of

Not Classified	-0.24

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Emerging Markets Debt Local Currency Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

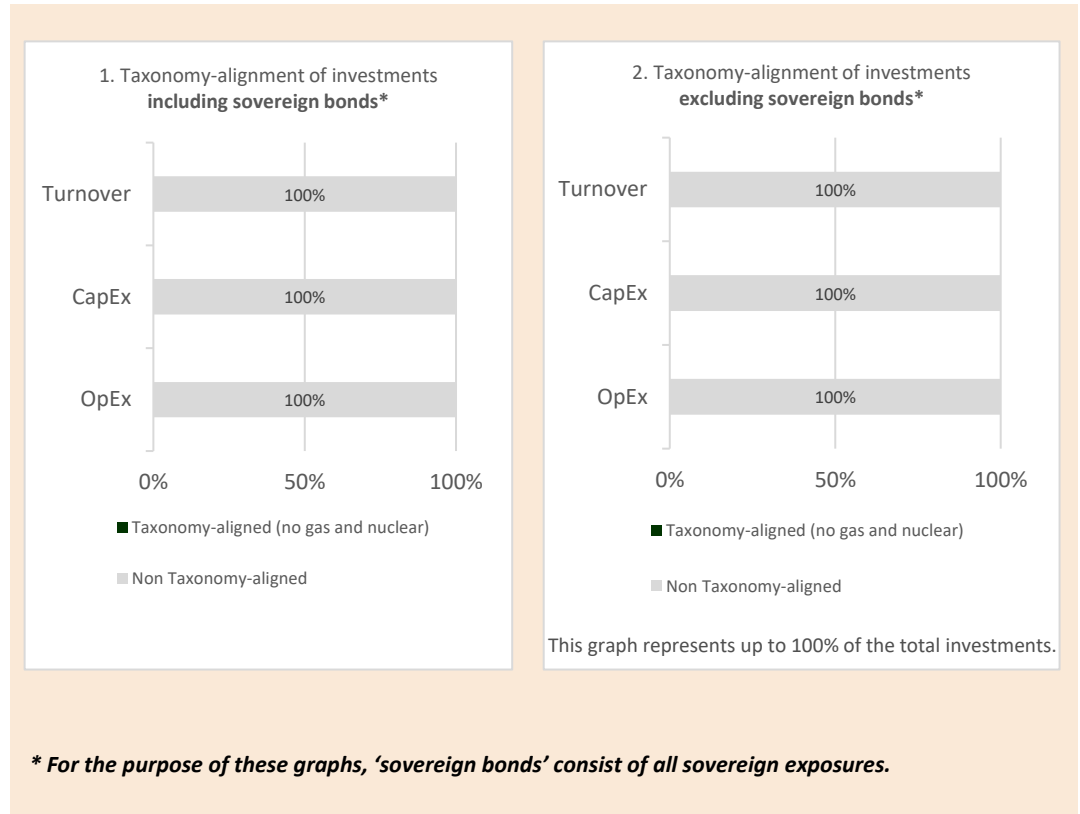

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:
 In fossil fuel In nuclear energy

No. The MFS Emerging Markets Debt Local Currency Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Emerging Markets Debt Local Currency Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Emerging Markets Debt Local Currency Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt assets that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments and currency derivatives which did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Emerging Markets Debt Local Currency Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Global Concentrated Fund ("MFS Global Concentrated Fund")
Legal entity identifier: BMRY0ZKI2EE3QEBKPG73

---	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Concentrated Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Concentrated Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 94.18% of the equity securities in the portfolio of the MFS Global Concentrated Fund met at least one of the climate criteria, which represented 93.23% of the total assets. Equity securities represented 98.99% of the assets of the MFS Global Concentrated Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	80.98	80.17
31 January 2023	69.12	68.02
30 November 2021	73.91	70.03

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	86.90	86.03
31 January 2023	64.39	63.37
30 November 2021	67.20	66.38

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	94.18	93.23
31 January 2023	82.50	81.19
30 November 2021	96.46	95.31

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Concentrated Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Concentrated Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
Visa Inc	Financials	5.84	United States
Thermo Fisher Scientific Inc	Health Care	5.04	United States

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 11 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

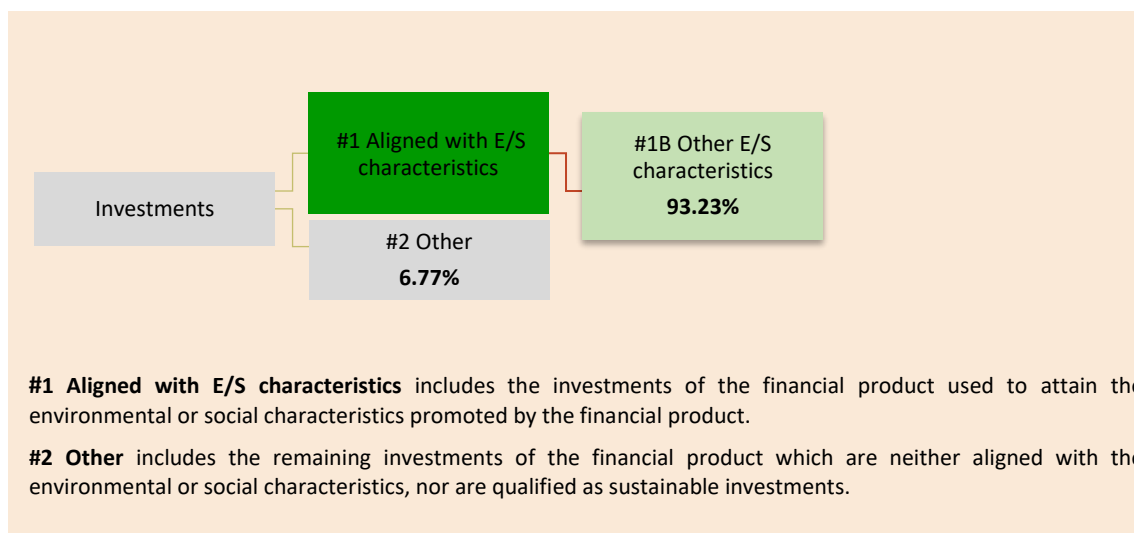

What was the proportion of sustainability-related investments?

The MFS Global Concentrated Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the Global Concentrated Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 98.99% of the total assets of the portfolio of the MFS Global Concentrated Fund; the remaining investments of the 1.01% portfolio included cash and / or cash equivalent instruments; 94.18% of the equity securities in the portfolio of the MFS Global Concentrated Fund met at least one of the climate criteria, which represented 93.23% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 6.77% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Global Concentrated Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

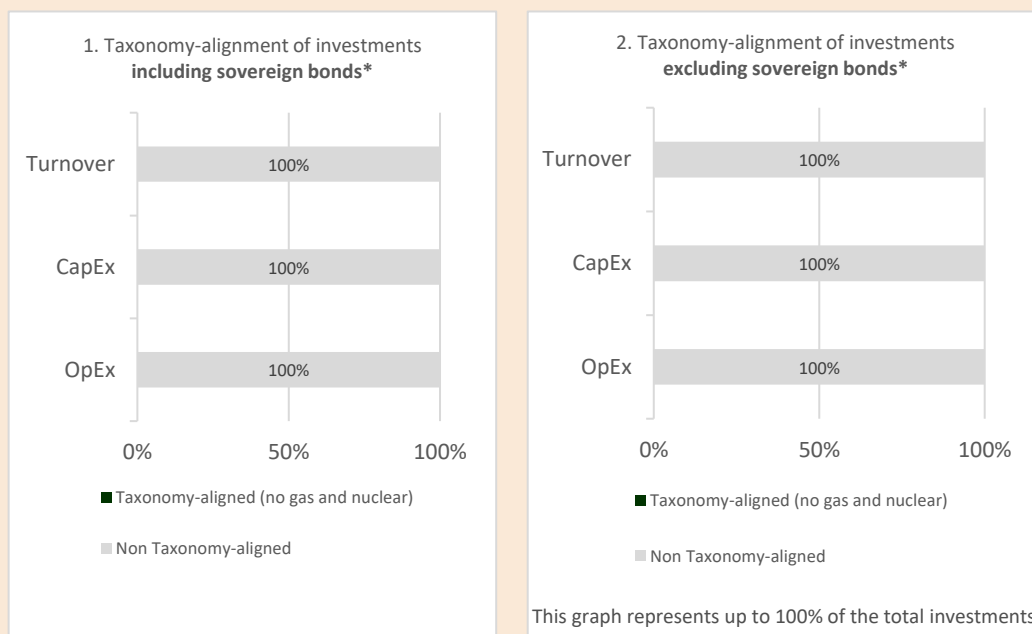

Yes:

In fossil fuel In nuclear energy

No. The MFS Global Concentrated Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Concentrated Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Concentrated Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Concentrated Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Global Concentrated Fund

During the reporting period, MFS investment professionals conducted 3 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Diageo PLC, Schneider Electric SE and Thermo Fisher Scientific Inc. Topics engaged on include identification of climate change risk and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Canadian National Railway Company and Schneider Electric SE. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: United Parcel Service, Inc. and Honeywell International Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: The Goldman Sachs Group, Inc. and Comcast Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

---	--

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Credit Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Credit Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 74.70% of the corporate debt instruments in the portfolio of the MFS Global Credit Fund met at least one of the climate criteria, which represented 65.41% of the total assets. Corporate debt instruments represented 87.57% of the assets of the MFS Global Credit Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	65.31	57.19
31 January 2023	58.44	47.06
30 November 2021	58.93	48.71

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	33.56	29.39
31 January 2023	33.49	26.97
30 November 2021	34.71	28.69

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	5.44	4.76
31 January 2023	5.45	4.39
30 November 2021	4.62	3.82

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	74.70	65.41
31 January 2023	71.82	57.83
30 November 2022	75.40	62.32

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Credit Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Credit Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

The MFS Global Credit Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Credit Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of

● What was the asset allocation?

As of 31 January 2024, corporate debt instruments represented 87.57% of the total assets of the portfolio of the MFS Global Credit Fund; the remaining investments of the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 74.70% of the corporate debt instruments in the portfolio of the MFS Global Credit Fund met at least one of the climate criteria, which represented 65.41% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 34.59% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sectors	Average weight %

sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Credit Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

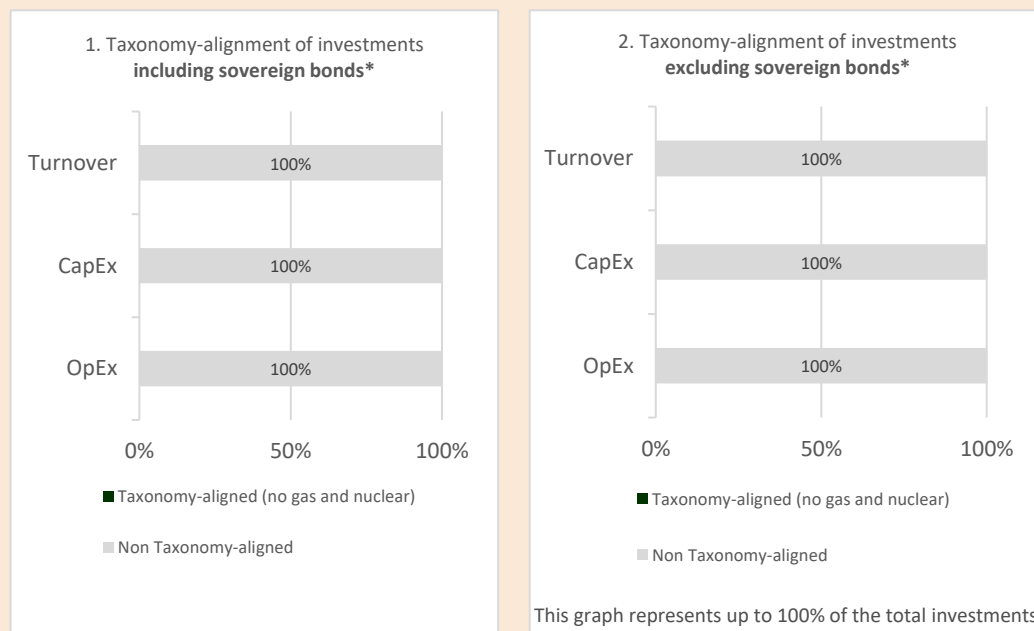

Yes:

In fossil fuel

In nuclear energy

No. The MFS Global Credit Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

● Zero. The MFS Global Credit Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Credit Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Credit Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 92.57% of the equity securities in the portfolio of the MFS Global Equity Fund met at least one of the climate criteria, which represented 92.51% of the total assets. Equity securities represented 99.93% of the assets of the MFS Global Equity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	80.61	80.55
31 January 2023	63.97	63.42
30 November 2021	69.34	68.94

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	79.64	79.59
31 January 2023	65.39	64.83
30 November 2021	60.40	60.04

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	92.57	92.51
31 January 2023	80.79	80.10
30 November 2021	86.59	86.09

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Largest investments	Sector	% Asset	Country
Visa Inc	Financials	3.02	United States

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

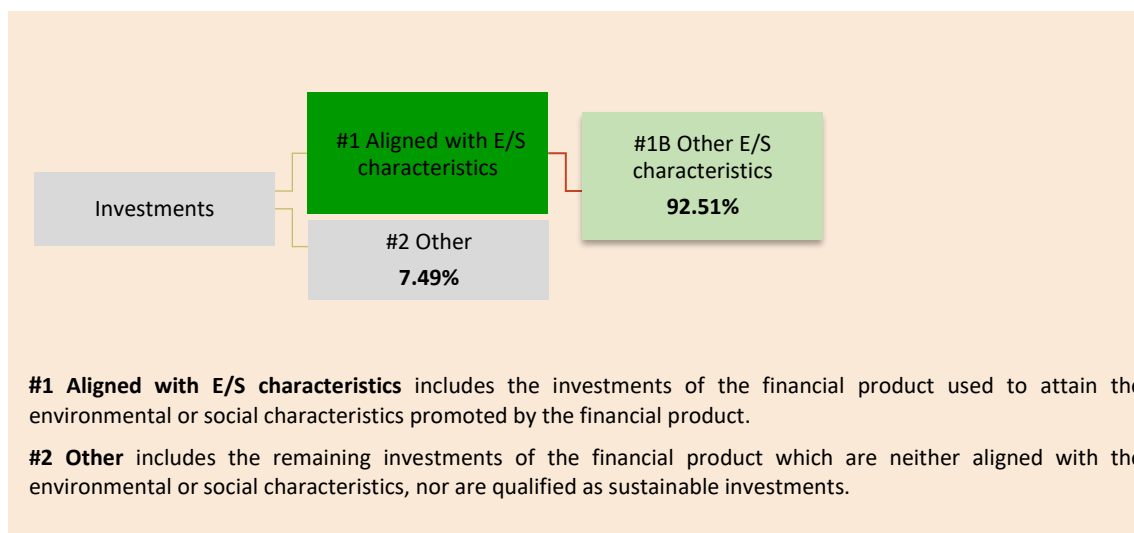

What was the proportion of sustainability-related investments?

The MFS Global Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Equity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 99.93% of the total assets of the portfolio of the MFS Global Equity Fund; the remaining investments of 0.07% the portfolio included cash and / or cash equivalent instruments; 92.57% of the equity securities in the portfolio of the MFS Global Equity Fund met at least one of the climate criteria, which represented 92.51% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 7.49% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

In which economic sectors were the investments made?

Sectors	% Average weight
Industrials	19.31
Health Care	18.32
Financials	16.26
Consumer Staples	11.85
Information Technology	10.34
Consumer Discretionary	8.05
Communication Services	7.80
Materials	7.01
Cash & Cash Equivalents	0.62
Equity Warrants	0.05
Other	0.04

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:

In fossil fuel In nuclear energy

No. The MFS Global Equity Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like

natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Global Equity Fund

During the reporting period, MFS investment professionals conducted 10 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Edison International, Erste Group Bank AG, Glencore PLC, Iberdrola SA, Omnicom Group Inc, Samsung Electronics, Suncor Energy Inc and Valero Energy Corp. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: UBS Group AG, Aena S.M.E. SA, Canadian National Railway Company, Schneider Electric SE and Canadian Pacific Kansas City Limited. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: United Parcel Service, Inc., Alphabet Inc. and Honeywell International Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: The Goldman Sachs Group, Inc and Comcast Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Global Equity Income Fund ("MFS Global Equity Income Fund")

--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 30 November 2022, the MFS Global Equity Income Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Equity Income Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 87.44% of the equity securities in the portfolio of the MFS Global Equity Income Fund met at least one of the climate criteria, which represented 85.79% of the total assets. Equity securities represented 98.11% of the assets of the MFS Global Equity Income Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	75.69	74.26
31 January 2023	59.03	58.29
31 October 2022	64.82	63.83

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	57.44	56.36
31 January 2023	58.78	58.04
31 October 2022	58.20	57.31

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
31 October 2022	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	87.44	85.79
31 January 2023	75.20	74.26
31 October 2022	79.82	78.61

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Equity Income Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Equity Income Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Global Equity Income Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel In nuclear energy

No. The MFS Global Equity Income Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

● Zero. The MFS Global Equity Income Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
31 October 2022	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Equity Income Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Equity Income Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed

and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Proxy Voting - MFS Global Equity Income Fund

During the reporting period, MFS investment professionals conducted 10 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Edison International, Erste Group Bank AG, Glencore PLC, Iberdrola SA, Omnicom Group Inc, Samsung Electronics, Suncor Energy Inc and Valero Energy Corp. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Total Energies SE. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore Plc. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Coterra Energy Inc., Texas Roadhouse, Inc and Exxon Mobil Corporation. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Suncor Energy Inc, Valero Energy Corporation, The Hartford Financial Services Group, Inc, Glencore Plc, Total Energies SE, Exxon Mobil Corporation, Comcast Corporation and Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Global Listed Infrastructure Fund ("MFS Global Listed Infrastructure Fund")
Legal entity identifier: 5493000HOQZBG78W0H47

Environmental and/or social characteristics

---	--

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 28 August 2023, the MFS Global Listed Infrastructure Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Listed Infrastructure Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 80.91% of the equity securities in the portfolio of the MFS Global Listed Infrastructure Fund met at least one of the climate criteria, which represented 79.43% of the total assets. Equity securities represented 98.16% of the assets of the MFS Global Listed Infrastructure Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 28 August 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	71.08	69.78

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	59.44	58.35

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	80.91	79.43

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Listed Infrastructure Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Listed Infrastructure Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 28 August 2023 to 31 January 2024.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
SBA Communications Corp REIT	Real Estate	5.18	United States

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

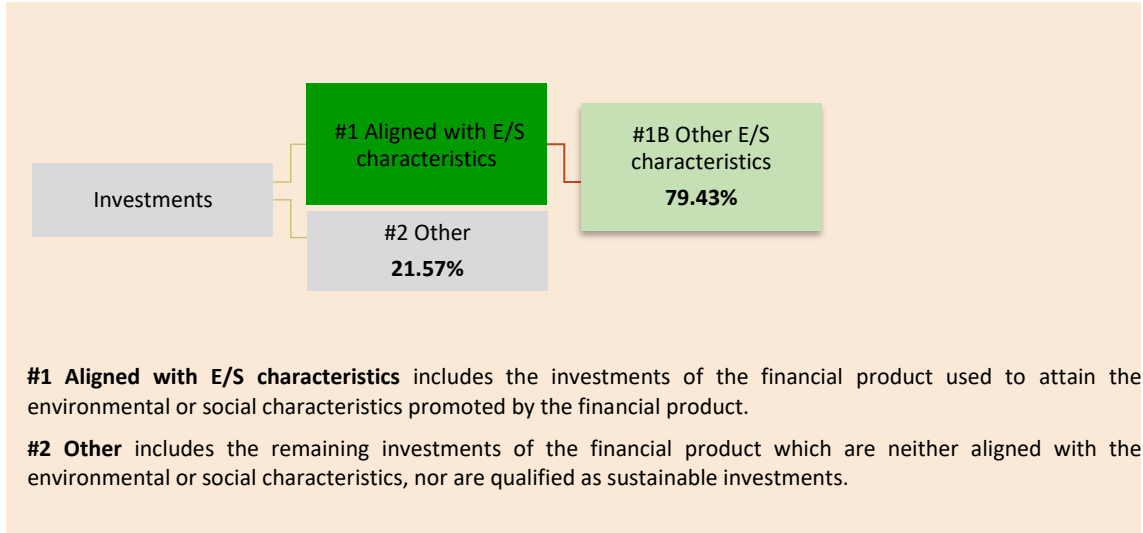

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS Global Listed Infrastructure Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Listed Infrastructure Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

● What was the asset allocation?

As of 31 January 2024, equity securities represented 98.16% of the total assets of the portfolio of the MFS Global Listed Infrastructure Fund; the remaining investments of 1.84% of the portfolio included cash and /or cash equivalent instruments; 80.91% of the equity securities in the portfolio of the MFS Global Listed Infrastructure Fund met at least one of the climate criteria, which represented 79.43% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 21.57% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

In which economic sectors were the investments made?

Sectors	% Average weight
Utilities	55.59
Industrials	25.12
Communication Services	5.82
Real Estate	5.18
Energy	3.74
Materials	2.67
Cash & Cash Equivalents	1.80
Other	0.08

The sector holdings above represent the average sector weight for the portfolio at the end of the 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Listed Infrastructure Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:

In fossil fuel In nuclear energy

No. The MFS Global Listed Infrastructure Fund does not commit to make investments aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Listed Infrastructure Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Listed Infrastructure Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The MFS Global Listed Infrastructure Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements - MFS Global Listed Infrastructure Fund

During the reporting period, MFS investment professionals conducted 5 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA Group, Edison International, Enel SpA, Iberdrola SA and National Grid PLC. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Global Intrinsic Value Fund ("MFS Global Intrinsic Value Fund")
Legal entity identifier: 549300HBJQZCFOH6EK74

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes
 No

- It made **sustainable investments with an environmental objective**: ____%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective**: ____%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Intrinsic Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Intrinsic Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 84.22% of the equity securities in the portfolio of the MFS Global Intrinsic Value Fund met at least one of the climate criteria, which represented 82.53% of the total assets. Equity securities represented 97.98% of the assets of the MFS Global Intrinsic Value Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	72.23	70.77
31 January 2023	56.77	55.56
30 November 2021	58.16	57.63

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	61.98	60.73
31 January 2023	52.65	51.52
30 November 2021	44.4	44.0

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	84.22	82.53
31 January 2023	71.95	70.41
30 November 2021	69.90	69.26

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Intrinsic Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Intrinsic Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

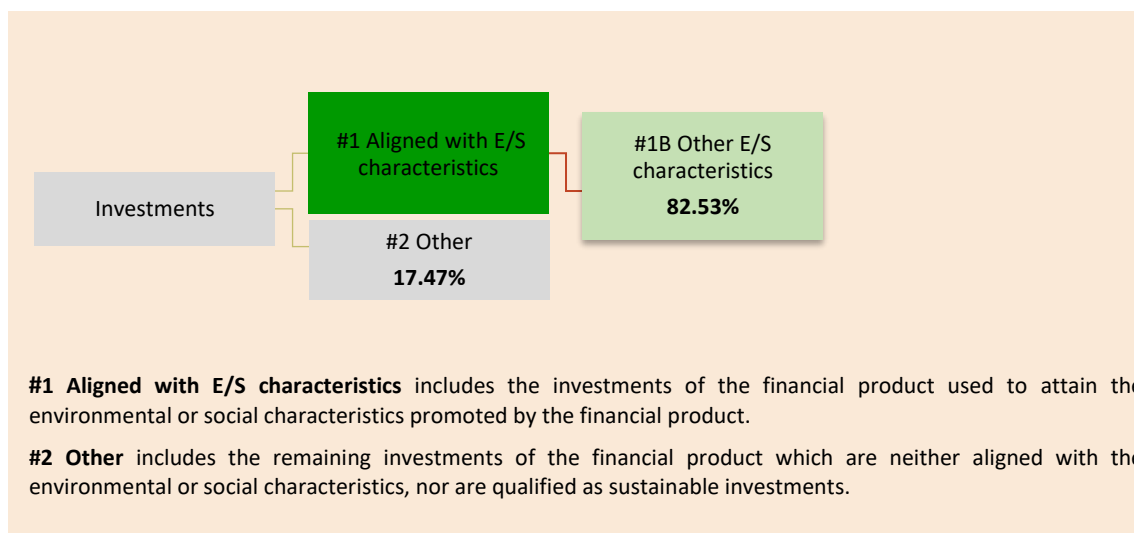

What was the proportion of sustainability-related investments?

The MFS Global Intrinsic Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Intrinsic Value Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 97.98% of the total assets of the portfolio of the MFS Global Intrinsic Value Fund; the remaining investments of 2.02% in the portfolio included cash and / or cash equivalent instruments; 84.22% of the equity securities in the portfolio of the MFS Global Intrinsic Value Fund met at least one of the climate criteria, which represented 82.53% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 17.47% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Consumer Discretionary	3.13
Cash & Cash Equivalents	1.87
Communication Services	1.30
Real Estate	0.91
Other	0.06

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Global Intrinsic Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

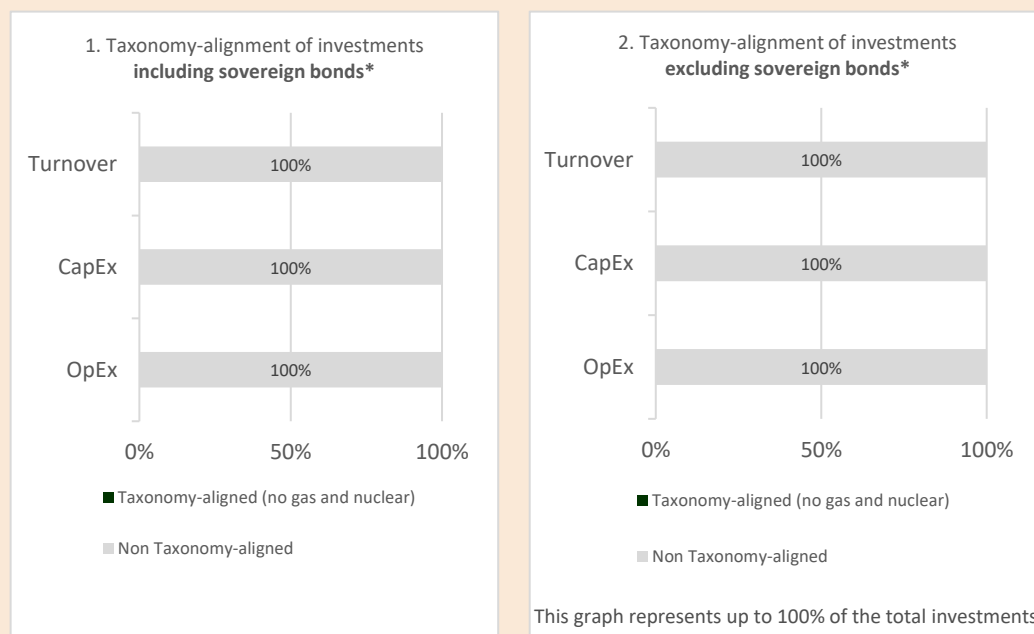

Yes:

In fossil fuel In nuclear energy

No. The MFS Global Intrinsic Value Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Intrinsic Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Intrinsic Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Intrinsic Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Global Intrinsic Value Fund

During the reporting period, MFS investment professionals conducted 10 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Diageo PLC, Glencore PLC, Samsung Electronics Co Ltd, Schneider Electric SE, Sika AG, Vulcan Materials Co, Woodside Energy Group Ltd. Topics engaged on include identification of climate change risk, transition risk and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Schneider Electric SE and Total Energies SE. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore PLC. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Martin Marietta Materials, Inc., Amazon.com, Inc. and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Amazon.com, Inc., Glencore Plc, TotalEnergies SE and Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Global Opportunistic Bond Fund ("MFS Global Opportunistic Bond Fund ")

--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Opportunistic Bond Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Opportunistic Bond Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 70.90% of the corporate debt instruments in the portfolio of the MFS Global Opportunistic Bond Fund met at least one of the climate criteria, which represented 22.15% of the total assets. Corporate debt instruments represented 31.24% of the assets of the MFS Global Opportunistic Bond Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	59.96	18.73
31 January 2023	49.55	17.22
30 November 2021	52.05	20.89

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	33.56	10.48
31 January 2023	30.11	10.46
30 November 2021	23.18	9.30

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	6.47	2.02
31 January 2023	8.33	2.89
30 November 2021	5.89	2.36

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	70.90	22.15
31 January 2023	66.44	23.08
30 November 2022	65.04	26.10

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Opportunistic Bond Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Opportunistic Bond Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon

economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

The MFS Global Opportunistic Bond Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Opportunistic Bond Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

As of 31 January 2024, corporate debt instruments represented 31.24% of the total assets of the portfolio of the MFS Global Opportunistic Bond Fund; the remaining investments of 69.76% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 70.90% of the corporate debt instruments in the portfolio of the MFS Global Opportunistic Bond Fund met at least one of the climate criteria, which represented 22.15% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 77.85% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Opportunistic Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:
 In fossil fuel In nuclear energy

No. The MFS Global Opportunistic Bond Fund does not commit to make investments aligned with the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee.

are sustainable investments with an environmental objective that **do not take into account the enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Opportunistic Bond Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Opportunistic Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Opportunistic Bond Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered ‘achieving net zero’.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company’s progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements - MFS Global Opportunistic Bond Fund

During the reporting period, MFS investment professionals conducted 23 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA Group, Bank of America Corp, Becton Dickinson & Co, Cable One Inc, Duke Energy Corp, E. ON SE, Enel SpA, Engie SA, Glencore PLC, National Grid PLC, Parkland Corp, Plains All American Pipeline LP, RAC Bond Co PLC, Sasol Ltd, Southern Co, Thermo Fisher Scientific Inc, United Parcel Service Inc, Volkswagen AG, Vulcan Materials Co and Westinghouse Air Brake Technologies Corp. Topics engaged on include identification of climate change risk, physical risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Global Research Focused Fund ("MFS Global Research Focused Fund")
Legal entity identifier: OXNVI8L269TT6JC97X03

Environmental and/or social characteristics

---	--

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Research Focused Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Research Focused Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 95.34% of the equity securities in the portfolio of the MFS Global Research Focused Fund met at least one of the climate criteria, which represented 94.22% of the total assets. Equity securities represented 98.82% of the assets of the MFS Global Research Focused Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	72.00	71.16
31 January 2023	69.98	69.60
30 November 2021	52.16	51.67

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	81.30	80.35
31 January 2023	57.58	57.27
30 November 2021	45.50	45.07

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	95.34	94.22
31 January 2023	83.30	82.85
30 November 2021	73.45	72.76

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Research Focused Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Research Focused Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Largest investments	Sector	% Asset	Country
Microsoft Corp	Information Technology	7.30	United States
Alphabet Inc Class A	Communication Services	4.14	United States

Becton Dickinson & Co	Health Care	2.24	United States

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

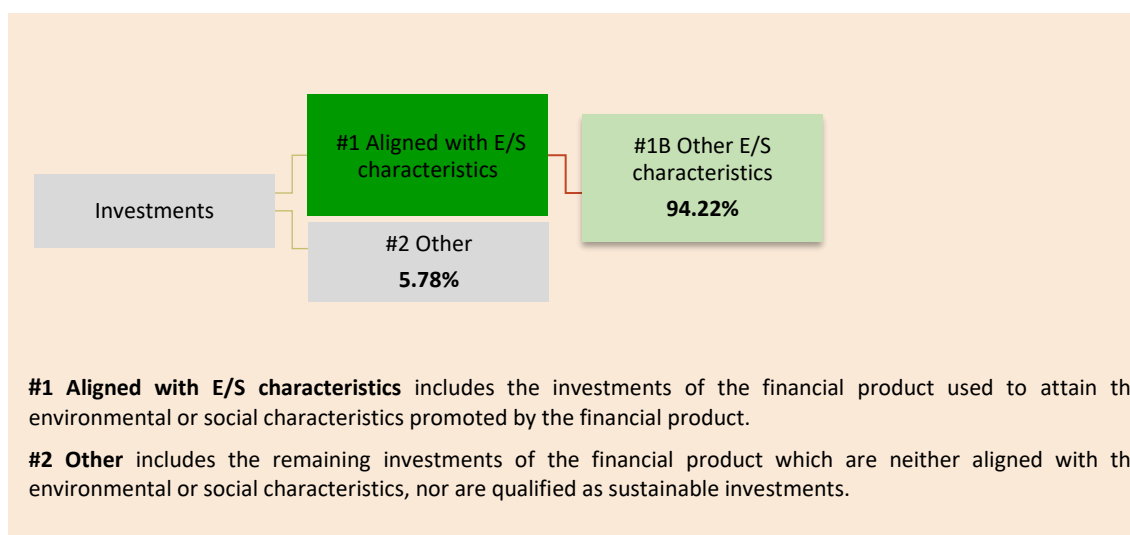

What was the proportion of sustainability-related investments?

The MFS Global Research Focused Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Research Focused Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, equity securities represented 98.82% of the total assets of the portfolio of the MFS Global Research Focused Fund; the remaining investments of 1.18% in the portfolio comprised of cash and cash equivalent instruments; 95.34% of the equity securities in the portfolio of the MFS Global Research Focused Fund met at least one of the climate criteria, which represented 94.22% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 5.78% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sectors	% Average weight
Technology	27.62
Capital Goods	17.40
Financial Services	15.86
Health Care	11.31
Consumer Cyclicals	10.67
Energy	7.75
Consumer Staples	5.91
Telecom / CATV	2.21
Cash & Cash Equivalents	0.98

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Research Focused Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:

In fossil fuel In nuclear energy

No. The MFS Global Research Focused Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

● Zero. The MFS Global Research Focused Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Research Focused Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Research Focused Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Global Research Focused Fund

During the reporting period, MFS investment professionals conducted 6 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Becton Dickinson & Co,

ConocoPhillips, Diageo PLC, Iberdrola SA, Schneider Electric SE and Woodside Energy Group Ltd. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Schneider Electric SE, Canadian Pacific Kansas City Limited and Total Energies SE. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Wells Fargo & Company, Honeywell International Inc., Amazon.com, Inc. and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Wells Fargo & Company, The Goldman Sachs Group, Inc, Chubb Limited, Amazon.com, Inc., TotalEnergies SE and Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

---	--

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 May 2022, the MFS Global Strategic Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Strategic Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 87.01% of the equity securities in the portfolio of the MFS Global Strategic Equity Fund met at least one of the climate criteria, which represented 85.98% of the total assets. Equity securities represented 98.81% of the assets of the MFS Global Strategic Equity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	60.29	59.57
31 January 2023	66.53	65.88
30 April 2022	74.94	74.39

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	75.85	74.95
31 January 2023	73.79	73.07
30 April 2022	59.07	58.63

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 April 2022	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	87.01	85.98
31 January 2023	89.05	88.18
30 April 2022	83.77	83.14

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Strategic Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Strategic Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
Microsoft Corp	Information Technology	7.39	United States

The top investment holdings above represent the average security weights for the top 12 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

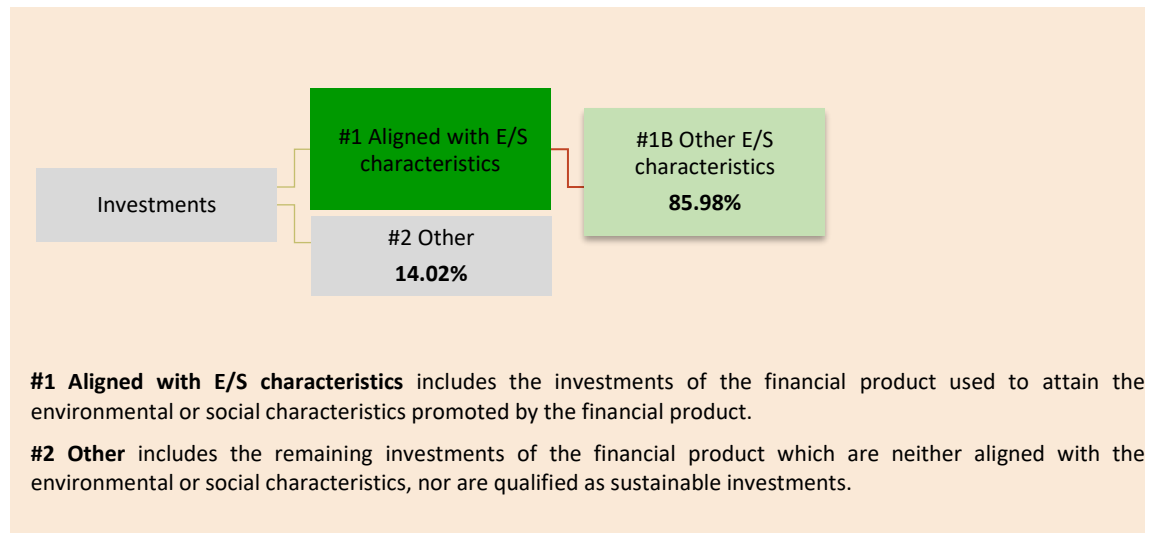

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS Global Strategic Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Strategic Equity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

● **What was the asset allocation?**

As of 31 January 2024, equity securities represented 98.81% of the total assets of the portfolio of the MFS Global Strategic Equity Fund; the remaining investments of 1.19% the portfolio comprised of cash and / or cash equivalent instruments; 87.01% of the equity securities in the portfolio of the MFS Global Strategic Equity Fund met at least one of the climate criteria, which represented 85.98% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 14.02% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Information Technology	29.22
Industrials	14.19
Health Care	12.58

Real Estate	1.39
Cash & Cash Equivalents	0.63
Other	0.05

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Global Strategic Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

No. The MFS Global Strategic Equity Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Strategic Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 April 2022	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Strategic Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Strategic Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Global Strategic Equity Fund

During the reporting period, MFS investment professionals conducted 4 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Schneider Electric SE, Thermo Fisher Scientific Inc and Vulcan Materials Co. Topics engaged on include identification of climate change risk. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Schneider Electric SE and Canadian Pacific Kansas City Limited. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Amazon.com, Inc. and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Amazon.com, Inc. CoStar Group, Inc, Microsoft Corporation and Intuit Inc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: MFS Meridian Funds – Global Total Return Fund ("MFS Global Total Return Fund")
Legal entity identifier: 1RDQ67M094ZPUN2RRO1

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment?

Yes **No**

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS Global Total Return Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Total Return Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 90.39% of the equity securities in the portfolio of the MFS Global Total Return Fund met at least one of the climate criteria, which represented 54.96% of the total assets; 76.70% of the corporate debt instruments in the portfolio of the MFS Global Total Return Fund met at least one of the climate criteria, which represented 9.35% of total assets. Equity securities represented 60.81% and corporate debt instruments represented 12.19% of the assets of the MFS Global Total Return Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	78.84	47.94
31 January 2023	66.12	39.22
30 June 2022	69.44	41.02

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	66.69	8.13
31 January 2023	59.75	7.05
30 June 2022	62.51	3.55

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	61.00	37.09
31 January 2023	58.24	34.54
30 June 2022	8.30	4.90

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	34.86	4.25
31 January 2023	32.12	3.79
30 June 2022	30.14	7.37

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 June 2022	0	0

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 June 2022	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	5.33	0.65
31 January 2023	5.68	0.67
30 June 2022	5.25	0.62

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	90.39	54.96
31 January 2023	83.01	49.24
30 June 2022	73.33	43.23

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	76.70	9.35
31 January 2023	73.98	8.73
30 June 2022	72.72	8.57

● ***and compared to previous periods?***

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Total Return Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Total Return Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its

own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Total Return Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

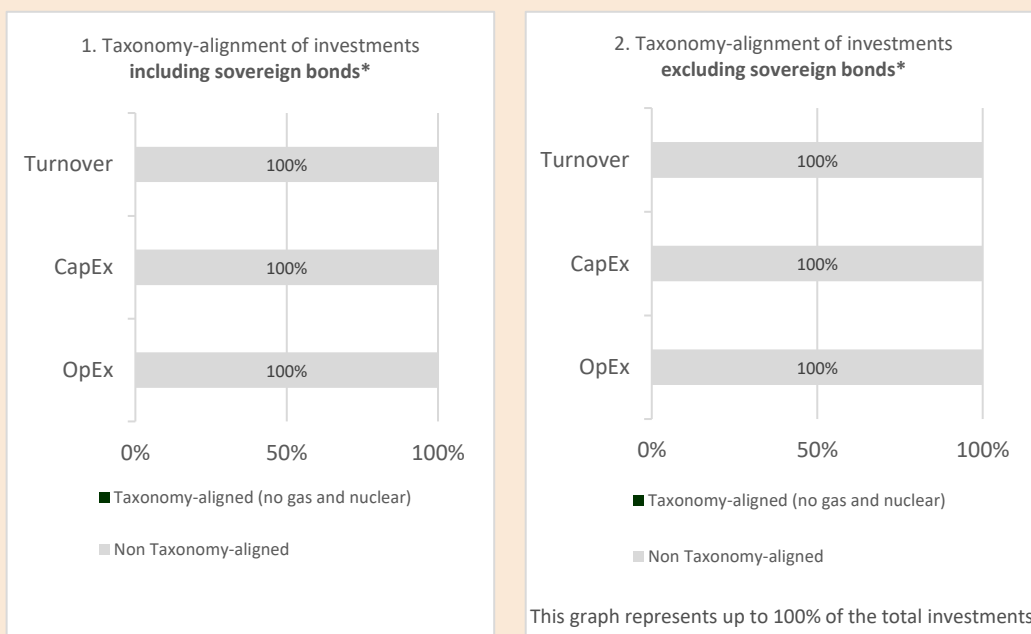

Yes:

In fossil fuel

In nuclear energy

No. The MFS Global Total Return Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Total Return Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 June 2022	0%	0%	0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Global Total Return Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Total Return Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the

limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Global Total Return Fund

During the reporting period, MFS investment professionals conducted 32 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA Group, Bank of America Corp, Becton Dickinson & Co, Cboe Global Markets Inc, ConocoPhillips, Diageo PLC, Duke Energy Corp, E. ON SE, Edison International, Enel SpA, Engie SA, Erste Group Bank AG, Glencore PLC, Iberdrola SA, National Grid PLC, Omnicom Group Inc, PPG Industries Inc, RAC Bond Co PLC, Samsung Electronics Co Ltd, Schneider Electric SE, Southern Co, Suncor Energy Inc, Thermo Fisher Scientific Inc, United Parcel Service Inc, Valero Energy Corp, Volkswagen AG, Vulcan Materials Co and Westinghouse Air Brake Technologies Corp. Topics engaged on include identification of climate change risk, physical risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: UBS Group AG, Schneider Electric SE, Canadian Pacific Kansas City Limited and Total Energies SE. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore Plc. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Coterra Energy Inc, Texas Roadhouse, Inc, Honeywell International Inc, Exxon Mobil Corporation and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Bank of America, The Goldman Sachs Group, Inc., Suncor Energy Inc, Valero Energy Corporation, JPMorgan Chase & Co, Chubb Limited, The Hartford Financial Services Group, Inc, The Travelers Companies, Inc, Glencore Plc, TotalEnergies SE, Exxon Mobil Corporation, Alphabet Inc, Comcast Corporation, Mitsubishi UFJ Financial Group, Inc and Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Limited Maturity Fund ("MFS Limited Maturity Fund ")

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS Limited Maturity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Limited Maturity Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 85.04% of the corporate debt instruments in the portfolio of the MFS Limited Maturity Fund met at least one of the climate criteria, which represented 44.23% of the total assets. Corporate debt instruments represented 52.01% of the assets of the MFS Limited Maturity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	76.47	39.77
31 January 2023	66.95	37.22
30 June 2022	70.45	39.60

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	28.80	14.98
31 January 2023	29.48	16.39
30 June 2022	30.68	17.24

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 June 2022	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	1.14	0.59
31 January 2023	1.57	0.87
30 June 2022	1.58	0.89

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	85.04	44.23
31 January 2023	76.20	42.36
30 June 2022	79.01	44.41

● **... and compared to previous periods?**

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Limited Maturity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Limited Maturity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “Additional Emissions

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

What was the proportion of sustainability-related investments?

The MFS Limited Maturity Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Limited Maturity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

● What was the asset allocation?

As of 31 January 2024, corporate debt instruments represented 52.01% of the total assets of the portfolio of the MFS Limited Maturity Fund; the remaining investments of 47.89% the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 85.04% of the corporate debt instruments in the portfolio of the MFS Limited Maturity Fund met at least one of the climate criteria, which represented 44.23% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 55.77% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sectors	% Average weight
Treasury-Treasury	26.38

Asset allocation describes the share of investments in specific assets.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Limited Maturity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

- Yes:
- In fossil fuel
- In nuclear energy
- No. The MFS Limited Maturity Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Zero. The MFS Limited Maturity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 June 2022	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Limited Maturity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Limited Maturity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered ‘achieving net zero’.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company’s progress in aligning with long-term net zero goals. For

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements - MFS Limited Maturity Fund

During the reporting period, MFS investment professionals conducted 12 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA Group, Bank of America Corp, Edison International, Enel SpA, Glencore PLC, Plains All American Pipeline LP, Thermo Fisher Scientific Inc, Toronto-Dominion Bank, Volkswagen AG, and Westinghouse Air Brake Technologies Corp. Topics engaged on include identification of climate change risk, physical risk, transition risk and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Managed Wealth Fund ("MFS Managed Wealth Fund")
Legal entity identifier: 222100EEEJHVDVAVX719

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

 No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS Managed Wealth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Managed Wealth Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 89.70% of the equity securities in the portfolio of the MFS Managed Wealth Fund met at least one of the climate criteria, which represented 81.23% of the total assets. Equity securities represented 90.55% of the assets of the MFS Managed Wealth Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	73.84	66.86
31 January 2023	68.82	63.89
30 June 2022	69.05	57.29

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	66.02	59.78
31 January 2023	62.96	58.45
30 June 2022	8.92	7.40

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 June 2022	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	89.70	81.23
31 January 2023	86.78	80.57
30 June 2022	81.26	59.12

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Managed Wealth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Managed Wealth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Largest investments	Sector	% Asset	Country
Microsoft Corp	Information Technology	4.15	United States

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS Managed Wealth Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Managed Wealth Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 90.55% of the total assets of the portfolio of the MFS Managed Wealth Fund; the remaining investments of 9.45% in the portfolio included derivatives, cash and / or cash equivalent instruments; 89.70% of the equity securities in the portfolio of the MFS Managed Wealth Fund met at least one of the climate criteria, which represented 81.23% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 18.77% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Other	54.28
Information Technology	17.48
Financials	15.74
Health Care	13.18
Industrials	13.04
Consumer Discretionary	7.90
Cash & Cash Equivalents	7.55
Consumer Staples	6.30
Communication Services	5.10
Materials	4.86
Utilities	2.65
Energy	2.58
Real Estate	0.92
Index Options	-1.51
Index Futures	-72.80

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS Managed Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities**

that comply with the EU Taxonomy?

Yes:
 In fossil fuel In nuclear energy

No. The MFS Managed Wealth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

● Zero. The MFS Managed Wealth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 June 2022	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Managed Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments .

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Managed Wealth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered ‘achieving net zero’.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company’s progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS’ second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company’s or portfolio’s climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Proxy Voting - MFS Managed Wealth Fund

MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: UBS Group AG, Canadian National Railway Company, Schneider Electric SE and Canadian Pacific Kansas City Limited. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: PACCAR Inc, Public Storage, Raytheon Technologies Corporation, Martin Marietta Materials, Inc, Honeywell International Inc, Amazon.com, Inc. and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: The Toronto-Dominion Bank, Citigroup Inc, ENGIE SA, The Goldman Sachs Group, Inc., PepsiCo, Inc, Duke Energy Corporation, Suncor Energy Inc, JPMorgan Chase & Co, Chubb Limited, Morgan Stanley, Amazon.com, Inc, BlackRock, Inc, The Southern Company, The Travelers Companies, Inc, Comcast Corporation, CoStar Group Inc, Caterpillar Inc, Microsoft Corporation and Intuit Inc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

---	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Prudent Capital Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Prudent Capital Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 72.93% of the equity securities in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 38.61% of the total assets; 45.43% of the corporate debt instruments in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 5.47% of total assets. Equity securities represented 52.93% and corporate debt instruments represented 12.04% of the assets of the MFS Prudent Capital Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

● **How did the sustainability indicators perform?**

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	46.61	24.67
31 January 2023	46.45	27.35
30 November 2021	66.76	32.23

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	35.47	4.27
31 January 2023	52.77	5.77
30 November 2021	29.9	3.02

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	63.76	33.75
31 January 2023	61.28	36.08
30 November 2021	52.30	25.27

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	24.25	2.92
31 January 2023	23.71	2.57
30 November 2021	9.60	0.97

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	5.90	0.71
31 January 2023	6.09	0.66
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	72.93	38.61
31 January 2023	68.64	40.42
30 November 2021	80.16	38.70

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	45.43	5.47
31 January 2023	62.92	6.82
30 November 2021	34.6	3.50

● ***... and compared to previous periods?***

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Prudent Capital Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Prudent Capital Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS Prudent Capital Fund aims to have at least 50% of the equity securities and 50% of the corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Prudent Capital Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

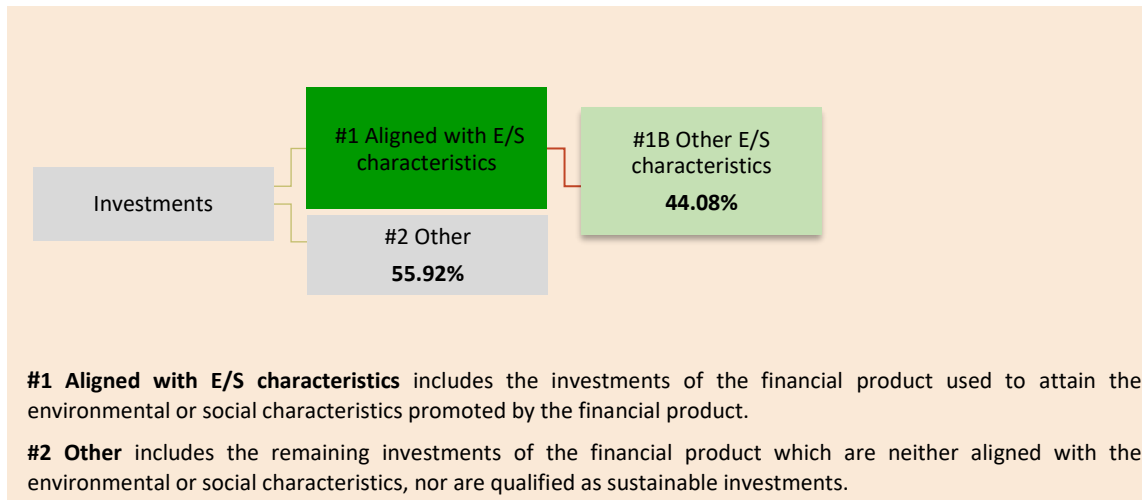

What was the asset allocation?

As of 31 January 2024, equity securities represented 52.93% and corporate debt instruments represented 12.04% of the total assets of the portfolio of the MFS Prudent Capital Fund; the remaining investments of 35.03% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 72.93% of the equity securities in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 38.61% of the total assets of the portfolio; 45.43% of the corporate debt instruments in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 5.47% of the total assets of the portfolio; 44.08% of the total assets of the portfolio attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 55.92% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that

Asset allocation describes the share of investments in specific assets.

percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Prudent Capital Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:
 In fossil fuel In nuclear energy

No. The MFS Prudent Capital Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Prudent Capital Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Prudent Capital Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Prudent Capital Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Prudent Capital Fund

During the reporting period, MFS investment professionals conducted 4 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Iberdrola SA, RAC Bond Co PLC, Samsung Electronics Co Ltd, and Southern Co. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Prudent Wealth Fund ("MFS Prudent Wealth Fund")
Legal entity identifier: 549300LM7K1F8VSRZS66

---	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Prudent Wealth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Prudent Wealth Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 68.53% of the equity securities in the portfolio of the MFS Prudent Wealth Fund met at least one of the climate criteria, which represented 43.63% of the total assets; 60.14% of the corporate debt instruments in the portfolio of the MFS Prudent Wealth Fund met at least one of the climate criteria, which represented 0.86% of total assets. Equity securities represented 63.67% and corporate debt instruments represented 1.43% of the assets of the MFS Prudent Wealth Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	44.14	28.10
31 January 2023	39.18	26.45
30 November 2021	67.01	37.0

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	60.14	0.86
31 January 2023	100	1.14
30 November 2021	100	0.90

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	58.86	37.48
31 January 2023	54.86	37.04
30 November 2021	43.80	24.20

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	4.90	0.07
31 January 2023	30.70	0.35
30 November 2021	33.1	0.28

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	68.53	43.63
31 January 2023	60.92	41.12
30 November 2022	76.12	42.03

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, 3 and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	60.14	0.86
31 January 2023	100	1.14
30 November 2022	100	0.90

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Prudent Wealth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Prudent Wealth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the "**Additional Emissions Indicators**"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Prudent Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:

In fossil fuel

In nuclear energy

No. The MFS Prudent Wealth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Prudent Wealth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

30 November 2021	0%	0%	0%
------------------	----	----	----

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS Prudent Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Prudent Wealth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS Prudent Wealth Fund

During the reporting period, MFS investment professionals conducted 3 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Iberdrola SA, Samsung Electronics Co Ltd, and Southern Co. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.K. Equity Fund ("MFS U.K. Equity Fund")
Legal entity identifier: DAPX7647TOH0KQ40FF91

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.K. Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.K. Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 95.87% of the equity securities in the portfolio of the MFS U.K. Equity Fund met at least one of the climate criteria, which represented 94.86% of the total assets. Equity securities represented 98.94% of the assets of the MFS U.K. Equity Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	88.39	87.46
31 January 2023	73.96	73.49
30 November 2021	74.09	72.80

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	69.36	68.63
31 January 2023	59.32	58.94
30 November 2021	51.80	50.89

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	95.87	94.86
31 January 2023	91.42	90.84
30 November 2021	88.62	87.07

● **... and compared to previous periods?**

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.K. Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.K. Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Largest investments	Sector	% Asset	Country
Shell PLC	Energy	7.12	United Kingdom
AstraZeneca PLC	Health Care	5.68	United Kingdom
Diageo PLC	Consumer Staples	5.01	United Kingdom
RELX PLC	Industrials	4.74	United Kingdom
Glencore PLC	Materials	3.78	United Kingdom
NatWest Group PLC	Financials	3.29	United Kingdom
National Grid PLC	Utilities	3.23	United Kingdom
Experian PLC	Industrials	3.22	United Kingdom
Rio Tinto PLC	Materials	3.15	United Kingdom
Lloyds Banking Group PLC	Financials	3.15	United Kingdom
Reckitt Benckiser Group PLC	Consumer Staples	3.14	United Kingdom
Tesco PLC	Consumer Staples	3.07	United Kingdom
London Stock Exchange Group PLC	Financials	2.95	United Kingdom

The top investment holdings above represent the average security weights for the top 13 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS U.K. Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.K. Equity Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, equity securities represented 98.94% of the total assets of the portfolio of the MFS U.K. Equity Fund; the remaining investments of 1.06% of the portfolio included cash and / or cash equivalent instruments; 95.87% of the equity securities in the portfolio of the MFS U.K. Equity Fund met at least one of the climate criteria, which represented 94.86% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 5.14% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sectors	% Average weight
Consumer Staples	18.03
Financials	17.93
Industrials	14.31
Materials	10.72
Energy	9.18
Consumer Discretionary	8.64
Health Care	8.54
Communication Services	4.46
Utilities	3.23
Information Technology	1.57
Real Estate	1.44
Cash & Cash Equivalents	1.21

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS U.K. Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:

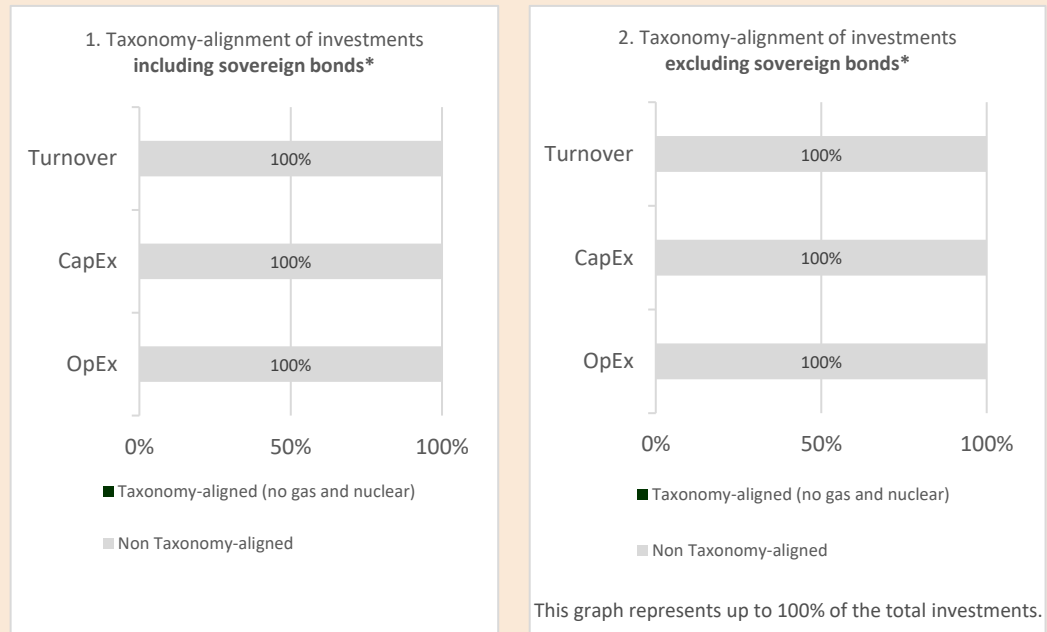

In fossil fuel In nuclear energy

No. The MFS U.K. Equity Fund does not commit to make investments aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

- Zero. The MFS U.K. Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS U.K. Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.K. Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS U.K. Equity Fund

During the reporting period, MFS investment professionals conducted 6 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Diageo PLC, Forterra PLC, Glencore PLC and National Grid PLC. Topics engaged on include identification of climate change risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Shell Plc. MFS investment professionals also assessed and voted AGAINST management proposals on climate transition plans of the following issuers during the reporting period: Glencore Plc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Shell Plc and Glencore Plc.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – U.S. Concentrated Growth Fund (“MFS U.S. Concentrated Growth Fund”)
Legal entity identifier: G651RPCOZ0VMJ132HI34

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes **No**

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it have a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Concentrated Growth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Concentrated Growth Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the “Transition Date”).

As of 31 January 2024, 96.53% of the equity securities in the portfolio of the MFS U.S. Concentrated Growth Fund met at least one of the climate criteria, which represented 96.23% of the total assets. Equity securities represented 99.68% of the assets of the MFS U.S. Concentrated Growth Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **How did the sustainability indicators perform?**

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 – measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	77.23	76.99
31 January 2023	77.45	76.87
30 November 2021	62.19	61.52

Climate Criterion 2 – measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	77.40	77.15
31 January 2023	59.36	58.92
30 November 2021	52.80	52.20

Climate Criterion 3 – measuring 'n't-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'n't-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	96.53	96.23
31 January 2023	90.08	89.41
30 November 2021	80.22	79.36

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Concentrated Growth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Concentrated Growth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”)” At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

Largest investments	Sector	% Asset	Country
Microsoft Corp	Information Technology	9.26	United States
Alphabet Inc Class A	Communication Services	7.57	United States
Visa Inc	Financials	6.62	United States
Accenture PLC	Information Technology	5.69	United States
Aon PLC	Financials	5.27	United States
Amphenol Corp	Information Technology	4.49	United States
Church & Dwight Co Inc	Consumer Staples	4.39	United States
TJX Cos Inc	Consumer Discretionary	4.24	United States
Boston Scientific Corp	Health Care	3.36	United States

The top investment holdings above represent the average security weights for the top 9 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

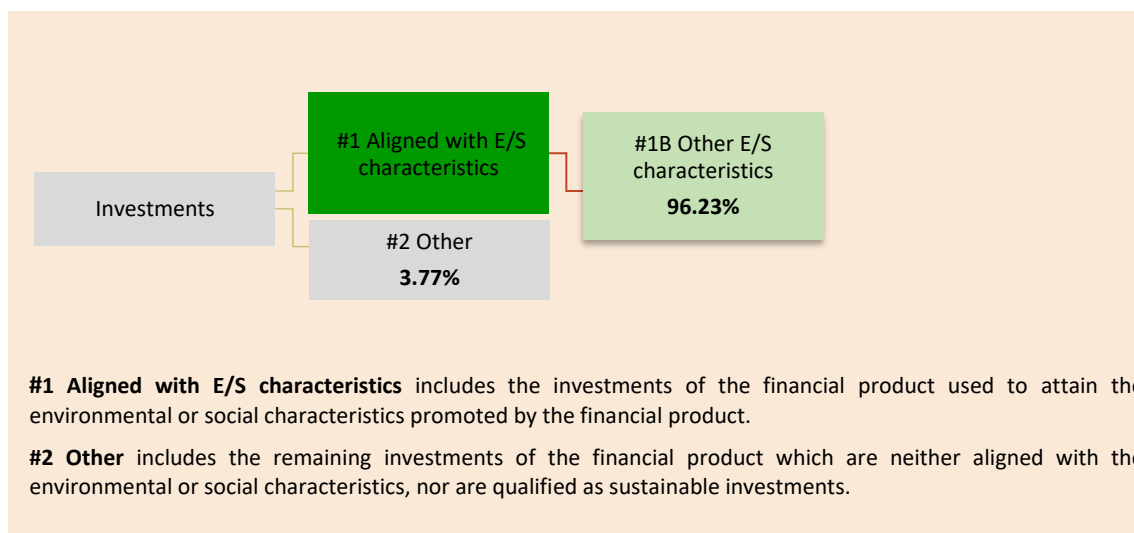

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The MFS U.S. Concentrated Growth Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Concentrated Growth Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

● What was the asset allocation?

As of 31 January 2024, equity securities represented 99.68% of the total assets of the portfolio of the MFS U.S. Concentrated Growth Fund; the remaining investments of 0.32% in the portfolio included cash and / or cash equivalent instruments; 96.53% of the equity securities in the portfolio of the MFS U.S. Concentrated Growth Fund met at least one of the climate criteria, which represented 96.23% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 3.77% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Information Technology	32.11
Health Care	15.52
Financials	14.16
Consumer Discretionary	11.56
Consumer Staples	8.58
Communication Services	8.29
Industrials	4.42
Real Estate	2.83
Utilities	1.83
Cash & Cash Equivalents	0.58

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS U.S. Concentrated Growth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel

In nuclear energy

No. The MFS U.S. Concentrated Growth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Concentrated Growth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS U.S. Concentrated Growth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Concentrated Growth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Proxy Voting - MFS U.S. Concentrated Growth Fund

MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Microsoft Corporation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – U.S. Corporate Bond Fund ("MFS U.S. Corporate Bond Fund ")
Legal entity identifier: 549300Y6O7X5WMN51U45

<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Corporate Bond Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Corporate Bond Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 76.19% of the corporate debt instruments in the portfolio of the MFS U.S. Corporate Bond Fund met at least one of the climate criteria, which represented 67.35% of the total assets. Corporate debt instruments represented 88.40% of the assets of the MFS U.S. Corporate Bond Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	67.84	59.96
31 January 2023	68.05	58.11
30 November 2021	68.17	63.25

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	29.24	25.84
31 January 2023	28.20	24.08
30 November 2021	28.51	26.45

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	2.17	1.91
31 January 2023	1.92	1.64
30 November 2021	2.21	2.05

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	76.19	67.35
31 January 2023	77.22	65.93
30 November 2022	81.39	75.51

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Corporate Bond Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Corporate Bond Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational**

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The MFS U.S. Corporate Bond Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Corporate Bond Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

● What was the asset allocation?

As of 31 January 2024, corporate debt instruments represented 88.40% of the total assets of the portfolio of the MFS U.S. Corporate Bond Fund; the remaining investments of 11.60% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 76.19% of the corporate debt instruments in the portfolio of the MFS U.S. Corporate Bond Fund met at least one of the climate criteria, which represented 67.35% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 32.65% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sectors	%Average weight
Corporate-Industrial	48.48
Corporate-Financial Institutions	29.70
Corporate-Utility	9.04
Treasury-Treasury	6.94
Cash-Cash	2.63
Derivatives-Exchange Traded	1.52
Government-Related-Sovereign	0.96
Government-Related-Agency	0.88
Securitized-CLO	0.88
Securitized-ABS	0.32
Government-Related-Local Authority	0.25

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

Zero. The MFS U.S. Corporate Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:
 In fossil fuel In nuclear energy

No. The MFS U.S. Corporate Bond Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

● Zero. The MFS U.S. Corporate Bond Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS U.S. Corporate Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Corporate Bond Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data.

In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements – MFS U.S. Corporate Bond Fund

During the reporting period, MFS investment professionals conducted 20 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: APA Group, Bank of America Corp, Becton Dickinson & Co, Diageo PLC, Duke Energy Corp, Edison International, Enel SpA, Glencore PLC, Plains All American Pipeline LP, ProLogis REIT, Sasol Ltd, Southern Co, Thermo Fisher Scientific Inc, Toronto-Dominion Bank, Volkswagen AG, Vulcan Materials Co and Westinghouse Air Brake Technologies Corp. Topics engaged on include identification of climate change risk, physical risk, transition risk, Net Zero / SBTi initiatives and climate scenario analysis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.S. Growth Fund ("MFS U.S. Growth Fund")
Legal entity identifier: 549300DUBLFTWOTUSY90

--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Growth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Growth Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 85.29% of the equity securities in the portfolio of the MFS U.S. Growth Fund met at least one of the climate criteria, which represented 84.45% of the total assets. Equity securities represented 99.02% of the assets of the MFS U.S. Growth Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	65.03	64.39
31 January 2023	63.55	62.25
30 November 2021	53.80	52.84

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	66.34	65.69
31 January 2023	70.68	69.24
30 November 2021	62.0	60.94

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	85.29	84.45
31 January 2023	84.52	82.80
30 November 2021	78.42	77.03

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Growth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Growth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

Largest investments	Sector	% Asset	Country
Microsoft Corp	Information Technology	9.67	United States
Amazon.com Inc	Consumer Discretionary	6.24	United States
Alphabet Inc Class A	Communication Services	6.07	United States
Apple Inc	Information Technology	6.04	United States

Boston Scientific Corp	Health Care	2.03	United States
Vulcan Materials Co	Materials	1.86	United States
MSCI Inc	Financials	1.80	United States
Verisk Analytics Inc	Industrials	1.80	United States

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 12 securities in portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

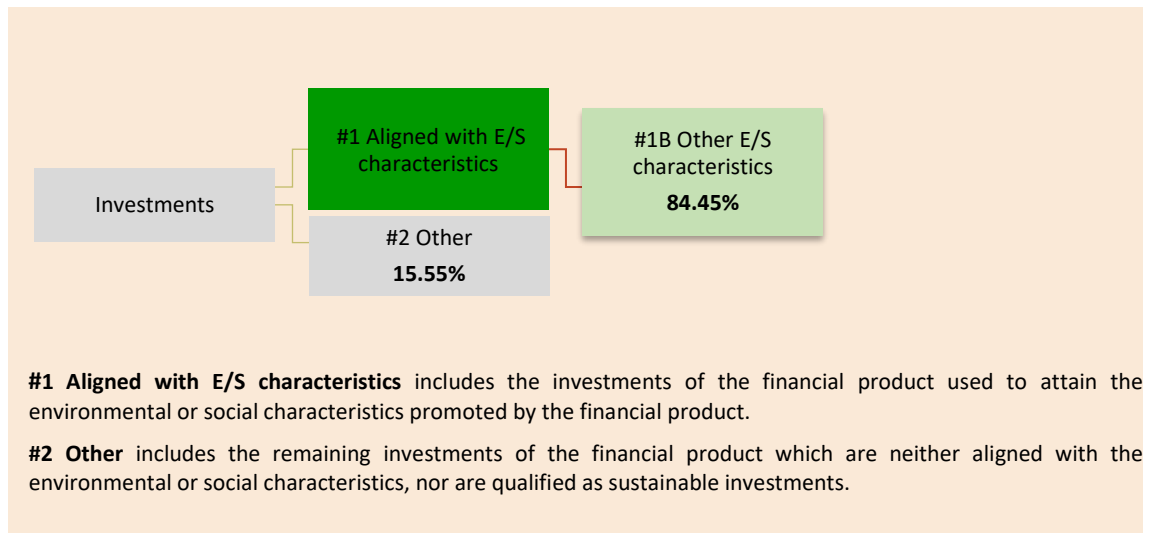

What was the proportion of sustainability-related investments?

The MFS U.S. Growth Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Growth Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2024, equity securities represented 99.02% of the total assets of the portfolio of the MFS U.S. Growth Fund; the remaining investments of 0.98% in the portfolio included cash and / or cash equivalent instruments; 85.29% of the equity securities in the portfolio of the MFS U.S. Growth Fund met at least one of the climate criteria, which represented 84.45% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 15.55% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Information Technology	36.77
Communication Services	12.26
Health Care	12.05
Consumer Discretionary	10.41
Financials	9.81
Industrials	8.45
Materials	5.56
Consumer Staples	1.36
Real Estate	1.06
Cash & Cash Equivalents	1.00
Energy	0.68

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS U.S. Growth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

 No. The MFS U.S. Growth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

● Zero. The MFS U.S. Growth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS U.S. Growth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Growth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements and Proxy Voting - MFS U.S. Growth Fund

During the reporting period, MFS investment professionals conducted 3 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Thermo Fisher Scientific Inc and Vulcan Materials Co. Topics engaged on include identification of climate change risk. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Canadian Pacific Kansas City Limited. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Martin Marietta Materials, Inc, Amazon.com, Inc and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuer during the reporting period: Amazon.com, Inc, CoStar Group, Inc, Caterpillar Inc, Microsoft Corporation and Intuit Inc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

<https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html>

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – U.S. Total Return Bond Fund ("MFS U.S. Total Return Bond Fund")
Legal entity identifier: YJVUBFW5FW4FOTQBP86

Environmental and/or social characteristics

Does this financial product have a sustainable investment?

Yes **No**

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS U.S. Total Return Bond Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Total Return Bond Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 82.02% of the corporate debt instruments in the portfolio of the MFS U.S. Total Return Bond Fund met at least one of the climate criteria, which represented 30.08% of the total assets. Corporate debt instruments represented 36.68% of the assets of the MFS U.S. Total Return Bond Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 1	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	75.58	27.72
31 January 2023	66.58	28.59
30 June 2022	70.64	26.86

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	23.92	8.77
31 January 2023	19.96	8.57
30 June 2022	19.87	7.56

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 June 2022	0	0

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

Climate Criterion 4	% of corporate debt instruments in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	1.44	0.53
31 January 2023	1.07	0.46
30 June 2022	1.59	0.60

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2, and / or 4 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of corporate debt instruments in the portfolio meeting any criteria	% of total assets in the portfolio meeting this criterion
31 January 2024	82.02	30.08
31 January 2023	73.20	31.42
30 June 2022	75.54	28.72

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

Not applicable.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Total Return Bond Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Total Return Bond Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational**

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

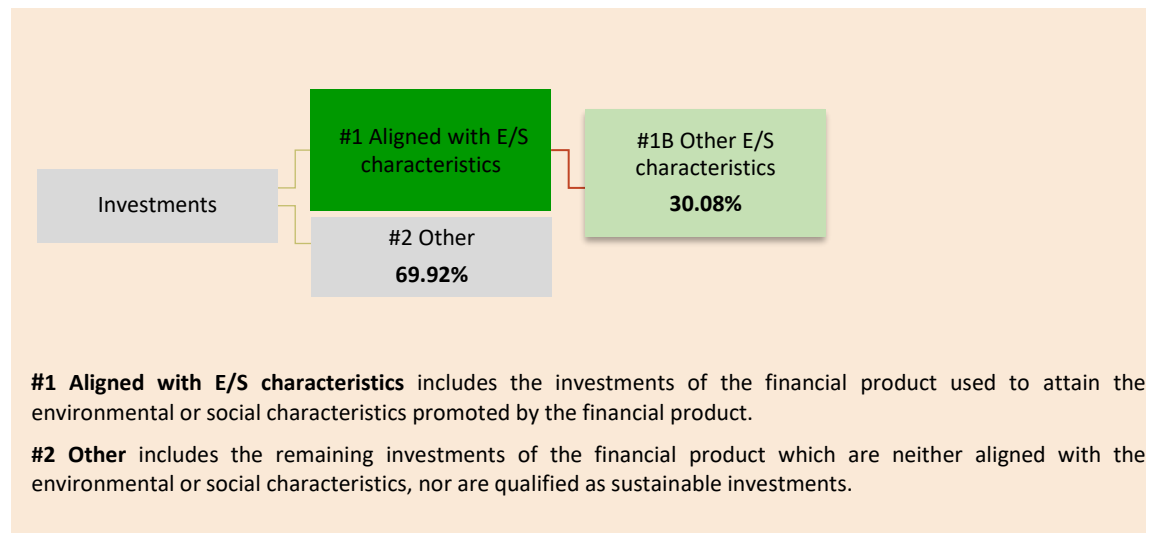

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS U.S. Total Return Bond Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Total Return Bond Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

● What was the asset allocation?

As of 31 January 2024, corporate debt instruments represented 36.68% of the total assets of the portfolio of the MFS U.S. Total Return Bond Fund; the remaining investments of 63.32% the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 82.02% of the corporate debt instruments in the portfolio of the MFS U.S. Total Return Bond Fund met at least one of the climate criteria, which represented 30.08% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 69.92% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments.

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

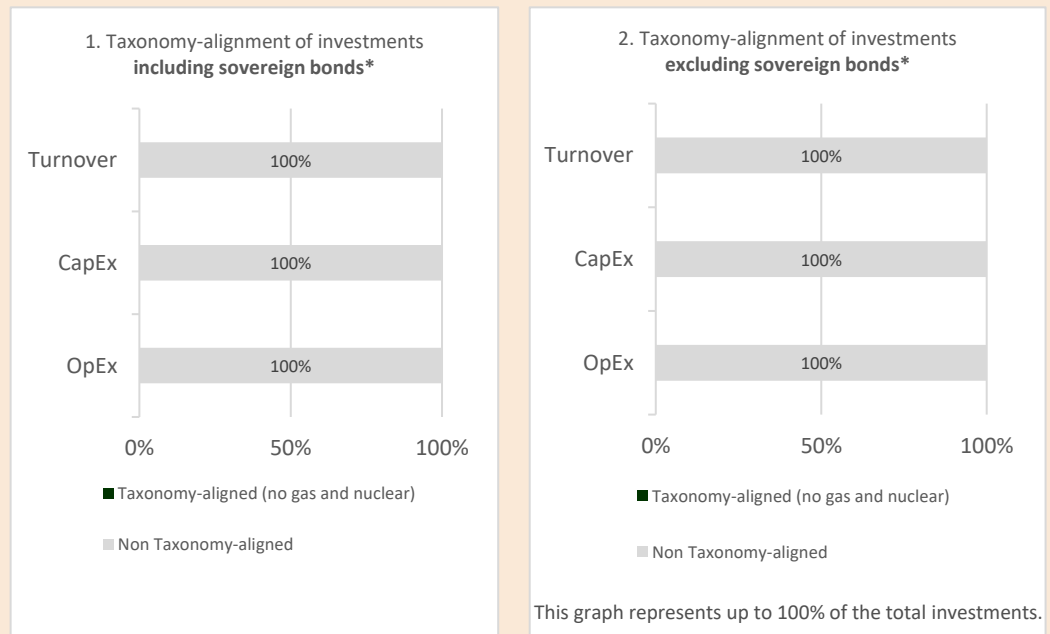

Zero. The MFS U.S. Total Return Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

Yes:
 In fossil fuel In nuclear energy

No. The MFS U.S. Total Return Bond Fund does not make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Total Return Bond Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 June 2022	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS U.S. Total Return Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Total Return Bond Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the

limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.

Engagements - MFS U.S. Total Return Bond Fund

During the reporting period, MFS investment professionals conducted 9 engagements with issuers in the portfolio of the Fund on climate related risks and opportunities including: Bank of America Corp, Enel SpA, Glencore PLC, Plains All American Pipeline LP, Vulcan Materials Co and Westinghouse Air Brake Technologies Corp. Topics engaged on include identification of climate change risk, transition risk and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.S. Value Fund ("MFS U.S. Value Fund")
Legal entity identifier: GB1O5HOU4PVHR7NT1O15

--	---

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2024, 89.07% of the equity securities in the portfolio of the MFS U.S. Value Fund met at least one of the climate criteria, which represented 88.80% of the total assets. Equity securities represented 99.69% of the assets of the MFS U.S. Value Fund as of 31 January 2024. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 1 February 2023 to 31 January 2024.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	82.98	82.72
31 January 2023	72.73	72.02
30 November 2021	83.44	82.39

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 2	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	51.04	50.88
31 January 2023	48.95	48.47
30 November 2021	37.20	36.74

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

Climate Criterion 3	% of equity securities in the portfolio meeting this criterion	% of total assets in the portfolio meeting this criterion
31 January 2024	0	0
31 January 2023	0	0
30 November 2021	0	0

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

Climate Criteria	% of equity securities in the portfolio meeting any criteria	% of total assets in the portfolio meeting any criteria
31 January 2024	89.07	88.80
31 January 2023	85.03	84.46
30 November 2021	92.34	91.17

... and compared to previous periods?

Please refer to the data disclosed under the section “How did the sustainability indicators perform?” above.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the “do no significant harm” principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the **GHG emissions** (scope 1 and 2, and 3 where available) and **GHG intensity of investee companies** principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: **carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector** (collectively, the “**Additional Emissions Indicators**”). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: **violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises** and **board gender diversity**. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 February 2023 to 31 January 2024.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

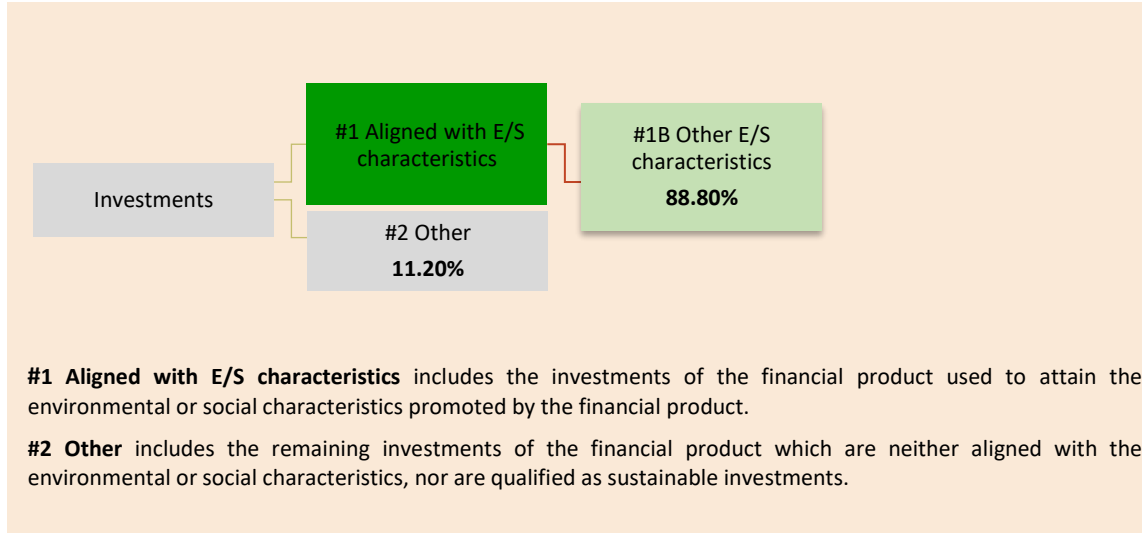

What was the proportion of sustainability-related investments?

The MFS U.S. Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Value Fund (i.e. # 1) from the Transition Date. Please see asset allocation section below for the proportion of sustainability-related investments.

What was the asset allocation?

As of 31 January 2024, equity securities represented 99.69% of the total assets of the portfolio of the MFS U.S. Value Fund; the remaining investments of 0.31% in the portfolio comprised of cash and / or cash equivalent instruments; 89.07% of the equity securities in the portfolio of the MFS U.S. Value Fund met at least one of the climate criteria, which represented 88.80% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 11.20% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments (#2 Other). Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sectors	% Average weight
Financials	24.89
Health Care	16.52
Industrials	16.18
Information Technology	8.25
Utilities	7.49
Consumer Staples	7.21
Energy	5.21

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2023, 30 June 2023, 30 September 2023 and 31 December 2023 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Zero. The MFS U.S. Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil fuel In nuclear energy

No. The MFS U.S. Value Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned investments	Turnover	CapEx	OpEx
31 January 2023	0%	0%	0%
30 November 2021	0%	0%	0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Zero. The MFS U.S. Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM")

In 2021, MFS joined the NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the NZAM initiative.

MFS interim and long-term targets:

- 2030 – 90% of in scope AUM is considered net zero aligned or aligning.
- 2040 – 100% of in scope AUM is considered net zero aligned.
- 2050 – 100% of AUM is considered 'achieving net zero'.

Over the past year, the MFS investment team began the process of creating general and certain sector-specific frameworks to evaluate a company's progress in aligning with long-term net zero goals. For example, members of the MFS staples sector team worked closely with the MFS sustainability investment team to evaluate certain high impact companies. We conducted engagements with several companies, and the MFS staples sector team held a meeting to share findings with the broader group of MFS analysts and portfolio managers.

MFS also produced its first NZAM progress report, which can be found on www.mfs.com.

Task Force on Climate related Financial Disclosures ("TCFD")

MFS' second annual TCFD report included additional data and insights on our approach to evaluating and managing climate risk. The report included a more detailed analysis of MFS views on and the limitations of climate scenario analysis, while also detailing our new commitments and work in the area of climate. The full MFS 2023 TCFD report can be found on www.mfs.com.

MFS Technology Enhancements on Climate

MFS employs IT professionals dedicated to integrating ESG data into MFS systems and creating new systems and visualizations that allow the MFS investment team to better capture and evaluate ESG data. In 2023, The MFS IT team developed new tools using visualization software that enables the MFS investment team to evaluate a company's or portfolio's climate performance. In addition, we developed a new front-end tool that will allow for the capture of critical information underpinning our assessment of net zero alignment.

Ongoing Research and Analysis

The MFS investment team members focused on sustainability continued to work with the broader investment team on various pieces of climate-related research and analysis. For example, details regarding climate commitments and NZAM alignment were shared as part of annual sustainability reviews with portfolio management teams, and the team conducted research on various topics like natural capital, carbon capture, and hydrogen supply. In addition, the MFS investment team developed and shared presentations around topics like the risks to oil sands companies in regards to the energy and climate transition.
