### INVESTMENT OBJECTIVE

The sub-fund seeks capital growth by investing at least two-thirds of its total assets in a diversified portfolio of the shares of companies whose main business and/or registered office is in India.

### RISK CONSIDERATIONS

- The Share class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy.
- The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest category does not mean a risk-free investment.
- The Compartment offers no capital guarantee or asset protection measures.
- The Compartment may be exposed to the following material risks which are not adequately captured by the synthetic risk indicator and may negatively impact its performance:
  - Operational risk: losses may result from, for instance, human errors, system failures, incorrect valuation and safekeeping of assets.
  - Counterparty risk: losses may occur when a counterparty does not honour its obligations related to instruments or contracts such as over-the-counter derivatives.
  - Impact of financial techniques: the use of leverage may amplify losses and gains, and/or may not result in the intended exposure.
  - Liquidity risk: under certain market conditions (such as, but not limited to stressed markets or low volumes), difficulties may be encountered in valuing and/or trading some of the assets.
  - Investments in emerging markets are generally more sensitive to risk events than those in developed markets. Such risk events may include changes in economic, political, fiscal and legal environment, as well as fraud.
