WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 5 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your initial investment. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 6 out of 7, which is the second highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the fund to pay you.

In addition to market risk other risks could be triggered i.e. counterparty risk, currency risk, interest rate risk, operational risk and liquidity risk. Refer to the Prospectus for full details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.
