Important information

Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- The Sub-Fund's exposure to a single country market, which may be subject to particular political and economic risks, may cause the sub-fund to be more volatile than more broadly diversified funds.
- Investors are reminded that there is no segregation of liability between Share Classes in the same Fund, so there is a remote risk that under certain circumstances, other Share Class holders of the same Fund will be exposed to liabilities arising from currency exposure transactions undertaken for a Base Currency Exposure Share Class which negatively impacts the Net Asset Value of these other Share Classes. Base Currency Exposure Share Classes contain additional risks which are set out in this Prospectus under the "General Risk Factors" heading.
