- The approach is to invest in industries which exhibit positive macro fundamentals and similarly companies which possess robust micro qualities.

Refer to Paragraphs 7.2, 7.3, 7.8 and 9.2.4 of the Prospectus for further information on the investment focus and approach of the Fund and its exposure to FDIs.

¹ The Prospectus is available for collection at our operating office at 80 Raffles Place, 3rd Storey, UOB Plaza 2, Singapore 048624 or through our authorised agents or distributors during normal business hours, or accessible at uobam.com.sg.

<ul style="list-style-type: none"> • While the main focus will be on long term growth, the Fund will only invest in companies where valuation levels can be justified. • <i>The Fund may use or invest in FDIs for the purposes of hedging existing positions in a portfolio, for efficient portfolio management or a combination of both purposes.</i> 	
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Managers are UOB Asset Management Ltd. • The Trustee is State Street Trust (SG) Limited. • The Custodian is State Street Bank and Trust Company, acting through its Singapore Branch. • The sub-manager of the Fund is Investec Asset Management Singapore Pte Limited. The sub-manager has in turn delegated its investment sub-management of the Fund to Investec Asset Management Limited. 	<p>Refer to Paragraphs 2 to 4 of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to Paragraphs 9.1 and 9.2 on of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risk in the global markets. Prices of securities that the Fund invests in may be affected by changes in economic conditions, interest rates and the market’s perception of the securities which in turn may affect the value of your investment. • You are exposed to equity risk as the Fund is an equity fund. The Fund may invest in stocks and other equity securities which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. This may in turn affect the value or volatility of the Fund. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Fund is not listed and you can redeem only on Dealing Days. There is no secondary market for the Fund. All realisation forms should be submitted to our authorised agents or distributors. • You are exposed to liquidity risk in the Fund’s investments. Investments by the Fund in some emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be less developed legal and regulatory systems, a greater degree of volatility in such markets because of smaller market capitalisations, greater influence from foreign capital flows, higher retail participation which tends to be shorter term in nature and possibly the lack of liquidity. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to commodities risk. The Fund currently does not use FDIs to gain exposure to commodities but may in the future do so, in accordance with the applicable provisions of the Code. The prices of commodities are influenced by, amongst others, various macroeconomic factors, climatic and geopolitical conditions, disease, and other natural phenomena, agricultural, trade, fiscal, monetary, and exchange control programmes and policies of governments and other unforeseeable events. The volatility of the Fund may be affected by the correlation between different commodities or classes of commodities to which the Fund is exposed. A higher correlation will have a greater impact on the performance of the Fund and may subject the Fund to greater or more rapid fluctuations in value. • You are exposed to political risk. The Fund’s investments may be adversely affected by political instability and exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls. 	

- **You are exposed to derivatives risk.** The Fund may use or invest in FDIs. An investment in a FDI may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. We have the controls for investments in FDIs and have in place systems to monitor the derivative positions of the Fund.
- **You are exposed to foreign exchange / currency risk.** Where the Fund makes investments which are denominated in foreign currencies, fluctuations in the exchange rates of the currency or currencies in which the underlying assets of the Fund are denominated against the Singapore dollar and/or the denominated currency of the relevant Class may affect the value of the relevant Units. The foreign currency exposure of the Fund or the relevant Class may not be fully hedged depending on the circumstances of each case. In the case of Hedged Classes, we currently adopt a passive hedging policy. Notwithstanding the above, we retain the discretion to adopt any other hedging policy as we may determine from time to time. There can be no guarantee that the hedging strategy applied in a Hedged Class will entirely eliminate the adverse effects of changes in exchange rates.
- **Other risks to your investment include small capitalisation companies risk, counterparty risk, broker risk, single sector risk, investment management risk and risk of using rating agencies and other third parties.**
