## JPM Multi-Asset Income Fund C - Net Accumulation a Share Class of JPM Multi-Asset Income Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B4N20M25

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

### Objective and Investment Policy

**Investment Objective:** To provide income by investing primarily in a global portfolio of income generating securities.

**Investment Approach:**

- ▶ Multi-asset approach, leveraging specialists from around JPMorgan Asset Management's global investment platform, with a focus on risk adjusted income.
- ▶ Flexible implementation of the managers' allocation views at asset class and regional level.

**Investment Policy:** The Fund will predominantly invest in fixed and floating rate Debt Securities and Equity and Equity-Linked Securities to generate income. The Fund may invest in High-Yield Bonds, Convertible Bonds, Investment Grade, Below-Investment Grade and Unrated securities, Real Estate Investment Trusts ("REITs"), smaller companies and collective investment schemes as the Investment Adviser deems appropriate. Issuers of securities may be located in any country, including Emerging Markets and the Fund may invest in assets denominated in any currency. Non-Sterling currency exposure (excluding Emerging Markets local currency) will be hedged back to Sterling. The Fund may use Financial Derivative Instruments (derivatives) and forward transactions for investment purposes and Efficient Portfolio Management, including hedging.

The Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes.

**Redemption and Dealing:** Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

**Management Discretion:** The Investment Adviser has the discretion to buy and sell investments on behalf of the Fund within the limits of the Objective and Investment Policy.

**Benchmark:** The benchmark of the Fund is 40% MSCI World Index (Net) Hedged to GBP, 30% Bloomberg Barclays US High Yield 2% Issuer Cap Index Hedged to GBP, 30% Bloomberg Barclays Global Credit Index Hedged to GBP.

The Benchmark is a performance comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

**Distribution Policy:** This Share Class will reinvest income.

### Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 4 because its Net Asset Value has shown medium fluctuations historically.

**Other material risks:**

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.
- ▶ The value of bonds and other debt securities may change significantly depending on market, economic and interest rate conditions as well as the creditworthiness of the issuer. Issuers of bonds and other debt securities may fail to meet payment obligations (default) or the credit rating of bonds and other debt securities may be downgraded. These risks are typically increased for below investment grade and certain unrated securities, which may also be subject to higher volatility and be more difficult to sell than investment grade securities.
- ▶ The Fund may have a significant exposure to asset and mortgage backed securities (ABS and MBS). ABS / MBS may be difficult to sell, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying asset are not met.
- ▶ The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The ACD is required to disclose in Appendix A of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.

- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.
- ▶ The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.
- ▶ Investments in companies engaged in the business of real estate may be more difficult to sell and may experience increased price volatility due to changes in economic conditions and interest rates.
- ▶ Investing in contingent convertible securities may adversely impact the Fund should specific trigger events occur (as specified in the terms of the security) and the Fund may be at increased risk of capital loss. This may be as a result of the contingent convertible security converting to equities at a discounted share price, the value of the contingent convertible security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- ▶ The Fund's asset allocation is actively managed. There is a risk that the performance of the Fund will suffer if the allocation to any particular asset class is low when that asset class is outperforming or high when that asset class is underperforming.
- ▶ This Fund is aggressively managed, which may result in higher volatility of the Fund's performance and bigger differences between the performance of the Fund and its benchmark.
- ▶ This Fund charges the annual fee of the Authorised Corporate Director (ACD) against capital, which will increase the amount of income available for distribution to Shareholders, but may constrain capital growth. It may also have tax implications for certain investors.
- ▶ As the portfolio of the Fund is primarily focused on generating income, it may bear little resemblance to the composition of its benchmark.
- ▶ Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.
