Dividend is not guaranteed. Past distributions are not necessarily indicative of future trends, which may be lower. A positive distribution yield does not imply a positive return. Data does not include special cash dividends. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. In the case of the Fund, the Fund may at its discretion pay dividends out of capital which may result in an immediate reduction of the Fund's NAV per share. In the case of Income II Shares, the Fund may at its discretion pay dividends out of capital as well as take into account the yield differential arising from share class currency hedging (which constitutes a distribution from capital). The management and other fees payable by the Income II Shares may also be charged to the capital of the Income II Shares, resulting in an increase in distributable income available for the payment of dividends and therefore, the Income II Shares may effectively pay dividends out of capital. This may result in an immediate reduction of the NAV per share for the Income II Shares. Please refer to www.pimco.com.sg for more information on income statistics. ¹ PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. ² PIMCO duration calculation with no adjustment on credit securities. ³ Benchmark provider duration methodology. ⁴ Annualised Distribution Yield is as of last quarter ending 31/12/2020. ⁵ Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. ABOUT THE BENCHMARK

ICE BofAML BB-B Rated Developed Markets High Yield Constrained Index Hedged into SGD tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries having an investment grade foreign currency long term debt rating (based on a composite of Moody's, S&P, and Fitch). The Index includes bonds denominated in U.S. dollars, Canadian dollars, sterling, euro (or euro legacy currency), but excludes all multicurrency denominated bonds. Bonds must be rated below investment grade but at least B3 based on a composite of Moody's, S&P, and Fitch.
