Summary of Investment Objective

The Global Allocation Fund seeks to maximise total return. The Fund invests globally in equity, debt and short term securities, of both corporate and governmental issuers, with no prescribed limits. In normal market conditions the Fund will invest at least 70% of its total assets in the securities of corporate and governmental issuers. The Fund generally will seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. The Fund may also invest a portion of its debt portfolio in high yield fixed income transferable securities. Currency exposure is flexibly managed.
