

JOHCM Global Opportunities Fund

Fund overview

- Objective: to generate long-term capital and income growth through active management of a concentrated portfolio of global equities listed on developed and emerging stock markets
- A high conviction, benchmark-unconstrained stock picking fund
- The fund managers believe that stock markets consistently underestimate the value created by well-managed companies in growth niches that reinvest wisely to create sustainable, compounding returns

Past performance is no guarantee of future performance.

The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging Markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. The Funds investment include shares in small-cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile. The annual management charge is deducted from the capital of the Fund. This will increase the income from the Fund but may constrain or erode potential for capital growth. We recommend that you read the Prospectus and Key Investor Information Document available from the address overleaf or from our website. Information on how JOHCM handles personal data which it receives can be found in the JOHCM Privacy Statement on its website: www.johcm.com.

Citywire's Fund Manager Ratings identify the individual managers who have the best risk-adjusted personal performance track records over three years and highlights the funds they are currently managing. The Citywire Manager Ratings are based on what is referred to as the Citywire Manager Ratio (equivalent of the Information Ratio). This takes into account career moves, career breaks and switches in funds managed. The figure reflects how much 'added value' in terms of outperformance against the benchmark the fund manager delivers for each unit of risk assumed (where risk is defined as not mirroring the index's return).

FE Crown Rating. Ratings do not constitute investment advice offered by FE and should not be used as the sole basis for making any investment decision. All rights reserved. © 2018 FE.
