Refer to paragraph 3 of Appendix 2 of the Prospectus for information on the investment strategy of the product.

[1] The Prospectus is available from the Managers (whose operating address is at 80 Raffles Place, 3rd Storey, UOB Plaza 2, Singapore 048624) or through their authorised agents or distributors during their respective business hours, or through the Managers' website at uobam.com.sg.

PRODUCT HIGHLIGHTS SHEET

• Investments are identified based on a balance of metrics such as quality, growth, valuation and capital returns. • The Sub-Fund invests primarily in equity securities. Subject to the foregoing, the Sub-Fund may invest in other securities including, without limitation, exchange traded funds and equity-related securities such as depositary receipts. • While the Sub-Fund is not constrained by market capitalisation, country, sector or industry, the companies it seeks to invest in typically have market capitalisation exceeding US$3 billion with sufficient trading volume. • FDIs may be used or invested in for the purposes of hedging existing positions, efficient portfolio management, or a combination of both purposes. • In the event of extreme market conditions, severe market stress or disruptions, or if there are no suitable investment opportunities, up to 100% of the Sub-Fund's assets may be temporarily held in cash and/or placed in cash deposits and/or invested in money market instruments.	
Parties Involved	
WHO ARE YOU INVESTING WITH? • The Managers are UOB Asset Management Ltd. • The Trustee is State Street Trust (SG) Limited. • The Custodian is State Street Bank and Trust Company, Singapore Branch. • The Sub-Managers are Wellington Management Singapore Pte Ltd. • The Sub-Investment Managers are Wellington Management Company LLP and Wellington Management International Ltd.	Refer to paragraphs 2, 3, 4 and 21.4 of the Prospectus for information on these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? **The value of the Sub-Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:**	Refer to paragraph 9 of the Prospectus and paragraph 6 of Appendix 2 of the Prospectus for information on risks of the product.
Market and Credit Risks	
• **You are exposed to market risks.** o Prices of the securities that the Sub-Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment. • **You are exposed to equity risks.** o The Sub-Fund invests in stocks and other equity securities that historically have greater price volatility than bonds and other fixed income securities. This in turn may affect the value or volatility of the Sub-Fund.	
Liquidity Risks	
• **The Sub-Fund is not listed and you can redeem only on Dealing Days.** o There is no secondary market for the Sub-Fund. All realisation forms should be submitted to the Managers' authorised agents or distributors. • **You are exposed to liquidity risks in the Sub-Fund's investments.** o Investments by the Sub-Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity.	
Product-Specific Risks	
• **You are exposed to political, regulatory and legal risk.** o The Sub-Fund's investments may be adversely affected by international political developments, exchange controls, taxation, monetary and fiscal policies, foreign investment policies, government policies, restrictions on repatriation of investments and other changes in the laws and regulations in the relevant countries. • **You are exposed to concentration risk.** o Concentration of investments in a relatively small number of securities, sectors or industries, or geographical regions may significantly affect performance.	

- **You are exposed to foreign exchange / currency risk.**
  - Where investments are denominated in a currency that is different from the currency of denomination of the Sub-Fund or (as the case may be) relevant Class, fluctuations of the exchange rates of such currencies against the currency of the Sub-Fund or Class may affect the value of Units. The Managers may hedge the foreign currency exposure of the Sub-Fund or Class and may adopt an active or passive currency management approach. Foreign currency exposure may not be fully hedged depending on circumstances of each case, including the outlook, hedging costs and market liquidity of the relevant currency.
  - Where a Class is not denominated in SGD, changes in the exchange rate between SGD and the Class currency may adversely affect the value of the Units of such Class, as expressed in the Class currency.
  - *Hedged Classes*: In the case of Hedged Classes, the Managers currently adopt a passive hedging policy. Notwithstanding the above, the Managers retain the discretion to adopt any other hedging policy as they may determine from time to time. There can be no guarantee that the hedging strategy applied in a Hedged Class will entirely eliminate the adverse effects of changes in exchange rates.
- **You are exposed to derivatives risks.**
  - Investments in FDIs are subject to risks associated with FDIs including leverage risk and short sale risk. An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Sub-Fund.
- **You are exposed to risks relating to distributions.**
  - Dividend/interest income may be adversely affected by e.g. investee entities suffering unexpected losses and/or paying lower than expected dividends, and currency fluctuations. Distributions from capital may reduce part of your original investment and result in reduced future returns. Distributions (out of capital or otherwise) may have the effect of lowering the Sub-Fund's NAV.

You should be aware that the Sub-Fund may be exposed to other risks of an exceptional nature from time to time.
