Objectives and Investment Policy

- The Sub-Fund's objective is to maximise earnings and achieve capital growth over a medium-long term investment horizon.
- The Sub-Fund primarily invests in global securities issued by entities operating within the financial sector. Securities may be fixed income (such as bonds issued by banks or insurance companies), equities (listed shares), or hybrids (securities which combine both fixed income and equity features) with a focus on contingent convertible bonds (higher dividend paying bonds which may convert into the issuers equity or suffer capital losses if pre-specified events occur).
- The fixed income securities held may be investment grade (Standard & Poor's (or equal) credit rating of BBB- or better), rated below investment grade or unrated.
- The Sub-Fund may use financial derivative instruments (FDIs) whose performance is linked to that of underlying security(s) or asset class(es).
- The Investment Manager has flexibility to change the Sub-Fund's asset allocation (% of the portfolio invested in equities/bonds/FDIs etc) at any time and has discretion to select investments within each asset class.
- Income and gains generated by the LB Class and SB Class of Units will be distributed periodically in the form of a dividend.
- All income and gains generated by the LA Class and SA Class of Units will be reinvested. No dividends will be paid.
- Units can be bought or sold on any business day from the Fund's Administrator.
- Please refer to the Prospectus and Sub-Fund Information Card for more detailed information.

Risk and Reward Profile

| | | | | | | |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

The following risks are considered material and may not be fully captured by the risk and reward indicator:

- Contingent Convertible Bond ("CoCo") Risk – Investment in CoCos may result in material losses to the Sub-Fund. Following certain trigger events, including an issuer's capital ratio falling below a particular level, the bond may be converted into the issuer's equity or suffer capital losses.
- Counterparty Risk - The risk that a counterparty will not fulfil their contractual obligations resulting in a potential loss to the Sub-Fund.
- Concentration Risk - investments are concentrated in a specific sector/country. This means the sub-fund is more sensitive to specific economic, market, political or regulatory events related to the sector/country.
- This Sub-Fund has the ability to pay dividends from capital which will have the following effects (i) capital will be eroded, (ii) distribution is achieved by forgoing the potential for future capital growth and (iii) the cycle may continue until all capital is depleted.

A complete description of risk factors is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.
