KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a UCITS compliant sub-fund constituted in Luxembourg.
- If you hold distribution shares, your shares may receive monthly or yearly distributions in accordance with the particular distribution share class. This is at the discretion of the directors and subject to the approval of the shareholders. However, no distribution will be carried out if it is not in your interest nor in that of other shareholders to distribute a dividend at that particular market condition. You should note that where distributions calculated on the basis of the benchmark dividend yield exceed the sub-fund’s income, such distributions will be made up of a capital component and will cause a decrease in the net asset value of the sub-fund.
- Capitalisation shares will retain their income to reinvest.

Please refer to the Luxembourg Prospectus, Book I, page 17 for further information on the SICAV and page 23 for details on the product share classes.

Investment Strategy

- At all times, this sub-fund invests at least 75% of its assets in equities and/or equity equivalent securities issued by companies that have their registered office or conduct a significant proportion of their business in Brazil.
- The remaining portion, namely a maximum of 25% of its assets, may be invested in any other transferable securities, money market instruments, financial derivative instruments or cash, and also, within a limit of 15% of the assets, in debt securities of any kind and, within a limit of 10% of the assets, in UCITS or UCIs.
- You should note that the sub-fund may use financial derivative instruments (“FDIs”) as part of its investment strategy for investment (trading) purpose and/or hedging purposes. The sub-fund may also carry out securities lending and repurchase transactions.
