## Old Mutual Investment Funds Series II

---

### Information About the Company During the Period

Old Mutual Investment Funds Series II is an investment company with variable capital incorporated in England and Wales under registration number IC76 and authorised by the Financial Services Authority under the Open Ended Investment Companies Regulations 2001.

The Company is an umbrella company. The assets of each fund are treated as separate from those of every other fund and will be invested in accordance with that fund's own investment objective and policy.

Each sub fund of the company belongs to the type of UCITS scheme within chapter 5 of the FSA Collective Investment Schemes Sourcebook 2004 Regulations ("COLL Sourcebook").

#### Liability

The shareholders of the Company have no liability for the debts of the Company.

Sub funds are not legal entities in themselves but form part of the Company. Should the assets attributed to any sub fund be insufficient to meet the liabilities attributable to it, the shortfall may be met out of the assets attributed to one or more of the other sub funds.

We hereby certify the financial statements on behalf of Old Mutual Managers Limited.

P. Nathan  
Chief Operating Officer  
Old Mutual Fund Managers Limited

Quartile	4	4	2	3	1	2
MSCI Asia Pacific Free	-4.8%	24.2%	63.1%	-44.7%	53.1%	23.3%
Data Source - © Morningstar, bid to bid, net income reinvested, sterling						

#### Investment Objectives, Policy and Strategy

To achieve long term capital growth through the active management of a diversified portfolio of securities. There will be no geographic or economic restrictions but principally, investment will be in securities traded on Asian and Australasian stockmarkets.

Subject to the regulations, the property of the fund may include transferable securities, shares in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives.

The fund will initially only use derivatives for Efficient Portfolio Management purposes. The fund may use derivatives for purposes other than EPM, provided it has given shareholders 60 days notice of such change. If the fund did use derivatives for investment purposes, the net asset value of the fund would therefore, at times, be highly volatile and the risk profile of the fund might change.

The fund aims to achieve long term capital growth by investing in a diversified portfolio of securities originating predominantly in the markets of the Asia Pacific region excluding Japan. This includes the more developed markets of Australia, Hong Kong and Singapore.

#### Review

Asian equity markets tracked higher through the first half of the review period, with investment sentiment buoyed by sustained economic growth in key emerging markets and a gradual but overall positive improvement in developed economies. Unfortunately, a number of events, financial and non-financial, combined to severely erode confidence, leading to a succession of crises and, in late July to early August, a sharp correction in share values. In February and March floods in Queensland affected commodity prices, while political unrest in the Middle East and North Africa affected the oil price. In early March Japan suffered significant damage from a tsunami, which in turn impacted global technology and automotive supply chains. Adding to concern, the summer quarter saw series of weak economic data from the US, including in key areas such as housing and employment.

The overwhelming issue however, was eurozone sovereign debt. The crisis in the eurozone served to highlight the levels of public debt across the large developed economies. Japan and the US both suffered credit downgrades in the period. Sentiment to Asian markets deteriorated sharply towards the end of the period as European authorities failed to deliver a solution sufficient to restore economic confidence. Within Asian economies, the risk of inflation kept monetary policy relatively tight, adding to concerns that alongside a slowing outlook for Asia's trade with developed economies tight monetary conditions could slow domestic activity.

The MSCI AC Asia Pacific Ex Japan fell 4.8% in sterling over the period. China and India under-performed as authorities kept monetary conditions tight to control inflation. Smaller economies, such as Indonesia, with more domestic oriented growth drivers made positive returns. Economically sensitive sectors such as industrials underperformed, while defensive sectors such as telecommunications led.

Overall fund performance for the period was disappointing. Detractors to performance included the overweight position in China where property developers Agile and China Overseas Land underperformed as investors feared sales growth would slow. Exposure to the technology sector further detracted from performance, as Catcher and Wintek underperformed on concern of increased competition. These negative features were partially offset by the overweight positions in the consumer sector. Jardine Cycle and Carriage benefited from strong demand for cars and motor cycles in Indonesia, while Daphne performed well as it demonstrated a recovery in growth. The fund also benefitted from a move to underweight in the mining sector where we owned Macarthur Coal, which performed strongly on a takeover approach.

#### Outlook

The issue of public debt in the developed economies is not going to disappear quickly or easily, but it appears increasingly likely that lurching from crisis to crisis will give way to broad agreement on longer-term solutions. This should be positive for equities as it will allow investors to return to fundamentals. These include good levels of growth in Asian economies, stimulating a global demand cycle, and stable, if low, levels of growth in developed economies. In the meantime, Asian equity valuations are at historically low levels.

#### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser.

#### Note:

External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset.

Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.

## Old Mutual Investment Funds Series II

### Old Mutual Asian Select Fund

#### Net Asset Value per Share

The fund was launched on 14 September 1994. Income units were first issued on that date at 105p per unit. Accumulation units were first issued on 10 October 1999. On 19 September 2007, the fund was converted into a sub fund of an Open Ended Investment Company, Old Mutual Investment Funds Series II.

#### Fund size

Date	Net asset value £	Net asset value per share (pence)	Equivalent number of shares in issue
31 October 2009 Class A Acc	75,117,977	205.32	36,584,938
31 October 2010 Class A Acc	88,158,365	240.53	36,651,897
31 October 2011 Class A Acc	72,713,198	219.77	33,085,469

#### Capital price range

The table below shows the highest buying and lowest selling prices of shares/units over the last five years.

Calendar year	Income shares		Accumulation shares	
	Highest buying (pence)	Lowest selling (pence)	Highest buying (pence)	Lowest selling (pence)
2006 Class A	147.33	115.36	156.72	121.08
2007 Class A	207.15	136.32	262.15	145.01
2008 Class A	-	-	255.35	113.83
2009 Class A	-	-	234.24	132.66
2010 Class A	-	-	262.20	202.24
2011* Class A	-	-	265.54	190.45

\*To 31 October

#### Net income distribution

The table below shows the net income distribution in pence per share/unit paid over the last five years.

Calendar year	Income shares (pence)	Per £1,000 invested 03/01/2006 (£)	Accumulation shares (pence)	Per £1,000 invested 03/01/2006 (£)

### Notes to the Financial Statements

#### 1. Accounting Policies

The accounting policies are set out in note 1 to the aggregated financial statements on page 109.

#### 2. Net (Losses)/Gains on Investments

The net (losses)/gains on investments during the year comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	(7,250)	12,661
Currency losses	(84)	(217)
Transaction costs and handling charges	(30)	(54)
<b>Net capital (losses)/gains</b>	<b>(7,364)</b>	<b>12,390</b>

#### 3. Revenue

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
UK dividends	94	89
Overseas income	2,039	1,839
Securitised interest	2	2
Sundry income	1	2
	<b>2,136</b>	<b>1,932</b>

#### 4. Expenses

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Payable to the ACD, associates of the ACD and agents of either of them:		
ACD's periodic charge	1,281	1,192
Administration fees	135	121
	<b>1,416</b>	<b>1,313</b>
Payable to the Depositary, associates of the Depositary and agents of either:		
Depositary's fee	16	15
Safe custody fees	68	67
	<b>84</b>	<b>82</b>
Other expenses:		
Audit fees	12	6
Sundry expenses	1	10
	<b>13</b>	<b>16</b>
<b>Total expenses</b>	<b>1,513</b>	<b>1,411</b>

## Old Mutual Investment Funds Series II

### Old Mutual Asian Select Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

###### a) Analysis of the charge for the year:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas tax	114	121
<b>Total taxation</b>	<b>114</b>	<b>121</b>

###### b) Factors affecting current tax charge for year:

The tax deductible expenses substantially exceed the taxable revenue of the Fund and, as a result, there is no corporation tax charge.

Net revenue before taxation	622	521
Corporation tax at 20%	124	104
Effects of:		
Revenue not subject to taxation	(19)	(18)
Overseas tax	114	121
Movement in excess management expenses	(105)	(86)
<b>Actual tax charge</b>	<b>114</b>	<b>121</b>

As at 31 October 2011, the fund had excess management expenses of £2,917,948 (31 October 2010: £1,407,432) which have not been recognised as a deferred tax asset. This is because the fund is not expected to generate taxable revenue in a future period in excess of deductible expenses of that period and, accordingly, the fund is unlikely to be able to reduce future tax liabilities through the use of existing surplus expenses.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed annually on the last day of December. The distributions take account of revenue received on the creation of shares and income deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net revenue after taxation	508	400
	<b>508</b>	<b>400</b>
Final accumulation	495	415
	495	415
Add: Revenue paid on shares cancelled	17	14
Deduct: Revenue received on shares created	(4)	(29)
Net distribution for the year	508	400
Interest	1	-
<b>Total finance costs: Distributions</b>	<b>509</b>	<b>400</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Amounts receivable from the ACD for creation of shares	3	-
Sales awaiting settlement	1,326	545
Accrued income	-	8
Withholding tax recoverable	6	5
Prepayment of expenses	3	11
	<b>1,338</b>	<b>569</b>

##### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

##### 10. Contingent Liabilities and Commitments

There are no contingent liabilities or commitments at the balance sheet date (31 October 2010: Nil).

##### 11. Financial Instruments and the Management of Risk

The main risk arising from the fund's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

The fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from time differences in the transactions of the fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

###### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy on the management of investment risk is driven by its objectives as stated on page 5.

The fund's market risk is monitored on a daily basis by an independent risk team of the Investment Adviser. The Fund's overall market positions are monitored daily by the Fund's Investment Adviser and reviewed by the ACD on a quarterly basis.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 8 to 10.

###### Currency risk

Currency risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in currency exchange rates. As the Fund invests in foreign currency denominated assets, it is exposed to currency risk.

This risk is managed through the use of limits which restrict the total amount that can be invested in foreign currency denominated assets.

United States Dollar	4,099	(334)	3,765
	<b>82,371</b>	<b>483</b>	<b>82,854</b>

#### Interest rate risk

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates.

Interest rate risk arises in the Fund through the surplus cash placed on short term deposits. As a result, the Fund is subject to limited exposure to interest rate risk due to fluctuations in the prevailing levels of market interest rates received.

#### Other price risk

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the Fund is to maintain a diversified portfolio by investing in different countries and sectors and limiting its exposure to a particular sector and or country in relation to the whole portfolio.

#### Credit risk

Credit risk is the risk that revenue and capital of the Fund will be adversely affected by inability of counterparties to meet their contractual payment obligations.

Credit risk arises in the Fund through the potential for counterparties to various financial instruments failing to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits.

#### Notes to the Financial Statements (continued)

##### 11. Financial Instruments and the Management of Risk (continued)

###### Liquidity risk

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price. Liquidity risk arises in the Fund through the potential redemption of any shares that investors wish to sell.

This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

##### 12. Portfolio Transaction Costs

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000

## Old Mutual Investment Funds Series II

### Old Mutual Asian Select Fund

---

#### Distribution on 31 December 2011 for the year ended 31 October 2011

Group 1: Shares purchased prior to 1 November 2010

Group 2: Shares purchased on or after 1 November 2010

	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>				
<b>Accumulation shares</b>				
Group 1	1.4949	-	1.4949	1.1318
Group 2	1.2028	0.2921	1.4949	1.1318

Equalisation applies only to shares purchased since 1 November 2010 (Group 2 shares). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to Income Tax but must be deducted from the cost of shares for Capital Gains Tax purposes.

##### Investment Objectives, Policy and Strategy

To achieve long term capital growth through the active management of a diversified portfolio invested primarily in European stock markets excluding the United Kingdom.

Subject to the regulations, the property of the fund may include transferable securities, units in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives.

The fund will initially only use derivatives for Efficient Portfolio Management purposes. The fund may use derivatives for purposes other than EPM, provided it has given shareholders 60 days notice of such change. If the fund did use derivatives for investment purposes, the net asset value of the fund would therefore, at times, be highly volatile and the risk profile of the fund might change.

The European Equity Fund is a core Europe (ex UK) fund managed using OMAM's proprietary quantitative investment process.

The fund aims to generate long term capital growth through an actively managed, diversified portfolio of listed European equities.

##### Review

Global equity markets tracked higher through the first four months of the review period, with investment sentiment buoyed by sustained economic growth in key emerging markets and a gradual but overall positive improvement in developed economies. Unfortunately, a number of events combined to severely erode confidence, leading in late July to early August to a sharp correction in share values. In February and March came floods in Queensland, affecting commodity prices, and political unrest in the Middle East and North Africa, affecting the oil price. A tsunami in Japan impacted global technology and automotive supply chains. Adding to concern, the summer quarter saw series of weak economic data from the US, including in key areas such as housing and employment.

The overwhelming issue, however, was eurozone sovereign debt. Lacking established political or fiscal institutions, and with the European Central Bank reluctant to take a lead, politicians struggled to find means to ensure that highly indebted peripheral states would avoid default. Although Greece was the epicentre of the successive crises which characterised the period, the real danger was always a loss of confidence in Italy, the world's third-largest debtor state. The crisis in the eurozone served to highlight the levels of public debt across the large developed economies. Japan and the US both suffered credit downgrades in the period.

The MSCI Europe ex UK Index fell 8.9% in sterling over the period. The periphery markets were hit the hardest, although the larger markets of Germany, France and particularly Italy were also hit hard over the period. Performance of the fund was extremely strong in the 12 months to the end of October with the fund strongly outperforming both benchmark and peer group in a very volatile period for equity markets. Both stock and sector selection added to performance with stock selection positive in eight out of ten sectors and sector selection positive in all ten sectors over the year. Returns to the individual investment strategies were also strong, with dynamic valuation, market dynamics and company management strategies of particular note.

##### Outlook

The issue of public debt in the developed economies is not going to disappear quickly or easily, but it appears increasingly likely that lurching from crisis to crisis will give way to broad agreement on longer-term solutions. This should be positive for equities as it will allow investors to return to fundamentals. These include good levels of growth in emerging markets, stimulating a global demand cycle, and stable, if low, levels of growth in developed economies. In the meantime, equity valuations are at historically low levels.

##### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser.

##### Note:

External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset.

Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.

### Notes to the Financial Statements

#### 1. Accounting Policies

The accounting policies are set out in note 1 to the aggregated financial statements on page 109.

#### 2. Net (Losses)/Gains on Investments

The net (losses)/gains on investments during the year comprise

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	(1,710)	3,382
Derivative contracts	(26)	107
Currency gains/(losses)	26	(55)
Transaction costs and handling charges	(49)	(26)
<b>Net capital (losses)/gains</b>	<b>(1,759)</b>	<b>3,408</b>

#### 3. Revenue

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
UK dividends	-	186
Overseas income	2,024	2,254
Bank interest*	1	1
Securitised interest	-	1
Sundry income	1	-
	<b>2,026</b>	<b>2,442</b>

\*Bank interest is earned on deposits held with an associate of the Depositary.

#### 4. Expenses

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Payable to the ACD, associates of the ACD and agents of either of them:		
ACD's periodic charge	1,096	1,018
Administration fees	109	102
	<b>1,205</b>	<b>1,120</b>
Payable to the Depositary, associates of the Depositary and agents of either:		
Depositary's fee	15	14
Safe custody fees	23	21
	<b>38</b>	<b>35</b>
Other expenses:		
Audit fees	12	6
	<b>12</b>	<b>6</b>
<b>Total expenses</b>	<b>1,255</b>	<b>1,161</b>

## Old Mutual Investment Funds Series II

### Old Mutual European Equity Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

###### a) Analysis of the charge for the year:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas tax	183	116
<b>Total taxation</b>	<b>183</b>	<b>116</b>

###### b) Factors affecting current tax charge for year:

The tax deductible expenses substantially exceed the taxable revenue of the Fund and, as a result, there is no corporation tax charge.

Net revenue before taxation	771	1,281
Corporation tax at 20%	154	256
Effects of:		
Revenue not subject to taxation	-	(37)
Overseas tax	183	116
Movement in excess management expenses	(154)	(219)
<b>Actual tax charge</b>	<b>183</b>	<b>116</b>

As at 31 October 2011, the fund had surplus management expenses of £1,448,222 (31 October 2010: £869,314) which have not been recognised as a deferred tax asset. This is because the fund is not expected to generate taxable revenue in a future period in excess of deductible expenses of that period and, accordingly, the fund is unlikely to be able to reduce future tax liabilities through the use of existing surplus expenses.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed annually on the last day of December. The distributions take account of revenue received on the creation of shares and income deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net revenue after taxation	588	1,165
	<b>588</b>	<b>1,165</b>
Final accumulation	537	1,188
	537	1,188
Add: Revenue paid on shares cancelled	52	70
Deduct: Revenue received on shares created	(1)	(93)
Net distribution for the year	588	1,165
<b>Total finance costs: Distributions</b>	<b>588</b>	<b>1,165</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Sales awaiting settlement	9	369
Accrued income	-	2
Withholding tax recoverable	276	187
Prepayment of expenses	2	9
	<b>287</b>	<b>567</b>

## Old Mutual Investment Funds Series II

### Old Mutual European Equity Fund

#### Notes to the Financial Statements (continued)

##### 8. Creditors

	31 October 2011	31 October 2010
	£000	£000
Amounts payable to the ACD for cancellation of shares	12	225
Purchases awaiting settlement	-	435
Accrued expenses	23	15
	<b>35</b>	<b>675</b>

##### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

##### 10. Contingent Liabilities and Commitments

There are no contingent liabilities or commitments at the balance sheet date (31 October 2010: £1,175).

##### 11. Financial Instruments and the Management of Risk

The main risk arising from the fund's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

The fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from time differences in the transactions of the fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

##### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy on the management of investment risk is driven by its objectives as stated on page 18.

The fund's market risk is monitored on a daily basis by an independent risk team of the Investment Adviser. The Fund's overall market positions are monitored daily by the Fund's Investment Adviser and reviewed by the ACD on a quarterly basis.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 21 to 24.

##### Currency risk

Currency risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in currency exchange rates. As the Fund invests in foreign currency denominated assets, it is exposed to currency risk.

This risk is managed through the use of limits which restrict the total amount that can be invested in foreign currency denominated assets.

Currency exposure:

The fund's foreign currency asset exposure as at 31 October 2011 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Danish Kroner	2,469	1	2,470
Euro	41,823	449	42,272
Norwegian Kroner	960	54	1,014
Swedish Kronor	4,727	27	4,754
Swiss Franc	10,423	127	10,550
United States Dollar	665	-	665
	<b>61,067</b>	<b>658</b>	<b>61,725</b>

## Old Mutual Investment Funds Series II

### Old Mutual European Equity Fund

#### Notes to the Financial Statements (continued)

##### 11. Financial Instruments and the Management of Risk (continued)

The fund's foreign currency asset exposure as at 31 October 2010 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Danish Kroner	3,830	5	3,835
Euro	49,358	(103)	49,255
Norwegian Kroner	2,262	15	2,277
Swedish Kronor	6,632	430	7,062
Swiss Franc	10,110	95	10,205
	<b>72,192</b>	<b>442</b>	<b>72,634</b>

##### **Interest rate risk**

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates.

Interest rate risk arises in the Fund through the surplus cash placed on short term deposits. As a result, the Fund is subject to limited exposure to interest rate risk due to fluctuations in the prevailing levels of market interest rates received.

##### **Other price risk**

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the fund is to maintain a diversified portfolio by investing in different European markets and limiting exposure to particular risk factors in relation to the whole portfolio. The fund Manager actively reviews the portfolio on an ongoing basis to ensure it is consistent with the Fund's objectives and re-balance as required to achieve this.

##### **Credit risk**

Credit risk is the risk that revenue and capital of the Fund will be adversely affected by inability of counterparties to meet their contractual payment obligations.

Credit risk arises in the Fund through the potential for counterparties to various financial instruments failing to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits.

## Old Mutual Investment Funds Series II

### Old Mutual European Equity Fund

---

#### Notes to the Financial Statements (continued)

##### 11. Financial Instruments and the Management of Risk (continued)

###### Liquidity risk

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price.

Liquidity risk arises in the Fund through the potential redemption of any shares that investors wish to sell. This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

##### 12. Portfolio Transaction Costs

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Analysis of total purchase costs		
Purchases in year before transaction costs	135,889	93,326
Commissions	46	63
Taxes	26	21
Total purchase costs	72	84
<b>Total purchases including transaction costs</b>	<b>135,961</b>	<b>93,410</b>
Analysis of total sale costs		
Gross sales before transaction costs	146,302	93,980
Commissions	(50)	(63)
Taxes	(1)	(3)
Total sale costs	(51)	(66)
<b>Total sales net of transaction costs</b>	<b>146,251</b>	<b>93,914</b>

## Old Mutual Investment Funds Series II

### Old Mutual European Equity Fund

---

#### Distribution on 31 December 2011 for the year ended 31 October 2011

Group 1: Shares purchased prior to 1 November 2010

Group 2: Shares purchased on or after 1 November 2010

	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>				
<b>Accumulation shares</b>				
Group 1	1.1839	-	1.1839	2.2575
Group 2	0.4822	0.7017	1.1839	2.2575
<b>Class B</b>				
<b>Accumulation shares</b>				
Group 1	1.4039	-	1.4039	2.0725
Group 2	1.4039	-	1.4039	2.0725

Equalisation applies only to shares purchased since 1 November 2010 (Group 2 shares). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to Income Tax but must be deducted from the cost of shares for Capital Gains Tax purposes.

*Accumulation shares						
Data Source - © Morningstar, bid to bid, net income reinvested, sterling						

##### Investment Objectives, Policy and Strategy

To achieve long term capital growth through the active management of a diversified portfolio invested primarily in a broad range of global equities.

Subject to the regulations, the property of the fund may include transferable securities, units in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives.

The fund will initially only use derivatives for Efficient Portfolio Management purposes. The fund may use derivatives for purposes other than EPM, provided it has given shareholders 60 days notice of such change. If the fund did use derivatives for investment purposes, the net asset value of the fund would therefore, at times, be highly volatile and the risk profile of the fund might change.

The Global Equity Fund is a diversified portfolio managed using a quantitative approach to generate long term capital growth. The fund is not subject to geographical restraints, although in practice it does not tend to invest in those markets or countries not represented in the MSCI World Index.

##### Review

Global equity markets tracked higher through the first four months of the review period, with investment sentiment buoyed by sustained economic growth in key emerging markets and a gradual but overall positive improvement in developed economies. Unfortunately, a number of events combined to severely erode confidence, leading in late July to early August to a sharp correction in share values. In February and March came floods in Queensland, affecting commodity prices, and political unrest in the Middle East and North Africa, affecting the oil price. A tsunami in Japan impacted global technology and automotive supply chains. Adding to concern, the summer quarter saw series of weak economic data from the US, including in key areas such as housing and employment.

The overwhelming issue, however, was eurozone sovereign debt. Lacking established political or fiscal institutions, and with the European Central Bank reluctant to take a lead, politicians struggled to find means to ensure that highly indebted peripheral states would avoid default. Although Greece was the epicentre of the successive crises which characterised the period, the real danger was always a loss of confidence in Italy, the world's third-largest debtor state. The crisis in the eurozone served to highlight the levels of public debt across the large developed economies. Japan and the US both suffered credit downgrades in the period.

The US was the only large market to deliver a positive return. Health care, retailing, energy and software were the best performing sectors. Performance of the fund was extremely strong in the 12 months to the end of October with the fund strongly outperforming both benchmark and peer group in a very volatile period for equity markets. Both stock and sector selection added to performance with stock selection positive in nine out of ten sectors. Returns to the individual investment strategies were also strong, with dynamic valuation, market dynamics and company management strategies of particular note.

##### Outlook

The issue of public debt in the developed economies is not going to disappear quickly or easily, but it appears increasingly likely that lurching from crisis to crisis will give way to broad agreement on longer-term solutions. This should be positive for equities as it will allow investors to return to fundamentals. These include good levels of growth in emerging markets, stimulating a global demand cycle, and stable, if low, levels of growth in developed economies. In the meantime, equity valuations are at historically low levels.

##### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser.

*Note:*

*External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset.*

*Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.*

## Old Mutual Global Equity Fund

### Notes to the Financial Statements

#### 1. Accounting Policies

The accounting policies are set out in note 1 to the aggregated financial statements on page 109.

#### 2. Net Gains on Investments

The net gains on investments during the year comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	2,372	4,462
Derivative contracts	13	26
Forward currency contracts	-	(1)
Currency gains/(losses)	11	(40)
Transaction costs and handling charges	(61)	(37)
<b>Net capital gains</b>	<b>2,335</b>	<b>4,410</b>

#### 3. Revenue

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
UK dividends	97	115
Overseas income	537	636
Sundry income	1	-
	<b>635</b>	<b>751</b>

#### 4. Expenses

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Payable to the ACD, associates of the ACD and agents of either of them:		
ACD's periodic charge	466	470
Administration fees	47	47
	<b>513</b>	<b>517</b>
Payable to the Depositary, associates of the Depositary and agents of either:		
Depositary's fee	8	7
Safe custody fees	5	5
	<b>13</b>	<b>12</b>
Other expenses:		
Audit fees	13	7
	<b>13</b>	<b>7</b>
<b>Total expenses</b>	<b>539</b>	<b>536</b>

## Old Mutual Investment Funds Series II

### Old Mutual Global Equity Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

###### a) Analysis of the charge for the year:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas tax	50	69
<b>Total taxation</b>	<b>50</b>	<b>69</b>

###### b) Factors affecting current tax charge for year:

The tax deductible expenses substantially exceed the taxable revenue of the Fund and, as a result, there is no corporation tax charge.

Net revenue before taxation	96	215
Corporation tax at 20%	19	43
Effects of:		
Revenue not subject to taxation	(19)	(23)
Overseas tax	50	69
Movement in excess management expenses	-	(20)
<b>Actual tax charge</b>	<b>50</b>	<b>69</b>

As at 31 October 2011, the fund had excess unrelieved overseas tax of £1,017,085 (31 October 2010: £510,902) which have not been recognised as a deferred tax asset. This is because the fund is not expected to generate taxable revenue in a future period in excess of deductible expenses of that period and, accordingly, the fund is unlikely to be able to reduce future tax liabilities through the use of existing surplus expenses.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed annually on the last day of December. The distributions take account of revenue received on the creation of shares and income deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net revenue after taxation	46	146
	<b>46</b>	<b>146</b>
Final accumulation	43	126
	43	126
Add: Revenue paid on shares cancelled	3	24
Deduct: Revenue received on shares created	-	(4)
Net distribution for the year	46	146
<b>Total finance costs: Distributions</b>	<b>46</b>	<b>146</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Amounts receivable from the ACD for creation of shares	31	-
Sales awaiting settlement	81	187
Accrued income	39	30
Withholding tax recoverable	15	11
Prepayment of expenses	1	4
	<b>167</b>	<b>232</b>

## Old Mutual Investment Funds Series II

### Old Mutual Global Equity Fund

## Notes to the Financial Statements (continued)

### 8. Creditors

	31 October 2011	31 October 2010
	£000	£000
Amounts payable to the ACD for cancellation of shares	2	185
Purchases awaiting settlement	94	112
Accrued expenses	23	15
	<b>119</b>	<b>312</b>

### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

### 10. Contingent Liabilities and Commitments

There are no contingent liabilities or commitments at the balance sheet date (31 October 2010: £1,000).

### 11. Financial Instruments and the Management of Risk

The main risk arising from the fund's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

The fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from time differences in the transactions of the fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

#### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy on the management of investment risk is driven by its objectives as stated on page 32.

The fund's market risk is monitored on a daily basis by an independent risk team of the Investment Adviser. The Fund's overall market positions are monitored daily by the Fund's Investment Adviser and reviewed by the ACD on a quarterly basis.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 35 to 41.

#### Currency risk

Currency risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in currency exchange rates. As the Fund invests in foreign currency denominated assets, it is exposed to currency risk.

This risk is managed through the use of limits which restrict the total amount that can be invested in foreign currency denominated assets.

Currency exposure:

The fund's foreign currency asset exposure as at 31 October 2011 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Australian Dollar	1,078	2	1,080
Canadian Dollar	1,370	11	1,381

### Old Mutual Global Equity Fund

#### Notes to the Financial Statements (continued)

##### 11. Financial Instruments and the Management of Risk (continued)

The fund's foreign currency asset exposure as at 31 October 2010 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Australian Dollar	1,141	(12)	1,129
Canadian Dollar	1,742	31	1,773
Danish Kroner	524	15	539
Euro	3,661	(28)	3,633
Hong Kong Dollar	391	1	392
Japanese Yen	2,786	24	2,810
Norwegian Kroner	304	23	327
New Zealand Dollar	48	1	49
Singapore Dollar	287	11	298
Swedish Kronor	506	84	590
Swiss Franc	1,077	10	1,087
United States Dollar	14,132	214	14,346
	<b>26,599</b>	<b>374</b>	<b>26,973</b>

##### **Interest rate risk**

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates.

Interest rate risk arises in the Fund through the surplus cash placed on short term deposits. As a result, the Fund is subject to limited exposure to interest rate risk due to fluctuations in the prevailing levels of market interest rates received.

##### **Other price risk**

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the fund is to maintain a diversified portfolio by investing in different markets and limiting exposure to particular risk factors in relation to the whole portfolio. The Fund Manager actively reviews the portfolio on an ongoing basis to ensure it is consistent with the Fund's objectives and re-balance as required to achieve this

##### **Credit risk**

Credit risk is the risk that revenue and capital of the Fund will be adversely affected by inability of counterparties to meet their contractual payment obligations.

Credit risk arises in the Fund through the potential for counterparties to various financial instruments failing to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits

##### **Liquidity risk**

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price.

Liquidity risk arises in the Fund through the potential redemption of any shares that investors wish to sell. This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

### Old Mutual Global Equity Fund

---

#### Distribution on 31 December 2011 for the year ended 31 October 2011

Group 1: Shares purchased prior to 1 November 2010

Group 2: Shares purchased on or after 1 November 2010

	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>				
<b>Accumulation shares</b>				
Group 1	0.1975	-	0.1975	0.5182
Group 2	0.1153	0.0822	0.1975	0.5182

Equalisation applies only to shares purchased since 1 November 2010 (Group 2 shares). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to Income Tax but must be deducted from the cost of shares for Capital Gains Tax purposes.

##### Investment Objectives, Policy and Strategy

To produce an attractive level of income together with capital appreciation by investing in a diversified portfolio of fixed and variable rate bond investments, including convertible securities. The fund will vary the currencies in which it invests to enable it to achieve its objective.

Subject to the regulations, the property of the fund may include transferable securities, units in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives. More than 35% in value of the property of the fund may consist of Government and other public securities issued by one issuer in accordance with the investment management and borrowing powers of the Company set out in Appendix 2.

The fund will be permitted to use derivatives for investment purposes; the net asset value of this fund may therefore, at times, be highly volatile and the risk profile of this fund may change. The aim of the fund is to produce an attractive level of income together with capital appreciation by investing in a diversified portfolio of fixed and variable rate bond investments, including convertible securities. The fund will vary the currencies in which it invests to enable it to achieve its objective.

##### Review

Global Strategic Bond fund delivered 1.7% for the twelve months under review, outperforming funds in the IMA Global Bond sector which on average returned 0.5% through the same period. The fund's positioning for interest rates and currency were the sources of positive return. The fund actively avoided owning peripheral eurozone bonds.

Large-scale US Treasury buying by the Federal Reserve (coined QE2) helped to drive US government bond prices to record highs through the third quarter of 2010, with UK and core European sovereign bonds following. Spurred by emerging market demand, record US government stimulus and corporations repairing their balance sheets, risk appetite increased globally through 2010 Q4. In response, capital flows increased towards corporate bonds, commodities and equity markets. In contrast, through the first half of 2011 markets were driven by largely non-financial exogenous events. Australian floods impacted global commodity and energy supplies, popular uprisings in the Middle East affected oil prices and the tsunami in Japan disrupted global supply chains.

The overwhelming issue, however, was eurozone sovereign debt. European leaders failed to deliver a credible package to ring fence Greece, putting the currency union at risk and raising questions on how the single currency could operate without fiscal and political union. The European central bank was forced to intervene in open markets to allow member states to fund their deficits. The key risk was Italy, the world's third largest public bond market. Europe's woes highlighted the scale of public debt in other developed economies. The US narrowly avoided default, while ever increasing volumes of new government debt forced rating agencies to downgrade the US and Japan.

Between January and June 2011 the fund was positioned for a rise in interest rates, based on signs of economic recovery, along with high levels of inflation and burgeoning government debt. However, strategy was rotated for falling interest rates through June/July as it became clear that politics overshadowed economic fundamentals. At this time credit default swaps (CDS) were introduced into the fund to dampen volatility.

##### Outlook

Toward the end of the period, economic data outside of Europe tended to surprise positively. Robust corporate earnings, consumer spending, goods orders and vehicle sales provide evidence for growth. However, Western governments are being forced into deficit reduction and together with weak sentiment risk potential for economic growth. In this environment, we remain cautious. Investment focus remains with government bonds in core countries supported by safe-haven currencies and selected corporate bonds that offer strategic long-term value.

##### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser. Bond funds are affected by changes (real or anticipated) in the rate of inflation or interest rates, which may cause returns on bonds to be more or less attractive. Investment in corporate bonds brings an increased risk of default and may affect the capital value of the fund.

##### Note:

External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset. Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.

### Old Mutual Global Strategic Bond Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

No corporation tax charge arises in 2010 as a result of the fund opting to distribute the net revenue as an interest distribution.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed quarterly on the last day of March, June, September and December. The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net revenue after taxation	4,509	4,524
	<b>4,509</b>	<b>4,524</b>
1st interim interest distribution	1,009	530
2nd interim interest distribution	452	625
3rd interim interest distribution	717	675
Final interest distribution	746	1,075
1st interim interest accumulation	661	400
2nd interim interest accumulation	203	521
3rd interim interest accumulation	426	770
Final interest accumulation	452	765
	4,666	5,361
Add: Revenue paid on shares cancelled	218	394
Deduct: Revenue received on shares created	(375)	(1,231)
Net distribution for the year	4,509	4,524
Interest	710	-
<b>Total finance costs: Distributions</b>	<b>5,219</b>	<b>4,524</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Amounts receivable from the ACD for creation of shares	8,888	5,099
Sales awaiting settlement	-	23,544
Accrued income	3,962	3,554
Prepayment of expenses	12	25
Other debtors	-	2
	<b>12,862</b>	<b>32,224</b>

##### 8. Creditors

	31 October 2011 £000	31 October 2010 £000
Amounts payable to the ACD for cancellation of shares	4,240	1,996
Purchases awaiting settlement	1,094	7,538
Accrued expenses	22	14
UK Income tax payable	230	296
	<b>5,586</b>	<b>9,844</b>

##### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

## Old Mutual Investment Funds Series II

### Old Mutual Global Strategic Bond Fund

## Notes to the Financial Statements (continued)

### 10. Contingent Liabilities and Commitments

The fund had the following contingent liability as at the balance sheet date £67,000 (31 October 2010: Nil).

### 11. Financial Instruments and the Management of Risk

The main risk arising from the fund's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

Although the fund's performance is measured in sterling, a proportion of the fund's assets are denominated in other currencies and, as a result, the income and capital value of the fund may be significantly affected by currency movements. The fund is permitted to hedge against price and currency fluctuations and, where there are foreign currency risks, these are disclosed as appropriate. The currencies in which investments are denominated and detailed are in the Portfolio Statement on pages 52 to 54.

The fund has no formal policy of hedging the exposure to currency risk but from time to time does take forward currency exchanges (FX) in relation to overseas denominated investments. Generally during the period, the forward FX was used for the currency exposure of US dollars.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

#### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy for the management of investment risk is driven by its objectives as stated on page 49.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 52 to 54.

#### Currency risk

Currency risk is the risk that revenue and capital of the Fund will be adversely affected by movements in currency exchange rates. As the Fund invests in foreign currency denominated assets, it is exposed to currency risk.

This risk is managed through the use of limits which restrict the total amount that can be invested in foreign currency denominated assets.

Currency exposure:

The fund's foreign currency asset exposure as at 31 October 2011 was as follows:

	<b>Investments</b>	<b>Net Current Assets</b>	<b>Total</b>
	£000	£000	£000
Australian Dollar	12,139	1	12,140
Canadian Dollar	66	1	67

##### 11. Financial Instruments and the Management of Risk (continued)

Investments	Net Current Assets	Total
£000	£000	£000
<b>130,557</b>	<b>41,977</b>	<b>172,534</b>

##### *Interest rate risk*

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates. Interest rate risk arises in the fund through a number of activities:

- Holdings in fixed income securities;
- Positions in interest rate derivatives; and
- Surplus cash placed on short term deposit.

Interest rate risk is managed through the limit framework and investment guidelines with which the Fund must comply. These include restrictions on position size, and the level of interest rate risk. In addition, interest rate derivatives have been used to manage interest rate risk within the Fund.

Interest rate exposure:

The Fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from timing difference in the transactions of the Fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate. Interest receivable on cash is at floating rates linked to LIBOR.

Interest rate risk profile of financial assets and financial liabilities.

The interest rate risk profile of the company's financial assets at 31 October 2011 was:

	Floating Rate Financial Assets	Fixed Rate Financial Assets	Financial Assets Not Carrying Interest	Total
	£000	£000	£000	£000
Australian Dollar	-	12,140	-	12,140

United States Dollar	4.20	27.51

##### **Other price risk**

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the Fund is to maintain a diversified portfolio by investing in different countries, sectors and debt type (Government/Corporate) limiting its exposure to a particular sector and or country in relation to the whole portfolio.

## Old Mutual Investment Funds Series II

### Old Mutual Global Strategic Bond Fund

## Notes to the Financial Statements (continued)

### 11. Financial Instruments and the Management of Risk (continued)

#### Credit risk

Credit risk is the risk that the revenue and capital of the Fund will be adversely affected by the inability of counterparties to meet their contractual payment obligations. Credit risk arises in the Fund through the potential for counterparties to financial market transactions to fail to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits.

In addition, the Fund is exposed to issuer credit risk, through its investment in fixed income securities. The object of the Fund is to manage the risk by regularly reviewing the credit rating of all counterparties to which it is exposed.

#### Bond Portfolio Rating As at 31 October 2011

	Fair value £000	Percentage of total net assets
AAA	151,859	27.90%
AA+	12,139	2.23%
AA	318	0.06%

B+	10,126	1.86%
B	8,083	1.49%
B-	9,035	1.66%
CCC+	3,763	0.69%
Not Rated	220,654	40.54%
Non-Interest Bearing Securities	30,741	5.65%
Net Current Assets	33,837	6.22%
<b>Net Assets</b>	<b>544,307</b>	<b>100.00%</b>

#### Liquidity risk

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price.

Liquidity risk arises in the Fund through the requirement to fund the redemption of any shares that investors wish to sell. This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

### 12. Portfolio Transaction Costs

There are no transactions costs for this fund.

### 13. Sensitivity Analysis

The fund uses forward foreign exchange contracts to hedge against currency fluctuations. At any point during the year, there will be hedging contracts in place to cover the currency risk of the overseas bond element of the portfolio. The effect of these contracts will be to reduce the exposure of the fund to foreign exchange rate movements. Further details as to the value of the contracts can be seen in the currency exposure section of note 11. As the Fund is not sophisticated, no detailed sensitivity analysis has been presented.

## Old Mutual Investment Funds Series II

### Old Mutual Global Strategic Bond Fund

#### Distribution on 31 December 2011 for the period ended 31 October 2011

Group 1: Shares purchased prior to 1 August 2010

Group 2: Shares purchased on or after 1 August 2010

	Gross Income 2011 pence per share	Income Tax 2011 pence per share	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>						
<b>Income shares</b>						
Group 1	0.3638	0.0728	0.2910	-	0.2910	0.7382
Group 2	0.1619	0.0324	0.1295	0.1615	0.2910	0.7382
<b>Accumulation shares</b>						
Group 1	0.5598	0.1120	0.4478	-	0.4478	1.1259
Group 2	0.2541	0.0508	0.2033	0.2445	0.4478	1.1259
<b>Class B</b>						
<b>Income shares</b>						
Group 1	0.3199	0.0640	0.2559	-	0.2559	0.4992
Group 2	0.0849	0.0170	0.0679	0.1880	0.2559	0.4992
<b>Accumulation shares</b>

##### Investment Objectives, Policy and Strategy

To achieve an above average return through the active management of a diversified portfolio invested in the Japanese stock markets, whilst constraining the overall level of portfolio risk.

Subject to the regulations, the property of the fund may include transferable securities, units in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives.

The fund will initially only use derivatives for Efficient Portfolio Management purposes. The fund may use derivatives for purposes other than EPM, provided it has given shareholders 60 days notice of such change. If the fund did use derivatives for investment purposes, the net asset value of the fund would therefore, at times, be highly volatile and the risk profile of the fund might change.

The Japanese Select Fund is a core Japanese equity fund managed using OMAM's proprietary quantitative investment process.

The fund aims to generate long term capital growth through an actively managed, diversified portfolio of listed Japanese equities.

##### Review

The Japanese equity market tracked higher at the start of the review period, with investment sentiment buoyed by sustained economic growth in key emerging markets and a gradual but overall positive improvement in developed economies. Unfortunately, a number of events, financial and non-financial, combined to severely erode confidence, leading to a succession of crises and, in late July to early August, a sharp correction in share values. In February and March came floods in Queensland, affecting commodity prices, and political unrest in the Middle East and North Africa, affecting the oil price. More importantly for Japanese markets Japan suffered significant damage from the earthquake and subsequent tsunami and nuclear disaster. European sovereign debt issues also played a part in affecting investor sentiment over the summer months. Whilst Japan's economy is not shielded from the effect of this on global growth, and is itself dealing with debt and political issues, the recovery from the extreme dislocation of the earthquake and subsequent nuclear disaster continues. Although the recession continued into Q2, the fall in output was less than expected. The rebuilding of the area affected by the earthquake is also likely to act as an economic stimulus over the longer term.

While Japanese markets were affected by the ongoing investor sentiment issues, the Yen has been soaring recently which has shielded sterling investors to a degree. Performance of the fund was extremely strong in the 12 months to the end of October with the fund strongly outperforming both benchmark and peer group in a very volatile period for equity markets. Stock and sector selection were both positive over the year. Indeed, stock selection and sector allocation were both positive in nine of the ten sectors. All strategies used in stock selection performed very well over the twelve months.

##### Outlook

The issue of public debt in the developed economies is not going to disappear quickly or easily, but it appears increasingly likely that lurching from crisis to crisis will give way to broad agreement on longer-term solutions. This should be positive for equities as it will allow investors to return to fundamentals. These include good levels of growth in emerging markets, stimulating a global demand cycle, and stable, if low, levels of growth in developed economies. In the meantime, equity valuations are at historically low levels.

##### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser.

##### Note:

External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset.

Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.

# Old Mutual Investment Funds Series II

## Old Mutual Japanese Select Fund

### Notes to the Financial Statements

#### 1. Accounting Policies

The accounting policies are set out in note 1 to the aggregated financial statements on page 109.

#### 2. Net Gains on Investments

The net gains on investments during the year comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	1,708	3,029
Derivative contracts	36	(99)
Currency gains	63	113
Transaction costs and handling charges	(17)	(12)
<b>Net capital gains</b>	<b>1,790</b>	<b>3,031</b>

#### 3. Revenue

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas income	460	514
Sundry income	1	-
	<b>461</b>	<b>514</b>

#### 4. Expenses

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Payable to the ACD, associates of the ACD and agents of either of them:		
ACD's periodic charge	347	408
Administration fees	35	41
	<b>382</b>	<b>449</b>
Payable to the Depositary, associates of the Depositary and agents of either:		
Depositary's fee	6	6
Safe custody fees	3	4
	<b>9</b>	<b>10</b>
Other expenses:		
Audit fees	12	6
	<b>12</b>	<b>6</b>
<b>Total expenses</b>	<b>403</b>	<b>465</b>

## Old Mutual Investment Funds Series II

### Old Mutual Japanese Select Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

###### a) Analysis of the charge for the year:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas tax	36	35
<b>Total taxation</b>	<b>36</b>	<b>35</b>

###### b) Factors affecting current tax charge for year:

The tax deductible expenses substantially exceed the taxable revenue of the Fund and, as a result, there is no corporation tax charge.

Net revenue before taxation	58	49
Corporation tax at 20%	11	10

Effects of:

Overseas tax	36	35
Movement in excess management expenses	(11)	(10)
<b>Actual tax charge</b>	<b>36</b>	<b>35</b>

As at 31 October 2011, the fund had surplus management expenses of £4,894,285 (31 October 2010: £4,491,915) which have not been recognised as a deferred tax asset. This is because the fund is not expected to generate taxable revenue in a future period in excess of deductible expenses of that period and, accordingly, the fund is unlikely to be able to reduce future tax liabilities through the use of existing surplus expenses.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed annually on the last day of December. The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net revenue after taxation	22	14
	<b>22</b>	<b>14</b>
Final accumulation	21	13
	21	13
Add: Revenue paid on shares cancelled	1	2
Deduct: Revenue received on shares created	-	(1)
Net distribution for the year	22	14
<b>Total finance costs: Distributions</b>	<b>22</b>	<b>14</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Amounts receivable from the ACD for creation of shares	5	-
Sales awaiting settlement	786	289
Accrued income	192	200
Prepayment of expenses	1	3
	<b>984</b>	<b>492</b>

## Old Mutual Investment Funds Series II

### Old Mutual Japanese Select Fund

## Notes to the Financial Statements (continued)

### 8. Creditors

	31 October 2011	31 October 2010
	£000	£000
Amounts payable to the ACD for cancellation of shares	12	143
Purchases awaiting settlement	797	43
Accrued expenses	14	10
	<b>823</b>	<b>196</b>

### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

### 10. Contingent Liabilities and Commitments

There are no contingent liabilities or commitments at the balance sheet date (31 October 2010: £6,500).

### 11. Financial Instruments and the Management of Risk

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

The fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from time differences in the transactions of the fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

#### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy on the management of investment risk is driven by its objectives as stated on page 64.

The fund's market risk is monitored on a daily basis by an independent risk team of the Investment Adviser. The Fund's overall market positions are monitored daily by the Fund's Investment Adviser and reviewed by the ACD on a quarterly basis.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 67 to 71.

#### Currency risk

Currency risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in currency exchange rates.

As the Fund invests in foreign currency denominated assets, it is exposed to currency risk. This risk is managed through the use of limits which restrict the total amount that can be invested in foreign currency denominated assets.

Currency exposure:

The fund's foreign currency asset exposure as at 31 October 2011 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Japanese Yen	20,375	55	20,430
	<b>20,375</b>	<b>55</b>	<b>20,430</b>

The fund's foreign currency asset exposure as at 31 October 2010 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Japanese Yen	22,586	521	23,107
	<b>22,586</b>	<b>521</b>	<b>23,107</b>

#### Interest rate risk

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates. Interest rate risk arises in the Fund through the surplus cash placed on short term deposits. As a result, the Fund is subject to limited exposure to interest rate risk due to fluctuations in the prevailing levels of market interest rates received.

## Old Mutual Investment Funds Series II

### Old Mutual Japanese Select Fund

#### Notes to the Financial Statements (continued)

##### 11. Financial Instruments and the Management of Risk (continued)

###### *Other price risk*

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the fund is to maintain a diversified portfolio limiting exposure to particular risk factors in relation to the whole portfolio. The fund Manager actively reviews the portfolio on an ongoing basis to ensure it is consistent with the Fund's objectives and re-balance as required to achieve this.

###### **Credit risk**

Credit risk is the risk that revenue and capital of the Fund will be adversely affected by inability of counterparties to meet their contractual payment obligations.

Credit risk arises in the Fund through the potential for counterparties to various financial instruments failing to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits.

###### **Liquidity risk**

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price.

Liquidity risk arises in the Fund through the requirement to fund the redemption of any shares that investors wish to sell. This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

##### 12. Portfolio Transaction Costs

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Analysis of total purchase costs		
Purchases in year before transaction costs	43,090	37,317
Commissions	13	14
Total purchase costs	13	14
<b>Total purchases including transaction costs</b>	<b>43,103</b>	<b>37,331</b>
Analysis of total sale costs		
Gross sales before transaction costs	47,049	45,219
Commissions	(14)	(17)
Total sale costs	(14)	(17)
<b>Total sales net of transaction costs</b>	<b>47,035</b>	<b>45,202</b>

## Old Mutual Investment Funds Series II

### Old Mutual Japanese Select Fund

---

#### Distribution on 31 December 2011 for the year ended 31 October 2011

Group 1: Shares purchased prior to 1 November 2010

Group 2: Shares purchased on or after 1 November 2010

	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>				
<b>Accumulation shares</b>				
Group 1	0.0856	-	0.0856	0.0430
Group 2	0.0777	0.0079	0.0856	0.0430

Equalisation applies only to shares purchased since 1 November 2010 (Group 2 shares). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to Income Tax but must be deducted from the cost of shares for Capital Gains Tax purposes.

Data Source - © Morningstar, bid to bid, net income reinvested, sterling						

##### Investment Objectives, Policy and Strategy

To achieve long term capital growth through the active management of a diversified portfolio invested primarily in North American stock markets.

Subject to the regulations, the property of the fund may include transferable securities, shares in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives.

The fund will initially only use derivatives for Efficient Portfolio Management purposes. The fund may use derivatives for purposes other than EPM, provided it has given shareholders 60 days notice of such change. If the fund did use derivatives for investment purposes, the net asset value of the fund would therefore, at times, be highly volatile and the risk profile of the fund might change.

The fund is designed to generate long term capital appreciation through a diversified portfolio of investments in North America, primarily the United States. The portfolio is managed using an active quantitative process which employs a number of 'return factors' to generate return forecasts for each stock in the investment universe. Holdings are drawn primarily from the MSCI North America Index.

##### Review

The North American equity market tracked higher at the start of the review period, with investment sentiment buoyed by sustained economic growth in key emerging markets and a gradual but overall positive improvement in developed economies. Unfortunately, a number of events, financial and non-financial, combined to severely erode confidence, leading to a succession of crises and, in late July to early August, a sharp correction in share values. In February and March came floods in Queensland, affecting commodity prices, and political unrest in the Middle East and North Africa, affecting the oil price. In early March Japan suffered significant damage from a tsunami, which in turn impacted global technology and automotive supply chains. Adding to concern, the summer quarter saw series of weak economic data from the US, including in key areas such as housing and employment.

The overwhelming issue, however, was eurozone sovereign debt. Lacking established political or fiscal institutions, and with the European Central Bank reluctant to take a lead, politicians struggled to find means to ensure that highly indebted peripheral states would avoid default. Although Greece was the epicentre of the successive crises which engulfed the eurozone through the period, the real danger was always the prospect of a loss of confidence in Italy, the world's third-largest debtor state and with a government perceived by many to be at the margin of dysfunction. The crisis in the eurozone served to highlight the levels of public debt across the large developed economies. Japan and the US both suffered credit downgrades in the period, while the UK and France have struggled to make meaningful cuts to their deficits.

The North American market was the only large market to deliver a positive return in the year, with the index up 6.4% in sterling terms. Health care, retailing, energy and software were the best performing sectors. Performance of the fund was extremely strong in the 12 months to the end of October with the fund strongly outperforming both benchmark and peer group to be placed the best performing fund in the sector in a very volatile period for equity markets. Stock selection dominated performance over the year, with sector allocation flat. Indeed, stock selection was positive in all ten sectors. Returns to the individual investment strategies were also strong, with dynamic valuation, analyst sentiment and company management strategies of particular note.

##### Outlook

The issue of public debt in the developed economies is not going to disappear quickly or easily, but it appears increasingly likely that lurching from crisis to crisis will give way to broad agreement on longer-term solutions. This should be positive for equities as it will allow investors to return to fundamentals. These include good levels of growth in emerging markets, stimulating a global demand cycle, and stable, if low, levels of growth in developed economies. In the meantime, equity valuations are at historically low levels.

##### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser.

##### Note:

External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset.

Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.

## Old Mutual North American Equity Fund

### Notes to the Financial Statements

#### 1. Accounting Policies

The accounting policies are set out in note 1 to the aggregated financial statements on page 109.

#### 2. Net Gains on Investments

The net gains on investments during the year comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	10,125	14,091
Derivative contracts	(13)	77
Currency gains/(losses)	18	(21)
Transaction costs and handling charges	(22)	(17)
<b>Net capital gains</b>	<b>10,108</b>	<b>14,130</b>

#### 3. Revenue

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas income	1,113	1,315
Bank interest*	-	1
Securitised interest	1	-
Sundry income	1	-
	<b>1,115</b>	<b>1,316</b>

\*Bank interest is earned on deposits held with an associate of the Depositary.

#### 4. Expenses

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Payable to the ACD, associates of the ACD and agents of either of them:		
ACD's periodic charge	1,054	1,155
Administration fees	105	116
	<b>1,159</b>	<b>1,271</b>
Payable to the Depositary, associates of the Depositary and agents of either:		
Depositary's fee	14	15
Safe custody fees	7	7
	<b>21</b>	<b>22</b>
Other expenses:		
Audit fees	14	6
	<b>14</b>	<b>6</b>
<b>Total expenses</b>	<b>1,194</b>	<b>1,299</b>

## Old Mutual Investment Funds Series II

### Old Mutual North American Equity Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

###### a) Analysis of the charge for the year:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas tax	150	178
<b>Total taxation</b>	<b>150</b>	<b>178</b>

###### b) Factors affecting current tax charge for year:

The tax deductible expenses substantially exceed the taxable revenue of the Fund and, as a result, there is no corporation tax charge.

Net revenue before taxation	(79)	17
Corporation tax at 20%	(16)	3

Effects of:

Overseas tax	150	178
Movement in excess management expenses	16	(3)
<b>Actual tax charge</b>	<b>150</b>	<b>178</b>

As at 31 October 2011, the fund had surplus management expenses of £2,384,867 (31 October 2010: £3,203,045) which have not been recognised as a deferred tax asset. This is because the fund is not expected to generate taxable revenue in a future period in excess of deductible expenses of that period and, accordingly, the fund is unlikely to be able to reduce future tax liabilities through the use of existing surplus expenses.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed annually on the last day of December. The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net expense after taxation	(229)	(161)
	<b>(229)</b>	<b>(161)</b>
Add: Revenue paid on shares cancelled	1	2
Net distribution for the year	1	2
<b>Total finance costs: Distributions</b>	<b>1</b>	<b>2</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Amounts receivable from the ACD for creation of shares	137	-
Sales awaiting settlement	-	239
Accrued income	50	24
Withholding tax recoverable	2	1
Prepayment of expenses	2	9
Other debtors	3	-
	<b>194</b>	<b>273</b>

## Old Mutual Investment Funds Series II

### Old Mutual North American Equity Fund

#### Notes to the Financial Statements (continued)

##### 8. Creditors

	31 October 2011	31 October 2010
	£000	£000
Amounts payable to the ACD for cancellation of shares	464	488
Purchases awaiting settlement	249	94
Accrued expenses	16	13
	<b>729</b>	<b>595</b>

##### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

##### 10. Contingent Liabilities and Commitments

There are no contingent liabilities or commitments at the balance sheet date (31 October 2010: Nil).

##### 11. Financial Instruments and the Management of Risk

The main risk arising from the fund's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

The fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from time differences in the transactions of the fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

##### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy on the management of investment risk is driven by its objectives as stated on page 78.

The fund's market risk is monitored on a daily basis by an independent risk team of the Investment Adviser. The Fund's overall market positions are monitored daily by the Fund's Investment Adviser and reviewed by the ACD on a quarterly basis.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 81 to 87.

##### Currency risk

Currency risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in currency exchange rates.

As the Fund invests in foreign currency denominated assets, it is exposed to currency risk. This risk is managed through the use of limits which restrict the total amount that can be invested in foreign currency denominated assets.

Currency exposure:

The fund's foreign currency asset exposure as at 31 October 2011 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Canadian Dollar	6,462	180	6,642
Euro	-	-	-
United States Dollar	61,583	301	61,884
	<b>68,045</b>	<b>481</b>	<b>68,526</b>

The fund's foreign currency asset exposure as at 31 October 2010 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
Canadian Dollar	5,866	(2)	5,864
Euro	-	57	57
United States Dollar	61,068	722	61,790

## Old Mutual Investment Funds Series II

### Old Mutual North American Equity Fund

#### Notes to the Financial Statements (continued)

##### 11. Financial Instruments and the Management of Risk (continued)

Investments	Net Current Assets	Total
£000	£000	£000
<b>66,934</b>	<b>777</b>	<b>67,711</b>

##### *Interest rate risk*

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates.

Interest rate risk arises in the Fund through the surplus cash placed on short term deposits. As a result, the Fund is subject to limited exposure to interest rate risk due to fluctuations in the prevailing levels of market interest rates received.

##### *Other price risk*

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the fund is to maintain a diversified portfolio by limiting exposure to particular risk factors in relation to the whole portfolio. The Fund Manager actively reviews the portfolio on an ongoing basis to ensure it is consistent with the Fund's objectives and re-balance as required to achieve this.

##### **Credit risk**

Credit risk is the risk that revenue and capital of the Fund will be adversely affected by inability of counterparties to meet their contractual payment obligations.

Credit risk arises in the Fund through the potential for counterparties to various financial instruments failing to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits.

##### **Liquidity risk**

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price.

Liquidity risk arises in the Fund through the potential redemption of any shares that investors wish to sell. This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

##### 12. Portfolio Transaction Costs

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Analysis of total purchase costs		
Purchases in year before transaction costs	128,592	104,032
Commissions	37	31

## Old Mutual Investment Funds Series II

### Old Mutual North American Equity Fund

---

#### Distribution on 31 December 2011 for the year ended 31 October 2011

Group 1: Shares purchased prior to 1 November 2010

Group 2: Shares purchased on or after 1 November 2010

	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>				
<b>Income shares</b>				
Group 1	1.2396	-	1.2396	1.9982
Group 2	0.9987	0.2409	1.2396	1.9982
<b>Accumulation shares</b>				
Group 1	1.9137	-	1.9137	3.0465
Group 2	0.9479	0.9658	1.9137	3.0465
<b>Class B</b>				
<b>Accumulation shares</b>				
Group 1	1.5641	-	1.5641	1.9390
Group 2	0.7368	0.8273	1.5641	1.9390
<b>Class C</b>				
<b>Income Shares</b>				
Group 1	1.5805	-	1.5805	1.3107
Group 2	1.5532	0.0273	1.5805	1.3107

Equalisation applies only to shares purchased since 1 November 2010 (Group 2 shares). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to Income Tax but must be deducted from the cost of shares for Capital Gains Tax purposes.

## Old Mutual Investment Funds Series II

### Old Mutual UK Select Equity Fund

#### Investment Adviser's Report For the year ended 31 October 2011

##### Performance

	1 year to 31 October 2011	1 year to 31 October 2010	1 year to 31 October 2009	1 year to 31 October 2008	1 year to 31 October 2007	1 year to 31 October 2006
Old Mutual UK Select Equity Fund*	0.32%	14.76%	36.87%	-42.36%	9.95%	20.91%
IMA UK All Companies sector median	1.18%	15.53%	31.11%	-37.77%	12.32%	22.76%
Quartile	3	2	1	4	3	3
FSE All-Share Index	0.63%	17.47%	23.47%	-34.36%	13.62%	21.66%
*Income shares						
Data Source - © Morningstar, bid to bid, net income reinvested, sterling						

##### Investment Objectives, Policy and Strategy

To achieve long term capital growth through the active management of a diversified portfolio invested primarily in a broad range of UK equities.

Subject to the regulations, the property of the fund may include transferable securities; units in collective investment schemes (including those managed or operated by the ACD or an associate of the ACD), warrants, money market instruments, deposits and derivatives. The fund will initially only use derivatives for EPM purposes.

The fund may use derivatives for purposes other than Efficient Portfolio Management, provided it has given shareholders 60 days notice of such change. If the fund did use derivatives for investment purposes, the net asset value of the fund would therefore, at times, be highly volatile and the risk profile of the fund might change.

The UK Select Equity Fund is an actively managed fund aiming to provide capital growth from investment in a broad-based portfolio of UK companies. The fund aims to outperform the IMA UK All Companies sector average over rolling 12-month periods.

##### Review

Never has the phrase "a game of two halves" seemed more appropriate than for this review period. The first half was driven by a re-acceleration of economic activity globally, strong corporate profits growth, and relative calm surrounding the sovereign debt issues of Europe. This allowed the UK equity market to rise some 9% or so. In contrast the second half was dominated by slowing global growth, in part driven by the disruption to global supply chains following the Japanese tsunami, and heightened sovereign debt worries not just in Greece but also Italy, Spain and even the USA. Consequently most of the previous equity gains were lost, resulting in a market rise of just 0.6% for the whole period. The fund modestly underperformed the market and peer group rising 0.3%.

Whilst the market environment changed significantly during the period we kept the general structure of the portfolio reasonably consistent and chose to maintain a cyclical bias as we believe the current economic expansion still has further to run. However, we have been increasing the quality of our cyclical holdings over the period by investing in businesses that have additional angles to the investment case aside from just economic sensitivity. Examples include luxury goods company Burberry where we still see a strong period of roll out potential ahead, and Filtrona an industrial business and Wolseley a building supplies business where, in both cases, management change is reinvigorating performance of the various operating units.

These additions have been funded by disposals of companies whose fortunes we feel rely to a greater degree on just the economic cycle. Examples include distributor Premier Farnell, media groups WPP, Informa and Aegis and industrial conglomerates IMI and Smiths Industries.

##### Outlook

We believe the key risk to markets is a continued lack of coordinated response from Europe over the financial crisis which in turn fuels further economic weakness. More recently it seems that political leaders on the continent are aware of the potential consequences of inaction and we are hopeful that actions in the coming months will prove positive. So whilst we cannot rule out a return to recession in the global economy, our view remains that we will continue to see economic growth into next year that will translate into profit growth for our investments. The UK equity market is currently trading on approximately nine times forward earnings and a prospective yield in excess of 4%, factors which we believe support our positive view into the medium term.

##### Risk Warning

Please remember that past performance is not a guide to future performance. The price of shares and the income from them may go down as well as up. You may not get back the amount you invest. The fund may not be suitable for everyone and if in doubt you should seek advice from your financial adviser.

##### Note:

External sources of underlying economic data used by Old Mutual Asset Managers (UK) Limited include MSCI, Datastream and Factset.

Market performance data is sourced from Morningstar / Factset. Each quoted index or stock return is based on the price movement between the market close on 31 October 2006 and the close on 31 October 2011. Returns quoted are sterling or local currency returns as specified.

### Notes to the Financial Statements

#### 1. Accounting Policies

The accounting policies are set out in note 1 to the aggregated financial statements on page 109.

#### 2. Net Gains on Investments

The net gains on investments during the year comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	948	11,477
Derivative contracts	-	(25)
Currency (losses)/gains	-	3
Transaction costs and handling charges	(14)	(17)
<b>Net capital gains</b>	<b>934</b>	<b>11,438</b>

#### 3. Revenue

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
UK dividends	2,116	2,412
Overseas income	94	70
Interest on debt securities	2	-
Underwriting commission	-	6
Securitised interest	1	2
Sundry income	1	-
	<b>2,214</b>	<b>2,490</b>

#### 4. Expenses

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Payable to the ACD, associates of the ACD and agents of either of them:		
ACD's periodic charge	1,468	1,350
Administration fees	148	135
	<b>1,616</b>	<b>1,485</b>
Payable to the Depositary, associates of the Depositary and agents of either:		
Depositary's fee	18	16
Safe custody fees	6	6
	<b>24</b>	<b>22</b>
Other expenses:		
Audit fees	10	5
	<b>10</b>	<b>5</b>
<b>Total expenses</b>	<b>1,650</b>	<b>1,512</b>

## Old Mutual Investment Funds Series II

### Old Mutual UK Select Equity Fund

#### Notes to the Financial Statements (continued)

##### 5. Taxation

###### a) Analysis of the charge for the year:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Overseas tax	8	3
<b>Total taxation</b>	<b>8</b>	<b>3</b>

###### b) Factors affecting current tax charge for year:

The tax deductible expenses substantially exceed the taxable revenue of the Fund and, as a result, there is no corporation tax charge.

Net revenue before taxation	564	978
Corporation tax at 20%	113	196
Effects of:		
Revenue not subject to taxation	(423)	(482)
Overseas tax	8	3
Movement in excess management expenses	310	286
<b>Actual tax charge</b>	<b>8</b>	<b>3</b>

As at 31 October 2011, the fund had surplus management expenses of £3,053,208 (31 October 2010: £11,728,164) which have not been recognised as a deferred tax asset. This is because the fund is not expected to generate taxable revenue in a future period in excess of deductible expenses of that period and, accordingly, the fund is unlikely to be able to reduce future tax liabilities through the use of existing surplus expenses.

##### 6. Finance Costs

###### Distributions

Revenue will normally be distributed annually on the last day of December. The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Net revenue after taxation	556	975
	<b>556</b>	<b>975</b>
Final distribution	173	166
Final accumulation	323	842
	496	1,008
Add: Revenue paid on shares cancelled	211	280
Deduct: Revenue received on shares created	(151)	(313)
Net distribution for the year	556	975
<b>Total finance costs: Distributions</b>	<b>556</b>	<b>975</b>

##### 7. Debtors

	31 October 2011 £000	31 October 2010 £000
Amounts receivable from the ACD for creation of shares	943	842
Sales awaiting settlement	1,764	3,416
Accrued income	20	128
Withholding tax recoverable	15	4
Prepayment of expenses	3	14
	<b>2,745</b>	<b>4,404</b>

## Old Mutual Investment Funds Series II

### Old Mutual UK Select Equity Fund

#### Notes to the Financial Statements (continued)

##### 8. Creditors

	31 October 2011	31 October 2010
	£000	£000
Amounts payable to the ACD for cancellation of shares	1,636	1,705
Purchases awaiting settlement	1,388	2,339
Accrued expenses	13	11
	<b>3,037</b>	<b>4,055</b>

##### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the Fund and are considered related parties of the fund. Transactions between the ACD and the Fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8.

##### 10. Contingent Liabilities and Commitments

There are no contingent liabilities or commitments at the balance sheet date (31 October 2010: Nil).

##### 11. Financial Instruments and the Management of Risk

The main risk arising from the fund's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

The fund has no financial liabilities other than short-term creditors and short-term bank overdrafts arising from time differences in the transactions of the fund. Interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate.

The nature and extent of the financial instruments outstanding at the balance sheet date and the risk management policies employed by the fund are discussed below.

##### Market risk

Market risk is the risk that the value of an investment will decrease due to moves in market factors, and includes currency risk, interest rate risk and other price risk.

The fund's strategy on the management of investment risk is driven by its objectives as stated on page 94.

The fund's market risk is monitored on a daily basis by an independent risk team of the Investment Adviser. The Fund's overall market positions are monitored daily by the Fund's Investment Adviser and reviewed by the ACD on a quarterly basis.

Details of the nature of the Fund's investment portfolio at the balance sheet date are disclosed in the Portfolio Statement on pages 97 to 99.

##### Currency risk

Currency risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in currency exchange rates.

The Fund is not exposed to significant currency risk because the majority of the Fund's assets or liabilities are denominated in Sterling.

Currency exposure:

The fund's foreign currency asset exposure as at 31 October 2011 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
United States Dollar	-	15	15
	<b>-</b>	<b>15</b>	<b>15</b>

The fund's foreign currency asset exposure as at 31 October 2010 was as follows:

	Investments	Net Current Assets	Total
	£000	£000	£000
United States Dollar	-	4	4
	<b>-</b>	<b>4</b>	<b>4</b>

## Old Mutual Investment Funds Series II

### Old Mutual UK Select Equity Fund

## Notes to the Financial Statements (continued)

### 11. Financial Instruments and the Management of Risk (continued)

#### Interest rate risk

Interest rate risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in interest rates.

Interest rate risk arises in the Fund through the surplus cash placed on short term deposits. As a result, the Fund is subject to limited exposure to interest rate risk due to fluctuations in the prevailing levels of market interest rates received

#### Other price risk

Other price risk is the risk that the revenue and capital of the Fund will be adversely affected by movements in other market prices, including the price of financial instruments.

Other price risk arises in the fund through its investments which will fluctuate as a result of changes in market prices (other than those arising from interest risk or currency risk), whether caused by factors specific to an individual investment, its issuer or other factors affecting all instruments traded in the market.

The objective of the Fund is to maintain a diversified portfolio by investing in different sectors and limiting its exposure to a particular sector and in relation to the whole portfolio.

#### Credit risk

Credit risk is the risk that revenue and capital of the Fund will be adversely affected by inability of counterparties to meet their contractual payment obligations. Credit risk arises in the Fund through the potential for counterparties to various financial instruments failing to discharge an obligation or commitment they have entered into with the Fund.

This risk is managed through the use of an approved counterparty policy, which requires all approved counterparties to meet a number of criteria, including a minimum credit rating and counterparty limits.

#### Liquidity risk

Liquidity risk is the risk that liabilities cannot be met when they fall due or can only be met at an uneconomic price.

Liquidity risk arises in the Fund through the potential redemption of any shares that investors wish to sell. This risk is managed through a combination of active management of cash balances within defined limits and investment in liquid securities.

### 12. Portfolio Transaction Costs

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Analysis of total purchase costs

### Old Mutual UK Select Equity Fund

---

#### Distribution on 31 December 2011 for the year ended 31 October 2011

Group 1: Shares purchased prior to 1 November 2010

Group 2: Shares purchased on or after 1 November 2010

	Net Income 2011 pence per share	Equalisation 2011 pence per share	Distribution Payable 2011 pence per share	Distribution Paid 2010 pence per share
<b>Class A</b>				
<b>Income shares</b>				
Group 1	1.2396	-	1.2396	1.9982
Group 2	0.9987	0.2409	1.2396	1.9982
<b>Accumulation shares</b>				
Group 1	1.9137	-	1.9137	3.0465
Group 2	0.9479	0.9658	1.9137	3.0465
<b>Class B</b>				
<b>Accumulation shares</b>				
Group 1	1.5641	-	1.5641	1.9390
Group 2	0.7368	0.8273	1.5641	1.9390
<b>Class C</b>				
<b>Income Shares</b>				
Group 1	1.5805	-	1.5805	1.3107
Group 2	1.5532	0.0273	1.5805	1.3107

Equalisation applies only to shares purchased since 1 November 2010 (Group 2 shares). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to Income Tax but must be deducted from the cost of shares for Capital Gains Tax purposes.

## Old Mutual Investment Funds Series II

### Statement of Responsibilities

---

#### Authorised Corporate Director's Responsibilities

The ACD is responsible for the management of the Company in accordance with its prospectus and the rules in the Collective Investment Schemes Sourcebook ("COLL") published by the Financial Services Authority. These regulations require the ACD to prepare Financial Statements for each annual accounting period which give a true and fair view of the financial affairs of the fund and of the net revenue and the net gains/(losses) on the property of the fund for the period. In preparing the Financial Statements the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- comply with the disclosure requirements of the Statement of Recommended Practice on Authorised Funds 2010 issued by the Investment Management Association in November 2010;
- follow generally accepted UK accounting principles and practice and UK applicable accounting standards (UK GAPP);
- keep proper accounting records which enable it to demonstrate that the Financial Statements as prepared comply with the above requirements;
- take reasonable steps for the prevention and detection of fraud and other irregularities;
- prepare the financial statements on a going concern basis, unless it is inappropriate to presume that the Company will continue in business.

#### Depository's Responsibilities

The depository is responsible for the safekeeping of all of the property of the company (other than tangible moveable property) which is entrusted to it and for the collection of revenue that arises from that property.

It is the duty of the depository to take reasonable care to ensure that the company is managed in accordance with the Financial Services Authority's Collective Investment Schemes Sourcebook (COLL), as amended, the Open-Ended Investment Companies Regulation 2001 (SI 2001/1228), as amended ('the OEIC Regulations'), the company's instruments of incorporation and prospectus, in relation to the pricing of, and dealings in, shares in the company; the application of revenue of the company; and the investment and borrowing powers applicable to the company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as depository of the company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects, the company, acting through the authorised corporate director:

(i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the company's shares and the application of the company's revenue in accordance with COLL and, where applicable, the OEIC Regulations and the instrument of incorporation and prospectus of the Company, and

(ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

As part of an internal restructuring in 2011 the Royal Bank of Scotland Group plc transferred its Trustee and Depository Services to its subsidiary, National Westminster Bank plc. Consequently, National Westminster Bank was appointed depository of all Old Mutual Asset Managers' UK-domiciled funds effective as from 16 September 2011. This has been approved by the Financial Services Authority. There is no change in duties or responsibilities and no impact on the funds is anticipated.

National Westminster Bank Plc

### Independent Auditors Report

---

#### Independent auditors' report to the shareholders of Old Mutual Investment Funds Series II

We have audited the financial statements of the Company for the year ended 31 October 2011 which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Shareholders, the Balance Sheet together with the related notes. The financial reporting framework that has been applied in their preparation is applicable law and UK Accounting Standards (UK Generally Accepted Accounting Practice).

This report is made solely to the Company's shareholders, as a body, in accordance with Rule 4.5.12 of the Collective Investment Schemes sourcebook ('the COLL Rules') issued by the Financial Services Authority under the Open-Ended Investment Companies Regulations 2001. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

#### **Respective responsibilities of Authorised Corporate Director ('the ACD') Old Mutual Fund Managers Limited and the auditor**

As explained more fully in the Statement of ACD's Responsibilities set out on page 88, the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit, and express an opinion on, the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's (APB's) Ethical Standards for Auditors.

#### **Scope of the audit of the financial statements**

A description of the scope of an audit of financial statements is provided on the APB's website at [www.frc.org.uk/apb/scope/private.cfm](http://www.frc.org.uk/apb/scope/private.cfm).

#### **Opinion on financial statements**

In our opinion the financial statements:

- give a true and fair view, in accordance with UK Generally Accepted Accounting Practice, of the financial position of the Company as at 31 October 2011 and of its net revenue and net capital gains on the property of the Company for the year then ended; and
- have been prepared in accordance with the requirements of the Instrument of Incorporation, Statement of Recommended Practice relating to Authorised Funds and the COLL Rules.

#### **Opinion on other matters prescribed by the COLL Rules**

In our opinion the information given in the Authorised Corporate Directors' Report is consistent with the financial statements.

We have received all of the information and explanations which we consider necessary for the purposes of the audit.

#### **Matters on which we are required to report by exception**

We have nothing to report in respect of the following matters where under the COLL Rules we are required to report to you if, in our opinion:

- proper accounting records for the Company have not been kept; or
- the financial statements are not in agreement with the accounting records.

**N. Palmer**

# Old Mutual Investment Funds Series II

## Aggregated Financial Statements

### Notes to the Financial Statements

#### 1. Accounting Policies

##### Basis of accounting

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of investments, in compliance with the Financial Service Authority's Collective Investment Schemes Sourcebook. They have been prepared in accordance with applicable accounting standards and in accordance with the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the IMA in October 2010.

##### Aggregated statements

The aggregated financial statements represents the sum of the individual funds within the umbrella company. Further analysis of distribution and the net asset position can be found on the financial statements of the individual funds.

##### Revenue

Dividends on equities and distributions on unit trust holdings are recognised when the relevant securities are quoted ex-dividend or exdistribution. Interest, underwriting commission and other income are accounted for on an accruals basis and the rules for Effective Interest Rate (EIR) accounting as outlined in the SORP. Underwriting commission is recognised when the issue takes place.

##### Special dividends

Special dividends are treated as repayments of capital or income depending on the circumstances surrounding the dividend. Where special dividends are taken to capital they are disclosed as realised gains on investments during the period (note 2).

##### Scrip dividends

The ordinary element of stocks received in lieu of cash are recognised as income. Any enhancement above the cash dividend is taken to capital and disclosed as realised gains on investments.

##### Management expenses

Management expenses are accounted for on an accruals basis.

##### Distributions

Amounts distributable are calculated after charging all of the ACD's periodic charge and all other expenses except those of a capital nature. Interest distributions will be made on an Effective Interest Rate (EIR) basis.

##### Basis of valuation of investments

The valuation point is 12.00 noon on the last business day of the accounting period. Quoted investments are valued at the market bid price net of any accrued interest which is included in the balance sheet as an income-related item.

##### Foreign currencies

Assets and liabilities have been translated into sterling at the mid-market exchange rates prevailing at the balance sheet date. Transactions in foreign currencies are translated at the exchange rate prevailing at the transaction date. Where forward positions in currencies are held, these are translated at the appropriate forward rate. Any resulting exchange differences are disclosed as Other gains/ (losses) in the Statement of Total Return.

##### Taxation

Corporation tax is charged at 20% of the income liable to Corporation tax less expenses.

##### Deferred tax

Deferred tax is provided for on a full liability basis for all timing differences. Deferred tax assets are only recognised to the extent that it can be regarded as more likely than not that there will be sufficient suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

##### Forward foreign exchange contracts

Forward foreign exchange contracts are used in order to hedge against currency exchange rate movements on underlying investments in overseas bonds. The difference between the forward and spot and movement in the spot rate are taken to the capital account.

##### Shares

Where a fund has more than one share class, each class may incur different expenses. Consequently the level of net revenue available to each share class may differ.

##### Allocation of Revenue and Expenses to Multiple Share Classes

With the exception of the annual management charge, which is directly attributable to individual Share Classes, all revenue and expenses are allocated to Share Classes pro rata to the value of the net assets of the relevant Share Class on the day the revenue or expense is recognised.

#### 2. Net Gains on Investments

The net gains on investments during the year comprise:

	1 November 2010 - 31 October 2011 £000	1 November 2009 - 31 October 2010 £000
Non-derivative securities	(2,138)	60,877
Derivative contracts	7,369	(1,240)
Forward currency contracts	12,439	4,294
Currency (losses)/gains	(1,734)	374
Sundry income	3	2
Transaction costs and handling charges	(269)	(173)
<b>Net capital gains</b>	<b>15,670</b>	<b>64,134</b>

##### 8. Creditors

	31 October 2011	31 October 2010
	£000	£000
Amounts payable to the ACD for cancellation of shares	6,413	5,376
Purchases awaiting settlement	5,868	11,831
Accrued expenses	140	108
UK Income tax payable	230	296
	<u>12,651</u>	<u>17,611</u>

##### 9. Related Party Transactions

The ACD, Old Mutual Fund Managers Limited, together with the Depositary, The National Westminster Bank plc, are regarded as the controlling parties of the fund by virtue of acting together in respect of the operations of the fund and are considered related parties of the fund. Transactions between the ACD and the fund are included in the Statement of Change in Shareholders' Net Assets and disclosed in notes 4, 7 and 8. Transactions with the Depositary and its associates are disclosed in notes 4 and 8. At the year end date, no amounts were due to the ACD or Depositary.

##### 10. Contingent Liabilities and Commitments

The sub-funds had the following contingent liability as at 31 October 2011 £67,000 (31 October 2010: £8,675).

##### 11. Financial Instruments and the Management of Risk

The main risk arising from the Company's financial instruments is market price. Market risk arises mainly from uncertainty about future prices of the financial instruments held.

There is no material difference between the value of the financial assets and liabilities as shown in the balance sheet and their fair value.

Although the Company's performance is measured in sterling, a large proportion of the Company's assets are denominated in other currencies and, as a result, the income and capital value of the Company may be significantly affected by currency movements.

The Company is permitted to hedge against price and currency fluctuations and, where there are foreign currency risks, these are disclosed as appropriate. The currencies in which investments are denominated are detailed in the portfolio statement of the individual sub fund.

The Company generally hedges the exposure to currency risk but from time to time does take forward currency exchanges (FX) in relation to overseas denominated investments. Generally during the period, forward FX was used to manage the currency exposure of Euros and US dollars.

Where the Company's assets are fixed income securities, they are exposed to interest rate risk. In addition, interest payable on bank overdrafts is at floating rates linked to the Bank of England Base Rate whilst Interest receivable on cash is at floating rates linked to LIBOR.

Where the Company's assets are comprised of fixed rate bonds, further information is provided in relation to the numerical disclosures in the financial statements of the individual sub funds.

### Other Significant Information

---

#### **Individual Savings Accounts**

From 6 April 1999, each fund has been managed so as to ensure that it is a qualifying investment for the stocks and shares component of an Individual Savings Account, within the Individual Savings Account ('ISA') Regulations 1999.

#### **Stamp Duty Reserve Tax (SDRT)**

##### **What is SDRT?**

SDRT is a tax charge levied by HM Revenue & Customs on the disposal or switching of shares in an OEIC. The tax is charged when shares are sold back to the ACD (Authorised Corporate Director), or when there is a non-exempt transfer of an investment. SDRT is charged at the maximum rate of 0.5% on eligible investments (although this figure may be reduced depending on the investments in and number of issues and surrenders applicable to the fund). If applicable, SDRT is paid to HM Revenue & Customs on the 14th of the month following the monthly charging period.

##### **When is SDRT charged?**

SDRT will be charged to redemptions of shares where the transaction is 2% or greater of the value of the fund as at the date of the transaction. The charge will be at a rate appropriate to the fund concerned, by reference to the proportion of exempt and non-exempt assets used in the calculation for the previous month.

##### **ACD's policy on charging SDRT**

Except for SDRT on larger deals and on non-exempt transfers between third parties OMFM intends that any liability to SDRT will be borne by the fund concerned.

For further information on the application of SDRT please refer to the full prospectus which is available on request from the ACD.

#### **Capital Gains Tax**

Capital gains within the fund are not liable to tax. You may be liable to capital gains tax when you sell some of your shares if the total gains in the relevant tax year exceed the annual exemption. For the tax year 2010/2011, the first £10,600 is exempt. This is the personal allowance for all your investments. If you have any queries regarding your tax position, you should contact your financial adviser.
