Out of 344 Foreign Large Growth investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

## Investment Information

### Investment Objective & Strategy

The portfolio seeks to exceed the return of the benchmark over a full market cycle. Franklin Templeton employs a disciplined, bottom-up philosophy with the objective of building a concentrated portfolio of high quality sustainable growth companies. The Sub-Advisor looks across industries and countries for companies with sustainable business models that meet their growth, quality and valuation criteria.

### Portfolio Manager(s)

Donald Huber, CFA.  
 John Remmert

### Morningstar Category: Foreign Large Growth

Foreign large-growth portfolios focus on high-priced growth stocks, mainly outside of the United States. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asia ex-Japan). Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). These portfolios typically will have less than 20% of assets invested in U.S. stocks.

### Volatility Analysis

3-Yr Risk Measures as of 06-30-18	Port Avg	Benchmark
Standard Deviation	13.12	11.47
Sharpe Ratio	0.90	0.50
Information Ratio	1.28	—
R-Squared	85.89	—
Beta	1.06	—
Alpha	5.71	—

### Best 3 Month Return

12.95%  
 (Nov '17 - Jan '18)

### Worst 3 Month Return

-3.81%  
 (Feb '18 - Apr '18)

### Notes

Wilmington Trust, N.A. Collective Funds (WTNA Funds) are trust company sponsored collective investment funds; they are not mutual funds.

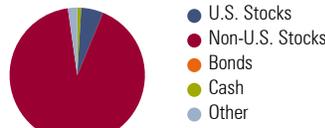

## Performance

**Performance Disclosure: The performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate; thus an investor's units, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than return data quoted herein. For more current information including month-end performance, please visit our website. Please refer to the performance section of the disclosure page for more information.**

# Disclosure

Performance data given represents past performance and should not be considered indicative of future results of the International Growth Fund (the "Fund"). The Fund is not a mutual fund and is not registered as an investment company under the Investment Company Act of 1940. The Fund is not FDIC-insured, may lose value and is not guaranteed by a bank or other financial institution.

Performance data reflects a specific class of units. Other fee classes may currently be available or may become available in the future. Not all fee classes are available for investment by all plans. In cases where a specific fee class was not yet launched as of the date of this Disclosure Statement, return figures shown may reflect the performance of a previously launched fee class. Fees vary across fee classes, and the net returns investors earn will be different from one fee class to another.

## Management of the Fund

*Trustee:* Wilmington Trust, N.A. (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and investments made, in the Fund. The Fund is part of the Wilmington Trust Collective Investment Trust (the "Trust") operated by the Trustee.

Wilmington Trust is a registered service mark. Wilmington Trust Corporation is a wholly owned subsidiary of M&T Bank Corporation. Wilmington Trust Company, operating in Delaware only, Wilmington Trust, N.A., M&T Bank and certain other affiliates, provide various fiduciary and non-fiduciary services, including trustee, custodial, agency, investment management and other services. Loans, retail and business deposits, and other personal and business banking services and products are offered by M&T Bank, member FDIC. Wilmington Trust Investment Advisors, Inc. is a SEC-registered investment advisor providing investment management services to Wilmington Trust and M&T affiliates and clients.

*Sub-Advisor:* Franklin Templeton Institutional, LLC  
The Trustee has engaged Franklin Templeton Institutional, LLC (the "Sub-Advisor" or "Franklin Templeton") to act as the Sub-Advisor to the Fund. In this capacity, Franklin Templeton will provide investment advice and recommendations with respect to the investment of Fund assets.

## Investment Process:

The Fund employs a bottom-up, research-driven investment process focused on building a concentrated portfolio of high quality sustainable growth companies. The goal of Franklin Templeton's "360° Research Process" is to identify the most attractive high quality sustainable growth companies that can be utilized within its risk framework to build the portfolio. Franklin Templeton views this bottom-up analysis as the most crucial aspect of their investment process.

Idea Generation - both quantitative and qualitative resources support analysts' efforts to identify investment ideas and track the competitive landscape, suppliers, and their industries. During this stage, analysts seek to understand whether a company represents a multi-year growth opportunity, has a sustainable business model, and demonstrates the potential to create shareholder value. The analysts also seek companies

that are not fully valued.

360° Research Process - Through qualitative research, analysts develop an understanding of specific drivers that they believe will enable a company to grow faster than its peers over a multi-year period. Meetings with management often help Franklin Templeton further evaluate corporate governance, accounting principles, and internal management objectives. Analysts typically try to meet with industry experts to seek additional perspective on the company and industry. Quantitative analysis typically involves the modeling of the company's financial statements. In evaluating companies, analysts seek the following characteristics:

- Growth - Utilize free cash flow analysis to help assess the sustainability of the company's business model and whether it has the potential to offer a longer term competitive advantage.
- Quality - Capital return and management analysis to assess management's record for value creation, as well as, financial transparency and accountability quality, corporate governance and environmental management and labor practices.
- Valuation - Analysts typically use a discounted cash flow (DCF) or dividend discount model (DDM) to help determine if a company is trading at an attractive price.

Portfolio construction begins at the onset of the investment process when analysts initiate a search for high quality sustainable growth companies across the full global opportunity set. Portfolio managers and analysts communicate regularly throughout this process, working together to identify ideas and evaluate them in light of current portfolios, to help ensure that recommendations meet Franklin Templeton's stringent growth, quality, and valuation criteria. Formal weekly discussions, ad-hoc roundtable meetings, and informal discussions serve as opportunities for members of the investment team to provide critical feedback and scrutinize investment opportunities. Drawing on their collective knowledge and experience across industries and markets strongly supports Franklin Templeton's risk framework, with the goal of reducing the overlap of economic exposures among holdings, such as direct competitors or stocks dependent on the same end markets or growth drivers. The combined insights of the portfolio managers and analysts help ensure that the overall focus of the portfolio is not overly reliant on a particular revenue source.

Franklin Templeton utilizes a two-rating system for stocks: Outperform and Sell. Outperform stocks are those that Franklin Templeton considers to exemplify their growth, quality and valuation criteria and demonstrate minimal duplicative exposures relative to other portfolio holdings. Only stocks that Franklin Templeton has rated as Outperform are included in client portfolios. In this way, portfolio construction represents the culmination of the analyst's research and the team's stock selection efforts, rather than a starting point from which to begin choosing securities. The goal is the construction of a concentrated, diversified portfolio represented by approximately 30-50 of their best stock ideas. Portfolio managers regularly review the overall capitalization and liquidity profile of the portfolio and seek to ensure that duplicative economic exposures among holdings are limited.

Franklin Templeton recognizes that trading volumes can shift

and portfolio managers therefore continually evaluate the overall capitalization and liquidity profile of the portfolio to help ensure that position sizes remain appropriate. Weightings are reviewed regularly and discussed formally at weekly roundtable meetings.

**Benchmark:** MSCI World Ex USA Growth NR USD

## Notes Regarding Return Information

Return figures represent the total change in net assets with capital gains and income dividends reinvested. Performance information is presented net of any applicable trustee fees, management fees, or other fees or expenses which are borne by the Fund. See "Fees and Expenses" for more information.

## Morningstar Rating™

The Morningstar Rating™ for funds, or "star rating", is calculated for investments funds and separate accounts with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

For collective investment trusts (CITs), the Morningstar Rating presented is hypothetical, because Morningstar does not independently analyze CITs. Rather, the rating is assigned as a means to compare these funds with the universe of mutual funds that Morningstar rates. The evaluation of this investment does not affect the retail mutual fund data published by Morningstar.

## Morningstar Return

The Morningstar Return rates a fund's performance relative to other managed products in its Morningstar Category. It is an assessment of a product's excess return over a risk-free rate (the return of the 90-day Treasury Bill) in comparison with the products in its Morningstar category. In each Morningstar category, the top 10% of products earn a High Morningstar Return (High), the next 22.5% Above Average (+Avg), the middle 35% Average (Avg), the next 22.5% Below Average (-Avg), and the bottom 10% Low (Low). Morningstar Return is measured for up to three time periods (three, five, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the product. Products with less than three years of performance history are not rated.

## Morningstar Risk

Morningstar Risk evaluates a fund's downside volatility relative to that of other products in its Morningstar Category. It is an assessment of the variations in monthly returns, with an emphasis on downside variations, in comparison with the products in its Morningstar category. In each Morningstar

# Disclosure

category, the 10% of products with the lowest measured risk are described as Low Risk (Low), the next 22.5% Below Average (-Avg), the middle 35% Average (Avg), the next 22.5% Above Average (+Avg), and the top 10% High (High). Morningstar Risk is measured for up to three time periods (three, five, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the product. Products with less than three years of performance history are not rated.

## Morningstar Style Box™

For equity funds, the vertical axis shows the market capitalization of the long stocks owned and the horizontal axis shows investment style (value, blend, or growth).

For fixed-income funds, the vertical axis shows the credit quality of the long bonds owned, and the horizontal axis shows interest rate sensitivity as measured by a bond's effective duration.

Morningstar seeks credit rating information from fund companies on a periodic basis (e.g., quarterly). In compiling credit rating information, Morningstar accepts credit ratings reported by fund companies that have been issued by all Nationally Recognized Statistical Rating Organizations (NRSROs). For a list of all NRSROs, please visit <http://www.sec.gov/ocr/ratingagency.html>. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/agencies have rated a security, fund companies are to report the lower rating; if three or more organizations/agencies have rated a security, fund companies are to report the median rating, and in cases where there are more than two organization/agency ratings and a median rating does not exist, fund companies are to use the lower of the two middle ratings. PLEASE NOTE: Morningstar, Inc. is not itself an NRSRO nor does it issue a credit rating on the fund. An NRSRO or rating agency ratings can change from time-to-time.

For credit quality, Morningstar combines the credit rating information provided by the fund companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond funds are assigned a style box placement of "low", "medium", or "high" based on their average credit quality. Funds with a low credit quality are those whose weighted-average credit quality is determined to be less than "BBB-"; medium are those less than "AA-", but greater or equal to "BBB-"; and high are those with a weighted-average credit quality of "AA-" or higher. When classifying a bond portfolio, Morningstar first maps the NRSRO credit ratings of the underlying holdings to their respective default rates (as determined by Morningstar's analysis of actual historical default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond fund. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from fund companies the average effective duration. Generally, Morningstar classifies a fixed-income fund's interest-rate sensitivity based on the effective duration of the Morningstar

Core Bond Index (MCBI), which is currently three years. The classification of Limited will be assigned to those funds whose average effective duration is between 25% to 75% of MCBI's average effective duration; funds whose average effective duration is between 75% to 125% of the MCBI will be classified as Moderate; and those that are at 125% or greater of the average effective duration of the MCBI will be classified as Extensive. In addition, for non-US taxable and non-US domiciled fixed income funds, static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: greater than 3.5 and less than equal to 6 years; (iii) Extensive: greater than 6 years.

## Fees and Expenses

The participant will incur management fees for investment advisory services provided by the Sub-Advisor to the Fund, trustee fees, and other operating expenses related to the Fund. Other operating expenses may include, but are not limited to, audit expenses, custody service fees, tax form preparation expenses, legal and other fees. A portion of this fee may be paid by the Trustee to the Fund's Sub-Advisor for its sub-advisory services to the Fund.

All fees and expenses will be reimbursed from the Fund when they are incurred. Any expenses incurred in connection with the investment and reinvestment of Fund assets including, without limitation, any transfer agency fees, brokerage commissions and expenses, will be charged against the Fund.

Below is a breakdown of the fees on the Fund:

International Growth Fund	Fee Class 35
Management Fee %	0.51
Trustee Fee %	0.13
Service Provider Fee %	0.35
Other Expenses %	0.03
<b>Gross Ratio %</b>	1.02
Fee Waiver %	0.00
<b>Net Expense Ratio %</b>	1.02

Fees and expenses are only one of several factors that participants and beneficiaries should consider when making investment decisions.

The cumulative effect of fees and expenses can substantially reduce the growth of a participant's or beneficiary's retirement account. Participants and beneficiaries can visit the Employee Benefit Security Administration's website for an example demonstrating the long-term effect of fees and expenses.

The example in the following table is intended to explain the ongoing costs of investing in the Fund and to compare these costs with the ongoing costs of investing in other collective funds. The table provides information about actual account values and actual expenses. This example is based on an investment of \$1,000 invested for one year:

International Growth Fund	Fee Class 35
Balance 06-30-2017	\$1,000.00
Balance 06-30-2018	\$1,248.71

Expenses (1 year) \$0.00

The next table is also intended to explain the ongoing costs of investing in the Fund and to compare these costs with the ongoing costs of investing in other collective funds. The table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 0.00% per year, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual account balance or expenses you paid for the period. This example is based on an investment of \$1,000 invested for one year:

International Growth Fund	Fee Class 35
Balance 06-30-2017	\$1,000.00
Hypothetical Balance 06-30-2018	\$989.85
Hypothetical Expenses (1 year)	\$10.15

## Risk Considerations

The decision to invest in the Fund and the risks involved in doing so should be carefully considered. The Fund should be considered a long-term investment.

The Principal Risks that are listed on the first page are described in the Additional Fund Information and Risk Definition booklet and should be read in connection with this profile.

The value of your investment in the Fund will increase and decrease over time in accordance with changes in the value of the securities held in the Fund. When assets of the Fund are invested in other investment vehicles (such as collective trusts or mutual funds), the Trustee does not have control over the trading policies or strategies of such entities.

The Trustee of the Fund may change the investment objective of the Fund at any time without prior notice or approval.

Investments in the Fund are not insured or guaranteed by any bank, the FDIC, or any other governmental entity.

## Basic Terms and Conditions

This profile is only a summary of some of the key features of the Fund and should be read in connection with the Additional Fund Information and Principal Risk Definitions. Participation in the Fund is governed by the Trust Agreement and the terms of the participation materials, which must be reviewed and signed by the plan sponsor or plan fiduciary. In the event of a conflict between the provisions of this profile and the Trust Agreement or participation materials, the Trust Agreement or participation materials control. Please carefully review the Trust Agreement and participation materials before investing in the Fund.

Investments in the WTNA Portfolios are not deposits or obligations of a guaranteed by Wilmington Trust, and are not insured by the FDIC, the Federal Reserve, or any other governmental agency. The Portfolios are commingled investment vehicles, and as such, the values of the underlying investments will rise and fall according to market activity; it is possible to lose money by investing in the Portfolios. Investors

---

# Disclosure

should consider the investment objectives, risks, charges and expenses of any pooled investment company carefully before investing.

The Fund is maintained by the Trustee as part of the Wilmington Trust Collective Investment Trust, which was most recently amended on June 20, 2016. It is a "group trust" within the meaning of Internal Revenue Service Revenue Ruling 81-100, as amended, and is exempt from registration under the Investment Company Act of 1940, as amended (the "1940 Act").

**For More Information:**

Please carefully review the Trust Agreement and participation materials prior to investing in the Fund. The Trust Agreement and participation materials provide limitations on liability and indemnifications in favor of Trustee. To learn more or obtain additional materials governing the Fund, please contact your plan sponsor or plan trustee. You may also obtain a copy of the Trust Agreement and participation materials, without charge, by contacting:
