  - seek investment exposure to small size European companies;
  - can tolerate potentially large fluctuations in share price;
  - have a high level of risk tolerance commensurate with an investment in equity securities; and

### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme that is a sub-fund of the Luxembourg incorporated SICAV Threadneedle (Lux), and which seeks to achieve capital appreciation by investing principally in the equity securities of European Smaller Companies.
- The distribution policies of the Share Classes are as follows:

**Share Classes whose denomination ends in a “P” or “C”:** Dividend, if declared, will be distributed. Dividends may include an element of capital which will have an impact on capital appreciation. The payment of dividends will result in an immediate decrease in the net asset value per share regardless of whether or not they are paid out of capital.

**Other Share Classes:** No dividend distribution. Income, if any, will be re-invested.

*Refer to Paragraphs 1, 2, 5 and 19.1 of the Singapore Prospectus for further information on features of the product.*

### Investment Strategy

- The Portfolio will invest principally in the equity securities of European Smaller Companies.
- The Portfolio may also invest up to one-third of its assets in other securities (including fixed income securities, other equities and money market instruments).
- **The Portfolio may use derivatives for hedging and efficient portfolio management.**
- Hedging between the currency of the Class and the base currency of the Portfolio will be carried out for Classes whose denomination ends in a “H” or “C”. These Classes will be hedged, with the objective of minimising currency risk exposure. This activity may increase or decrease the return to investors in those Classes.

*Refer to Paragraph 5 of the Singapore Prospectus for further information on the investment strategy.*

<sup>1</sup> The Singapore Prospectus is available for collection during normal Singapore business hours from Singapore distributors for the Portfolio or accessible at [www.columbiathreadneedle.sg](http://www.columbiathreadneedle.sg).

<sup>2</sup> Provided for available unit classes incepted before 31 March 2018.

- The Management Company of the SICAV is Threadneedle Management Luxembourg S.A.
- The Sub-Advisor of the Portfolio is Threadneedle Asset Management Limited.
- The Depositary for the SICAV is Citibank Europe plc, Luxembourg Branch.

*Refer to Paragraphs 1, 3 and 4 of the Singapore Prospectus for further information on the role and responsibilities of these entities.*

## KEY RISKS

### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

**The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:**

*Refer to Paragraph 8 of the Singapore Prospectus for further information on the risk of the product.*

## Market and Credit Risks

- **You are exposed to general market risks.**
  - The value of investments may fall as well as rise and you may not get back the sum originally invested, especially if investments are not held for the long term.
- **You are exposed to market risks in Europe.**
  - Your investments may go up or down due to changing economic, political or market conditions that impact the share price of the companies that the Portfolio invests in.
  - You should also note that the geographic concentration of the Portfolio may add more volatility to the Portfolio than a more broadly diversified portfolio.
- **You are exposed to exchange rate risks.**
  - Where investments are made by the Portfolio in assets that are denominated in currencies other than Euro (the base currency of the Portfolio), changes in exchange rates may affect the value of your investments.
  - The Portfolio and share classes offered may not be denominated in SGD and you may therefore be exposed to additional exchange rate risks if your reference currency is SGD.

## Liquidity Risks

- **The Portfolio is not listed in Singapore and you can redeem only on Valuation Dates (subject to the opening hours of the Singapore distributors).**
  - There is no secondary market for the Portfolio in Singapore. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **Your right to request for redemption may be suspended or deferred in certain circumstances.**

## Product-Specific Risks

- **You are exposed to small and mid-cap companies risks.**
  - The Portfolio invests principally in European Smaller Companies. There are certain risks associated with investing in securities of small and middle capitalised companies including greater market price volatility, less publicly available information, and greater vulnerability to fluctuations in the economic cycle. Because such companies normally have fewer shares outstanding than larger companies, it may be more difficult to buy or sell significant amounts of such shares without affecting prevailing market prices.
- **You are exposed to volatility risks.**
  - The Portfolio may exhibit significant price volatility.
- **You are exposed to derivatives risks.**
  - The use of derivatives by the Portfolio may increase the volatility of the Portfolio and may involve a small investment of cash relative to the magnitude of risk assumed. In addition, these techniques could result in a loss if the counterparty of the transaction does not perform as promised.
  - If the Management Company or the Sub-Advisor judges market conditions incorrectly or employs a strategy that does not correlate well with the Portfolio’s investments, these techniques could result in a loss.
