## Additional information supplied by the distributor

The information included in this document is complementary to that in the fund prospectus, a document supplied by the distributor to the investor. The distributor will provide any additional information required for the investor to feel that he disposes of all the information he needs to make the right investment decision, especially as regards (a) the advantages receivable from or payable to the distributor, with respect to the transaction in question, and (b) the adequacy of the match between the UCITS and the investor's risk profile.

## Investment strategy

Dexia Bonds Euro Inflation Linked is a subfund of the sicav Dexia Bonds. This subfund mainly invests in fixed or floating rate debt instruments represented by bonds denominated in euro. These are linked to inflation and are issued by reputable issuers, in particular, governments, public bodies, international organisations, banks or companies.

## NAV evolution (absolute value) since 7 years in EUR

Past performances listed in this document are no guarantee of future results, nor are performances guaranteed not to fluctuate over time. The NAVs listed above are supplied by Accounts and take into account any restructuring undergone by the subfund.

## Modified Duration evolution

## Mean maturity breakdown (%)

## Rating\* allocation (%)

## Currency allocation (%)

\* The Bloomberg Composite (COMP) is a blend of a security's MOODY'S, S&P, FITCH, and DBRS ratings. The NA mention means that there is no COMP-rating available.

## Manager's comment

The comments on this fund are available on the website [www.dexia-am.com](http://www.dexia-am.com).

## Subfund's risk profile

To better understand the fund's risk profile, investors are asked to consider, in addition to their risk category, the risks that are inherent to the investment strategy as described in the prospectus. Investors should be aware that the fund's value may decrease, particularly due to its exposure to the following main risks:

- Interest-rate risk, i.e., the fluctuation in interest rates and anticipations of inflation rate trends.
- Credit risk: default or downgrade of the credit rating of a fund issuer or counterparty.
- Liquidity risk: certain market events may prevent the fund from selling its positions at the valuation prices.
- Derivatives and related risks, such as their sophistication, higher volatility and possible use of leverage.
