Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Fund is constituted as a sub-fund under the Allianz Global Investors Fund (the “Company”). • The Management Company is Allianz Global Investors GmbH. • The Investment Manager is Allianz Global Investors U.S. LLC. • The Depositary is State Street Bank Luxembourg S.C.A.. 	<p>Refer to Sections 1, 3 and 4.4 of the Prospectus for further information on the role and responsibilities of these entities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends and coupons (if any) may rise or fall. These risk factors may adversely impact the net asset value of the product and cause you to lose some or all of your investment:</p>	<p>Refer to Section 7 of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You may be exposed to general market risk. <ul style="list-style-type: none"> ◦ The Fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which are partially attributable to irrational factors. Such factors could lead to substantial and longer-lasting drops in prices affecting the entire market. • You may be exposed to country and region risk in US and/or Canada. <ul style="list-style-type: none"> ◦ The Fund’s investments focus on US and/or Canada, which may increase the concentration risk. Consequently, the Fund is particularly susceptible to the adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event or development in and risks of this region, or of companies based and / or operating in this region. • You may be exposed to currency risk. <ul style="list-style-type: none"> ◦ The Fund may hold assets or have a share class denominated in foreign currencies other than the base currency of the Fund. Accordingly, the Fund is exposed to a currency risk that if these foreign currency positions have not been hedged or if there is any change in the relevant exchange control regulations, the net asset value of the Fund or Class may be affected unfavourably. Any devaluation of the foreign currency against the base currency of the Fund would cause the value of the assets denominated in the foreign currency to fall. • You may be exposed to issuer default risk. <ul style="list-style-type: none"> ◦ The issuer of securities held by the Fund may become insolvent causing its inability to fulfill his payment obligations in a full and timely manner and causing such issued assets to become economically worthless. • You may be exposed to creditworthiness risk. <ul style="list-style-type: none"> ◦ The creditworthiness (ability to pay) of the issuer of an asset held by the Fund may fall. This usually leads to a decrease in the price of the asset greater than that caused by general market fluctuations. • You may be exposed to emerging markets risk. <ul style="list-style-type: none"> ◦ The Fund invests in emerging markets which are subject to greater liquidity risk, currency risk, general market risk, settlement risk and custodial risk. The legal, taxation and regulatory environment and the accounting, auditing and reporting standards may deviate substantially to the Fund’s detriment from the levels and standards that are considered standard international practice. 	

Liquidity Risks	
<ul style="list-style-type: none"> • The Fund is not listed in Singapore and you can redeem only on Dealing Days. <ul style="list-style-type: none"> ◦ There is no secondary market in Singapore for the Fund. All redemption requests may only be made in the manner described in the Prospectus. • Your right to redemption may be deferred or suspended under certain circumstances highlighted in paragraphs 9.3 and 12 of the Prospectus. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • You may be exposed to company-specific risk. <ul style="list-style-type: none"> ◦ The value of the Fund's assets may drop significantly and for an extended period of time if company-specific factors (such as the issuer's business situation) deteriorates, even if the market trend is generally positive. • You may be exposed to derivatives risk. <ul style="list-style-type: none"> ◦ (i) The derivatives may be misvalued or may have varying valuations; (ii) the use of derivatives may not completely hedge the risk intended to be hedged; (iii) derivative may become difficult to sell. In such cases, the Fund may not be able to liquidate a position at an appropriate time or price; (iv) there is also a creditworthiness risk (i.e. that the counterparty may default or be unable to completely fulfill its obligations); (v) given the leverage effect embedded in derivatives, even a small investment in derivatives could have a substantial, even negative, effect on the performance of the Fund. • You may be exposed to the risk relating to distribution out of capital. <ul style="list-style-type: none"> ◦ If you invest in a share class which provides for distributions out of capital you should be aware that payment of such distributions may result in an immediate decrease in the net asset value per share and may reduce the capital available for future investment and capital growth. • You may be exposed to the risk of interest rate changes. <ul style="list-style-type: none"> ◦ If market interest rates rise, the value of the interest-bearing assets held by the Fund may decline substantially. This applies to an even greater degree if the Fund also holds interest-bearing securities with a longer time to maturity and a lower nominal interest rate. • You may be exposed to downgrading risk. <ul style="list-style-type: none"> ◦ The credit rating of interest bearing securities held by the Fund may be downgraded. The Fund may or may not be able to dispose of the securities that are being downgraded. This may lead to a fall in the net asset value of the Fund. • You may be exposed to the risk of investing in high-yield investments and convertible bonds. <ul style="list-style-type: none"> ◦ Investing in high-yield investments is normally associated with increased creditworthiness risk, risk of interest rate changes, general market risk, company-specific risk and liquidity risk ◦ Investing in convertible bonds is normally associated with increased creditworthiness risk, risk of default, risk of interest rate changes, prepayment risk, general market risk and liquidity risk. • You may be exposed to valuation risk. <ul style="list-style-type: none"> ◦ Valuation of the Fund assets may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the Fund. • You may be exposed to credit rating risk. <ul style="list-style-type: none"> ◦ Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times. • You may be exposed to asset allocation risk. <ul style="list-style-type: none"> ◦ The performance of the Fund is partially dependent on the success of the asset allocation strategy employed by the Fund. There is no assurance that the strategy employed by the Fund will be successful and therefore the investment objective of the Fund may not be achieved. The investments of the Fund may be periodically rebalanced and therefore the Fund may incur greater transaction costs than a fund with static allocation strategy. • You may be exposed to RMB currency risk. <ul style="list-style-type: none"> ◦ The Fund may invest in assets denominated in offshore and onshore RMB. The RMB traded in the PRC is not freely convertible and is subject to exchange control policies and restrictions imposed by the PRC authorities. Restrictions on repatriation of RMB out of the PRC may limit the depth of the RMB market available outside of the PRC, and thereby may reduce the liquidity of the Fund. The RMB may be subject to devaluation, in which case the value of the investments in RMB assets will be adversely affected. Furthermore although offshore RMB and onshore RMB are the same currency, they are traded on different and separate markets and as such, their values could differ and their exchange rates may not move in the same direction. 	

<ul style="list-style-type: none">The net asset value of the Fund may likely have a high volatility due to the investment policies or portfolio management techniques employed in respect of the Fund.

APPENDIX: GLOSSARY OF TERMS

Business Day	: Means each day on which banks and exchanges in Luxembourg are open for business. For the avoidance of doubt, half-closed bank business days in Luxembourg are considered as being closed for business.
Emerging Markets	: Means a country which is not classified by the World Bank as a high-income economy (high gross national income per capita).
High-Yield Investments Type 1	: Means an investment in debt securities which at the time of acquisition has a rating of BB+ or below (Standard & Poor's and Fitch) or of Ba1 or below (Moody's) or the equivalent by another rating agency or, if unrated, as determined by the Investment Manager to be of comparable quality. In case of a minimum (maximum) investment limit of High-Yield Investment Type 1 securities according to the Fund's investment restrictions, the lowest (highest) available rating of a debt security at acquisition day is decisive for the assessment of the possible acquisition of such debt security as High-Yield Investment Type 1. Generally, there is no intention to acquire debt securities that are only rated CC, C or D (Standard & Poor's), C, RD or D (Fitch) or Ca or C (Moody's) unless otherwise specified.
PRC	: Means the People's Republic of China, excluding the Hong Kong Special Administrative Region, the Macau Special Administrative Region and Taiwan.
RMB	: Means the Chinese Renminbi, the official currency of the PRC and, unless the context otherwise requires, the term "RMB" refers to offshore Chinese Renminbi (" CNH ") traded offshore in Hong Kong or markets outside the PRC and not to onshore Chinese Renminbi (" CNY ").
Valuation/ Dealing Day	: Means each day on which banks and exchanges in Luxembourg and the United States are open for business.
