## Risk and reward profile

This indicator represents the risk and reward profile presented in the Key Information Document. It is not guaranteed and may change during the month.

## Key risks

**Market risk:** securities may decline in value due to factors affecting securities markets generally, and equity securities generally have greater price volatility than debt securities.

**Mainland China investment risk:** investments in equity securities of Chinese companies involve risks due to restrictions imposed on foreign investors, greater market volatility and a risk of lack of liquidity lines.

**Stock Connect risk:** investments in China A-shares through Stock Connect are subject to risks associated with quota limitations, potential suspension of trading and possible restrictions on trading, among others.

**Smaller company securities risk:** securities of companies with smaller market capitalisations tend to be more volatile and less liquid than securities of larger companies.

**Emerging market risk:** emerging markets may be more sensitive than more mature markets to a variety of economic factors and may be less liquid than markets in the developed world.
