

LionGlobal Short Duration Bond Fund

**LION
GLOBAL
INVESTORS**

The investment objective of the Fund is to provide total return of capital growth and income over the medium to long term, through an actively managed portfolio of Singapore and international bonds, high quality interest rate securities and other related securities. There is no target industry or sector. For the avoidance of doubt, while we will generally invest in bonds with investment grade quality, we may nonetheless also invest or expose the Fund to sub-investment grade securities.

Fund Manager's Commentary

- Interest rates rose in February due to better risk-on environment and improving US 4th quarter GDP. A hard Brexit scenario was also ruled out, leading to higher rates in UK and Europe. Spreads were however lower as investors continued to buy credits, encouraged by the pause in the Fed and easing by People's Bank of China (PBoC).
- The US 10 year yield rose 8 basis points (bps) to 2.71% while yields on the 10 year Singapore Government Securities (SGS) were higher by 10 bps to 2.24%. Both SGD and USD corporate spreads continued to tighten in the current risk-on environment.
- We think the rally on credit spreads will continue as credit easing by PBoC will encourage more issuers from China to tap the onshore market, thereby limiting offshore bond supply.
