DPAM CAPITAL B Equities EMU Behavioral Value

(a sub-fund of DPAM CAPITAL B SA, a public SICAV under Belgian law)

managed by Degroof Petercam Asset Management SA

Classe A - ISIN: BE6289166744

Objectives and investment policy

Objective

- The fund's objective is to obtain as high a return as possible. The fund invests in equities (with no limits as to sectors) listed in EU member states forming part of the EMU. The investment policy is based on the principles of Behavioural Finance, an academic field which analyses financial markets with the aid of psychology. The fund invests in equities considered undervalued and showing good momentum. The fund will maintain a wide spread of risks, in particular by means of wide diversification of economic sectors.

Investment policy

- The fund invests in equities of European companies in the EMU zone (and other analogous transferable securities), warrants, subscription rights and cash and cash equivalents. At least eighty percent of the fund's gross assets are invested in equities and other equity instruments of companies based in European Union member states that form part of the European Monetary Union (EMU) or carry on the greater part of their activity in such states. The remaining twenty percent may be invested in cash and cash equivalents.

Subscription/Redemption

- All subscription or redemption requests may be made prior to 1.15 pm (Belgian time) on each business day to Banque Degroof Petercam SA.

Types of Units

- The units of the fund are distribution units, issued in the form of shares, which give right to a dividend.
- Authorised derivative financial instruments are used on an ancillary basis with a view to attaining the investment objectives. The use of these contracts has no significant influence on the risk profile.

Investment holding period

- This fund may not be appropriate for investors who intend to withdraw their capital within 5 years of the initial investment.

Risk and reward profile

---	---	---	---	---	---	---

Certain risks are not (or not adequately) reflected in the risk and reward profile mentioned herein. Amongst those risks, the following could have a material impact on the risk and reward profile of the fund:

- All investments being risky by nature, the return (performance) is subject to a high degree of uncertainty. The risk and reward profile of your investment is reflected by a synthetic indicator which ranks the fund over a risk/return scale from the lowest (1) to the highest (7) risk category.
- The computation of this risk/reward profile is based on the portfolio's net asset value fluctuations (volatility) recorded over the past 5 years (or on simulations based on an appropriate benchmark for funds or share classes of less than 5 years). It gives an indication of the fund's potential performance and of your capital risk exposure, but it does not guarantee that the risk/reward profile currently published will remain unchanged.
- Historical data, such as those used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund.
- The lowest risk/return category (level 1) does not mean a risk-free investment.
- The risk/return profile mentioned herein is essentially due to the presence of equities in the portfolio.
- The capital invested in this fund is neither guaranteed nor protected. You may therefore lose all or part of your investment.
