You are exposed to regulatory risk.

The investment objectives and parameters of the Fund and/or the Underlying Funds are restricted by legislative and regulatory guidelines. There may be a risk that legislative or regulatory changes may make it less likely for the Fund to achieve its objectives.

You are exposed to regional and emerging markets risk.

The Fund and/or the Underlying Funds may experience increased volatility as emerging markets lack the diversity of global markets. Exposure to emerging markets also increases potential volatility in your portfolio as the region's legal, judicial and regulatory infrastructure is still developing and this may create uncertainty for investors.

You are exposed to additional risks related to the Underlying Fund of the Aberdeen Standard China Opportunities Fund's ("ASCOF") investment in Chinese securities through the use of a Qualified Foreign Institutional Investor ("QFII") licence.

If the creditors of the QFII successfully assert that the securities and other assets in the nominee accounts are owned by the QFII and not the underlying fund of the ASCOF, the creditors of the QFII may seek payment from the assets of the Underlying Fund of the ASCOF, which could in turn affect the net asset value of the Fund.

You may be exposed to derivatives risk.

The Underlying Funds (excluding Aberdeen Global – Indian Equity Fund) may use financial derivatives instruments for the purposes of hedging and/or efficient portfolio management.
