

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Distribution Fund I-Class

I-Class Income Units, ISIN: GB00B4WDT300, (also representative of I-Class Accumulation Units, ISIN: GB00B52HN049).
The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

The Fund aims to provide investors with a level of income that can be sustained over a period of time, as well as providing the possibility that the amount they invest in the Fund will increase. The Fund will invest in a mixture of fixed interest securities and ordinary shares that pay higher than average dividends, principally issued by UK companies. The balance between ordinary shares and fixed interest securities will change over time to reflect opportunities presented by changing market circumstances, but will always be subject to a minimum level of 60% in fixed interest securities.

The Fund Manager is able to make their own investment decisions, is not constrained by any geographical or sector limits and is not guided by any particular benchmark.

If you select I-Class Accumulation Units any income payable by the Fund will be automatically reinvested and reflected in the price of the units. If you select I-Class Income Units any income payable by the Fund will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- Bonds are very sensitive to interest rate changes and it is possible that bond issuers will not pay interest or return the capital promised. Bonds can also be 'downgraded' by ratings agencies. All of these events can reduce the value of bonds held by the Fund and therefore impact performance.
- The Fund Manager has the power to invest up to 10% of the portfolio in high yield bonds (a type of bond which has a low or no rating from a credit rating agency) and non rated bonds. While such bonds may offer a higher income the interest paid on them and their capital value is at greater risk, particularly during periods of changing market conditions.
- The level of income will not remain constant and will fluctuate.
- A portion of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.61%
