Note: In this report the abbreviated names of the sub-funds will be used, i.e. without the prefix 'Robeco Capital Growth Funds'.

This partial semi annual report over the first half year of 2024 is an excerpt from the full June 2024 semi-annual report of Robeco Capital Growth Funds. It only contains data from the Robeco Capital Growth Funds sub-funds, whose distribution is permitted in Switzerland. This report is part of a consolidation of all assets, liabilities, income and expenses of all sub-funds of Robeco Capital Growth Funds, which are authorized for distribution in Switzerland. A copy of the semi-annual report is recommended to people as this report is only an excerpt from the semi-annual report of Robeco Capital Growth Funds, which includes details of all sub-funds.

Representative in Taiwan

Nomura Asset Management Taiwan Ltd -30F, No.7, Sec. 5, Xinyi Road, Taipei 110, Taiwan.

Robeco

Where reference is made to 'Robeco', it refers to 'Robeco Institutional Asset Management B.V.', which includes the activities of the other entities which are in the scope of Robeco's management.

Report of the Board of Directors

General

Website

An information update on the Fund's investment policies, returns and investment portfolio can be found on www.robeco.com/en/riam.

Code of conduct

The Board of Directors adheres to the 11 principles of the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct for Luxembourg investment funds and considers the Fund to be in compliance with the principles in all material respects.

Merger of several sub-funds into sub-fund Robeco Capital Growth Funds

In accordance with the decision made by the Board of Directors of Robeco All Strategies Funds and the Board of Directors of Robeco Capital Growth Funds ("RCGF"), Robeco Multi Asset Sustainable, Robeco Multi Asset Growth and Robeco Multi Asset Income have been merged into the corresponding sub-funds of RCGF. The decision to merge these Sub-funds into the receiving sub-funds has been taken for the following reasons: (1) the mergers will lead to greater client centricity, as the mergers will result in efficiency benefits for existing and prospective shareholders; (2) both the merging sub-funds and the receiving sub-funds are managed by Robeco Institutional Asset Management B.V., therefore it has been considered appropriate to transfer the merging Sub-funds to the receiving sub-funds.

Following the mergers, the merging Sub-funds ceased to exist.

Below table states the merging and receiving share-classes including the conversion rates.

Report of the Board of Directors (continued)

General (continued)

Merger of several sub-funds into sub-fund Robeco Capital Growth Funds (continued)

On 17 April 2024, the Board of Directors of Robeco QI Global Dynamic Duration and the Board of Directors of Robeco Capital Growth Funds (“RCGF”) have resolved to propose to investors to merge Robeco QI Global Dynamic Duration into the corresponding sub-fund of RCGF. The decision to merge the Fund into the receiving sub-fund has been taken for the following reasons: (1) the merger will lead to greater client centricity, as the merger will result in efficiency benefits for existing and prospective shareholders; (2) both the merging fund and the receiving sub-fund are managed by Robeco Institutional Asset Management B.V., therefore it is considered appropriate to transfer the merging fund to the receiving sub-fund.

During an Extraordinary General Meeting the investors in Robeco QI Global Dynamic Duration will be requested to resolve on the merger.

Following the merger, the merging fund shall cease to exist.

Report of the Investment manager

General market review

In the first half of 2024, the global economy sustained a late cycle expansion in economic activity and continued to show resilience to a maturing monetary policy tightening cycle and a densely packed global election cycle. The post-Covid expansion has been exhibiting an unusual vibrancy and longevity with the global economy, defying the gravitational pull of higher real interest rates so far, despite leading indicators with a proven track record (like an inverted US Treasury yield curve) suggesting otherwise. A lower susceptibility to higher interest rates, partly thanks to a prolonged deleveraging cycle on behalf of the US consumer during the Great Expansion from 2009-2019, explains one part of this puzzle. In addition, extraordinary pro-cyclical fiscal expansion by governments has continued to fuel the post-Covid expansion. In the first quarter of 2024, stronger than expected real activity numbers in advanced economies coincided with a lower degree of disinflation, leaving central bankers and market participants to downgrade the number of forthcoming rate cuts, worrying about the stickiness of core inflation. Notably services inflation in advanced economies remains elevated. The global economy is experiencing a bifurcated business cyclicality; whereas global manufacturing activity only troughed in late 2023 and entered on a path of moderate expansion in the first half of 2024, services activity and subsequent consumption instead cooled from elevated growth levels at the start of the second quarter of 2024. The recovery in the global manufacturing cycle, evidenced by the global JP Morgan manufacturing PMI staying above 50 (a level indicating expansion) throughout the first half of 2024 has improved the outlook for advanced and emerging economies with a strong manufacturing base. In Europe, Germany emerged from a technical recession, showing a positive 0.2% (q-o-q) real GDP growth again on the back of easing supply side pressures and an abating energy price shock. Europe's natural gas inventories are tracking well above their 5-year average. Whereas US first quarter 2024 real GDP surprised to the upside, expanding at a 2.9% (y-o-y) growth rate, the latest nowcast figure from the Atlanta Federal Reserve Bank for the second quarter of 2024 shows a rather subdued 1.5% (y-o-y) pace. China's economic growth performance in the first quarter of 2024 notably improved with a 5.3% (y-o-y) increase in real GDP. Despite persistent housing market weakness inhibiting domestic consumption growth, China's strategy aimed at exporting high value-added manufacturing items like EVs and solar panels seems to be gaining traction. Yet, its export success has also met resistance from the European Commission which is set to confirm provisional import tariffs of up to 37.6% on Chinese EVs. Deflationary pressures, stemming from excess supply issues as well as ongoing deleveraging efforts abated somewhat in the first half of 2024, with China's consumer price inflation back in positive territory in May (+0.3%, y-o-y).

⁴ 3 year performance since inception/until deactivation.

Performance analysis

Robeco BP Global Premium Equities

Over the reporting period, Robeco BP Global Premium Equities generated a return of 9.7% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund has underperformed the benchmark as market concentration with an emphasis on growth companies has presented a headwind for performance. Both stock selection and sector allocation have detracted nearly equally with sector allocation detracting slightly more. Market concentration in the magnificent 7 continued to be a hurdle, with the Sub-fund's underweight to Information Technology and Communication Services the largest detractors. Underweight to both consumer discretionary and real estate provided some relief. Within stock selection, information technology, consumer discretionary and communication services lagged, while stocks in financials helped offset this disadvantage. Regionally, Europe, the United Kingdom and North America contributed negatively while Japan and the Pacific have offset this disadvantage. With respect to sustainability investing, we qualitatively capture a range of ESG issues which directly and indirectly affect our decision making during the course of our characteristics-based investment process.

Robeco QI Global Conservative Equities

Over the reporting period, Robeco QI Global Conservative Equities generated a return of 9.9% (gross of fees in EUR), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The low-risk factor was the primary detractor from relative performance. On the other hand, the value factor added to relative returns and momentum was neutral.

Robeco Sustainable Global Stars Equities

Over the reporting period, Robeco Sustainable Global Stars Equities generated a return of 18.7% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

Over the reporting period, the Sub-fund showed very strong absolute and relative returns. The positive results were mainly driven by positive sector allocation to the industrials, information technology, healthcare and communications services sector, while the Sub-fund had a slightly negative contribution from the financials and energy sectors, as well as from cash allocation. Within the industrials sector, the Sub-fund had very strong contribution from Hitachi, which is driven by the electrification theme, as the electricity grid around the world needs to be upgraded. Within information technology, the Sub-fund had a very strong attribution from AI semiconductor names, such as Broadcom and Nvidia. During the reporting period, the overall sustainability profile of the Sub-fund was improved further by focusing on most material ESG factors. Furthermore, the majority of our holdings are under active engagement. The environmental profile of the Sub-fund in terms of greenhouse gas emissions remained well below that of the benchmark.

Robeco Emerging Stars Equities

During the first half year of 2024, Robeco Emerging Stars Equities generated a return of 8.0% (gross of fees in EUR), against a return of 10.8% for its reference index, the MSCI Emerging Markets Index (Net Return in EUR).

The main negative contributors to the relative performance were an overweight position in Brazil and Korea, an underweight position in India and Taiwan, and a negative stock selection result in China. Not having a position in Saudi Arabia and stock selection in Korea, Brazil and Taiwan contributed positively. During the period, the Sub-fund added weight in Taiwan and reduced positions in Thailand. The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and supported by quantitative models, while ESG factors are fully integrated into the investment process. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile and through engagement the Sub-fund tries to improve the sustainability profile of the companies it invests in.

Robeco Emerging Markets Equities

Over the reporting period, Robeco Emerging Markets Equities generated a return of 11.4% (gross of fees in EUR), against a return of 10.8% for its benchmark, the MSCI Emerging Markets Index (net return in EUR).

The Sub-fund slightly outperformed the index. The main positive contributors to the relative performance were the underweight positions in Qatar, Thailand and Saudi Arabia and the overweight position in Hungary and Turkey. Negative contributions came from an overweight in Brazil, Mexico, Indonesia and South Korea, and an underweight in India. The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and supported by quantitative models, while ESG factors are fully integrated into the investment process. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile and through engagement the Sub-fund tries to improve the sustainability profile of the companies it invest in.

Robeco QI Emerging Markets Active Equities

Over the reporting period, Robeco QI Emerging Markets Active Equities generated a return of 16.4% (gross of fees in EUR), against a return of 10.8% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

For the period, the Sub-fund outperformed the benchmark. The value factor was the primary contributor to relative performance, while the analyst revisions and momentum factors also added to relative returns. On the other hand, quality factor and short-term signals contribute detracted from relative performance.

Robeco QI Global Developed Sustainable Enhanced Index Equities

Over the reporting period, Robeco QI Global Developed Sustainable Enhanced Index Equities generated a return of 16.5% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund outperformed the benchmark. The momentum factor was the primary contributor to relative performance, while the quality and analyst revisions factors also added to relative returns. On the other hand, the value and sustainability factors and short-term signals contributed negatively to relative performance.

Robeco QI Emerging Conservative Equities

Over the reporting period, Robeco QI Emerging Conservative Equities generated a return of 10.5% (gross of fees in EUR), against a return of 10.8% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The low-risk factor was the primary detractor from relative performance. On the other hand, the momentum and value factors contributed positively to relative returns.

Robeco QI Global Value Equities

Over the reporting period, Robeco QI Global Value Equities generated a return of 10.2% (gross of fees in EUR), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The value factor was the primary detractor from relative performance, while the momentum factor also dragged on relative returns. On the other hand, the quality and low-risk factors contributed positively to relative performance.

Robeco QI Global Developed Multi-Factor Equities

Over the reporting period, Robeco QI Global Developed Multi-Factor Equities generated a return of 14.7% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The value factor was the primary detractor from relative performance, while the low-risk and quality factors also dragged on relative returns. On the other hand, the momentum factor contributed positively to relative performance.

Robeco QI Emerging Markets Sustainable Active Equities

Over the reporting period, Robeco QI Emerging Markets Sustainable Active Equities generated a return of 14.2% (gross of fees in EUR), against a return of 10.8% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

For the period, the Sub-fund outperformed the benchmark. The value factor was the primary contributor to relative performance, while the analyst revisions and momentum factors also added to relative returns. On the other hand, the quality and sustainability factors and short-term signals contributed negatively to relative performance.

Robeco QI Global Developed Conservative Equities

Over the reporting period, Robeco QI Global Developed Conservative Equities generated a return of 11.3% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The low-risk factor was the primary detractor from relative performance. On the other hand, the momentum and value factors added to relative returns.

Performance analysis (continued)

Robeco QI Global SDG & Climate Conservative Equities (formerly RobecoSAM QI Global SDG & Climate Conservative Equities)

Over the reporting period, Robeco QI Global SDG & Climate Conservative Equities generated a return of 10.6% (gross of fees in EUR), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The low-risk factor was the primary detractor from relative performance, while the sustainability factor also dragged on relative returns. On the other hand, the value and momentum factors added to relative returns.

Robeco QI Global Developed Enhanced Index Equities

Over the reporting period, Robeco QI Global Developed Enhanced Index Equities generated a return of 16.9% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund outperformed the benchmark. The quality, momentum and analyst revisions factors contributed positively to relative performance. On the other hand, the value factor was the primary detractor from relative performance. The short-term signals had a neutral contribution to relative performance.

Robeco Sustainable Emerging Stars Equities

During the first half year of 2024, Robeco Sustainable Emerging Stars Equities generated a return of 3.3% (gross of fees in EUR), against a return of 10.8% for its reference index, the MSCI Emerging Markets Index (Net Return in EUR).

The main negative contributors to the relative performance were an overweight position in Brazil and Korea, an underweight position in India and negative stock selections result in China, India and Korea. Not having a position in Saudi Arabia and stock selection in Taiwan and South Africa contributed positively. During the period, the Sub-fund added weight in China and reduced positions in India. The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and supported by quantitative models, while ESG factors are fully integrated into the investment process. In addition, the Sub-fund has a better sustainability profile than the MSCI EM Index, limits investments in companies with an elevated sustainability risk profile and through engagement the Sub-fund tries to improve the sustainability profile of the companies it invests in.

Robeco QI Emerging Markets Sustainable Enhanced Index Equities

Over the reporting period, Robeco QI Emerging Markets Sustainable Enhanced Index Equities generated a return of 11.0% (gross of fees in USD), against a return of 7.5% for its reference index, the MSCI Emerging Markets Index (net return in USD).

For the period, the Sub-fund outperformed the benchmark. The value factor was the primary contributor to relative performance, while the analyst revisions, momentum and quality factors also added to relative returns. On the other hand, the sustainability factor detracted from relative returns while the short-term signals were neutral.

Robeco Global SDG Equities (formerly RobecoSAM Global SDG Equities)

Over the reporting period, Robeco Global SDG Equities generated a return of 15.1% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The in-line performance was driven by positive stock selection that was offset by a negative sector allocation effect and the lower risk profile of the Sub-fund versus the overall market, with a beta clearly below 1. Stock selection within the healthcare and consumer staples sectors contributed most positively whilst the Sub-fund's largest detractors were preliminary mega-cap stocks which are considered to have a negative or too low positive contribution to the sustainable development goals. Based on Robeco's proprietary SDG framework, the Sub-fund focuses on companies that generate a positive social/environmental impact by contributing to the achievement of the UN Sustainable Development Goals (SDGs) as defined by the United Nations ("SDGs"). The highest allocation is in companies contributing to good health & wellbeing (SDG 3), decent work and economic growth (SDG 8), industry innovation and infrastructure (SDG 9).

Report of the Board of Directors (continued)

Global Equity sub-funds (continued)

Performance analysis (continued)

Robeco Global SDG Engagement Equities (formerly RobecoSAM Global SDG Engagement Equities)

Over the reporting period, Robeco Global SDG Engagement Equities generated a return of 7.2% (gross of fees in USD), against a return of 11.3% for its reference index, the MSCI All Country World Index (net return in USD).

The underperformance of the strategy relative to the benchmark was mainly driven by allocation to and stock selection in the information technology sector. As the Sub-fund did not have exposure to some of the large benchmark names that have been driven by the artificial intelligence theme, such as Nvidia and Microsoft, the strategy had a hard time keeping up with the benchmark. In addition, adverse results from stock-picking in the rest of the sector also explained most of the underperformance. The Sub-fund had weak results from names such as STMicroelectronics, Samsung Electronics and Salesforce.com, which were the main reason for the underperformance. On the flip side, the Sub-fund did have very strong contributions from stock selection in Industrials and the Communication Services sector, but clearly not enough to offset the weak results from the Information Technology sector.

Robeco Quantum Equities

Over the reporting period, Robeco Quantum Equities generated a return of 15.1% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund performed in line with the benchmark. The reversal indicators were the primary detractors to relative performance. On the other hand, the flows, short-term momentum, short-term revisions indicator and reversal indicators contributed positively to relative performance.

Robeco Emerging Markets ex China Equities

Over the reporting period, Robeco Emerging Markets ex China Equities generated a return of 11.2% (gross of fees in EUR), against a return of 11.4% for its reference indices, the MSCI Emerging Markets ex China Index (net return in EUR) till 31st May, 2024 and then the MSCI Emerging Markets ex China 10/40 Index (net return EUR) from the 1st of June, 2024 onwards.

The Sub-fund slightly underperformed the index. The main positive contributors to the relative performance were from the underweights in Thailand and Saudi Arabia and overweight in Turkey. Negative contribution came from an overweight in Brazil, Mexico, and Indonesia and underweight in India. The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and supported by quantitative models, while ESG factors are fully integrated into the investment process. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile and through engagement the Sub-fund tries to improve the sustainability profile of the companies it invests in.

Robeco Emerging Markets Climate Transition Equities

Over the reporting period, Robeco Emerging Markets Climate Transition Equities generated a return of 0.3% (gross of fees in GBP), against a return of 0.7% for its reference index, the MSCI Emerging Markets Index (net return in GBP).

The Robeco Emerging Markets Climate Transition Equities was launched on the 24th of June 2024. The Sub-fund aims to make investments in assets that contribute to a transition. Transition pertains to activities that measurably and credibly contribute to the goals of the Paris Agreement. This is achieved by investing in companies that have credible emission reduction targets and companies that provide solutions to enable climate change mitigation. The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research with Robeco's Climate IP and supported by quantitative models, while ESG factors are fully integrated into the investment process.

Performance analysis

Robeco Asia-Pacific Equities

Over the reporting period, Robeco Asia-Pacific Equities generated a return of 13.0% (gross of fees in EUR), against a return of 11.1% for its reference index, the MSCI All Country Asia Pacific (net return in EUR).

The Sub-fund generated a strong outperformance due to positive stock selection and its overweight position in Japan and Korea. An underweight position in the highly valued India market remained a headwind as the positive election results boosted sentiment. Japan continued to rerate on the back of corporate governance reform but more importantly of strong earnings growth. Hitachi was the largest contributor on strong demand in IT and grid energy, which are essential to the decarbonization pathway. A marginal positive attribution came from a Hong Kong underweight, which had an outsized correction, as the economy was impacted by Northbound travel. The Sub-fund incorporates sustainability risks in company assessments, but the focus is on engagement and improvement rather than exclusion. A substantially lower energy intensity profile over the benchmark is maintained.

Robeco Sustainable European Stars Equities

Over the reporting period, Robeco Sustainable European Stars Equities generated a return of 9.0% (gross of fees in EUR), against a return of 9.1% for its reference index, the MSCI Europe Index (net return in EUR).

Despite a high active share of around 75%, the Sub-fund's risk was lower compared to the index. The tracking error remained at around 3%. The in-line performance was the result of positive allocation effects and offsetting negative selection. The positive allocation effect came from the overweight in information technology and underweight in consumer staples and utilities. Stock selection was most negative in information technology and consumer discretionary, while it was positive in health care and consumer staples. As the strategy seeks to have a lower environmental footprint and a better ESG risk rating (using Sustainalytics ESG Risk Score) than the benchmark, investment decisions are considering the effect of adding or exiting positions on these metrics. Consequently, the strategy's carbon, water and waste footprint is materially lower and the aggregate ESG risk rating better than that of the benchmark.

Robeco QI European Conservative Equities

Over the reporting period, Robeco QI European Conservative Equities generated a return of 7.9% (gross of fees in EUR), against a return of 9.1% for its reference index, the MSCI Europe Index (net return in EUR).

For the period, the Sub-fund underperformed the benchmark. The low-risk factor was the primary detractor from relative performance, while the momentum factor also dragged on relative returns. On the other hand, the value factor added to relative returns.

Robeco QI US Conservative Equities

Over the reporting period, Robeco QI US Conservative Equities generated a return of 8.4% (gross of fees in USD), against a return of 14.1% for its reference index, the MSCI North America Index (net return in USD).

For the period, the Sub-fund underperformed the benchmark. The low-risk factor was the primary detractor from relative performance, while the value and momentum factors also dragged on relative returns.

Robeco BP US Premium Equities

Over the reporting period, Robeco BP US Premium Equities generated a return of 4.9% (gross of fees in USD), against a return of 6.2% for its reference index, the Russell 3000 Value Index (Total Return in USD).

The Sub-fund underperformed the benchmark as continued market concentration and inflation have been headwinds. Stock selection and sector allocation both detracted from relative returns, with mixed results in both areas. Within stock selection, detraction was primarily concentrated in industrials, while financials and energy also weighed on returns. On a positive note, stock picking in information technology and communication services helped to offset this disadvantage through the beginning of the year. From a sector allocation perspective, overweight exposure to health care and consumer discretionary were the top two detractors. Having no exposure to real estate helped offset these disadvantages. With respect to sustainability investing, we qualitatively capture a range of ESG issues which directly and indirectly affect our decision making during the course of our characteristics-based investment process.

Regional & Country Equity sub-funds (continued)

Performance analysis (continued)

Robeco Chinese Equities

Over the reporting period, Robeco Chinese Equities generated a return of 4.2% (gross of fees in EUR), against a return of 6.4% for its reference index, the MSCI China 10/40 Index (net returns in EUR).

The Sub-fund underperformed the index driven by underweighting energy and financials sectors, two value sectors. Stock selection on consumer staples and materials, along with underweighting in healthcare and overweighting industrials contributed positively. The Chinese equities market had a volatile first half in 2024. The market started the year with a sell-off driven by weak macroeconomic data. The market rebounded as policymakers tried to stabilize it. Foreign capital flowed back in driven by cheap valuations and leading companies initiating buybacks and increasing dividends. The rally continued into mid-May, supported by a Q1 GDP number that reached 5.3%, and policy support for the property sector. The Sub-fund has integrated ESG in the investment process. The Sub-fund focuses on three long-term structural growth themes: consumption upgrade, technology innovation and structural reforms.

Robeco Indian Equities

Over the reporting period, Robeco Indian Equities generated a return of 19.4% (gross of fees in EUR), against a return of 20.5% for its reference index, the MSCI India Index (net return in EUR).

The Sub-fund underperformed the benchmark during the period under review, with sector allocation being the primary driver of negative attribution. Our underweight positioning in the energy and utilities sectors detracted performance. Stock selection was once again the driver of positive attribution, mainly from the consumer discretionary and industrial sectors. Apart from exclusions of weapons, tobacco and coal utility companies, the Sub-fund's ESG lens puts emphasis on companies that practice good governance, and which have articulated a coherent strategy on moving towards decarbonization.

Robeco Asian Stars Equities

Over the reporting period, Robeco Asian Stars Equities generated a return of 10.9% (gross of fees in USD), against a return of 9.7% for its reference index, the MSCI All Country Asia ex Japan (Net Return in USD).

The Sub-fund selects stocks with attractive valuation & exciting fundamentals while maintaining positive earnings and price momentum. It is a high conviction strategy with a concentrated portfolio of 42 stocks. This strategy delivered strong relative returns in the first half of 2024. Technology stocks in Asia, especially hardware, semiconductor and IT services stocks in Korea, Taiwan and Vietnam related to the AI thematic, soared with Nvidia frenzy. The 'Value Up' initiative in Korea led to corporates announcing various shareholder improvement plans, which enhanced performance of the Sub-fund. Sustainability is integrated in every investment decision and Robeco's Sustainability Investing analysts are well positioned to identify attractive investment opportunities. The Sub-fund limits investments in companies with an elevated sustainability risk profile.

Robeco Sustainable Asian Stars Equities

Over the reporting period, Robeco Sustainable Asian Stars Equities generated a return of 8.4% (gross of fees in USD), against a return of 9.5% for its reference index, the MSCI All Country Asia ex Japan (Net Return in USD).

The Sub fund invests in underappreciated and undiscovered 'best-in-class' sustainability ideas in Asia. It is a high conviction strategy with a concentrated portfolio of 40 stocks and gives exposure to six sustainability themes. The Sub-fund started the year with very strong performance but ended the first half in the negative territory. Stock selection was positive in tech-enabling thematic, where the AI related stocks in Korea, Taiwan and performed well. Stocks in smart energy theme outperformed on expectation of increasing renewable energy off-take onto the national grid in China. As timing of US rate-cuts were delayed, the Bank Indonesia raised the interest rate and sent the local stock market into capitulation, which contributed negatively to the Sub-fund's performance. The Sub-fund maintained an excellent carbon footprint ownership of 74% below benchmark. Through engagement efforts, portfolio companies are actively approached to improve their sustainability performance.

Report of the Board of Directors (continued)

Regional & Country Equity sub-funds (continued)

Performance analysis (continued)

Robeco BP US Large Cap Equities

Over the reporting period, Robeco BP US Large Cap Equities generated a return of 11.1% (gross of fees in USD), against a return of 6.6% for its reference index, the Russell 1000 Value Index (total return in USD).

The Sub-fund convincingly outperformed the benchmark in a challenging, concentrated environment highly focused on growth companies. Both stock selection and sector allocation contributed meaningfully to outperformance, with stock selection being the primary driver of returns. Within stock selection, information technology was the primary driver of outperformance by a convincing margin with IT devices and semiconductor related businesses performed strongly. Communication services and health care picks also contributed meaningfully during the period. Only two sectors detracted from a stock selection perspective, energy and industrials. Within sector allocation, the Sub-fund added the most value in energy and financials, while utilities was the only detractor of note. With respect to sustainability investing, the Sub-fund qualitatively captures a range of ESG issues which directly and indirectly affect the Sub-fund's decision making during the course of the characteristics-based investment process.

Robeco BP US Select Opportunities Equities

Over the reporting period, Robeco BP US Select Opportunities Equities generated a return of 4.5% (gross of fees in USD), against a return of 4.5% for its reference index, the Russell Mid Cap Value index (total return in USD).

The Sub-fund performed roughly in line with the benchmark driven by sector allocation with overweight exposure to industrials and underweight to communication services. Sector allocation was slightly offset by an underweight exposure to utilities, though not enough to eclipse advantages elsewhere. Sector allocation has contributed negatively so far, with primary detractors coming from industrials and financials lagging the broader market result, despite a positive return. Stock selection was strong in information technology and consumer staples, helping to offset disadvantages elsewhere. With respect to sustainability investing, the Sub-fund qualitatively captures a range of ESG issues which directly and indirectly affect the Sub-fund's decision making during the course of the characteristics-based investment process.

Robeco Chinese A-share Equities

Over the reporting period, Robeco Chinese A-share Equities generated a return of 1.6% (gross of fees in EUR), against a return of 1.5% for its reference index, the MSCI China A International Index (net returns in EUR).

The Sub-fund slightly outperformed the index. The focus on themes such as industrial upgrade, technology and innovation, in particular driven by AI and exports, contributed positively. The stock selection in consumer discretionary and materials also contributed positively. Underweighting the energy and financials sectors, two value sectors, contributed to underperformance, while stock selection in healthcare performed negatively. The China A-shares market had a volatile first half in 2024. The market started the year with a sell-off driven by weak macroeconomic data and margin calls from local funds' derivative investments. The market rebounded as policymakers tried to stabilize it and supported by a 1Q GDP number that reached 5.3%, and policy support for the property sector. ESG integration is fully incorporated in the investment process, and the Sub-fund maintained a better sustainability risk score than the reference index and earned the Febelfin label.

Robeco QI Chinese A-share Conservative Equities

Over the reporting period, Robeco QI Chinese A-share Conservative Equities generated a return of 11.8% (gross of fees in EUR), against a return of 1.5% for its reference index, the MSCI China A International Index (net returns in EUR).

For the period, the Sub-fund outperformed the benchmark. The momentum factor was the primary contributor to relative performance, while the valuation and low-risk factors also added to relative returns.

Robeco Transition Asian Equities

Over the reporting period, Robeco Transition Asian Equities generated a return of 1.0% (gross of fees in USD), against a return of 0.3% for its reference index, the MSCI All Country Asia ex Japan (Net Return in USD).

The Sub-fund, launched on June 24, 2024, is dedicated to investments that foster a holistic transitioning economy, encompassing climate change, social equity, and biodiversity conservation. It prioritizes companies that have set tangible goals for reducing emissions and those that are actively contributing to emission reduction solutions, as well as entities that support a just transition and the preservation of biodiversity. The Sub-fund's investment strategy is built on in-depth research, leveraging Robeco's proprietary Climate IP and advanced quantitative models, with a strong commitment to fully integrating ESG considerations into every stage of the investment process.

Performance analysis

Robeco New World Financials

Over the reporting period, Robeco New World Financials generated a return of 7.8% (gross of fees in EUR), against a return of 12.8% for its reference index, the MSCI All Country Financials (net return in EUR).

At the start of the year, the consensus call was for lower rates but despite that the US 10 year yield jumped from 3.9% to a high of 4.6% in April on sticky inflation. In this environment, long duration assets such as FinTech equities suffered, and the digital finance trend was a major detractor for the Sub-fund. While US rates tightened global liquidity, especially in emerging markets, the emerging finance trend had a close to neutral contribution to performance. In aging finance strong performance in Japanese life insurers and capital markets plays like Intermediate Capital, Goldman Sachs, and KKR helped but the trend still contributed negatively to the performance. Alongside the implementation of the Robeco's good governance test the Sub-fund limits investments in companies with an elevated sustainability risk profile, excluding the 10% bottom ranked companies on ESG from the investment universe. Through engagements like 'Climate Transition of Financial Institutions' the Sub-fund tries to improve the sustainability profile of the invested companies.

Robeco Sustainable Property Equities

Over the reporting period, Robeco Sustainable Property Equities generated a return of -2.1% (gross of fees in EUR), against a return of -0.5% for its reference index, the S&P Developed Property Index (Net Return in EUR).

Positive stock selection in Japan was offset by a negative contribution in Europe and North America. Transaction activity including BlackStone's takeover of Apartment Income REIT, a portfolio holding, further drove the rally in this sub-sector. Inflation and volatility in (real) interest rates combined with structural trends have driven performance differences throughout the first half of 2024. While fundamentals remain supportive for property stocks, (re-) financing costs are rising, affecting investment markets. The Sub-fund integrates ESG factors into its investment process and actively monitors and engages companies on GHG emissions. The Sub-fund has an above-average ESG score and actively steers on a carbon intensity below the benchmark average. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

Robeco Global Consumer Trends

Over the reporting period, Robeco Global Consumer Trends generated a return of 14.2% (gross of fees in euros), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

Equity markets rallied to new highs driven by a very narrow group of technology companies, as the artificial intelligence theme still has very strong momentum. Main lagging sectors are defensive sectors like healthcare and consumer staples, but also cyclical sectors like industrials and materials. The Sub-fund's performance was mostly driven by the digital transformation of consumption theme, in large part due to excitement about the future prospects for artificial intelligence applications. The slowdown in overall consumer spending is causing the health & wellbeing theme to lag the overall market, with exposure to slowing end markets like cosmetics and sporting goods. The strategy has integrated ESG factors into its investment process by adhering to our binding elements like limiting exposure to elevated risk investments, voting in line with Robeco's Proxy Voting Policy and comply with Robeco's exclusion policy.

Robeco Global Multi-Thematic (formerly Robeco MegaTrends)

Over the reporting period, Robeco Global Multi-Thematic generated a return of 14.4% (gross of fees in EUR), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

The Sub-fund slightly lagged the benchmark, but companies exposed to advancements in artificial intelligence, under the Transforming Technologies theme, were the primary contributors to performance. The preserving earth theme was flat while the changing socio-demographics theme impacted the performance negatively. Towards the end of the reporting period, the Sub-fund modified its investment policy and expanded its investment universe to include companies from all of Robeco's thematic equity strategies, consolidating resources and leveraging extensive investment experience. While the investment philosophy and objective remained unchanged, the process now incorporates a network of internal ambassadors for each theme. This enhances the portfolio management team's ability to gather diverse ideas and insights, aiding in bottom-up stock picking and risk diversification across the three themes.

Robeco Digital Innovations

Over the reporting period, Robeco Digital Innovations generated a return of 14.9% (gross of fees in EUR), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

The Sub-fund benefited from the continued strong performance of companies active in the field of artificial intelligence, primarily through its exposure in Nvidia, the largest position in the Sub-fund, and to a lesser extent TSMC and Microsoft. Cybersecurity providers Palo Alto and CyberArk also contributed positively to the performance, as did ERP leader SAP, surgical robots manufacturer Intuitive Surgical and chip testing specialist Teradyne. During the reporting period the Sub-fund started to build positions in 'new data stack' leaders MongoDB and Snowflake, which contributed negatively to performance. Performance was also negatively affected by the Sub-fund's positions in GXO Logistics, Keysight Technologies and Infineon. With respect to sustainable investing, the Sub-fund uses insights from both RobecoSAM and Sustainalytics in its investment process. The ESG risk score for the portfolio is 16.4 ("low") versus 21.5 ("medium") for the reference index

Robeco FinTech

Over the reporting period, Robeco FinTech generated a return of 2.9% (gross of fees in euros), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

In 2024, the technology companies related to the financial sector, i.e. FinTechs, have been mostly competing for investment attention with other technology companies related more to artificial intelligence. Looking at fundamentals, investments continued to deliver mid-teens revenue and earnings growth while valuation multiples have contracted to pre-2017 levels. The financial management part of the fintech investment universe delivered a strong positive performance contribution while payments, financial infrastructure and digital assets had negative contributions. Through active cooperation with SI Analysts and SDG Engagement, companies are supported to improve their sustainability profiles and corporate governance structures. The Sub-fund has a substantial weight allocated to improving financial inclusion, especially in emerging markets such as Brazil, Mexico and India. In the US and other developed markets, FinTechs also help people without bank accounts getting financial access and the Sub-fund invests in these FinTechs.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

Robeco Circular Economy (formerly RobecoSAM Circular Economy Equities)

Over the reporting period, Robeco Circular Economy generated a return of 12.3% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to the underweight to tech mega-cap names in the portfolio, which are not part of the circular economy theme. Information technology and industrials were the main positive contributors to performance. Exposure to infrastructure investments (electrical grid, water) has contributed positively. Renewables remained weak and were among the largest detractors. Cyclical pressure continued to be felt by many companies and was reflected in general weaker demand and longer sales cycles for customers.

The Sub-fund has the following sustainable investment objective: to finance solutions that support the transition from traditional production and consumption patterns toward a circular economy. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Amongst others, the Sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process

Robeco Smart Energy (formerly RobecoSAM Smart Energy Equities)

Over the reporting period, Robeco Smart Energy generated a return of 8.9% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to no exposure to tech mega-cap names in the portfolio, which are not part of the Smart Energy theme. The first half of the year has proven overall challenging for renewables, with higher-for-longer rates and fears of lower political support for clean tech across the US and Eurozone weighing on sentiment. On the other hand, grid equipment suppliers benefited from the strong electrification trend and increasing investments and an additional boost from fast-growing power demands from AI data centers. The latter also strongly boosted energy efficiency solutions for data centers in the strategy's "Big Data" sub-cluster.

The sustainable investments of the Sub-fund aim to further the transformation and decarbonization of the global energy sector. Amongst others, the Sub-fund applies norms-based and activity-based exclusions, Robeco's good governance test and considers principal adverse impacts in the investment process.

Robeco Smart Materials (formerly RobecoSAM Smart Materials Equities)

Over the reporting period, Robeco Smart Materials generated a return of 2.7% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to no exposure to tech mega-cap names in the portfolio, which are not part of the Smart Materials theme. The positive absolute performance was mostly driven by the performance of semiconductor and advanced equipment companies throughout the first half of the year. These companies benefited from the acceleration in capex spending linked to the 'Gen AI' development, coupled with the recovery of the broader semiconductor market. The most significant downturn came from transition metal names, primarily due to the continued weak lithium prices affecting producers coupled with short selling of these companies by hedge funds.

The sustainable investments of the Sub-fund aim to help mitigate the resource scarcity challenge within industries while supporting economic growth. Amongst others, the Sub-fund applies norms-based and activity-based exclusions, Robeco's good governance test and considers principal adverse impacts in the investment process.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

Robeco Smart Mobility (formerly RobecoSAM Smart Mobility Equities)

Over the reporting period, Robeco Smart Mobility generated a return of 2.1% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to the underweight to tech mega-cap names in the portfolio, which are not part of the smart mobility theme. The positive absolute performance was mostly driven by vehicle intelligence related names, with AI / ADAS related demand continuing strong. Charging infrastructure related companies also contributed positively. The battery value chain was under pressure due to the softening of EV demand from western markets impacting both lithium producers and battery manufacturers focused on Europe and US end markets.

The sustainable investments of the Sub-fund aim to support the transformation and decarbonization of the global transportation sector. Amongst others, the Fund applies norms-based and activity-based exclusions, Robeco's good governance test and considers principal adverse impacts in the investment process.

Robeco Sustainable Healthy Living (formerly RobecoSAM Sustainable Healthy Living Equities)

Over the reporting period, Robeco Sustainable Healthy Living generated a return of 6.6% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to no exposure to tech mega-cap names in the portfolio and the general low exposure to the strong performing IT sector, both of which are not part of the sustainable healthy living theme. The positive absolute performance was mostly driven by personal care retailers, with mixed performance as they saw quite a strong start to the year and retreated slightly in the second quarter. On the healthcare side, medical tool companies benefited from better orders in what is still a post-Covid normalization; pharmaceutical companies held in the Sub-fund generally performed well with the exception of one key holding due to company specific issues.

The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Amongst others, the Fund applies norms-based and activity-based exclusions, Robeco's good governance test and considers principal adverse impacts in the investment process.

Robeco Sustainable Water (formerly RobecoSAM Sustainable Water Equities)

Over the reporting period, Robeco Sustainable Water generated a return of 6.9% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to no exposure to tech mega-cap names in the portfolio and the general low exposure to the strong performing IT sector, both of which are not part of the sustainable water theme. The positive absolute performance by water treatment companies and water infrastructure related companies also performed well. Other construction-related companies were weaker though still positive but suffered from the postponement of interest rate cuts. Water analytics companies saw a slight recovery after the expected post-pandemic overstocking stabilization.

The sustainable investments of the Sub-fund aim to help mitigate the global challenges related to scarcity, quality, and allocation of water. Amongst others, the Sub-fund applies norms-based and activity-based exclusions, Robeco's good governance test and considers principal adverse impacts in the investment process.

Performance analysis (continued)

Robeco Global Gender Equality (formerly RobecoSAM Global Gender Equality Equities)

Over the reporting period, Robeco Global Gender Equality generated a return of 16.8% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

Overall absolute and relative performance was driven by strong stock selection amongst companies with favourable gender scores, especially companies in information technology, pharmaceuticals and banking sectors with strong DE&I characteristics. AI stocks have been the main driver led by Nvidia's triple-digit rally. The strong performance posted by other IT names like semiconductor and software companies have shown that the performance is broader based and not only owing to a single company position. Under-allocation to autos, energy, real estate, and utilities companies also positively contributed to relative return.

The Sub-fund selects leading gender equality companies which focus not only on board-level diversity, but also items including senior and junior management diversity, overall workforce equality, talent retention, and ensuring gender pay equality. The Sub-fund also has a lower environmental footprint versus the MSCI World Index.

Robeco Next Digital Billion

Over the reporting period, Robeco Next Digital Billion generated a return of 7.7% (gross of fees in USD), against a return of 7.5% for its reference index, the MSCI Emerging Markets Index (net return in USD).

In the wake of a global AI frenzy, emerging markets were mostly driven by a huge rally in semiconductor stocks which are part of the broader AI supply chain. Although the fund holds positions in SK Hynix (+57%) and Mediatek (+34%), it is not the natural hunting ground for the next digital billion fund, and hence the underexposure detracted. The Sub-fund's preference for digital transformation plays contributed negatively too, as Globant, EPAM and Endava retraced last year's gains. Consumer stocks like Zomato (+62%) and Meituan (+36%) helped, just like Platform companies Sea (+77%), Prosus (+20%) and Reliance (+21%). The Sub-fund moreover was able to sell off its Russian stock exposure in accordance with rules and regulations. The portfolio has a better sustainability score compared to the reference index and limits investments in companies with an elevated sustainability risk profile.

Robeco Biodiversity Equities (formerly RobecoSAM Biodiversity Equities)

Over the reporting period, Robeco Biodiversity Equities generated a return of 5.9% (gross of fees in EUR), against a return of 15.2% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to no exposure to tech mega-cap names in the portfolio and the general low exposure to the strong performing IT sector, both of which are not part of the biodiversity theme. Exposure to global consumer names has proven fruitful as pricing power and reduced input price inflation fuelled margin expansion and share prices. Engineering names with strong links to environmental projects have also performed well. In June, exposure to several French companies hurt performance following the surprise early election announcement and ensuing volatility.

The sustainable investments of the Sub-fund aim to support the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce Biodiversity threats or restore natural habitats. Amongst others, the fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers principal adverse impacts in the investment process.

Robeco Net Zero 2050 Climate Equities (formerly RobecoSAM Net Zero 2050 Climate Equities)

Over the reporting period, RobecoSAM Net Zero 2050 Climate Equities generated a return of 17.1% (gross of fees in EUR), against a return of 18.1% for its reference index, the MSCI World Climate Change Index (Net Return in EUR).

Positive contributions to the relative return of the portfolio came from strong stock-selection in the consumer staples, industrials and materials sectors, while negative contributions came from stock-selection in the information technology, consumer discretionary and healthcare sectors. The main theme was the strong performance from stocks related to the infrastructure buildout around Artificial Intelligence such as Nvidia and Schneider Electric. Performance was negatively impacted by the underweight positions in large benchmark constituents such as Amazon and Meta Platforms, which performed well. Good contribution came from holdings in healthy food retailer Sprouts Farmers Market, chip maker Nvidia and consultancy firm Tetra Tech. Performance detractors included software play Aspen Technology, wind turbine maker Vestas and chip maker Power Integrations. In terms carbon footprint, the portfolio remains at least 30% below the overall market, decarbonizes by 7% p.a. and is aligned with the pathway to net zero by 2050.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

Robeco Fashion Engagement (formerly Robeco Fashion Engagement Equities)

Over the reporting period, Robeco Fashion Engagement generated a return of 3.2% (gross of fees in EUR), against a return of 14.7% for its reference index, the MSCI All Country World Index (net return in EUR).

The Sub-fund's absolute performance was positive, but underperformed the benchmark due to no exposure to tech mega-cap names in the portfolio, and the general low exposure to the strong performing IT sector, both of which are not part of the fashion engagement theme. The positive absolute performance was mostly driven by luxury and premium brands, along with sportswear companies, which performed well during the first half of the reporting period. The last months have posed challenges to the fashion industry, whereby governments' discouragement of wealth display is not helpful for luxury's growth momentum, support for local brands is challenging the growth of western sportswear companies, and increased competition from domestic cosmetics brands is raising concerns for multinational companies with substantial exposure to China. The Sub-fund's team completed 20 engagements with investee companies, bringing the total number of engagement calls since the Sub-fund's launch to 44.

The Sub-fund promotes structural changes in the fashion industry by engaging with companies on the industry's sustainability challenges. The companies are selected by showing potential and intention to address the industry's sustainability challenges and driving systemic change for the fashion industry.

Robeco Gravis Digital Infrastructure Income

Over the reporting period, Robeco Gravis Digital Infrastructure Income generated a return of -0.5% (gross of fees in EUR), against a return of 1.7% for its reference index, the S&P Developed Property Index (net return in EUR).

Analysing the performance in more detail reveals that logistics, incorporating both e-commerce fulfilment centres and urban logistics warehouses, was the best performing infrastructure type delivering a positive performance during the period. The second best performing next generation infrastructure types were data centres, followed by cell towers. However, they both delivered slightly negative performance. Within the logistics subsector, there was a strong contribution from Catena in Sweden, driven by strong long-term demand trends for logistics facilities. Within data centres NEXTDC, an Australian data centre owner and operator, saw a strong performance after it raised AU\$1.3bn (approximately €790mn) from existing investors via a share issue which the fund participated in. NEXTDC intends to use the proceeds to fund its expansion plans. During the period, a new position was initiated in Cordiant Digital Infrastructure, an owner and operator of digital infrastructure assets in the US, the EEA and the UK. Cordiant invests in the critical infrastructure of the modern internet through five portfolio companies holding a diversified asset mix including data centres, mobile & broadcast towers and fibre-optic networks. The Sub-fund incorporates sustainability risks in company assessments, but the focus is on engagement and improvement rather than exclusion. The portfolio has a better Sustainalytics score compared to the reference index and limits investments in companies with an elevated sustainability risk profile.

Performance analysis

Robeco High Yield Bonds

Over the reporting period, Robeco High Yield Bonds generated a return of 1.7% (gross of fees hedged into EUR), against a return of 1.8% for its reference index, the Bloomberg US Corp. HY & Pan Eur. HY. ex Fin. 2.5% Issuer Cap (hedged into EUR).

As US economic data continued to exceed expectations, markets have increasingly priced in a soft landing. A constructive economic environment for high yield. The positive total return of high yield was fully attributable to spread compression as treasury yields increased since the beginning of the year. The underweight position in CCC contributed to the performance as this category underperformed the broader market. This was offset by underperformance due to negative performance of some individual issuers.

With respect to sustainable investing, the Sub-fund has integrated ESG factors into the investment process. The prime goal of integrating ESG factors into the analysis is to strengthen the ability to assess the downside risk of the credit investments.

Robeco Global Credits

Over the reporting period, Robeco Global Credits generated a return of 0.1% gross of fees (EUR hedged), against a return of -0.5% for the Bloomberg Global Aggregate Corporate Index (EUR hedged).

Negative total returns from the index were driven by a meaningful move higher in underlying government bond yields, overwhelming positive excess returns from credit where spreads tightened by 11bps. Credit spreads tightened as previous fears over recession abated and higher 'all in' yields spurred significant demand for the asset class. The Sub-fund's top down positioning contributed to performance, with a beta slightly above the benchmark benefiting as spreads tightened. However, the bulk of outperformance was driven by issuer selection. Overweights within subordinated financials and a preference for EUR denominated credit over the USD market benefited performance, as did underweights to certain underperforming names such as Boeing. The Sub-fund also invests in subordinated green, social and sustainability bonds, the exposure in the portfolio is circa 7.9%.

Report of the Board of Directors (continued)

Global Bond sub-funds (continued)

Performance analysis (continued)

Robeco QI Dynamic High Yield

Over the reporting period, Robeco QI Dynamic High Yield generated a return of 2.9% (gross of fees hedged into EUR), against a return of 2.5% for its index, the Bloomberg Global High Yield Corporate (hedged into EUR).

The Sub-fund held an overweight credit beta position from January to April, which contributed positively to the performance. The overweight in Europe and underweight in the US that was held from January to mid-February contributed negatively, while the overweight in the US and underweight in Europe from April to June contributed positively. The duration overweight also delivered a positive contribution. The 0.4% outperformance is explained by a positive contribution of 1.2% from the model-based active positions, and a -0.8% negative contribution from high yield CDS indices underperforming high yield bonds. In the long run, no structural return differences between credit default swap (“CDS”) indices and bonds are expected. Given the type of instruments used to implement the investment strategy, ESG integration does not play a role in the investment strategy. The Sub-fund provides liquid exposure to high yield through CDS indices on top of a portfolio of government bonds. The position in CDS indices is based on a quantitative model: the position is increased to at most 150% when the model is positive and vice versa reduced to at most 50% when negative. The duration of the portfolio can be increased or decreased by at most 1 year based on a quantitative model.

Robeco QI Global Multi-Factor Credits

Over the reporting period, Robeco QI Global Multi-Factor Credits generated a return of -0.2% (gross, euro-hedged), compared to the return of -0.5% of its index, the Bloomberg Global Aggregate Corporates index (euro-hedged).

Issue(r) selection delivered a strong positive contribution and beta allocation contributed neutrally. The value factor delivered the largest positive contribution, followed by smaller positive contributions from the size and momentum factors. The low-risk/quality factor contributed negatively, driven by the defensive company selection. Sector allocation contributed negatively, mainly due to the overweight in the technology sector and the underweight in the banking sector in the first quarter. Currency allocation had a small positive contribution, primarily due to the overweight in EUR denominated paper. Country allocation delivered a positive contribution, primarily, due to the overweights in Germany and Italy. The allocation to subordination groups contributed negatively, due to the underweight in senior financials and the overweight in senior corporates. Rating allocation delivered a positive contribution, mostly due to the off-benchmark position in BBs. SDG score allocation delivered a small positive contribution. ESG Risk Rating allocation contributed neutrally. The portfolio construction ensures that the portfolio’s Sustainability ESG Risk Rating is better than the index, that the portfolio’s carbon emission, water consumption, and waste disposal footprints are lower than the index, and that the portfolio invests more market value weight in names with positive SDG scores than the index.

Robeco QI Global Multi-Factor Bonds

Over the reporting period, Robeco QI Global Multi-Factor Bonds generated a return of 0.0% (gross of fees in EUR), against a return of -0.6% for its reference index, the Bloomberg Global Aggregate Index (Net Return hedged into EUR).

The systematic duration overlay and the factor-based government bond selection contributed most to the relative performance. Duration underweights contributed mainly in February and April. Within government bond selection the low-risk factor added most. The factor-based credit selection made a small positive contribution as well, mainly thanks to the value factor.

The Sub-fund offers balanced exposure to the value, momentum, low-risk, quality and size factors. The bottom-up selection of bonds aims to systematically harvest factor premiums with a risk profile similar to the index and with the weighted average ESG scores and CO2 emissions of the government bonds and the credits in portfolio better than the index. The Sub-fund incorporates an active duration overlay, which is fully driven by the outcomes of the manager’s quantitative duration model.

Robeco Global Credits - Short Maturity

Over the reporting period, Robeco Global Credits - Short Maturity generated a return of 1.3% (gross of fees, hedged into EUR), against a return of 1.0% for its reference index, the Bloomberg Global Aggregate Corporate 1-5 years index (hedged into EUR).

Beta positioning of the Sub-fund has been a positive driver of outperformance in the first half of 2024. The beta had been above 1 and credit spreads tightened. Issuer selection also had a positive contribution with positions Barclays, Athora and Adani Green Energy among the top performers. The position in Thames Water was the biggest negative contributor over the reporting period.

ESG factors are considered when assessing the fundamental credit quality of individual issuers. The Sub-fund also invests in green bonds, the exposure in the portfolio was around 7%.

Report of the Board of Directors (continued)

Global Bond sub-funds (continued)

Performance analysis (continued)

Robeco Corporate Hybrid Bonds

Over the reporting period, Robeco Corporate Hybrid Bonds delivered a return of 3.8% (gross of fees in EUR), against a return of 3.2% for the Bloomberg Global Corporate Hybrids (3% issuer cap) index.

The Sub-fund's total return was largely attributed to a decrease in credit spreads, offsetting an increase in underlying treasury yields. The outperformance was primarily due to strong issuer selection and effective beta management. The Sub-fund maintained a beta position above one for most of the period, except at the start of the year. Positive contributions to performance came from several overweight positions in specific issuers. Additionally, the Sub-fund's off-benchmark positions in subordinated financials and senior investment-grade credit contributed to the Sub-fund's outperformance. ESG factors were considered in evaluating the fundamental credit quality of individual issuers.

Robeco QI Global Multi-Factor High Yield

Over the reporting period, Robeco QI Multi-Factor High Yield generated a return of 2.1% (gross, euro-hedged), compared to the return of 2.2% of its index, the Bloomberg Global High Yield Corporates ex-Financials index (euro-hedged).

The value, size and momentum factors delivered large positive contributions. The low-risk/quality factor contributed negatively. Sector allocation delivered a positive contribution, mainly due to the underweight in the communications sector and the overweight in the industrial other sector. Currency allocation contributed neutrally; the overweight in CAD denominated paper delivered a small positive contribution, while the overweight in GBP bonds contributed somewhat negatively. Country allocation contributed negatively, mostly due to the underweight in EM; the underweight in France delivered a large positive contribution. The allocation to subordination groups contributed positively, due to the overweight in corporate hybrids. Rating allocation delivered a large positive contribution, due to the underweight in CAAs and the overweight in BAs. Beta allocation contributed neutrally: the beta position of the bond portfolio contributed negatively, but this was exactly offset by an equally large positive contribution from the CDS index beta hedge. SDG score and ESG Risk Rating allocations both contributed negatively. The portfolio construction ensures that the portfolio's Sustainalytics ESG Risk Rating is better than the index, that the portfolio's carbon emission, water consumption, and waste disposal footprints are lower than the index, and that the portfolio invests more market value weight in names with positive SDG scores than the index.

Robeco SDG Credit Income (formerly RobecoSAM SDG Credit Income)

Over the reporting period, Robeco SDG Credit Income generated a return of 2.2% (gross of fees hedged into USD).

The Sub-fund is managed on a total return basis and not versus an index. There was a strong positive contribution from spread returns in the first half of 2024. For a large part of the first half of 2024 duration exposure was around 5 years, which contributed negatively to performance as government bonds yields increased. The Sub-fund benefited from the position in deeply subordinated financial Contingent Convertible ("CoCo") bonds and other exposures in the banking sector as these performed strongly. Contributors were positions in banks like Deutsche Bank, Barclays, and Santander. Also, in industrials there were several names with a strong positive contribution, example are First Quantum and Braskem. For a large part of the first half of 2024 duration exposure was around 5 years, which contributed negatively to performance as government bonds yields increased. The sub-fund focusses on issuers that are contributing positively to the SDGs. The Sub-fund is invested in several companies in the Indian renewable energy sector, which have a strong contribution to SDG 7 (Clean and Affordable Energy). All portfolio companies have good governance practices.

Robeco Global SDG Credits (formerly RobecoSAM Global SDG Credits)

Over the reporting period, Robeco Global SDG Credits generated a return of 0.2% gross of fees (EUR hedged) against a return of -0.5% for the Bloomberg Global Aggregate Corporate Index (EUR hedged).

For the period the Sub-fund underperformed the benchmark. Negative total returns from the index were driven by a meaningful move higher in underlying government bond yields, overwhelming positive excess returns from credit where spreads tightened by 11bps. Credit spreads tightened as previous fears over recession abated and higher 'all in' yields spurred significant demand for the asset class. The Sub-fund's top down positioning contributed to performance, with a beta slightly above the benchmark benefiting as spreads tightened. However, the bulk of outperformance was driven by issuer selection. Overweights within subordinated financials and a preference for EUR denominated credit over the USD market benefited performance, as did underweights to certain underperforming names such as Boeing. The Sub-fund is not allowed to invest in SDG negative issuers from for example the energy, alcohol and unhealthy food. In the investment process, the Sub-fund focusses on issuers that are contributing positively to the SDGs. That means that companies that contribute negatively to one or more SDG's, are excluded from the portfolio. The Sub-fund also invests in subordinated green, social and sustainability bonds, the exposure in the portfolio is circa 13.9%.

Report of the Board of Directors (continued)

Global Bond sub-funds (continued)

Performance analysis (continued)

Robeco SDG High Yield Bonds (formerly RobecoSAM SDG High Yield Bond)

Over the reporting period, RobecoSAM SDG High Yield Bonds generated a return of 2.3% (gross of fees hedged into EUR), against a return of 2.5% for its reference index, the Bloomberg Global High Yield Corporate Index (hedged into EUR).

As US economic data continued to exceed expectations, markets have increasingly priced in a soft landing. A constructive economic environment for high yield. The positive total return of high yield was fully attributable to spread compression as treasury yields increased since the beginning of the year. The underweight position in CCC contributed to the performance as this category underperformed the broader market. This was offset by underperformance due to negative performance of some individual issuers.

With respect to sustainable investing in the investment process, the sub-fund focusses on issuers that are contributing positively to the SDGs. That means that companies that contribute negatively to one or more SDG's, like tobacco companies, certain mining companies and coal powered utilities, are excluded from the portfolio.

Robeco Global Green Bonds (formerly RobecoSAM Global Green Bonds)

Over the reporting period, Robeco Global Green Bonds generated return of -1.9% (gross of fees hedged into EUR), versus -1.1% for its index, the Bloomberg MSCI Global Green Bond index (hedged into EUR).

The negative return of the sub-fund can be attributed to rising bond yields globally. Duration and yield curve positioning subtracted from relative performance as the sub-fund was positioned for lower yields and steeper curves. The opposite happened as many developed economies, especially the US, proved to be more resilient than expected, while inflation is only gradually moving towards target. Credit issuer selection and overweight beta positioning contributed positively to the performance. The risk in financial and non-financial corporates was kept unchanged for most of the year. Most of the beta performance was made in the first quarter and issuer selection in the second quarter of the year. The overweight banking, electric utilities and technology positions all contributed positively. Notably, senior banking credits added to the performance. Over the first 6 months of 2024 global green bond issuance amounted to USD 375bn (source: Bloomberg NEF) which is about the same as over the first 6 months of 2023 (USD 385bn).

Robeco Climate Global Credits (formerly RobecoSAM Climate Global Credits)

Over the reporting period, Robeco Climate Global Credits posted a return of 0.3% (gross of fees, hedged into USD), compared to -0.1% for the Solactive Paris Aligned Global Corporate Index (hedged into USD).

The outperformance of the sub-fund was mainly driven by bottom-up credit selection. However, the top-down beta policy also contributed positively. The Sub-fund's risk position was slightly above benchmark level. With credit spreads slowly grinding tighter, this overweight beta position paid off. Issuer selection overall made a significant positive contribution, driven by positions in both the financial and non-financial sector. Several overweights in the banking sector outperformed the market, as did certain holdings in the telecommunications and utility sector. Positions in the cable and media sectors contributed negatively, as these overweights underperformed the market. Overall, the net result from issuer selection was clearly positive. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. The average carbon intensity of the fund was below that of its Paris Aligned benchmark throughout the period. The Sub-fund also invests in green, social and sustainability bonds, with exposure around 15% at period-end.

Robeco Climate Global Bonds (formerly RobecoSAM Climate Global Bonds)

Over the reporting period, Robeco Climate Global Bonds generated a return of -2.5% (gross of fees hedged into EUR), against a return of -1.0% for its reference index, the Solactive Paris Aware Global Corporate Index (hedged into EUR).

Main drivers of the underperformance were the overweight duration and yield curve positions. Central banks did not deliver the rate cuts that were priced in at the end of last year as the economy turned out to be much more resilient next to the disinflation process stalling as underlying inflation actually increased a bit during the first quarter of this year. The Sub-fund achieved its sustainable investment objective by having a lower (better) carbon intensity not only versus a broad market index but also versus its sustainable reference index. Furthermore, the Sub-fund met its carbon reduction target by having less exposure to the worst polluting countries and corporates whilst having an overweight in aggregate to issuers which are outperforming based on their carbon intensities. The Sub-fund also invests in green, social, and sustainable bonds, with exposure around 17.8% at period-end.

Report of the Board of Directors (continued)

Global Bond sub-funds (continued)

Performance analysis (continued)

Robeco Transition Emerging Credits (formerly Robeco Sustainable Emerging Credits)

Over the reporting period, Robeco Transition Emerging Credits generated a return of 3.5% (gross of fees in USD), against a return of 3.8% for its reference index, the JPM CEMBI Broad Diversified Index (Net Return in USD).

Returns were dominated by credit spread tightening. Spreads moved lower and especially Emerging Europe credit performed well, followed by Latin America and Asia. The Sub-fund started the year with a credit beta close to one, and further reduced exposure marginally over the reporting period on tight valuations. As credit spreads continued to tighten top-down positioning contributed negatively to the relative performance. Issuer selection had a small positive contribution to performance, with key contributors being Braskem, New World Development and First Quantum Minerals. Detractors were Adani Green and BBVA Bancomer SA. The investment process is focused on selecting companies that enable emerging market corporates to transition towards a more sustainable future and as a result, the Sub-fund is predominately invested in sustainable corporates or those that contribute as climate solution providers or transition leaders. The Sub-fund also invests in green, social, sustainability and/ or sustainability-linked bonds with exposure around 28% at period-end.

Robeco High Income Green Bonds

Over the reporting period and since the launch of the sub-fund on 25 June 2024, Robeco High Income Green bonds posted a return of -0.3% (gross of fees, hedged into EUR). The negative return mainly reflects the trading cost of the Sub-fund's ramping.

Regional Bond sub-funds (continued)

Performance analysis

Robeco Euro Government Bonds

Over the reporting period, Robeco Euro Government Bonds generated a return of -2.5% (gross of fees in euro) versus -2.0% for its benchmark, the Bloomberg Euro Aggregate Treasury index.

The negative return of the Sub-fund can be attributed to rising bond yields globally. Duration and yield curve positioning subtracted from relative performance as the Sub-fund was positioned for lower yields and steeper curves. The opposite happened as many developed economies, especially the US, proved to be more resilient than expected, while inflation is only gradually moving towards target. On balance, country allocations and allocations to SSA paper added to performance. Notably, a significant reduction to French OAT exposure just before the European elections, benefitted performance as the OAT-Bund spread widened sharply after the elections. The Sub-fund remained overweight inflation linked bonds. In January, Greece was included in the benchmark of the sub-fund, following its upgrade to a BBB rating. The sub-fund participated in green bond issuance from both government and government related issuers. ESG factors are considered when assessing the fundamental credit quality of individual issuers. At the end of June around 24% of the sub-fund is invested in green, social and sustainable bonds.

Robeco Euro Credit Bonds

Over the reporting period, Robeco Euro Credit Bonds generated a return of 1.0% (gross of fees in EUR), against a return of 0.5% for its reference index, the Bloomberg Euro Aggregate: Corporates (in EUR).

The outperformance of the Sub-fund was mostly driven by issuer selection, while the top-down beta positioning contributed positively too. The Sub-fund's top-down positioning has been fairly conservative in the first six months of 2024, with the beta ranging from 1.0 to 1.1. This means that the Sub-fund only benefitted to a limited extent from the spread tightening that was visible in this period. Factors that played a role in the positive contribution from issuer selection were the overweight in Banking and Covered Bonds, the underweight French issuers and in longer-maturity bonds and the overweight in BB-rated bonds. The Sub-fund also invests in green, social and sustainability bonds, the exposure in the portfolio is circa 17.8%.

Robeco All Strategy Euro Bonds

Over the reporting period, Robeco All Strategy Euro Bonds generated a return of -2.5%, against a return of -1.2% for the reference index, the Bloomberg Euro Aggregate Index.

Duration and yield curve positioning contributed negatively to relative performance as the Sub-fund was positioned for lower yields and steeper curves. The opposite happened as many developed economies, especially the US, proved to be more resilient than expected, while inflation is only gradually moving towards target. Several central banks started cutting policy rates in the second quarter of the year; the Swiss SNB, the Swedish Riksbank, the Canadian BoC, and finally the ECB, which lowered its policy rate by 25bps to 3.75% at its June meeting. The yield curve is expected to steepen significantly in the second half of the year, driven by expectations of further rate cuts. Credit allocation, credit selection and country allocation all contributed to performance, while allocation to emerging markets subtracted slightly. ESG factors are considered when assessing the fundamental credit quality of individual issuers. At the end of June around 23% of the Sub-fund is invested in green, social and sustainability bonds.

Robeco European High Yield Bonds

Over the reporting period, Robeco European High Yield Bonds generated a return of 2.1% (gross of fees hedged into EUR), against a return of 2.2% for its reference index, the Bloomberg Pan-Eur. HY Corp. ex Fin. 2.5% Issuer Cap (hedged into EUR).

As US economic data continued to exceed expectations, markets have increasingly priced in a soft landing. A constructive economic environment also for European for high yield. The positive total return of high yield was fully attributable to spread compression as treasury yields increased since the beginning of the year. The underweight position in CCC contributed to the performance as this category underperformed the broader market. This was offset by underperformance due to negative performance of some individual issuers.

With respect to sustainable investing, the Sub-fund has integrated ESG factors into the investment process. The prime goal of integrating ESG factors into the analysis is to strengthen the ability to assess the downside risk of the credit investments.

Report of the Board of Directors (continued)

Regional Bond sub-funds (continued)

Performance analysis (continued)

Robeco Transition Asian Bonds (formerly Robeco Sustainable Asian Bonds)

Over the reporting period, Robeco Transition Asian Bonds generated a return of 2.8% (gross of fees in USD), against a return of 2.8% for its reference index, the JP Morgan Asia Credit Index (Net Return in USD).

The Sub-fund's performance was driven by both country allocation and issuer selection and a small contribution from Beta positioning. Within country allocation, the underweights to China and Pakistan contributed negatively. The overweight of Hong Kong, India, Indonesia, and Korea added to the performance. Exposure to sovereign bonds from Indonesia and the Philippines also contributed to performance. Within India, the overweight to renewable energy and telecoms benefitted the performance due to the strong macro environment in India. The investment process is focused on selecting companies that enable Asia to transition towards a more sustainable future and as a result, the Sub-fund is predominately invested in sustainable corporates or those that contribute as climate solution providers or transition leaders. The Sub-fund structurally underweights the Macau gaming sector, which scores negatively on the SDGs, which only marginally contributed negatively. At the end of June, 35.6% of the Sub-fund is invested in green, social, sustainability and/ or sustainability-linked bonds, with Asian renewable energy issuers having the largest share.

Robeco Euro SDG Credits (formerly RobecoSAM Euro SDG Credits)

Over the reporting period, Robeco Euro SDG Credits generated a return of 0.9% (gross of fees in EUR), against a return of 0.5% for its reference index, the Bloomberg Euro Aggregate Corporate (in EUR).

The outperformance of the Sub-fund was mostly driven by issuer selection, while the top-down beta positioning contributed positively too. The Sub-fund's top-down positioning has been fairly conservative in the first 6 months of 2024, with the beta ranging from 1.0 to 1.1. This means that the Sub-fund only benefitted to a limited extent from the spread tightening that was visible in this period. Factors that played a role in the positive contribution from issuer selection were the overweight in banking, the underweight in longer-maturity bonds and the overweight in BB-rated bonds. In the investment process, the Sub-fund focusses on issuers that contribute positively to the SDGs. That means that companies that contribute negatively to one or more SDG's are excluded from the portfolio. The allocation effect of this SDG investment policy was neutral in the first half of 2024. The Sub-fund also invests in green, social and sustainability bonds, the exposure in the portfolio is circa 22.5%.

Robeco Financial Institutions Bonds

Over the reporting period, Robeco Financial Institutions Bonds generated a return of 3.3% (gross of fees in EUR), against a return of 2.6% for its reference index, the Bloomberg Euro Aggregate: Corporates Financials Subordinated 2% Issuer Cap (in EUR).

The outperformance of the Sub-fund was mainly driven by the top-down beta positioning. The Sub-fund started the year with a beta overweight position of circa 1.2. This overweight has been gradually reduced to a level of circa 1.1 at the end of June, to reflect for credit spreads that have tightened throughout the first 6 months of the year. To reduce the beta position, the position in CoCos was lowered from circa 14.5% to 12.3%. Issuer selection also showed a positive contribution in the first half of 2024. The off-benchmark position in senior bank bonds in the Sub-fund contributed positively, as did the underweight position in French issuers. On an individual name basis, the overweights in Athora and Raiffeisen Bank and the underweights in Société Générale and Generali contributed most. The underweight position in real estate hybrids contributed negatively. ESG factors are considered when assessing the fundamental credit quality of individual issuers. The Sub-fund also invests in subordinated green, social and sustainability bonds, the exposure in the portfolio is circa 10.5%.

Robeco Investment Grade Corporate Bonds

Over the reporting period, Robeco Investment Grade Corporate Bonds generated a return of 0.4% (gross of fees in EUR), against a return of -0.0% for the Bloomberg Euro Corporate ex Financials 2% issuer cap index (in EUR).

The outperformance was primarily driven by a decrease in credit spreads, even as underlying treasury yields rose. Strong issuer selection and effective beta management were key contributors, with the Sub-fund maintaining a beta position above one throughout the period. Several overweight positions in specific issuers positively impacted performance. Many of these single-name investments were compression trades, where lower-rated issuers outperformed on a risk-adjusted basis. Additionally, an overweight position in corporate hybrids for most of the period contributed positively to the Sub-fund's performance. ESG factors are integral to assessing the fundamental credit quality of individual issuers, and the sub-fund also invests in green, social and sustainability bonds, which comprised around 13% of the portfolio at the end of the period.

Report of the Board of Directors (continued)

Regional Bond sub-funds (continued)

Performance analysis (continued)

Robeco US Green Bonds (formerly RobecoSAM US Green Bonds)

Over the reporting period, Robeco US Green Bonds generated return of -0.8% (Gross, in USD), versus 0.3% (In USD) for its index, the Bloomberg MSCI US Green Bond index.

The negative return of the Sub-fund can be attributed to rising bond yields globally. Duration and yield curve positioning subtracted from relative performance as the sub-fund was positioned for lower yields and steeper curves. The opposite happened as many developed economies, especially the US, proved to be more resilient than expected, while inflation is only gradually moving towards target. Throughout the volatile credit markets, top-down credit beta positioning was close to one or below one. The overall beta contribution had a small negative contribution for the year, as credit spreads rallied. This was more than offset by issuer selection. Financials and electric utility added the most outperformance. Whereas the underweight in REITS and other financials (quasi Real estate) cost performance. Over the first 6 months of 2024 US denominated green bond issuance amounted to USD 73 bn (source: Bloomberg NEF) which was somewhat below the level seen during the first 6 months of 2023 (USD 82 bn).

Robeco Euro SDG Short Duration Bonds

Over the reporting period and since the launch of the Sub-fund on 21 May 2024, Robeco Euro SDG Short Duration Bonds posted a return of 0.5% (gross of fees, in EUR), compared to 0.5% for the Bloomberg Euro-Aggregate 500MM 1-3 years Index.

Performance analysis

Robeco Sustainable Diversified Allocation

Over the reporting period, Robeco Sustainable Diversified Allocation generated a return of 3.1% (gross of fees in EUR), against a return of 3.0% for its reference index, 50% MSCI ACWI (in EUR) and 50% Bloomberg Global Aggregate (hedged to EUR).

At a headline level, the decision to take more risk in equities as opposed to credit played out well. However, stock selection within equities was mixed. The fundamental Equity segment delivered strong outperformance in the first half of 2024. It was supported by a slight quality bias and an overweight in mega cap tech stocks. However, the Impact equity segment endured a tough ride. These stocks have a small/mid cap growth bias and this unloved part of the market trades at a near-record valuation discount principally due to concerns around rates remaining higher for longer. The overweight in emerging market equities was a drag on performance over the first three months of the year, but encouragingly bounced back strongly in the second quarter. In fixed income, the credit allocation contributed positively to overall returns. Sector-wise, the credit allocation benefited from exposures in banking, insurance, and basic industry sectors. Within alternatives, the tactical overweight in commodities worked well as it was funded by the underweight in credit. On March 8, 2024, this Sub-fund was launched. On same date Robeco Multi Asset Sustainable, a former sub-fund of Robeco All Strategies Fund, merged into the Sub-fund.

Report of the Board of Directors (continued)

Sustainable Investing

All Robeco's investment activities comply with the Principles for Responsible Investing (PRI). Responsibility for implementing Sustainable investing lies with Robeco's CIO Fixed Income and Sustainability, who has a seat on Robeco's Executive Committee.

Fulfilling the responsibilities in the field of stewardship forms an integral part of Robeco's approach to Sustainable investing. Robeco publishes its own stewardship policy on the website. This policy describes how Robeco deals with possible conflicts of interest, how the companies in which the sub-funds invest are monitored, how the activities in the field of engagement and voting are conducted, and how the stewardship activities are reported.

Constructive and effective activities under active ownership encourage companies to improve their management of risks and opportunities in the field of ESG which in turn establish a better competitive position and improve profitability and moreover have a positive impact on the community. Active ownership involves voting and engagement. Robeco exercises its voting rights for the shares in its investment funds all over the world. Robeco uses this engagement to address strategic ESG issues that might affect value creation in the long term.

Robeco has research available from leading sustainability experts, including own proprietary research from the sustainable investing research team. This dedicated Sustainable Investing research team works together very closely with the investment teams to provide them with in-depth sustainability information. The investment analysis focuses on the most material ESG factors and the connection with the financial performance of a company. Robeco can then focus on the most relevant information in performing the investment-analysis and can reach enhanced investment decisions.

To help customers contribute to their sustainable investment objectives, Robeco has developed a methodology that analyses the contribution of investee companies to the Sustainable Development Goals (SDGs) and has developed SDG investment solutions. Furthermore, Robeco contributes to the SDGs by integrating ESG factors in its decision-making process for investments and encourages companies to act in support of these goals by means of a constructive dialogue.

Robeco's climate change policy is focused on integrating climate issues in investments when financially material and engaging with companies. Furthermore Climate risks for our funds are assessed and monitored by Robeco's financial risk management department.

Robeco pursues an exclusion policy for companies that are involved in the production of or trade in controversial weapons such as cluster munitions and anti-personnel mines, for tobacco companies and for companies that seriously and habitually violate either the United Nations Global Compact (UNGC) or the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. Robeco applies strict criteria for this last category and if a dialogue fails, the company can be excluded. Robeco publishes its exclusion policy and the list of exclusions on its website.

The SFDR classifications of the Robeco Capital Growth sub-funds are shown in the table below. More information is available in the precontractual and periodical SFDR disclosures of the fund on our website.

Sub-fund	SFDR Classification

Notes to the financial statements as at 30 June 2024

1. General

The Company was incorporated on 2 May 1997 for an undetermined period of time as an open ended investment company based in Luxembourg, issuing and redeeming its shares on demand at prices based on the respective net asset value per share. Its Articles of Incorporation were published in the 'Memorial, Recueil des Societes et Associations' of the Grand Duchy of Luxembourg (the 'Memorial') on 6 June 1997. The Articles of Incorporation were last amended and became effective as per 1 January 2022. Robeco Capital Growth Funds is a 'Societe d'Investissement a Capital Variable' (SICAV) pursuant to the law of 10 August 1915, as amended, on commercial companies and to part I of the law of 17 December 2010, on undertakings for collective investment of the Grand Duchy of Luxembourg.

The Company takes the form of an umbrella fund. It is made up of several sub-funds each representing an investment portfolio and other assets and liabilities corresponding to a different investment policy. Each sub-fund is therefore represented by different types of shares with one or more classes of shares. The Board of Directors has the authority to issue different categories of shares within each of the sub-funds. The Directors of the Company may at any time establish new sub-funds and/or may decide upon the issue of class A, AH, D, D2, D2H, D3H, DCo, DHCo, DH, DHL, DL, F, F2, F2H, FCo, FHC, FH, FHL, FL, I, ICo, IHCo, IH, IHI, IHL, IL, IM, IMH, J, K, KH, M, M2, M2H, MH, ML, P, S, SEH, SH, X, XH, XG, XGH, Y, YH, Z, ZH, Z2, Z2H, 0D, 0DH, 0F, 0MH, 0FH, 0I, 0IH, 2F, 2FH, 2I, 2IH and IHHi shares (accumulating classes) and class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IEx, IExH, KE, M2, M3, M3H, MB, MBx, MBxH, SE, SEH, YE, YEH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0EH, 0IEH, 2C, 2CH, 2E and 2EH shares (distributing classes) in existing or new sub-funds.

The reference currency of the classes of shares may be the Euro (EUR), the US Dollar (USD), the British Pound (GBP), the Swiss Franc (CHF), the Japanese Yen (JPY), the Canadian Dollar (CAD), the Chinese Yuan (CNH), the Mexican Peso (MXN), the Hong Kong Dollar (HKD), the Singapore Dollar (SGD), the Swedish Krona (SEK), the Norwegian Krone (NOK), the Australian Dollar (AUD), the South African Rand (ZAR) and the Brazilian Real (BRL).

Legal entity

The Company as a whole constitutes a single legal entity, however the assets of any one sub-fund will only be available to satisfy the rights of investors in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of the sub-fund. For the purpose of the relations as between shareholders, each sub-fund is deemed to be a separate entity.

Dividend policy

The general policy regarding the appropriation of net income and capital gains is as follows:

Class D, D2, D2H, DCo, DH, DHCo, DL, F, F2, F2H, FCo, FH, FHC, FL, I, ICo, IH, IHCo, IHI, IL, J, K, KH, M, M2, M2H, MH, ML, P, S, SH, X, XH, Y, YH, Z, Z2, Z2H, ZH, 0D, 0DH, 0F, 0FH, 0I, 0IH, 0MH, 2F and 2I shares (accumulating).

Income is reinvested and added to the relevant sub-funds and contributes to a further increase in value of the total net assets.

Class B, BH, Bx, BxH, C, CH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IExH, KE, M3, M3H, MBxH, SE, SEH, YE, YEH, ZB, ZBH, 0BxH, 0CH, 0D3H, 0E, 0EH, 0IEH, 2C and 2E shares (distributing).

After the end of the reporting period, the Company can recommend what distribution shall be made from the net investment income and net capital gains attributable to the Class B, BH, Bx, BxH, C, CH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IExH, KE, M3, M3H, MBxH, SE, SEH, YE, YEH, ZB, ZBH, 0BxH, 0CH, 0D3H, 0E, 0EH, 0IEH, 2C and 2E shares.

The annual general meeting of shareholders will determine the dividend payment. The Board of Directors of the Company may decide to distribute interim dividends, in accordance with Luxembourg law.

General remarks

As provided by the 2010 law, the Company may decide to distribute dividends with no other limit than the obligation that any such dividend distribution does not reduce the net asset value of the Company below the legal minimum amount. Similarly, the Company may distribute interim dividends and may decide to pay dividends in shares. If dividends are distributed, payments of cash dividends to registered shareholders will be made in the currency of the relevant share class to such shareholders at the addresses they have given to the Registrar Agent. Dividend announcements (including names of paying agents) and all other financial notices concerning Robeco Capital Growth Funds shall be published on www.robeco.com/riam and published in those newspapers as the Board of Directors shall determine from time to time. Dividends not collected within five years will lapse and accrue for the benefit of the Company in accordance with Luxembourg law.

Open-ended fund

Robeco Capital Growth Funds is an open-ended investment Company, meaning that, barring exceptional circumstances, Robeco Capital Growth Funds issues and purchases its shares on a daily basis at net asset value prices per share. The Company reserves the right to refuse any subscription request at any time.

Notes to the financial statements as at 30 June 2024 (continued)

1. General (continued)

Swing pricing

Shares are issued and redeemed on the basis of the net asset value per share. However, the actual costs of purchasing or selling assets and investments for a sub-fund may deviate from the latest available prices, as appropriate, when calculating the net asset value per share. This deviation can be caused by duties and charges, and spread from buying and selling prices of the underlying investments ('spreads'). These costs have an adverse effect on the value of a sub-fund and its underlying share classes, and are known as dilution. To mitigate the effects of dilution, the company may, at its discretion, make a dilution adjustment to the net asset value per share on any valuation day. The company will retain the discretion in relation to the circumstances under which to make such a dilution adjustment. At the end of the reporting period, no swing adjustments were made.

The dilution adjustment will involve adding to (when the sub-fund is in a net subscription position) and deducting from (when the sub-fund is in a net redemption position) the net asset value per share, such figure as the Company considers representing an appropriate figure to meet the cash flow costs. The resultant amount will be the price rounded to such number of decimal places as the Company deems appropriate. The dilution adjustments may vary depending on the order type (net subscription or net redemption), on the underlying asset classes for any sub-fund or on the market conditions. The dilution adjustments as well as the dealing levels from which they become applicable may be amended from time to time depending on market conditions or any other situation where the Company is of the opinion that the interests of the shareholders require such amendment(s).

For any given valuation day, the swing factor adjustment is limited to a maximum of 2% of what the net asset value would otherwise be. In exceptional circumstances, the Board of Directors may, in the best interest of its shareholders, decide to temporarily increase the swing factor above the maximum-stated level. Such exceptional circumstances can be triggered by (but not limited to) high market volatility, disruption of markets or slowdown of the economy caused by terrorist attack or war (or other hostilities), serious pandemic or a natural disaster (such as a hurricane or a super typhoon).

Additional details on the anti-dilution/swing pricing adjustments and actual swing factors can be found on www.robeco.com/riam.

To avoid doubt, shareholders holding shares in the same share class will be treated in an identical manner.

Pooling and co-management

For the purpose of efficient management and to reduce administrative costs and if the investment policies of the sub-funds allow such, the Board of Directors may decide to co-manage some or all of the assets of certain sub-funds with assets of other Luxembourg UCIs of the Robeco Group (co-managed units). In this case, the assets from different co-managed units will be jointly managed using the pooling technique. Assets that are co-managed will be referred to using the term 'pool'. Such pools will only be used for the purposes of internal management. They will not constitute distinct legal entities and will not be directly accessible to investors. Each co-managed unit will have its own assets allocated to it. During the reporting period no pooling or co-management took place.

Affiliated parties

The Directors of the Company have appointed the affiliated entity Robeco Institutional Asset Management B.V. ("RIAM" or the "Management Company"), responsible on a day-to-day basis, under supervision of the Directors of the Company, to provide administration, marketing, portfolio management and investment advisory services in respect of all sub-funds. The Management Company may, from time to time, carry out its portfolio management activities through one or more of its European branches, which will in such case not be fully in charge of the day-to-day management of the relevant sub-fund.

The Management Company has delegated the administration, registrar and transfer functions to J.P. Morgan S.E, Luxembourg branch. The various sub-funds and share-classes will incur an annual management fee which reflects all expenses related to Company management, which is payable to the Management Company. The Directors of the Company are also Directors of Robeco QI Global Dynamic Duration, Robeco Global Total Return Bond Fund, Robeco All Strategies Funds, Robeco (LU) Funds III and Robeco Institutional Solutions Funds and Managers of RSSLF GP S.à r.l, which is in its turn general partner of Robeco Sustainable Senior Loan Feeder Fund SCA SICAV-RAIF and Robeco Sustainable Senior Loan Fund SCSp.

The delegated portfolio managers, Boston Partners Global Investors Inc., Robeco Hong Kong Ltd, Robeco Schweiz AG and Robeco Singapore Private Ltd are affiliated entities. The delegated portfolio managers are charged with the day-to-day management of the assets and receive a fee for that service.

Robeco Capital Growth Funds is affiliated with the entities belonging to ORIX Corporation Europe N.V. The affiliation with ORIX Corporation Europe N.V. is the result of the possibility of having decisive control or a substantial influence on the Company's business policy. ORIX Corporation Europe N.V. is part of ORIX Corporation. The management structure of ORIX Corporation Europe N.V. is such that ORIX Corporation does not have any meaningful say in or influence on the Company's business policy. ORIX Corporation Europe N.V. pursues an independent investment policy on behalf of its affiliated investment companies, taking into account the interest of the investors involved. Besides services of other market parties, Robeco Capital Growth Funds may also utilize the services of one or more of these affiliated entities including transactions relating to securities, treasury, derivatives, securities lending, and subscriptions and redemptions of its own shares, as well as management activities. Transactions are executed at market rates.

Notes to the financial statements as at 30 June 2024 (continued)

1. General (continued)

Financial instruments

Risks

Transactions in financial instruments may lead the sub-funds to be subject to the risks described below or to the sub-funds transferring these risks to another party.

General investment risk

The value of the investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the sub-funds is affected by developments in the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested or even worth nothing. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the net asset value per share. General investment risk can be broken down into market risk, concentration risk, currency risk and counterparty risk.

Market risk

The net asset value of the sub-funds is sensitive to market movements. In addition, investors should be aware of the possibility that value of investments may vary as a result of changes in political, economic or market circumstances. Therefore, no assurance can be given that the sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in a sub-fund will not fall below its value at the time of acquisition.

Concentration risk

Based on its investment policies, each sub-fund may invest in financial instruments from issuing institutions that (mainly) operate within the same sector, region, or market. If this is the case, the concentration of sub-fund's investment portfolio may cause events that have an effect on these issuing institutions to have a greater effect on the sub-fund's assets than would occur with a less concentrated investment portfolio.

Currency risk

All or part of the securities portfolio of the Sub-funds may be invested in transferable securities, money market instruments, UCITS or other UCIs and other eligible financial instruments denominated in currencies other than the Base currency of the Sub-fund. As a result, fluctuations in the exchange rate may have both a negative and a positive effect on the investment result of the Sub-funds. As part of an active currency policy, exposure to currencies may be hedged but Investors should note that there is no guarantee that the exposure of the currency in which the Shares are invested can be fully or effectively hedged against the base currency of the relevant Sub-fund. Investors should also note that the implementation of an active currency policy may, in certain circumstances, substantially reduce the benefit to Shareholders in the relevant class of Shares (for instance, if the base currency depreciates against the currency of the instrument in which the relevant Sub-fund is invested) and could thereby result in a decrease in the value of their shareholding.

Inflation risk

As a result of inflation (reduction in value of money), the actual investment income of each Sub-fund may be eroded.

Counterparty risk

A counterparty of a sub-fund may fail to fulfil its obligations towards that sub-fund. In case of hedging transactions in classes of shares, the relevant sub-fund carries the counterparty risk. This risk is limited as much as possible by taking every possible care in the selection of counterparties. Wherever it is customary in the market, the sub-funds will demand and obtain collateral. The sub-funds minimize this risk by trading exclusively with reputable counterparties with a minimum rating of A in the Standard & Poor's or other recognized credit rating agencies lists. The positions that each sub-fund takes in terms of interest-rate swaps and credit default (index) swaps (where possible) are centrally cleared at a clearing house. This means that the sub-fund has a single central counter party (CCP) for derivative instruments with which the required collateral (margin) is exchanged on a daily basis. To hedge the initial required collateral (initial margin) and for the variable required collateral (variation margin), the sub-funds use cash.

Risk of lending financial instruments

In the case of financial instrument lending transactions, the Company and its respective sub-funds concerned run the risk that the borrower cannot comply with its obligation to return the financial instruments on the agreed date or furnish the requested collateral. The lending policy of the Company is designed to control these risks as much as possible.

The credit worthiness of counterparties in securities-lending transactions is assessed on the basis of how independent rating agencies rank their short-term credit worthiness and on the basis of their net assets. Guarantees given by parent companies are also taken into account.

Notes to the financial statements as at 30 June 2024 (continued)

1. General (continued)

Financial instruments (continued)

Risks (continued)

Risk of lending financial instruments (continued)

The Fund only accepts collateral from OECD countries in the form of:

- Government bonds with a minimum credit rating of BBB;
- The bonds of supranational bodies with a minimum credit rating of BBB-;
- Stocks listed on the main indexes of stock markets in OECD countries; and to a limited extent in the form of
- Index trackers;
- Stocks issued by financial institutions;
- Cash

As of balance-sheet date, the Fund had received collateral ensuing from securities-lending transactions. More information can be found on page 157.

Liquidity risk

The actual buying and selling prices of financial instruments in which the sub-funds invest partly depend upon the liquidity of the financial instruments in question. It is possible that a position taken on behalf of a sub-fund cannot be quickly liquidated at a reasonable price due to a lack of liquidity in the market in terms of supply and demand. The sub-funds minimize this risk by mainly investing in financial instruments that are tradable on a daily basis.

Euro currency risk

All or part of the assets of the sub-funds may be invested in securities denominated in Euro. In the event of any adjustments, including a full break-up, an exit of individual countries or other circumstances that may result in the emergence or reintroduction of national currencies, each sub-fund runs the risks that the value of its investments is reduced and/or the liquidity of its investments is (temporarily) reduced, regardless of the measures the Company may seek to reduce this risk.

Sustainability risk

RIAM systematically incorporates sustainability factors, to the extent these present a material risk to a sub-fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability Risk Policy, which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability Risk Policy is built on three pillars. The environmental or social characteristics promoted by a sub-fund or sustainable investment objective of a sub-fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a sub-fund.

Operational risk

The operational risk is the non inherent risk remaining after determining the risks as detailed afore (general investment risk, counterparty risk, liquidity risk, Euro currency risk or risk of lending financial instruments). It mainly includes risks resulting from breakdowns in internal procedures, people and systems.

Insight into actual risks

The report of the Board of Directors, the Combined Statement of Net Assets, the Notes to the Financial Statements and the Schedule of Investments, which include currency classification of the investments, give an insight into the actual risks at the end of the reporting period.

Risk management

Managing risk is a part of the investment process as a whole and with the help of advanced systems, the risks outlined above are limited, measured and monitored on the basis of fixed risk measures.

Policy regarding the use of derivatives

Investing implies that positions are taken. As it is possible to use various instruments, including derivative instruments, to construct an identical position, the selection of derivatives is subordinate to the positioning of an investment portfolio. In the published information, attention is given primarily to the overall position, and secondarily to the nature and volume of the financial instruments employed.

Derivative instruments

The unrealized results of derivative instruments are reported in the Combined Statement of Net Assets. Commitments to derivatives are not included in the Combined Statement of Net Assets. They are, however, explained in the Schedule of Investments. The unrealized results presented in the Combined Statement of Net Assets are disclosed by contract in the Schedule of Investments.

The derivative instruments listed in the Notes are transacted through third party brokers. Those brokers hold/paid collateral as described on page 154 to 156. The Company is exposed to counterparty risk in respect of all amounts including collateral due to it from such brokers.

Notes to the financial statements as at 30 June 2024 (continued)

2. Summary of significant accounting policies

General

Unless stated otherwise, the items shown in the financial statements are included at their nominal value and expressed in the reference currency of the sub-fund. This semi-annual report covers the reporting period from 1 January 2024 until 30 June 2024.

Preparation and presentation of financial statements

The financial statements are prepared on the basis of the last net asset value calculated during the year (28 June 2024 for all sub-funds) and presented in accordance with Luxembourg generally accepted accounting principles for investment funds. The going concern basis was applied for the preparation of the financial statements of the Fund and its sub-funds, except for the Sub-fund Robeco QI Multi Factor Absolute Return, that was liquidated on 04 April 2024.

Combined figures

The combined figures are expressed in Euro and are presented for information purpose only. The combined figures are the sum of the statements of each sub-funds. The Combined Statement of Net Assets is presented in EUR at the exchange rates prevailing at the end of the reporting period, while the Combined Statement of Operations and Changes in Net Assets is presented in EUR at the average exchange rates during the year. Cross sub-funds investments (where one sub-fund invested within sub-fund of the Company) are not eliminated from the combined statement.

Foreign currencies

Transactions in currencies other than the reference currency of the relevant sub-fund are converted into the reference currency at the exchange rates prevailing at the time of the transaction. The market value of the investments, assets and liabilities expressed in currencies other than the reference currency of the sub-fund are converted into the sub-fund's reference currency at the exchange rates prevailing at the end of the reporting period. Any positive or negative exchange differences arising are accounted for in the Combined Statement of Operations and Changes in Net Assets. The table on page 223 shows the exchange rates as at 28 June 2024.

Valuation of investments

Transferable securities, money market instruments and financial derivative instruments listed on an official stock exchange listing

These instruments are valued at their last available market price. In the event that there should be several such markets, the instruments will be valued on the basis of the last available price of the main market for the relevant security or asset. Should the last available market price for a given transferable security, money market instrument or financial derivative instrument not truly reflect its fair market value, then that transferable security, money market instrument or financial derivative instrument is valued on the basis of the probable sales price which the Board of Directors deems prudent to assume. Fixed income securities not traded on such markets are generally valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors or any other price deemed appropriate by the Board of Directors. According to the valuation policy which is approved by the Fund Board, a fair value adjustment will be made to reflect the current market values for securities traded in markets with a different timezone (mainly Asia Pacific) where new market information surfaces after the close of the local market but before the calculation of the net asset value.

Transferable securities and/or money market instruments dealt in on another regulated market

These instruments are valued on the basis of their last available market price. Should the last available market price for a given transferable security and/or money market instrument not truly reflect its fair market value, then that transferable security and/or money market instrument is valued by the Board of Directors on the basis of the probable sales price which the Board of Directors deems prudent to assume.

Transferable securities and/or money market instruments not listed or dealt in on any stock exchange or on any regulated market

In the event that any assets are not listed or dealt in on any stock exchange or on any regulated market, or if the above valuation methods are inappropriate or misleading, with respect to assets listed or dealt in on any stock exchange, or on any regulated market as aforesaid, where the above valuation methods are inappropriate or misleading, the Board of Directors may adopt any other appropriate valuation principles for the assets of the Company.

Investment transactions and investment income

Securities are initially recorded at cost, and where applicable on the basis of exchange rates prevailing on the date they are purchased. Results on sales of securities are determined on the basis of the average cost method (for future first-in-first-out method). Investment transactions are accounted for on the trade date. Dividends are accounted for on the ex-dividend date. Interest income is recorded on an accrual basis. Discounts/premiums on zero-coupon bonds are accreted as adjustments to interest income. Interest and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

Valuation of Russian Investments as at financial year-end:

As at 30 June 2024, the securities issued by Russian companies are valued at 'nil' in the schedules of investments of the respective sub-funds exposed to such securities. This nil value may not reflect the intrinsic value of those companies but rather reflect the fact that those securities are not tradable as of 30 June 2024.

Notes to the financial statements as at 30 June 2024 (continued)

3. Open forward exchange transactions

Open forward exchange transactions are valued with market practice valuation models using forwards rates based on exchange and interest rates applicable at 28 June 2024. The unrealized results of these transactions have been recorded gross in the Combined Statement of Net Assets under the heading 'Unrealized gain/loss on forward currency exchange contracts' and changes in unrealized results are recorded in the Combined Statement of Operations and Changes in Net Assets under the heading 'Net change in unrealized appreciation/(depreciation) on forward currency exchange contracts'.

The contracts outstanding as at 28 June 2024 are disclosed in the Schedule of Investments. Information on the collateral received or paid on these positions is stated in the table on pages 154 to 156. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

4. Interest rate swaps

Interest rate swaps are valued with market practice valuation models using exchange and interest rates applicable at 30 June 2024. The unrealized gains/losses on interest rate swaps are recorded gross in the Combined Statement of Net Assets under the heading 'Swap contracts at fair value' and changes in unrealized results are recorded in the Combined Statement of Operations and Changes in Net Assets under the heading 'Net change in unrealized appreciation/(depreciation) on swaps contracts'. The contracts outstanding as at 30 June 2024 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 154 to 156. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

5. Credit default swaps

Credit default swaps are valued at fair value under procedures approved by the Board of Directors. The valuation is based on market practice valuations models using observable market inputs. The unrealized gains/losses on credit default swaps are recorded gross in the Combined Statement of Net Assets under the heading 'Swap contracts at fair value' and changes in unrealized results are recorded in the Combined Statement of Operations and Changes in Net Assets under the heading 'Net change in unrealized appreciation/(depreciation) on Swaps contracts'. The contracts outstanding as at 30 June 2024 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 154 to 156. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

6. Financial futures contracts

Regulated futures contracts are valued at their exchange quoted settlement price. Initial margin deposits are made upon entering into futures contracts. Variation margin payments are made or received, depending on the daily fluctuation in market value of the contract and are recorded by the fund as unrealized appreciation or depreciation. When the contract is closed, the Company records a realized gain or loss equal to difference between the value of the contract at the time it was opened and the value at the time it was closed. All margin deposits are included in the Combined Statement of Net Assets under the heading 'Cash at bank and at brokers'.

Changes in unrealized results and realized results during the year are both recorded in the Combined Statement of Operations and Changes in Net Assets. The contracts outstanding as at 30 June 2024 are disclosed in the Schedule of Investments.

Notes to the financial statements as at 30 June 2024 (continued)

7. Collateral

Several sub-funds received or paid collateral to cover the unrealized results on derivative instruments. Collaterals are calculated and settled on a daily basis per counterparty. The collateral is primarily cash held at the broker in the name of the sub-fund. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'. No cash collateral has been reinvested. The amounts per sub-fund and counterparty are shown in the table below.

8. Schedule of Investments

The Schedule of Investments of the sub-funds are included at the end of this report.

Notes to the financial statements as at 30 June 2024 (continued)

9. Securities lending

J.P. Morgan SE, Luxembourg Branch is a lending agent for all Robeco Capital Growth Funds securities lending transactions. J.P. Morgan SE, Luxembourg Branch is authorized to retain a fee in an amount equal to (A) 25% of the income from securities-lending transactions for any loans which generate a return of 0.5% or less and (B) 10% of the income from securities-lending transactions for any loans which generate a return greater than 0.5% of the sum of (i) earnings derived from authorized investments (as adjusted for any rebate paid or received by J.P. Morgan SE, Luxembourg Branch) (ii) any fee, paid or payable by the borrower with respect to loans (including any loan fee but excluding any compensation payable by borrower under the Master Securities Lending Agreement "MSLA" in connection with a loan (net, however, of any other amount payable by a lender in connection with such loan).

Gains and losses on cash collateral investments shall not be taken into account in calculating earnings for the purpose of J.P. Morgan's fees. The following table shows the position of the collateralized securities lending transactions with first-class financial institutions as described in the prospectus at the end of the reporting period, as well as the income from securities lending over the reporting period for the Company and the income for J.P. Morgan SE, Luxembourg Branch. Income on securities-lending transactions is recorded under the heading 'Securities lending income' in the statement of operations and changes in net assets. Collateral received in the frame of the lending activity, primarily securities, is held in the name of the Fund on an escrow account with external agents. In exceptional cases, the collateral is received in cash, which is not subject to reinvestment. More information on collateral received can be found on pages 855 and further.

10. Taxes

The classes of shares of the sub-funds are liable in Luxembourg to an annual duty (“taxe d’abonnement”/“subscription tax”) at the rate of 0.05% of their net assets calculated and payable at the end of each quarter. This rate is 0.01% per annum for institutional classes of shares such as class D, DCo, DH, DHC0, F, FH, FCo, FHCo, I, IB, IBH, IBxH, ICo, IH, IHC0, OIH, 2IH, IE, IEH, OIEH, IHHi, IL, IExH, IMH, IMBxH, IBx, J, K, KE, KH, M, X, XH, Y, YH, Z2H, ZB, ZBH, and ZH shares. To the extent that the assets of the sub-funds are invested in investment funds which are established in Luxembourg, no such tax is payable, provided that the relevant investment funds have been subject to this tax. The sub-funds will receive income from their investments after deduction of applicable withholding taxes in the country of origin. There are no taxes regarding Luxembourg income, withholding, capital gains, estate or inheritance taxes that are payable by the sub-funds.

Taxation of Chinese A shares:

Capital gains derived from the transfer of Chinese A shares on or after 17 November 2014 are (temporarily) exempt from the 10% capital withholding tax (‘CWT’).

Taxation Indian listed stocks

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 15% Indian capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long-term gains) were exempt until 1 April 2018. Starting April 1st 2018 India also introduced a capital gains tax on long-term gains at a rate of 10%. The capital gains taxes are taken into account on an arisen basis at the applicable rates for a short term gain or a long term gain without taking a provision into account. Since 17 December 2019, the capital gains taxes are accrued in the net asset value and included in the statement of net assets under the heading ‘Other liabilities’ and included in the statement of operations and changes in net assets under ‘Net realized gain/(loss) on currency exchange’ for the capital gain taxes linked to realized gains and under ‘Net Change in unrealized appreciation/depreciation on: currency exchange’ for the unrealized appreciation of investments during the year.

11. Management Company

The Board of Directors of the Company has appointed Robeco Institutional Asset Management B.V. as the Management Company to be responsible on a day-to-day basis for providing administration, marketing and investment management services in respect of the sub-funds.

Robeco Institutional Asset Management (“RIAM”) is incorporated under the laws of the Netherlands on 21 May 1974 and at that time called Rotrusco B.V. On 25 February 1997, the name was changed into RIAM. RIAM holds an AIFMD license as referred to in Section 2:65 Wft. In addition, RIAM is licensed as a manager of UCITS (2:69b Wft, the Dutch Financial Supervision Act). RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (Stichting Autoriteit Financiële Markten, “AFM”).

The Management Company has delegated the administration functions and registrar agent functions to J.P. Morgan SE, Luxembourg branch.

RIAM is part of ORIX Corporation Europe N.V. and also acts as the Management Company for other Luxembourg and Dutch domiciled funds.

12. Portfolio Manager

RIAM an investment management company forming part of the Robeco Group in Rotterdam, the Netherlands, manages the assets of the sub-funds on a day-to-day basis. The Portfolio Management Agreement between the Management Company and RIAM was concluded on 1 June 2019 for an undetermined period.

The Management Company Adviser has appointed Boston Partners Global Investors Inc. as its Sub Delegated Portfolio Manager for the sub-funds Robeco BP Global Premium Equities, Robeco BP US Premium Equities, Robeco BP US Large Cap Equities and Robeco BP US Select Opportunities Equities.

The Sub Delegated Portfolio Manager for the sub-funds Robeco Asia-Pacific Equities, Robeco Chinese Equities, Robeco Indian Equities, Robeco Asian Stars Equities, Robeco Sustainable Asian Stars Equities and Robeco Chinese A-Share Equities is Robeco Hong Kong Ltd.

The Sub Delegated Portfolio Manager for the sub-funds Robeco Sustainable European Stars Equities, RobecoSAM Circular Economy Equities, RobecoSAM Smart Energy Equities, RobecoSAM Smart Materials Equities, RobecoSAM Smart Mobility Equities, RobecoSAM Sustainable Healthy Living Equities, RobecoSAM Sustainable Water Equities, RobecoSAM Global Gender Equality Equities and RobecoSAM Biodiversity Equities is Robeco Schweiz AG.

The Portfolio Manager for Robeco Sustainable Asian Bonds is Robeco Singapore Private Ltd.

Notes to the financial statements as at 30 June 2024 (continued)

13. Cross investment between sub-funds

The Company is permitted to engage in cross investment between sub-funds within the umbrella structure. In case there are management fees or service fees charged on the cross investments, these fees are returned to the investor sub-fund. The following information pertains to the cross investment between sub-funds within the Company as of 30 June 2024:

Investment	Sub-fund Currency	Market Value	% of net assets
Robeco QI Global Conservative Equities			
Robeco QI Chinese A-share Conservative Equities - Z EUR		5,646,866	1.45
	EUR	5,646,866	1.45
Robeco Chinese Equities			
Robeco Chinese A-Share Equities - I EUR		340,638	0.28
	EUR	340,638	0.28
Robeco High Yield Bonds			
Robeco European High Yield Bonds - ZH EUR		162,950,440	2.54
	EUR	162,950,440	2.54
Robeco Global Credits			
Robeco Global Credits - Short Maturity - Z EUR		60,187,272	2.07
Robeco Transition Emerging Credits - Z USD		114,410,042	3.93
	EUR	174,597,315	6.00
Robeco Sustainable Diversified Allocation			
Robeco Sustainable Global Stars Equities - Z EUR		7,100,461	5.34
Robeco QI Emerging Markets Sustainable Active Equities - Z EUR		1,597,403	1.20
Robeco Sustainable Emerging Stars Equities - I EUR		1,523,571	1.15
RobecoSAM Circular Economy Equities - Z EUR		19	-
	EUR	10,221,454	7.69

If the sub-funds invest in UCITS/UCI's that are not part of the Robeco Group, all costs at the level of these UCITS/UCI's (including the non recoverable management fees, service fees, performance fees and/or transactions costs) shall be borne by the sub-funds ultimately and therefore by the shareholders. The management fee and service fee paid in the Robeco funds is restituted to the sub-funds and recorded in the Statement of operations and changes in net assets. During the year, the cross investments between the sub-funds mainly occurred in share-class Z of Robeco sub-fund which does not pay any management fees.

Notes to the financial statements as at 30 June 2024 (continued)

14. Management, service and performance fees

The different sub-funds or classes of shares incur an annual management fee payable to the Management Company, which reflects expenses¹ related to the management of the sub-funds. Furthermore the different sub-funds or classes of shares incur an annual service fee payable to the Management Company reflecting expenses¹ such as the fees of the administration agent, the registrar agent, auditors and legal advisers, the costs of custody (including custody fees and bank charges), the costs of depositary services, the costs of preparing, printing and distributing all prospectuses, memorandums, reports and other necessary documents concerning the Company, any fees and expenses involved in the registration of the Company with any governmental agency and stock exchange, the costs of publishing prices and operational expenses, and the cost of holding shareholders' meetings.

¹ Additional expenses maybe charged to the Fund on an exceptional basis as disclosed in the prospectus.

The annual charges, both management fee and service fee, are expressed as a percentage of the net asset value. The charges, paid quarterly, are based on the net asset value of the relevant period and are reflected in the share price.

The share classes Z do not pay management fees. For some sub-funds the Management Company is entitled to a performance fee, payable annually in arrears after the end of the reporting period. A performance fee for the relevant class of shares of the sub-fund is only due at the end of the financial year when the relevant class of shares of the sub-fund outperforms the relevant index or hurdle rate as indicated in the prospectus. Note that an outperformance of the relevant class of shares of the sub-fund does not imply a positive return of the relevant class of sub-fund's shares. A performance fee is also due when the relevant class of sub-fund's shares has a negative return but an outperformance over the relevant index or hurdle rate as indicated in the prospectus. This outperformance must have taken place since inception of the relevant class of share of the sub-fund's or since the time that a performance fee was due. In the event that payment of the performance fee is due, the basis for the performance fee calculation for the next financial year will start at 0 (reset). In the event that no payment of the performance fee is due no reset will take place. In addition, if a shareholder redeems or switches all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallize on that Valuation Day and will then become payable to the Management Company. The basis for the performance fee calculation will not reset on those valuation days at which performance fees crystallize following the redemption or switch of shares.

The following table shows the maximum percentages for the different outstanding classes of shares on an annual basis.

	Sub Fund currency	Performance fee	Percentage of average net assets

If the net asset value per share class exceeds EUR 1 billion the service fee will be reduced by 0.02% for the portion above 1 billion. If the net asset value per share class value exceeds EUR 5 billion, the service fee will be reduced by a further 0.02% for the portion above EUR 5 billion.

15. Depositary fees

The Depositary bank is remunerated in accordance with the agreement between J.P. Morgan SE, Luxembourg Branch (acting as the depositary) and the Company. The depositary fees are paid by RIAM out of the service fee.

16. Other operating expenses

The banking fees relating to the assets of the sub-funds or expenses incurred thereof, such as proxy voting are paid by RIAM out of the service fee. The costs of establishing the Company have been paid entirely. If additional sub-funds are created in the future, these sub-funds will bear, in principle, their own formation expenses.

Notes to the financial statements as at 30 June 2024 (continued)

17. Transaction costs

The sub-funds and their classes of shares pay directly commissions, brokerage fees and taxes resulting from financial transactions. Transaction costs are included in the purchase/sale price of the securities.

18. Total Expense Ratio (TER)

The Total Expense Ratio ('TER') expresses the operational costs (e.g. management fee, service fee, performance fee, taxe d'abonnement and bank charges) charged to the sub-funds as a percentage of the average assets entrusted, calculated on a daily basis, during the reporting period. The TER as shown below do not include transaction costs. The other costs concern mainly bank charges, depositary fees and taxe d'abonnement. Total Expense Ratio are annualized for periods less than one year.

The total expense ratio (TER) was calculated based on the version currently applicable of the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Asset Management Association Switzerland (AMAS).

19. Broker commission

Robeco will ensure that the selection of counterparties for trade execution (“Brokers”) will take place according to defined procedures and criteria to ensure best execution, taking into account execution capability and - where applicable - quality of investment research (“Research”).

Under the influence of the MIFID II regulation RIAM decided to bear the research costs for most of the sub-funds of Robeco Capital Growth Funds from 2018. Only for the funds for which the American based asset manager Boston Partners is the Sub Delegated Portfolio Manager, the research costs are charged to the fund. The below text on research costs is only applicable to the sub-funds in the table below.

Brokers may charge execution only fees (excluding a fee for Research) and brokers may also charge a transaction fee consisting of two elements: a fee for the execution of an order and a fee for Research. Robeco will only pay a fee for Research if such Research is directly instrumental for improving the investment decision-making process within Robeco (via full service fees and via Commission Sharing Agreements (“CSA”). Having CSAs enables Robeco to unbundle Research and execution services to fulfill best execution criteria. By using CSAs, the Fund can obtain research services from those providers who do not have an execution business or do not fit the Fund’s best execution criteria. It is Robeco’s policy that the abovementioned arrangements are only allowed as long as the research services under consideration research, securities advice, etc.) are related to the enhancement of our investment process. Robeco makes use of:

1. Execution-only fees for quantitatively managed equity sub-funds;
2. Full services fees for fundamentally managed equity sub-funds; and
3. CSAs for fundamentally managed equity sub-funds.

Research costs paid

Sub-Fund	Sub-Fund Currency	Total research costs paid
Robeco BP Global Premium Equities	EUR	xxx ,xxx
Robeco BP US Premium Equities	USD	xxx,xxx
Robeco BP US Large Cap Equities	USD	xxx,xxx
Robeco BP US Select Opportunities Equities	USD	xxx,xxx

20. Portfolio Turnover Ratio (PTR)

This is the turnover ratio of the investments, against the average assets entrusted and this is a measure of the incurred transaction costs resulting from the investment portfolio policies pursued and the ensuing investment transactions. In the employed calculation method, the amount of turnover is determined by the sum of purchases and sales of investments, excluding derivative and liquidity instruments, less the sum of issuance and repurchase of own shares, divided by the daily average of the net assets. The portfolio turnover ratio is determined by expressing the amount of turnover as a percentage of the average assets entrusted. The following table shows the portfolio turnover ratios of the sub-funds.

Sub-Fund Name	Portfolio turnover ratio (%)
Robeco BP Global Premium Equities	51.93
Robeco QI Global Conservative Equities	6.33
Robeco Sustainable Global Stars Equities	62.66
Robeco Emerging Stars Equities	(35.14)

Savings directive information

The bond sub-funds of the Company are subject to the EU savings directive.

Stock exchange listing

All the Robeco Capital Growth Funds share-classes D and DH, the IExH of Robeco High Yield Bonds, the B EUR of Robeco QI Emerging Conservative Equities, the IH USD of Robeco Financial Institutions Bonds, the Z EUR of Robeco QI Chinese A-Share uities, the D2 USD of Robeco Global Consumer Trends and the F EUR of Robeco Mega Trends are listed on the Luxembourg Stock Exchange.

Auditors

No external audit of this semi-annual report has been conducted.

Remuneration policy

The fund itself does not employ any personnel and is managed by Robeco Institutional Asset Management B.V. ('RIAM'). The remuneration for persons working for RIAM comes out of the management fee.

Remuneration policy

RIAM's remuneration policy, which applies to all staff working under its responsibility, complies with the applicable requirements laid down in the European framework documents of the UCITS Directive and the ESMA guidelines for a responsible remuneration policy under the UCITS Directive.

The remuneration policy of RIAM can be obtained free of charge at the offices of the Company.

This remuneration policy applies to all staff of RIAM, including individuals who may have a material impact on the risk profile of the fund. These persons are designated to be 'Identified Staff'.

Responsibility for and application of the policy

RIAM's Remuneration Policy is determined, applied and annually reviewed by and on behalf of RIAM with the approval of its shareholder, the (Board of) Robeco Holding B.V. For each review (the Board of) Robeco Holding B.V. shall obtain prior advice from the Supervisory Board of RIAM, which acts as its Supervisory Board. In the application and evaluation of the remuneration policy, RIAM occasionally makes use of the services of various external advisers.

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point. The Fund's securities lending transactions have open maturity.

Settlement and clearing

The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Re-use of collateral

Non cash collateral, received in a securities lending transaction may not be sold, re-invested or pledged. Cash collateral received from such transactions is re-used in a reverse repurchase transaction.

Safekeeping of collateral

Collateral received

J.P. Morgan SE, Luxembourg Branch as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan SE, Luxembourg Branch is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Return and cost

The total income earned from securities lending transactions is split between the Fund and the securities lending agent. Details of this split are disclosed in notes to the financial statements on pages 171. Income earned during the year by the Funds from securities lending transactions is disclosed in the Combined Statement of Operations and Changes in Net Assets from pages 91 to 118.
