Fund Strategy

At the core of the team's investment philosophy is a belief in valuation-driven, active management. The European equities team firmly believes that investors are best served by a focus on long-term investing, avoiding an over-emphasis on current trends and consensus. Companies operate in long-term cycles and so does the focus of the investment team's research. The team's approach is to take advantage of inefficiencies in the market and buy stocks at below what they believe to be their intrinsic value. The investment process is driven by fundamental stock-picking, combining both top-down and bottom-up analysis, and with a focus on valuation.
