

Capital Group Euro Bond Fund (LUX)

Objective

The fund seeks to maximize total return through a combination of income and capital gains, with a view towards preservation of capital, by investing primarily in euro-denominated investment grade bonds. The value of shares and income from them can go down as well as up and you may lose some or all of your initial investment.

The Capital advantage

Since 1931 our firm, Capital Group, has been singularly focused on delivering superior, consistent results for long-term investors using high-conviction portfolios, rigorous research and individual accountability. We have been investing in fixed income assets since 1973.

Fund results are shown after fees and expenses and are calculated as the increase or decrease in net asset value of the fund over the relevant period. The net asset value is calculated based on close-of-business prices for performance and fee calculation purposes only. No dealing activity can be based on such net asset value. Please refer to capitalgroup.com/europe for further information on net asset value applicable to any dealing activity in the fund, and for other share classes; these have different fees and expenses, and returns will differ. Results data does not take account of costs incurred on the issue of shares. Past results are not a guarantee of future results. Source: Capital Group.

Index is the Bloomberg Barclays Euro Aggregate Bond Total Return which is provided for indicative purposes only. Prior to 31 December 2014: Citigroup Euro Broad Investment Grade Bond Total Return. Index uses PolyPaths analytics.

Yield to worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting.

Effective duration takes into account that expected cash flows will fluctuate when interest rates change and is expressed in years to maturity.

Fund essentials

Launch date	31 October 2003
Fund size	€566 million
Number of issuers	144
Gross income yield	1,1%
Net income yield	1,1%

Yield is calculated over the same period as income earned by the fund, on both a before (gross) as well as an after (net) withholding taxes basis (in each case before fees), divided by average total net assets. This differs from the yield of each share class.

12 months risk statistics

Standard deviation	1,8
Tracking error	0,6
Information ratio	-2,0

Risk statistics are based on close of market returns (T+1).

Standard deviation (absolute volatility) is a measure of the absolute variability of returns and the larger the standard deviation, the greater the likelihood (and risk) that a fund's results will fluctuate from the average return. It is based on monthly observations using a population standard deviation calculation.

Tracking error (volatility relative to benchmark) measures the volatility of the difference between a portfolio's results and the benchmark.

Information ratio (risk adjusted relative return) represents the value added of the manager (excess return) divided by the tracking error.

12 months risk statistics are based on monthly observations over the 12 months to 30 November 2018

Dividend yield is the income return on the share class and is shown for distributing share classes only. It is calculated over the last 12 months as income earned by the fund after withholding taxes, fees and expenses. Where hedged share classes are listed, for the purpose of currency hedging all assets attributable to them in this fund will be deemed to constitute exposure to EUR. The fund will aim to hedge 100% (with reasonable margin of tolerance) of this deemed currency exposure back into the currency referred to in the relevant Class's designation.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. In addition to the Total Expense Ratio (TER), entry charges may apply according to provisions described in the Prospectus. Data is likely to change over time and does not constitute a commitment from the management company. Past results are not a guarantee of future results.

Total Expense Ratio (TER) is calculated over the last 12 months with a one month lag. TER data is therefore as at 31 October 2018.

Risk factors you should consider before investing:

- The value of shares and income from them can go down as well as up and you may lose some or all of your initial investment.
- Past results are not a guarantee of future results.
- If the currency in which you invest strengthens against the currency in which the underlying investments of the fund are made, the value of your investment will decrease.
- The Prospectus and Key Investor Information Document set out risks, which, depending on the fund, may include risks associated with investing in emerging markets and/or high yield securities. Emerging markets are volatile and may suffer from liquidity problems.

Other important information:

The fund is offered only by Prospectus, together, where applicable, with the Key Investor Information Document. These documents, together with the latest Annual and Semi-Annual Reports and any documents relevant to local legislation, contain more complete information about the fund, including relevant risks, charges and expenses, and should be read carefully before investing.
