AXA World Funds - Euro 5-7

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Euro 5-7 E Capitalisation EUR (ISIN: LU0251660279)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The Sub-Fund's investment objective is to seek performance by investing mainly in corporate and governments debt securities in Euros, over a medium term period. The Sub-Fund will be managed with an interest rate sensitivity between 3 and 8.

Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in the Euro corporate and government bonds market. The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- duration positioning (duration measures in numbers of years the portfolio's sensitivity to interest rate variations)
- yield curve positioning (the yield curve illustrates the relation between investment term and bond yield)
- geographical allocation
- issuer selection

The Sub-Fund invests permanently at least two thirds of its total assets in investment grade or sub-investment grade governments and corporate transferable debt securities denominated in Euro. The Sub-Fund will mainly invest in investment grade transferable debt securities issued by corporate and government entities.

Investment grade securities will be rated at least BBB- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. Sub-investment grade securities will be rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager, securities will be sold within 6 months. If two different ratings of rating agencies exist, the lower rating will be considered, if more than two different ratings of rating agencies exist, the second highest rating will be considered.

The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.

The Sub-Fund will be managed with an interest rate sensitivity between 3 and 8. If interest rates increase by 1%, the Net Asset Value of the Sub-Fund may decrease by 3% up to 8%.
