INVESTMENT MANAGER

Insight are leaders in absolute return investing, multi-asset, specialist equity solutions, fixed income and liability driven investment.

The Fund transitioned investment manager on the 1st September 2021. Prior to this date it was managed by Mellon Investments Corporation, LLC.

PERFORMANCE BENCHMARK

The Fund will measure its performance against JP Morgan GBI-EM Global Diversified Index (the "Benchmark"). The Investment Manager will use the Benchmark to construct the investment universe. The Fund is actively managed and does not seek to replicate the full constituents of the Benchmark. The Investment Manager has limited discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. The majority of the Fund's holdings will be constituents of the Benchmark and as a result the Fund's currency and sector exposures, as well its maturity and credit quality profile, will be similar to the Benchmark. The investment strategy restricts the extent to which the portfolio holdings of the Fund may deviate from the Benchmark, and consequently the extent to which the Fund can outperform the Benchmark. The investment strategy provides similar volatility to the Benchmark over the medium to long term.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets have additional risks due to less-developed market practices.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- For hedged share classes the hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- The Fund may invest in China interbank bond market through connection between the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
