## JPM Global High Yield Bond I (inc) - EUR (hedged) a Share Class of JPMorgan Investment Funds – Global High Yield Bond Fund a Sub-Fund of JPMorgan Investment Funds

LU0248018532

The management company is JPMorgan Asset Management (Europe) S.à r.l.

### Objectives and Investment Policy

**Investment Objective:** The Sub-Fund aims to achieve a return in excess of global bond markets by investing primarily in global below investment grade corporate debt securities, using financial derivative instruments where appropriate.

**Investment Policy:** At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested, either directly or through the use of financial derivative instruments, in below investment grade corporate debt securities. Issuers of these securities may be located in any country, including emerging markets.

The Sub-Fund may invest in unrated debt securities.

The Sub-Fund will invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging.

The Sub-Fund may hold up to a maximum of 5% of its assets in Contingent Convertible Securities.

The Sub-Fund may invest in assets denominated in any currency and currency exposure may be hedged.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (EUR).

**Redemption and Dealing:** Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

**Management Discretion:** The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

**Benchmark:** The benchmark of the Share Class is BofA Merrill Lynch US High Yield Master II Constrained Index (Total Return Gross) Hedged to EUR.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund may bear little resemblance to its benchmark.

**Distribution Policy:** This Share Class will normally pay dividends.

---	---	---	---	---	---	---

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 4 because its Net Asset Value has shown medium fluctuations historically.

#### Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities.

- Contingent Convertible Securities are likely to be adversely impacted should specific trigger events occur (as specified in the contract terms of the issuing company). This may be as a result of the security converting to equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The Management Company is required to disclose in Appendix III of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
