Objectives and investment policy

The Fund's investment decisions are made on a discretionary basis. The Fund mainly invests in stocks, bonds and convertible bonds of international issuers. The bonds are issued by companies, national governments, government agencies and supranational organisations. In addition the Fund can invest in shares of other funds. The Fund's investments may be denominated in Euro or other currencies. The Fund may have a duration range between - 10 to + 30 years.

Financial techniques and instruments for hedging and/or non hedging purposes may be used.

Income generated by the Fund is reinvested and included in the value of units.

Investors can buy or sell units of the Fund every day which is a bank business day in Luxembourg.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 4 reflects average/moderate potential gains and/or losses for the portfolio. This is due to investments in equities or bonds issued by international issuers.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Interest rate risk: An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

Financial, economic and political risks: Financial instruments are impacted by various factors, of which, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation as well as economic and political conditions prevailing in each country.

Operational risk: This is the risk of losses due to inadequate or malfunctioning internal procedures and systems, personnel or external events. The introduction of new regulatory frameworks or changes to existing regulatory frameworks may also harm the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

For a comprehensive description of the risks, please see the "Risk factors" section of the prospectus.
