TreeTop Sequoia Equity

A sub-fund of TreeTop Global SICAV Class AH EUR ISIN: LU0257173335

Managed by TreeTop Asset Management S.A.

Objectives and Investment Policy

Objective: The sub-fund aims to increase the value of your investment over the long term.

Portfolio securities: Under normal market conditions, the sub-fund invests mainly in shares from issuers anywhere in the world, including in emerging markets, China and Russia. The sub-fund also invests in other types of securities that are consistent with its objective. The sub-fund may use derivatives for investment purposes or to reduce investment risks (hedging).

Investment process: The fund management team selects - based on criteria such as product innovation, quality of management, sector leadership, valuation - companies around the world that appear to offer solid growth prospects or whose securities seem to them undervalued. The sub-fund invests in a concentrated portfolio made of shares of these companies and/or in financial instruments convertible in shares or entitling the sub-fund to acquire shares of these companies. The sub-fund invests mostly in mid-cap and large-cap companies. The manager's objective is to hedge positions in currencies other than the euro which represent more than 2.5% of the net asset value of the share class.

The MSCI All Country World index provides a reference of the investment universe of the fund manager. It is provided for information purpose only as indeed the sub-fund is managed on a discretionary basis and its portfolio will show a significant departure from the index.

Recommended holding period: The sub-fund may not be appropriate for investors who plan to withdraw their money within 6 years.

This share class does not distribute dividends (meaning that any income earned by the sub-fund is added to the share price).

You can place orders to buy or sell shares of the sub-fund daily.

Terms to Understand

Shares: Securities that represent partial ownership in a company.

Hedging of positions in currencies other than the euro: Use of currency-related derivatives to reduce the effect of fluctuations in the exchange rates of these currencies in relation to the euro. This may generate gains (if the value in euros of the securities in the portfolio in another currency decreases as a result of fluctuations in exchange rates) or losses (if the value in euros increases).

Derivatives: Contracts whose value is linked to one or more securities, interest rates, currencies, commodities or financial indices.

Risk and Reward Profile

The sub-fund's risk/reward rating is based on its past volatility (how far, and how quickly, its price has gone up and down). Sub-fund volatility going forward could be lower or higher, and therefore its rated risk/reward level may change.

The sub-fund's risk/reward rating reflects following:

- The sub-fund may invest in a limited number of shares,
- The sub-fund may favour particular economic sectors or regions, including emerging markets.

The risk/reward rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify the risks reflected in the risk/reward rating.

The sub-fund is also exposed to the following risks that may not be fully captured in the risk/reward rating:

Liquidity risk: Convertible bonds may become hard to value or to sell at a desired price and time particularly when market conditions are unusual or when the issuer encounters financial difficulties.

Legal and tax risks: The sub-fund could be affected by foreign legal and tax changes, some of which may be retroactive.

Counterparty risk: The sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honour its obligations to the sub-fund.
