Fund overview

ISIN LU0248005711	Sedol B12CNP6	Bloomberg JPUSSU LX	Reuters LU0248005711.LUF
----------------------	------------------	------------------------	-----------------------------

Investment objective: To achieve a return in excess of the US equity market by investing primarily in US companies.

Investor profile: This is a core equity Sub-Fund designed to give exposure to US equities. The Sub-Fund may be suitable for investors who are looking for a core single-country equity investment to sit at the heart of their portfolio, or as a stand alone investment aimed at producing long-term capital growth. Also, because the Sub-Fund is invested in equities, and because of the individual economic, currency and political risks associated with single country investing, the Sub-Fund may be suitable for investors with at least a three to five year investment horizon.

Fund manager(s) Thomas Luddy Susan Bao Helge Skibeli	Share class currency USD	Domicile Luxembourg
Client portfolio manager(s) Christian Preussner Fiona Harris	Fund assets USD 2344.8m	Entry/exit charges Entry charge (max) 0.00% Exit charge (max) 0.00%
Fund reference currency USD	NAV USD 175.54	Ongoing charge 0.81%
	Fund launch 5 Jul 1984	
	Class launch 15 May 2007

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Indices do not include fees or operating expenses and you cannot invest in them.

Key risks

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

The single market in which the Sub-Fund invests may be subject to particular political and economic risks, and as a result, the Sub-Fund may be more volatile than more broadly diversified funds.

Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

GENERAL DISCLOSURES

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID) and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpmm.lu.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. Information from communications with you will be recorded, monitored, collected, stored and processed consistent with our EMEA Privacy Policy available at www.jpmm.com/pages/privacy

The time difference between Fund NAV calculation and the US market can distort the figures in the Portfolio Analysis table.

DEFINITIONS

Correlation measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

Annualised volatility an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
