STATUTORY AUDITOR'S REPORT TO THE GENERAL SHAREHOLDERS' MEETING OF DPAM B SA (PUBLIC INVESTMENT COMPANY WITH VARIABLE CAPITAL UNDER BELGIAN LAW) ON THE ANNUAL ACCOUNTS FOR THE YEAR ENDED 31 DECEMBER 2023

We present to you our statutory auditor's report in the context of our statutory audit of the annual accounts of DPAM B SA (Public Investment Company with variable capital under Belgian law) (the "Company"). This report includes our report on the annual accounts, as well as the other legal and regulatory requirements. This forms part of an integrated whole and is indivisible.

We have been appointed as statutory auditor by the general meeting d.d. 17 March 2021, following the proposal formulated by the board of directors. Our mandate will expire on the date of the general meeting which will deliberate on the annual accounts for the year ended 31 December 2023. We have performed the statutory audit of the Company's annual accounts for 6 consecutive years.

Report on the annual accounts

Unqualified opinion

We have performed the statutory audit of the Company's annual accounts, which comprise the balance sheet as at 31 December 2023, and the profit and loss account for the year then ended, and the notes to the annual accounts, with a globalised statement of total net assets of EUR 14.445.439.500,39 and of which the globalised result statement shows a profits for the financial year of EUR 2.019.699.960,17. An overview of the total net assets and the result of the financial year per sub-fund is provided in the table below:

In our opinion, the annual accounts give a true and fair view of the Company's net equity and financial position as at 31 December 2023, and of its results for the year then ended, in accordance with the financial-reporting framework applicable to Collective Investment Funds in Belgium (and in particular the Royal Decree of 10 November 2006).

Basis for unqualified opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Belgium. Furthermore, we have applied the International Standards on Auditing as approved by the IAASB which are applicable to the year-end and which are not yet approved at the national level. Our responsibilities under those standards are further described in the "Statutory Auditor's responsibilities for the audit of the annual accounts" section of our report. We have fulfilled our ethical responsibilities in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Belgium, including the requirements related to independence.

We have obtained from the board of directors and Company officials the explanations and information necessary for performing our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of the board of directors for the preparation of the annual accounts

The board of directors is responsible for the preparation of annual accounts that give a true and fair view in accordance with the financial-reporting framework applicable in Belgium, and for such internal control as the board of directors determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

FREE TRANSLATION

In preparing the annual accounts, the board of directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Statutory auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

In performing our audit, we comply with the legal, regulatory and normative framework applicable to the audit of the annual accounts in Belgium. A statutory audit does not provide any assurance as to the Company's future viability nor as to the efficiency or effectiveness of the board of directors' current or future business management. Our responsibilities in respect of the use of the going concern basis of accounting by the board of directors are described below.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors;
- Conclude on the appropriateness of the board of directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our statutory auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our statutory auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

FREE TRANSLATION

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other legal and regulatory requirements

Responsibilities of the board of directors

The board of directors is responsible for the preparation and the content of the directors' report, as well as for the compliance with the legal and regulatory requirements regarding bookkeeping, with the Companies' and Associations' Code and the Company's articles of association.

Statutory auditor's responsibilities

In the context of our engagement and in accordance with the Belgian standard which is complementary to the International Standards on Auditing (ISAs) as applicable in Belgium, our responsibility is to verify, in all material respects, the directors' report, as well as compliance with the articles of association and of certain requirements of the Companies' and Associations' Code and to report on these matters.

Aspects related to the directors' report

In our opinion, after having performed specific procedures in relation to the directors' report, the directors' report is consistent with the annual accounts for the year under audit, and is prepared in accordance with the articles 3:5 and 3:6 of the Companies' and Associations' Code.

In the context of our audit of the annual accounts, we are also responsible for considering, in particular based on the knowledge acquired resulting from the audit, whether the directors' report is materially misstated or contains information which is inadequately disclosed or otherwise misleading. In light of the procedures we have performed, there are no material misstatements we have to report to you.

Statements related to independence

- Our registered audit firm and our network did not provide services which are incompatible with the statutory audit of the annual accounts and our registered audit firm remained independent of the Company in the course of our mandate;
- The fees for additional services which are compatible with the statutory audit of the annual accounts referred to in article 3:65 of the Companies' and Associations' Code are correctly disclosed and itemized in the notes to the annual accounts.

FREE TRANSLATION

Other statements

- Without prejudice to formal aspects of minor importance, the accounting records were maintained in accordance with the legal and regulatory requirements applicable in Belgium;
- The appropriation of results proposed to the general meeting complies with the legal provisions and the provisions of the articles of association;
- There are no transactions undertaken or decisions taken in breach of the Company's articles of association or the Companies' and Associations' Code that we have to report to you.

Description of the share classes

Class A: distribution shares offered to the public.

Class A USD: distribution shares which differ from shares of class A due to the fact that they are denominated in United States dollars.

Class A EUR HEDGED: distribution shares which differ from class A shares in that the exchange risk against the euro is hedged. The Manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class V: distribution shares which differ from class A shares due to the fact that (i) at the discretion of the management company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, excluding Banque Degroof Petercam Belgium and Banque Degroof Petercam Luxembourg, (ii) they may be offered by distributors and platforms that have entered into separate remuneration agreements with their customers that are not subject to any rebate, and (iii) they are not subject to a rebate on management fees.

Class V EUR HEDGED: distribution shares which differ from Class V shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class E: distribution shares which differ from class A shares in that (i) they are reserved for eligible investors acting on their own account, (ii) they have a minimum initial subscription amount, (iii) a different management fee and (iv) a different annual tax.

Class E USD: distribution shares which differ from shares of class E due to the fact that they are denominated in United States dollars.

Class E EUR HEDGED: distribution shares which differ from Class E shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class M: distribution shares which differ from class A shares due to the fact that (i) they are reserved to investors having one or more current discretionary management mandates with one or more companies belonging to Degroof Petercam Group, (ii) they are reserved to the account(s) to which these discretionary management mandates apply, (iii) they are reserved for all-in mandates and in that (iv) they have a different management fee.

In this context, "all in" includes at least the management fees and custody fees charged on the account (s) to which these "all in" discretionary management mandates apply.

Class M USD: distribution shares which differ from shares of class M due to the fact that they are denominated in United States dollars.

Class M EUR HEDGED: distribution shares which differ from class M shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class B: capitalisation shares offered to the public.

Class B LC: capitalisation shares which differ from class B shares due to the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current “Services Agreement Life Cycle” contracts with Degroof Petercam Asset Management, and (ii) that they have a different management fee.

Class B USD: capitalisation shares which differ from shares of class B due to the fact that they are denominated in United States dollars.

Class B EUR HEDGED: capitalisation shares which differ from class B shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class L: capitalisation shares which differ from shares of class B due to the fact that (i) they have a minimum initial subscription, and (ii) a management fee that may be different.

Class L USD: capitalisation shares which differ from shares of class L due to the fact that they are denominated in United States dollars.

Class W: capitalisation shares offered to the public which differ from class B shares due to the fact that (i) at the discretion of the management company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, excluding Banque Degroof Petercam Belgium and Banque Degroof Petercam Luxembourg, (ii) they may be offered by distributors and platforms that have entered into separate remuneration agreements with their customers that are not subject to any rebate, and (iii) they are not subject to a rebate on management fees.

Class W USD: capitalisation shares which differ from class W shares due to the fact that (i) they are denominated in US dollars.

Class W EUR HEDGED: capitalisation shares which differ from class W shares in that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class F: capitalisation shares which differ from class B shares due to the fact that (i) they are reserved for eligible investors¹ dealing on behalf of their own name, (ii) they have a minimum initial subscription amount, (iii) a different management fee and (iv) a different annual tax.

Class F LC: capitalisation shares which differ from class F shares due to the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current “Services Agreement Life Cycle” contracts with Degroof Petercam Asset Management, (ii) they have no minimum initial subscription amount and (iii) that they have a different management fee.

Class F USD: capitalisation shares which differ from shares of class F due to the fact they are denominated in United States dollars.

Class F EUR HEDGED: capitalisation shares which differ from class F shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class F USD HEDGED: capitalisation shares which differ from class F USD shares due to the fact that the exchange risk against the US dollar is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class F CHF HEDGED: capitalisation shares which differ from class F CHF shares due to the fact that the exchange risk against the Swiss franc is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class J: capitalisation shares which differ from shares of class F due to the fact that they are reserved for (i) investors for which there are currently one or more discretionary management mandates with one or several companies of the Degroof Petercam group, and (ii) accounts to which these discretionary management mandates apply, due to the fact that (iii) they have no minimum initial subscription amount and (iv) they have a different management fee.

Class J EUR HEDGED: capitalisation shares which differ from class J shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class N: capitalisation shares which differ from shares of class B due to the fact that they are reserved for (i) investors for which there are currently one or more discretionary management mandates with one or several companies of the Degroof Petercam group, and (ii) accounts to which these discretionary management mandates apply, (iii) in that they are reserved for all-in mandates and due to the fact that (iv) they have a different management fee.

In this context, "all in" includes at least the management fees and custody fees charged on the account (s) to which these "all in" discretionary management mandates apply.

Class N USD: capitalisation shares which differ from shares of class N due to the fact they are denominated in United States dollars.

Class N EUR HEDGED: capitalisation shares which differ from class N shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class P: capitalisation shares which differ from class F shares by the absence of (i) a management fee and (ii) capitalisation shares which differ from class F shares by the fact that (i) they have no management fee (ii) no minimum initial subscription amount and (iii) due to the fact that they are reserved for invertors that have one of more discretionary mandates with Degroof Petercam Asset Management and (iv) they are reserved for the accounts where this discretionary mandates are applicable.

Class P EUR HEDGED: capitalisation shares which differ from class P shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class Z: capitalisation shares which differ from class F shares due to the fact that (i) they are reserved for investors where the minimum initial subscription amount is EUR 25,000,000 and (ii) they are subject to a different management fee and (iii) a different annual tax, it being understood that shareholders investing in this class may not request the partial redemption of their shares so as to reduce their level of investment to below the minimum initial subscription amount.

* "eligible investors" are investors, within the meaning of Article 5 of the Law of 3 August 2012, namely the corporate customers referred to in Appendix A of the Royal Decree of 3 June 2007 on the rules transposing the Directive on markets in financial instruments (MiFID), as well as eligible counterparties within the meaning of Article 3, §1 of the above-mentioned Royal Decree of 3 June 2007 and legal entities which are not considered corporate investors and which have asked to be entered in the FSMA register of eligible investors. Natural persons, as well as legal entities that are not part of the eligible investors defined above, do not have access to these share classes, even if subscriptions are made within the framework of a discretionary management mandate concluded with an eligible investor.

- Luxemburg
- The Netherlands
- United Kingdom
- Switzerland
- Finland
- Sweden
- Portugal
- Singapore (only for institutional investors)

1.2.MANAGEMENT REPORT

1.2.1. Information for shareholders

Generalities

Information to shareholders

DPAM B is an undertaking for collective investment, hereinafter the SICAV.

Since 1st January 2023 :

- the "Key Investor Information Documents" (KIID) have been replaced by "Key Information Documents" (KID) for all share classes of the sub-funds in the SICAV;
- the methodology for calculating the risk level of a sub-fund has been modified. The synthetic risk indicator (SRI) calculated in accordance with the provisions of the Delegated Regulation (EU) 2017/653 and available, in its most recent version, in the KIDs, has replaced the synthetic risk and rendering indicator (SRRI);
- the methodology for the calculation of fees (formerly ongoing charges) has been modified. The latest version is available in the PRIIPs KID.

The ordinary general meeting of shareholders of 15 March 2023 approved, among other things, the annual accounts closed on 31 December 2022 and the distribution of a dividend to the holders of distribution shares of certain sub-funds of the SICAV as mentioned in the notice published on March 17 March 2023.

De Board of Directors of 28 February 2023 decided to modify the investment policy of the DPAM B Equities DRAGONS Sustainable sub-fund.

In the below mentioned sub-funds which promote environmental and social characteristics within the meaning of article 8 of SFDR 2019/2088 and invest (partially) in sustainable investments, some of the sustainability indicators have been reformulated in the prospectus in the "Investment strategy" sub-section of the "Environmental, social and governance (ESG) considerations - Sustainability transparency" section and in the appendices on pre-contractual disclosure (the SFDR appendix), in the section entitled "What Sustainability Indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?":

DPAM B Equities Europe Small Caps Sustainable, DPAM B Equities Newgems Sustainable, DPAM B Equities DRAGONS Sustainable, DPAM B Equities Euroland Sustainable, DPAM B Bonds EUR Corporate Sustainable, DPAM B Equities US Dividend Sustainable, DPAM B Equities Europe Sustainable, DPAM B Equities Sustainable Food Trends, DPAM B Equities World Sustainable, DPAM B Real Estate Europe Dividend Sustainable, DPAM B Real Estate Europe Sustainable, DPAM B Real Estate Emu Dividend Sustainable and DPAM B Real Estate Emu Sustainable.

These changes came into effect on 15 May 2023.

The extraordinary meeting of 20 June 2023 decided the closing of the liquidation of the DPAM B Global Diversified World sub-fund.

The Board of Directors of 21 June 2023 decided to reverse split the SICAV's Class "P" shares in some SICAV's sub-funds.

The DPAM B Corporate Bonds EUR 2023 sub-fund has been dissolved automatically upon expiry of its term on 30 June 2023.

The DPAM B Equities Japan ESG Leaders Index sub-fund was launched on 21 August 2023.

The Board of Directors decided on 15 November 2023 :

1/ to update, with effect from 1 January 2024, the prospectus and pre-contractual disclosures SFDR (PCD) of the SICAV's art. 8+ SFDR sub-funds to take account of the addition of the next 4 environmental objectives, i.e. :

- sustainable use and protection of water and marine resources,
- the transition to a circular economy,
- pollution prevention and control, and
- protection and restoration of biodiversity and ecosystems;

2/ to amend the " Environmental, social and governance (ESG) aspects - sustainability transparency" section of the prospectus and SFDR pre-contractual disclosures (PCD) of the DPAM B Equities Sustainable Food Trends sub-fund in order to provide clarifications.

Some sub-funds promoting environmental and/or social (E/S) characteristics and partly presenting sustainable investments (although not having sustainable investment as their objective) mention in the pre-contractual information for financial products referred to in Article 8 of Regulation (EU) 2019/2088 annexed to the prospectus, a minimum proportion of sustainable investments with a social objective.

Following the clarifications provided by the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided when an activity can contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been reviewed and the minimum commitment for this objective has been revised downwards in the prospectus dated 15 May 2023. The methodology for calculating the minimum commitment for this objective excludes, for the entire Reference Period, double accounting. As a result of the review of the calculation methodology, the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1er January to 14 May 2023 may not have been met. This overachievement will be mentioned in the specific section dedicated to the sub-fund in the annual report under " Notes to the Financial statements and other informations/Investment restrictions and overruns".

Fee sharing agreements

Management fee retrocession agreements may exist, on the one hand, between the SICAV (or, where applicable, the distributor) and the investment portfolio manager, and, on the other hand, between the SICAV and other distributors (indicated, where applicable, in the prospectus) and third parties, such as shareholders of the SICAV. These agreements are in no way exclusive. They do not affect the manager's ability to carry out his duties freely in the interests of the Fund's shareholders. The management fee is allocated according to market conditions.

The information concerning the remuneration retroceded by the manager is taken up at the level of each sub-fund concerned under point "Charges".

Aberdeen and Fokus Bank

As the result of the Aberdeen and Fokus Bank rulings by the European Union Court of Justice concerning discrimination in the tax laws of certain EU Member States towards foreign UCIs, DPAM B has taken steps, with the help of the management company and external consultants, to reclaim the supplementary withholding tax paid and not recovered in some countries members of the EU. The costs will be charged immediately to the current financial year.

The SICAV did not make any redemptions during 2023.

Class action

During 2023, the SICAV made redemptions in respect of a « Class Action » for 11,567.9 USD.

Information required under Article 3:6 §1 of the Company and Association Code**Risk factors**

In view of the status of DPAM B as a société d'investissement au capital variable (SICAV, or open-ended investment company), its development and results are influenced by various risk factors, including two over which the Board of Directors has little or no control:

- subscription and redemption applications,
- direct and indirect risks inherent in financial markets.

The risk factors, which are also described in the prospectus, can be broken down as follows:

Type of risk	DPAM B Bonds EUR Short Term 1 Y	DPAM B Bonds EUR	DPAM B Equities Europe Small Caps Sustainable	DPAM B Equities Euroland	DPAM B Real Estate Europe Sustainable
Capital risk: Risk to capital, including the risks of erosion following redemptions of units and distributions in excess of returns	High	High	High	High	High
Inflation risk: Risk to which the value of the assets of the portfolio is exposed due to inflation	High	High	/	/	/
Market risk: Risk of a decline in the market for a given asset class that may affect the price and value of the assets in the portfolio	Low	Low	High	High	High
Credit risk: Risk of default of an issuer or counterparty	Low	Medium	/	/	/
Settlement risk: Risk that the settlement of a transaction does not take place as expected in a given transfer system, due to a payment/delivery default by a counterparty, or a payment/delivery not conforming to the original conditions	/	/	/	/	/
Liquidity risk: Risk that a position cannot be closed at an appropriate time at a reasonable price	Medium	Low	High	Low	High
Exchange risk: Risk of the value of the investment being affected by changes in exchange rates	/	/	Medium	/	Medium
Concentration risk: Risk linked to a high concentration of investments in a given class of assets or on a given market	Medium	Medium	Medium	High	High
Performance risk: Risk to performance, including variability of the levels of risk depending on the stock-picking strategy of each sub-fund and/or UCI, and the existence or absence of third-party guarantees or restrictions on these guarantees	/	/	/	/	/
Risks relating to derivative products	Low	Medium	Low	Low	Low
Sustainability risk: Risk of the probability of occurrence of an environmental, social or governance event that could lead to an actual or potential material loss in the value of the sub-fund as a result of that event	Medium	Medium	Low	Medium	Low
Hedging risk : (only applicable for hedged share classes)	/	/	/	Low	/

Other information

No significant event has occurred since the closing date of the financial year and no circumstance is likely to have a significant influence on the development of the SICAV with the exception of those mentioned under the heading «Events after the reporting period».

All circumstances likely to have a significant influence on the SICAV are set out in this annual report.

The SICAV has not carried out any research and development activities.

The SICAV employs no staff and has no branches.

This report includes all the information that must be included in accordance with the Companies and Associations Code.

Remuneration and mission of the auditor

The auditor's fees in respect of its auditor mandate amount 3,990.00 EUR (excl. VAT) per year and per sub fund.

In addition to its role as statutory auditor, PwC Société de Réviseurs agréés carried out a special assignment for DPAM B for an amount of EUR 5,730.00 for the dissolution of the DPAM B Corporate Bonds EUR 2023 sub-fund.

Comments on the balance sheet

The balance sheet total, which is identical to equity, amounted to 14,445,439,500.39 EUR, of which 14,205,107,900.02 EUR in transferable securities, money market instruments, UCIs and financial derivative instruments.

For the year 2023, the result amounted to 2,019,699,960.17 EUR, the retaining earnings amounted to 1,493,274,110.77 EUR and the income equalisation amounted to -86,979,706.95 EUR.

Appropriation of profits

The profit for the year to be appropriated amounted to 3,552,381,210.41 EUR.

The Board of Directors will propose to the general meeting of shareholders that this profit be appropriated as follows:

- ◆ a distribution of 31,899,695.55 EUR to the following distribution shares:

Remuneration policy of DPAM

- **Total amount of remuneration for the financial year:**

	Total paid by the Management Company and the Fund to its staff	Number of beneficiaries	Other amount paid directly by the UCI	Performance commissions

Fixed remuneration	18,767,958 €	202	/	/
Variable remuneration	5,195,373 €	170	/	/

- **Aggregate amount of remuneration**

Identified staff	12,092,012.77 €
Portfolio Managers	4,542,917.97 €

- **Description of how compensation and benefits were calculated**

This information is available in the Compensation Policy prepared by Degroof Petercam Asset Management. The Remuneration Policy is available at <https://dpaminvestments.com/documents/remuneration-policy-enBE>.

- **Results of assessments in the annual review by the management company of the general principles of the remuneration policy and their implementation**

The annual review of the compensation policy has led to the adoption of a new Remuneration Policy.

- **Significant change to the remuneration policy adopted**

The remuneration policy approved by the Board of Directors of the Management Company on February 14, 2017 has been modified in 2023. Details of the Remuneration Policy and the composition of the Remuneration Committee, are available at <https://www.dpaminvestments.com/documents/remuneration-policy-enBE>.

Regulation EU 2015/2365 of the European Parliament and the Council of 25 November 2015: transparency of securities financing transactions and of reuse (hereinafter the Regulation)

In accordance with Article 13 and Section A of the Annex to the Regulation, the SICAV must inform investors of the use it makes of securities financing transactions and total return swaps in its annual and half-yearly reports.

This information is included in each sub-fund concerned by the requirements of the Regulation under the heading "Notes to the financial statements and other information".

Use of liquidity management tools

The Directors decided, pursuant to the Royal Decree of 15 October 2018 regarding the liquidity tools, to introduce the possibility of using the following liquidity tools:

I. SWING PRICING

1. List of sub-funds that may use swing pricing:

All of the SICAV's sub-funds may use swing pricing.

2. Description of the objective, operation and methodology of swing pricing:

Objective:

The objective is to reduce performance dilution due to net inputs or outputs. The performance of the SICAV may be eroded by frequent transactions due to large inflows or outflows and the SICAV may suffer from (in)direct trading costs involved in capital movements. Swing pricing offers investors already invested in the SICAV the possibility of not having to bear the transaction costs or the cost of illiquidity in the underlying financial markets generated by the entry or exit of investors.

With swing pricing, existing investors should, in principle, no longer indirectly incur the transaction fees, which will now be directly integrated into the calculation of the net asset value (NAV) and borne by the entering and exiting investors.

Swing pricing protects long-term investors, as an investor can only be affected by swing pricing on the day of subscription/redemption.

Methodology and operation:

The swing pricing method adopted is based on the following principles:

- It is a partial swing, which implies that a certain threshold must be crossed before the NAV is adjusted;
- It is a symmetrical swing, which is activated for both subscriptions and redemptions;
- The use of swing pricing is systematic, without favoring one or more categories of investors.

The swing threshold is the value determined as a trigger event for net subscriptions and redemptions. This threshold value is expressed as a percentage of the total net assets of the sub-fund in question.

The swing threshold is always applied.

Swing factor: the direction of the swing depends on the net flow of capital applicable to a NAV.

In the case of a net inflow of capital, the swing factor linked to subscriptions of shares in the sub-fund will be added to the NAV. For net redemptions, the swing factor linked to redemptions of shares in the sub-fund in question will be deducted from the NAV. In both cases, all entering/exiting investors on a given date will have the same NAV applied.

3. Maximum swing factor:

The maximum swing factor set to a maximum of 5% of the unadjusted NAV.

The threshold and swing factor will be published on the website www.funds.dpaminvestments.com/funds.html in the "Fees" section.

4. Use of the swing pricing during the period:

The Board of Directors of the SICAV has decided to fix, as from the NAV dated 29 September 2023, calculated on 2 October 2023 and until further notice, the thresholds and swing factors detailed in the table below :

Sub-fund	Threshold	Swing factors	
	% net assets	Net subscriptions	Net redemptions
DPAM B Bonds EUR	3%	0.0075%	0.0075%
DPAM B Bonds EUR IG	3%	0.0075%	0.0075%

The Board of Directors of the SICAV has decided to fix, as from the NAV dated 2 October 2023, calculated on 3 October 2023 and until further notice, the thresholds and swing factors detailed in the table below :

Sub-fund	Threshold	Swing factors	
	% net assets	Net subscriptions	Net redemptions

DPAM B Bonds EUR	3%	0.13%	0.13%
DPAM B Bonds EUR IG	3%	0.12%	0.12%

The table below indicates, by sub-fund, the number of times and the dates when the swing pricing has been applied during the period covered by this report and the impact of this application for the purpose of calculating during the period covered by this report:

Trade date	Sub-fund	Swing threshold	Swing factor	Subscriptions/redemptions	Net amount	Impact on the performance

II. ANTI-DILUTION LEVY

1. List of sub-funds that may use the anti-dilution levy:

All of the SICAV's sub-funds may use "the anti-dilution levy".

2. Description of the objective, operation and methodology of the anti-dilution levy:

Objective:

The objective of this mechanism is to transfer the negative impact on the NAV of a sub-fund of the SICAV to the investors who generated this impact.

Methodology and operation:

If redemptions / subscriptions exceed a threshold, the SICAV may decide to impose an additional cost on incoming or outgoing investors, which will benefit the SICAV. Higher exit fees may be charged for large net outflows, and higher entry fees may be charged for large net inflows.

The anti-dilution levy will only be applied after an explicit decision of the Board of Directors of the SICAV. There is no automatic application of this mechanism. The Board of Director's decision relates both to the level of the threshold and the additional costs and whether or not to apply the mechanism if the threshold is exceeded.

It should be noted that these two mechanisms, swing pricing and the anti-dilution levy, cannot be applied to the same NAV.

3. Use of the anti-dilution levy during the period:

During the period covered by this report, no sub-fund of the SICAV used anti-dilution levy.

III. REDEMPTION GATES

1. Description of the objective, operation and methodology

This mechanism allows the SICAV to partially suspend the execution of requests for the redemption and/or repayment of units ("redemption gates") when the negative change in the balance of the liabilities of the company or sub-fund for a given day exceeds, for the day in question, a percentage (or threshold) determined by the Board of Directors.

The threshold above which this mechanism may be applied is set at 5% for all sub-funds.

The NAV calculation itself is not suspended as orders are partially executed.

Only the part of the requests for redemptions which exceeds the threshold is affected by this partial suspension. It must be applied proportionally to all requests for individual redemptions submitted by the closing date concerned.

The portion of the redemption requests not executed following this partial suspension will be postponed automatically to the next closing date, except in the event of revocation by the shareholder or if this mechanism is reapplied.

The partial suspension is always provisional.

This suspension will be carried out in accordance with the provisions of Article 198/1 of the Royal Decree of 2012.

In the event of a partial suspension of the execution of redemption and/or repayment requests, a notice to shareholders will be published on the website www.funds.dpainvestments.com/funds.html in the “News” section

2. Use of the redemption gates during the period

During the period covered by this report, no sub-fund of the SICAV used the redemption gates.

1.2.2. **Overview of the markets**

In 2023, global equities posted a positive performance of 16.2% in euro terms (excluding dividends). By region and in terms of the common currency (euro), US equities outperformed other regions, ending the year up 21%. Emerging equities ended the year at the back of the pack, posting a return of just 3.6% due to the negative performance of Chinese equities. European equities were up 12.7%, in line with Japanese equities (+13.3%). After a difficult year for tech stocks in 2022, the Nasdaq composite came out a winner in 2023 (+43% in dollars). The Dow Jones hit a new all-time high, while the S&P 500 ended the year 56 basis points off its record close in January 2022. The trend for the S&P 500 was generally bullish, although shares retreated in the third quarter (and bottomed out at the end of October) before recovering at the end of the year. The significant gains made by a number of technology mega-caps (referred to as the “Magnificent Seven”) played a major part in the overall performance of the index, and market tightness remained a persistent concern for much of the year. A major theme among technology stocks was optimism regarding artificial intelligence. Yields on 10-year US Treasury bonds ended the year below 4%, broadly unchanged from the end of 2022. The banking crisis pushed yields down in March, then they rose until October in line with the Fed’s mantra of “higher for longer” before finally falling sharply at the end of the year. All eurozone bond segments were in the black after a negative 2022. The dollar posted a year-on-year decline for the first time since 2020.

United States of America

Over the past year, investors have been counting on the Fed to reverse its monetary policy stance in response to better inflation figures, while US consumer spending and corporate profits have remained resilient. In a nutshell, fears of a hard landing have given way to a broader economic consensus of a soft landing or no landing at all. US monetary policy was at the heart of the 2023 story. Throughout the summer of 2023, the Fed continued to sound its “higher for longer” mantra and the market debated where the ceiling might be. The Fed’s December 2023 meeting (including its median projection of a 75 basis point rate cut in 2024) marked the inflection point in US monetary policy and triggered a rise in equities and a fall in Treasury yields that continued through to the end of the year. A key element in the Fed’s decision was the ongoing progress in pushing inflation down towards the 2% target. While inflation peaked at 8.9% year-on-year in June 2022, this figure fell to 6.4% in December 2022 and 3.1% in November 2023. Core inflation eased to 4.0% year-on-year in the November report.

Eurozone

The eurozone economy was broadly flat over the year. The German economy was disappointing compared with the rest of the eurozone. Manufacturing confidence indicators remained below the 50 mark (which separates expansion from contraction) throughout the year. Activity in the services sector, resilient until the summer, began to lose momentum towards the end of the year. The labour market has proved resilient despite the absence of economic growth. The unemployment rate remained at a historically low level. Inflation continued to trend downwards throughout the year. Core inflation finally reached an inflection point in April and then settled at 3.6% in November, while headline inflation fell to just 2.4% at the end of the year. The European Central Bank continued to raise its key rates during the year, although at a slower pace than in the second half of 2022. The deposit rate stood at 4% in September. The ECB subsequently left this rate unchanged for the rest of the year.

Japan

Economic growth in Japan was relatively robust in the first part of the year, then turned negative in the third quarter (quarter-on-quarter change). Economic growth nevertheless stood at 1.6% year-on-year in the third quarter of 2023. The yen depreciated sharply against the euro and the dollar in 2023. The yield on 10-year government bonds rose from 0.41% to 0.59% over the period as a result of the Bank of Japan's greater flexibility in setting the 10-year rate, which reached 0.95% at the beginning of November. The yen depreciated sharply over the period.

Emerging markets

The Chinese government moved to lift Covid restrictions in December, prompting a rebound in economic activity in the first quarter of 2023. Economic growth was already slowing in the second quarter of 2023, and then business confidence indicators showed that activity rebounded slightly at the end of the third quarter thanks to the various support measures taken by the Chinese government. The Chinese property sector struggled during the year on the back of a decline in new construction and the debt problem faced by actors in the sector. In other emerging countries, at the end of the period, the downturn in manufacturing continued in emerging Europe, while the sector returned to growth in Latin America. Some central banks began a cycle of rate cuts in response to the slowdown in inflation. This was the case for Brazil, Poland and the Czech Republic.

1.3.AUDITOR'S REPORT

1.4. IVOX GLASS LEWIS' S REPORT ON THE EXERCISE OF VOTING RIGHTS

DEGROOF PETERCAM ASSET MANAGEMENT S.A.
rue Guimard 18 B - 1040 - Brussels - Belgium

Limerick, 2024

DPAM B

Glass Lewis Europe Limited: Vote analysis and execution report for the securities contained in the SICAV DPAM B.

The Board of Directors of the SICAV has mandated DPAM, its management company, to organize the exercise of the voting rights attached to the shares held in the SICAV's portfolio and to vote, in its own name and on its own behalf, at the general meetings of the companies in which the SICAV is a shareholder to the extent of and in accordance with DPAM's Voting Policy (<https://dpaminvestments.com/documents/dpam-voting-policy-enBE> (Voting Policy)).

To this end, under the mandate granted to Glass Lewis Europe Limited by DPAM, Glass Lewis Europe Limited has implemented a vote analysis and execution service to assist DPAM in discharging its fiduciary responsibilities towards the SICAV.

An analysis of the resolutions demonstrating non-compliance with the SICAV's Corporate Governance principles, taking into account DPAM's Voting Policy, reports anomalies and, thanks to our voting execution service, has enabled the managers of DPAM to take the measures they deemed necessary.

This analysis, which is set out in a document available on our service, is based on the recognized standards and principles of each financial center concerned and on the corporate governance structure expected of each issuer.

DPAM, as mandated by the SICAV, approved the majority of the resolutions that were proposed at the various meetings. A resolution is not voted for if it is considered to be against the long-term interests of the shareholders and therefore of the SICAV. This is the case when the Board of Directors of the issuing company tries to set up capital defense structures or when the interests of the issuing company do not seem to coincide with those of the shareholder.

Glass Lewis Europe Limited has opened a file relating to each of the General Meetings at which DPAM, as mandated by the SICAV, exercised its voting rights on behalf of the SICAV during 2023.

Please see below for statistical information on voting rights exercised in 2023:

Management Proposals – Votes versus Management

Shareholder Proposals – Votes versus Management

N/A - Any proposal for which no recommendation from the issuer’s officers has been provided and which therefore could not be listed as FOR or AGAINST the officers.

No action - The term “No action” refers to any meeting that has intentionally not been voted on, whether automatically assigned this status by the system due to previous DPAM instructions (e.g. any ballot marked for share blocking), or manually assigned this status by an individual. This means that no voting instructions have been sent by the system.

Mixed - Refers to cases where different voting decisions have been selected for different accounts/ballots on the same agenda item in the same meeting.

1y - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option to choose 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

2y - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option to choose 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

3y - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option to choose 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

1.7.SUMMARY OF BOOKING AND VALUATION RULES

1.7.1. Summary of rules

The valuation of the Company's assets, subdivided by sub-fund, is determined as follows:

a. for securities admitted to official listing or traded on another organised market: at the last known stock exchange or market price, unless this price is not representative.

b. for securities for which the last price is not representative and for securities not admitted to an official stock exchange or another organised market, the valuation is based on the probable realisable value estimated prudently and in good faith.

c. for liquid assets: at their nominal value plus accrued interest.

d. unmatured receivables will be valued pro rata temporis on the basis of their exact amount if known or, failing this, on the basis of their estimated amount.

e. values expressed in a currency other than that of the sub-fund concerned will be converted into the currency of the sub-fund on the basis of the last known exchange rates.

f. the notional amounts of forward contracts are included in off-balance sheet items under "III. Notional amounts of forward contracts". Futures contracts are recorded in off-balance sheet items on the basis of the following calculation: number of contracts multiplied by the price on the acquisition date multiplied by the lotsize; to be converted into the sub-fund's currency on the basis of the last known exchange rates if the futures contracts are expressed in a currency other than that of the sub-fund. Futures contracts are valued each time the net asset value is calculated on the basis of the last known market price, unless this price is not representative. Differences resulting from changes in the value of forward contracts are charged to the income statement as a reduction in value or unrealised gain, under the sub-heading "ii. Forward contracts" of the relevant sub-items of "I. Impairment losses and gains - F. Derivative financial instruments", or in sub-item "I. Write-downs, losses and gains - H. Foreign exchange positions and transactions. - a. Derivative financial instruments - ii. Forward contracts" if the underlying asset is a foreign currency.

g. option contracts are valued at the time of each net asset value calculation on the basis of the last known market price, unless this price is not representative. Differences arising from changes in the value of contract premiums are charged to the income statement as a write-down or unrealised gain in sub-item "i. Option contracts" of the relevant sub-items of "I. Impairment losses and gains - F. Derivative financial instruments" or in sub-item "I. Write-downs, losses and gains - H. Foreign exchange positions and transactions - a. Derivative financial instruments - i. Option contracts" if the underlying asset is a foreign currency. When option contracts are exercised, the premiums are added to or deducted from the purchase or sale price of the underlying assets. Option contracts are recorded in off-balance sheet items under "II. Underlying values of option contracts and warrants" on the basis of the following calculation: number of contracts multiplied by the strike price multiplied by the quantity of underlying;

h. notional amounts of swap contracts are included in off-balance sheet items under "IV. Notional amounts of swap contracts". Swap contracts are valued at the time of each net asset value calculation on the basis of the last known market price, unless this price is not representative. Differences resulting from changes in the value of swap contracts are charged to the income statement as a reduction in value or unrealised gain, under sub-item "iii. Swap contracts" of the relevant sub-items of "I. Impairment losses and gains - F. Derivative financial instruments" or in sub-item "I. Write-downs, losses and gains - H. Foreign exchange positions and transactions - a. Derivative financial instruments - iii. Swap contracts" if the underlying security relates to currencies.

i. the underlying UCIs are valued at the time of each net asset value calculation on the basis of the last known prices, unless these prices are not representative.

To obtain the net assets, the valuation thus obtained is reduced by the Company's commitments.

2. INFORMATION ABOUT THE SUBFUND DPAM B BONDS EUR SHORT TERM 1 Y

2.1. MANAGEMENT REPORT

2.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 6 August 1992.

Initial subscription price: EUR 123.98.

2.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

2.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of instruments issued by Investment grade* or Prime* issuers, as rated by a ratings agency such as Standard & Poor's, Moody's or Fitch. These issuers may be public authorities, companies or private issuers.

The portfolio is invested principally in bonds, treasury certificates and other debt securities or equivalent securities denominated in EUR.

The initial or residual maturity of the instruments making up the portfolio will not exceed twelve months.

This is an actively managed sub-fund.

No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market may be used for risk management and evaluation by the manager.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

* Investment Grade: is an interpretation in terms of financial risk of the quality of the bond's issuer. The rating agencies each use their own scale to assess the notion of risk. Investment grade ratings are between AAA and BBB- on the Standard & Poor's and Fitch scale and between Aaa and Baa3 on the Moody's scale.

*Prime: is a short-term rating that assesses the issuer's ability to meet its obligations within one year. Prime ratings are between A-1+ and A-3 on the Standard & Poor's scale, between F1+ and F3 on the Fitch scale and between P-1 and P-3 on the Moody's scale.

Investment policy

The sub-fund invests a maximum of 10% of its assets in undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed

below), and by its regional public bodies. These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be charged to the assets of the SICAV to the extent of such investments.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

2.1.4. Index and benchmark

No benchmark is used in the management of the sub-fund.

2.1.5. Policy followed during the year

The Euribor rose rapidly during the the year, from 2.17 to 3.90.

These higher interest rates and the uncertainties on the financial markets make short-term bonds attractive.

As a result, short-term bonds have again a very attractive yield. In view of persistent volatility, investors bought more short-term bonds.

For our portfolio we often went in search of a good mix of sectors. The majority of positions are financials, particularly bank bonds. These are predominantly high rated (A-). In the remaining sectors we constantly opted for good diversification, a good mix of ratings and geographical spread.

2.1.6. Future policy

- Search for bonds with a final maturity date of between 5 and 12 months.
- Corporate bonds, financials and government bonds within investment grade bonds in euros.
- Good diversification to be maintained in terms of countries, sectors and ratings.

2.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 2.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

2.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	134,466,285.60	97,949,414.50	232,415,700.10
Sales	56,891,677.00	60,239,341.00	117,131,018.00
Total 1	191,357,962.60	158,188,755.50	349,546,718.10
Subscriptions	81,865,989.27	86,042,816.96	167,908,806.23
Redemptions	89,735,208.13	82,528,944.31	172,264,152.44
Total 2	171,601,197.40	168,571,761.27	340,172,958.67
Reference average of the total net asset	135,260,947.93	152,154,466.51	143,777,132.64
Rotation Percentage	14.61%	-6.82%	6.52%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

2.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.21%

Fee sharing

As at 31 December 2023, 33.81% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

2.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

2.11.1. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

2.11.2. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

2.11.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.
- excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- 1) For direct investments (in corporate bonds):
 - a) The sub-fund has not been exposed to companies considered to be below Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments (in sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.7%	98.59%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For direct investments (in corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to DPAM's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
1 3/4 INTL FLAVORS MAR24 14.03.2024	Manufacturing	4.51	United States of America

MIZUHO FINANCIAL GROUP INC 0.956% 16-OCT-2024	Financial and insurance activities	3.37	Japan

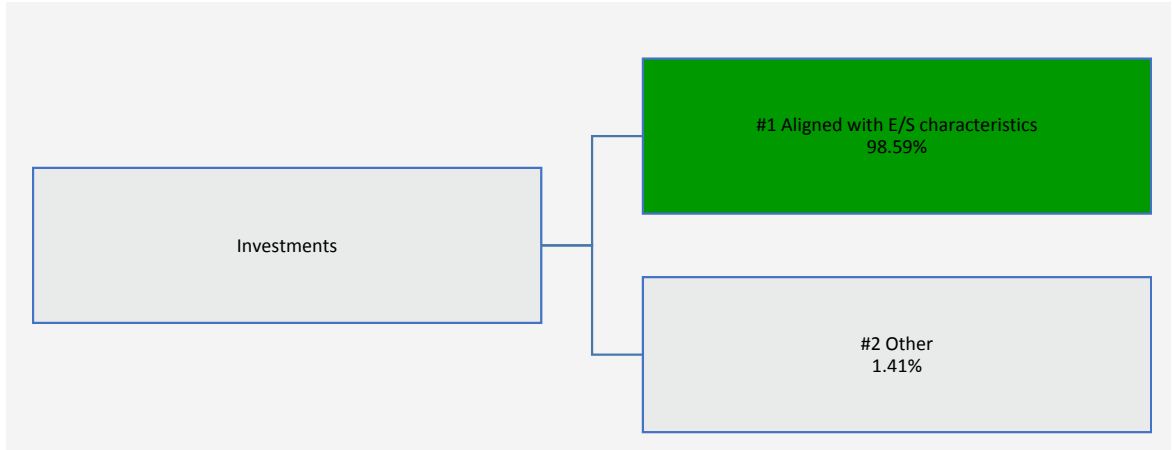

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.59% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	49.96
Manufacturing	Manufacture of beverages	8.33
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	8.29
Information and communication	Telecommunications	7.94
Administrative and support service activities	Rental and leasing activities	7.75
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	5.99
Manufacturing	Manufacture of food products	4.51
Manufacturing	Other manufacturing	4.08
Manufacturing	Manufacture of chemicals and chemical products	1.04
Transportation and storage	Land transport and transport via pipelines	0.71
Liquid assets	Liquid assets	1.41

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.41% in liquid assets. There are no minimum environmental or social guarantees on these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

3. INFORMATION ABOUT THE SUBFUND DPAM B BONDS EUR

3.1. MANAGEMENT REPORT

3.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 04/10/1996.

Initial subscription price: EUR 123.98.

On 26/10/2004, the capitalization and distribution shares were divided by four.

On 30/12/2004, this sub-fund absorbed the sub-fund Belinvest Bonds within the framework of merger by acquisition of the investment company Belinvest S.A. by DPAM B S.A. (formerly DPAM INVEST B S.A.).

3.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

3.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of short-, medium- and long-term instruments such as bonds and other debt securities or equivalent securities denominated in EUR, at fixed or floating rates, offering periodic or capitalised income and issued or guaranteed by Member States of the European Union.

The portfolio may also comprise government bonds (fixed-rate and variable-rate) issued by government agencies and by local authorities, government bonds denominated in a currency other than the country's local currency, and supranational agencies.

There is no rating requirement on the instruments making up the portfolio or their issuers.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed below (*)) and by its regional public bodies.

These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be charged to the assets of the SICAV to the extent of such investments.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

3.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: JPM EMU Government Bond Total Return.

This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency. The performance is calculated by reinvesting the coupons paid by the debt securities included in the index.

J.P. Morgan Securities PLC is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of the assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

The composition and value of the benchmark can be found at <https://www.funds.dpaminvestments.com/funds.html>.

3.1.5. Policy followed during the year

Since the second quarter of 2023, we started observing certain red flags in economic data in Europe. From a positive standpoint, China exited its Covid lockdowns, energy prices dropped to almost pre-war levels, and inflation in general also started decreasing.

But still a specific part of the European economy was not rebounding. The manufacturing sector continued deteriorating although all stars were aligned for it to boom. This weakness in manufacturing was mainly driven by weak domestic demand. This first, logically, during the higher inflation regime since the Covid crisis. However, it even continued deteriorating going into the second quarter of the year. Up until then international demand for European goods was still positive, but over the summer, this also started dropping. Consequently, over the summer we decided to fully remove our underweight duration stance to a neutral level when the German 10Y Bund reached 2.5%.

It is off course perfectly possible to have the European economy experiencing a manufacturing trough as long as the services sector makes up for this. This was the case, but August brought a new next red flag. Typically, the summer months are peak tourism season and hence we observe an extremely strong services sector. But in August, even the services sector fell into contractionary territory as indicated by PMI data. At that moment it becomes even more important to thoroughly monitor incoming data as a period of weak activity typically leads to a softening of the labor market. And their lays to biggest risk for the European economy. Once real economic activity consistently falls, the demand for labor will also fall. Consequently, a vicious circle of decreasing activity and increasing unemployment will start appearing. Consequently, we started building up a long duration stance as we believed the next market moves would be an interest rate rally. However, over September and October, interest rates continued decreasing. As this was not in line with the opposite movement of economic data, we continued adding duration up until the Bund reached 3%. By November, we reached an overweight of almost 1 year in the strategy.

But it has not only been soft data that has consistently deteriorated over the last quarters. When we look at hard economic data, the deterioration is also very clear and broad-based. When looking at bankruptcy data, real retail sales, European import and export data, labor market revisions, etc., they all point towards the possibility that this vicious circle has already started, and Europe is already in a recession. When taking a longer time frame, the only times these data were in this type of a downward trend, was when we were already in a recession. This time could be different, but it typically never is.

As typically a recession goes together with risk aversion, we decided to take significant profit on our allocation to Romania as this country typically underperforms in a rally. We believe an overweight stance on peripheral countries is still appropriate as since the Covid crisis they undertook significant fundamental changes. However, we have started building up an underweight stance on Italy. First as a hedge against the duration overweight, but now also as an outright short.

3.1.6. Future policy

In the end it is very easy to confirm the assertion whether Europe is in a recession and that's by looking at the definition of what a recession is. A recession constitutes two successive quarters of negative real GDP growth. When we assess this definition for all countries that are part of the European Union, already more than 25% is in recession! And if we look at those countries that experienced negative real GDP growth in the third quarter of the year, more than half of European countries experienced negative real GDP! Off course this does not mean that they will also fall in recession, but it is difficult to see a change in momentum given underlying activity data has forcefully continued deteriorating over the past months. To change this type of momentum there are not many solutions. One of them requires the ECB to start actively cutting interest rates. Unfortunately, it is clear that the ECB is not ready for this and is risking a severe policy mistake.

We believe a long duration bias remains very appropriate as once the ECB realizes we moved to the next phase of the economic cycle, they will move to the next phase of their monetary policy cycle. This also means that a curve steepening bias should play out very well as first the anticipation of cuts followed by actual decreases in the policy rate will affect the shorter end of yield curves much more than the longer end.

3.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

3.5.GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
SPAIN	20.62%
ITALY	18.44%
FRANCE	11.43%
GERMANY (FEDERAL REPUBLIC)	8.98%
AUSTRIA	8.05%
FINLAND	4.25%
LUXEMBOURG (GRAND DUCHY)	4.19%
IRELAND	3.58%
BELGIUM	3.47%
NETHERLANDS	3.22%
CROATIA (REPUBLIC)	3.16%
PORTUGAL	2.74%
SLOVAKIA (SLOVAK REPUBLIC)	2.60%
ROMANIA	2.02%
SLOVENIA (REPUBLIC)	1.99%
SERBIA (REPUBLIC)	0.86%
GREECE	0.40%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

3.6.ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
STATES	87.56%
BANKS	4.71%
EUROPEAN ORGANIZATIONS	3.98%
PROVINCE	3.05%
COMMERCIAL & PUBLIC SERVICES	0.62%
ROAD VEHICLES	0.08%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

3.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	269,671,381.40	294,814,402.34	564,485,783.74
Sales	76,670,560.59	42,864,807.53	119,535,368.12
Total 1	346,341,941.99	337,679,209.87	684,021,151.86
Subscriptions	215,479,889.01	289,852,699.38	505,332,588.39
Redemptions	44,910,858.93	41,657,365.28	86,568,224.21
Total 2	260,390,747.94	331,510,064.66	591,900,812.60
Reference average of the total net asset	608,684,771.30	870,642,568.00	740,740,208.54
Rotation Percentage	14.12%	0.71%	12.44%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

3.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: JPM EMU Government Bond Total Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
JPM EMU Government Bond Total Return	7.00 % (in EUR)	-5.39 % (in EUR)	-0.97 % (in EUR)	1.41 % (in EUR)		

Class A

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A	8.33 % (in EUR)	-4.73 % (in EUR)	-0.50 % (in EUR)	1.52 % (in EUR)		

Class B

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B	8.28 % (in EUR)	-4.75 % (in EUR)	-0.51 % (in EUR)	1.52 % (in EUR)		

Class E

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class E	8.55 % (in EUR)	-4.53 % (in EUR)	-0.27 % (in EUR)	1.79 % (in EUR)		

Class F

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F	8.54 % (in EUR)	-4.54 % (in EUR)	-0.27 % (in EUR)	1.78 % (in EUR)		

Class J

Table showing historical performance (actuarial returns):

Fee sharing

As at 31 December 2023, 6.40% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

3.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

3.12.1. Gross dividends paid in the financial year

2019	class A 0.61 EUR
	class E 0.82 EUR
	class V 0.76 EUR
	class M 0.75 EUR
2021	class A 0.75 EUR
	class E 0.83 EUR
	class V 0.76 EUR
	class M 0.79 EUR
2022	class A 0.11 EUR
	class E 0.24 EUR
	class M 0.19 EUR
	class V 0.22 EUR

3.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

3.12.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

3.12.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.
- by systematically applying a policy for impact bonds (such as green and social bonds).
- excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- For investments in corporate bonds:
 - a. The Sub-fund has not been exposed to companies considered to be below Global Standards;

b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c. The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

- For investments in sovereign bonds:

a. The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

b. The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was higher than the benchmark. Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 7.35% while the benchmark was 2.52%.

- **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	94.81%	98.77%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Impact bonds	Sub-fund: 6.04% Benchmark: 0.68%	Sub-fund: 7.35% Benchmark: 2.52%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

- For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:

- a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

- b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

- c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

- d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

- a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

- b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

- c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

- d) The issue of gender diversity on the board of directors is addressed primarily through shareholder responsibility by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

- For investments in sovereign bonds:

During the Reference Period, the Sub-fund took into consideration the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/enqagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.77% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	89.99
Financial and insurance activities	Financial service activities, except insurance and pension funding	4.80
Extraterritorial activities	Activities of extraterritorial organisations and bodies	3.91
Construction	Civil engineering	0.08
Derivatives	Derivatives	0.14
Liquid assets	Liquid assets	1.09

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
-**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.09% in liquid assets and 0.14% in derivatives. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For investments in shares or corporate bonds:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For investments in sovereign bonds:

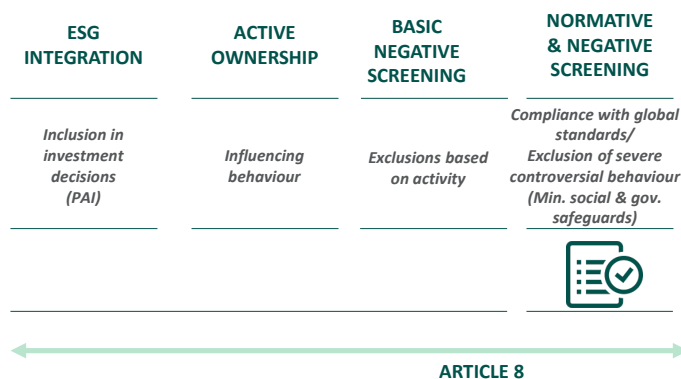

The Sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

4. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROPE SMALL CAPS SUSTAINABLE

4.1. MANAGEMENT REPORT

4.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 07/12/1997.

Initial subscription price: EUR 123.98.

On 16/12/2001 the shares were divided into three.

The sub-fund received all the assets of the DPAM CAPITAL B Equities Belgium sub-fund through a merger by absorption which took effect on 26 February 2021.

4.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

4.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is investment in shares of European companies with a small market capitalisation (1) at European level, selected on the basis of compliance with environmental, social and governance (ESG) criteria, and any securities giving entitlement to the capital of these companies.

The following are considered to be equivalent companies: companies' resident in non-European countries that have a significant proportion of their assets, activities and profit or decision-making centres in Europe and which meet the criteria stated above. The investment policy favours the selection of companies based on their specific qualities, with no particular rules as to geographic or sectoral distribution.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

(1) The sub-fund invests mainly in European companies representing a small market capitalization, i.e. companies whose market capitalization does not exceed the largest market capitalization among the companies making up the MSCI Europe Small Cap Net Return index at the time of the initial investment

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

4.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Small Cap Net Return.

This index is representative of the small-cap equity market in developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance and to determine the maximum authorized market capitalization of the underlying securities (see "Objectives of the sub-fund" above). The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark. The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

4.1.5. Policy followed during the year

The DPAM B Equities Europe small caps fund invests in high quality, sustainable undervalued small cap companies with a minimum investment horizon of 3 to 5 years. In 2023 inflation cooled down throughout the year, while the fear of energy shortages and dislocations in supply chains seemed overdone. The overall economy and profits held up better than feared. Small caps underperformed as an asset class in Europe on fears of an economic slowdown, a different sector composition (lower exposure to financials, higher exposure to value & economically sensitive names, no/less exposure to luxury names,..) but rebounded strongly in the last 2 months of the year (closing the gap with large caps from 10% underperformance to just a bit over 2%). The anticipation of central bank pivots next year and the expectation of a soft landing led to a powerful rally in risk assets. While the fund still outperforms its BM nicely on a 3 yr basis (after 2 strong years), the fund underperformed its benchmark in 2023. Some of our names suffered from destocking and lower demand post over ordering and excessive demand in the post covid era. Recticel (lower activity levels in insulation and a negotiated reduction in the sales price of a business they sold), Alfen (lower activity levels in EV chargers after a stellar 2022), Azelis (destocking and lower demand in the more cyclical part of the specialty chemical portfolio) and Corbion (volumes getting impacted from price increases), Bakkafrost (restructuring in their Scottish activities taking longer than expected) and CVS (the CMA in the UK opened an investigation into the vet sector) were a few of the names that contributed negatively. Positive contributors were our semi-equipment names (Besi, Inficon & VAT (anticipation of the through in semi-equipment order intake, while enjoying AI driven tailwinds)), SOL (undiscovered Italian producer of industrial and medical gases that enjoyed a bullish initiation report of a broker), Van Lanschot (recovery in net interest margin, strong excess capital generation).

4.1.6. Future policy

The fund focuses on attractively valued sustainable quality stocks. For us, these are companies with a strong market position, a sustainable competitive advantage that are active in attractive market segments. They have excellent management teams focused on sustainable value creation, make efficient use of their (mainly) internally generated cash flow in value creative projects and score well on our sustainability criteria. The fund pursues a bottom-up buy and hold approach. We reduce the huge universe by means of quantitative and qualitative filters and select a limited number of attractively valued sustainable quality stocks. Interviews with management and company visits are an important aspect of the analysis, as are the insights of our buy-side analysts. The geographical and sector allocation are the result of bottom-up stock picking but must conform to certain limits. Over the course of 2023 we bought on weakness new positions that comply with our "quality at a reasonable price" and ESG criteria like Diploma (high value added distributor of technical products) that benefited from a lot of earnings upgrades since and enjoyed from takeover bids on 2 portfolio companies (Applus and Abcam). We benefited from some weakness in high quality companies like Diploma (high value added distributor of technical products), CTS Eventim (nr 1 ticketing company in Continental Europe), VAT (highly specialized valves for vacuum chambers for semiconductors,), Bytes (UK distributor

of software) and Fortnox (leading SaaS accounting software player in Sweden with plenty of upselling potential. We sold the positions in companies that didn't meet our quality criteria anymore (like Loomis, Keywords Studios, RWS and Integrafon) because of disruption, changing market dynamics,...

For 2024, we are maintaining our focus on quality sustainable names while remaining disciplined on valuation and staying away from value traps i.e., disrupted industries (retail, traditional media) and highly geared companies. The European small cap segment remains an attractive asset class. Studies have shown that in the longer-term small caps perform better than the universe of larger cap stocks. In particular the high-quality sustainable companies on which we focus in this fund perform strikingly better in the longer term. Small caps in Europe have become very cheap compared to the large cap universe. A(n) (earnings) recession in the first part of 2024 could still impact the universe negatively, but given leading indicators are already low to historical standards, inflation seems under control, a soft landing has become the base case scenario and both relative and absolute valuations are attractive, 2024 could be an interesting year to revisit the asset.

4.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

4.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	72,624,110.43	10,869,264.96	83,493,375.39
Sales	43,270,386.02	67,166,855.21	110,437,241.23
Total 1	115,894,496.45	78,036,120.17	193,930,616.62
Subscriptions	74,207,775.45	17,414,767.56	91,622,543.01
Redemptions	52,599,671.75	73,174,437.77	125,774,109.52
Total 2	126,807,447.20	90,589,205.33	217,396,652.53
Reference average of the total net asset	372,035,396.26	308,157,066.93	339,833,717.91
Rotation Percentage	-2.93%	-4.07%	-6.91%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

4.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

	Average cumulated returns				Since	
	1 year	3 years	5 years	10 years	Year	Value

Fee sharing

As at 31 December 2023, 33.35% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

4.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

4.11.1. Gross dividends paid in the financial year

2019	class A 1.27 EUR class V 2.95 EUR class M 2.76 EUR
2021	class A 1.89 EUR class V 3.29 EUR class M 2.92 EUR
2022	class A 4.70 EUR class V 4.94 EUR class M 4.78 EUR

4.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

4.11.3. Investment restrictions and overruns

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 02/01/2023 and 15/05/2023, a breach was noticed in the DPAM B Equities Europe Small Caps Sustainable fund. Indeed, the fund takes the commitment to be invested at least 50% in assets with a social objective. As of 02/01/2023, the fund was at 38.94%. The breach closed after an adaptation of the fund's prospectus.

4.11.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

4.11.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES EUROPE SMALL CAPS SUSTAINABLE

Legal entity identifier:
549300IE87MW44R5QF87

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.72% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;
- d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;
- e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 1052.74 tCO₂e/M revenue compared to 1352.46 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.15%	99.16%
Sustainable Investment	78.05%	76.72%
Other Environmental Investments	37.59%	49.14%
Social	73.63%	26.53%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 673.57 Benchmark: 1152.98	Sub-fund: 1052.74 Benchmark: 1352.46

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund aimed to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 76.72% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 1.04% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 49.14% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 26.53% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 70.65% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 70.65% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et
<https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
D'IETEREN SA	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.72	Belgium
DIPLOMA PLC	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.56	United Kingdom
SPIE SA	Professional, scientific and technical activities	3.39	France
ARCADIS NV	Professional, scientific and technical activities	3.10	Netherlands
IMCD N.V.	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.10	Netherlands
REPLY SPA	Professional, scientific and technical activities	3.07	Italy
SHURGARD SELF STORAGE	Real estate activities	2.63	Belgium
GAMES WORKSHOP GROUP PLC	Manufacturing	2.54	United Kingdom
AZELIS GROUP	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.53	Belgium
IPSOS SA	Professional, scientific and technical activities	2.46	France
ROYAL UNIBREW	Manufacturing	2.42	Denmark
VAN LANSCHOT	Financial and insurance activities	2.38	Netherlands
CTS EVENTIM	Information and communication	2.30	Germany
KINEPOLIS GROUP	Information and communication	2.26	Belgium
BYTES TECHNOLOGY GROUP PLC	Information and communication	2.18	United Kingdom

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 99.16% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

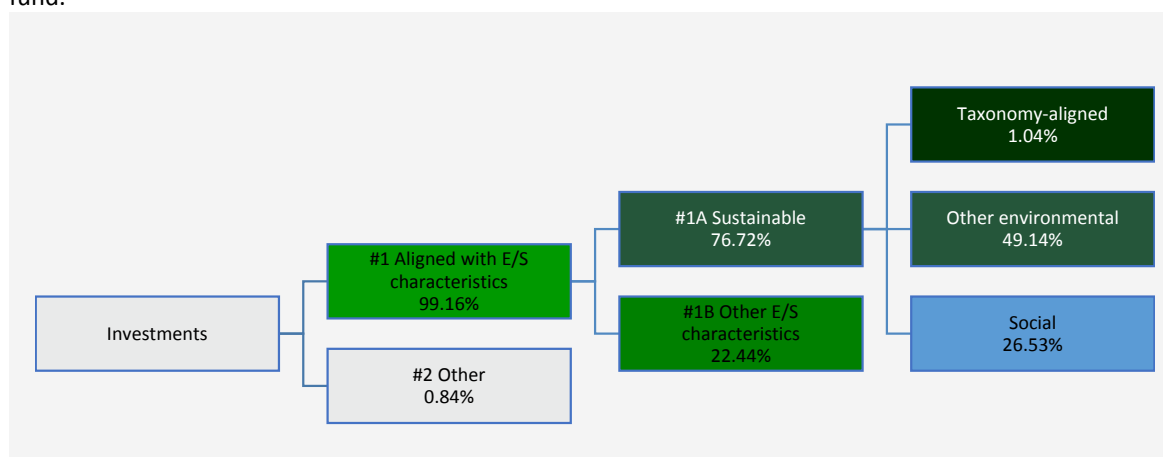

The Sub-fund invested at least 76.72% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	10.61
Manufacturing	Manufacture of computer, electronic and optical products	6.60
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	6.49
Real estate activities	Real estate activities	5.45

Sector	Sub-sector	% assets
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	4.91
Manufacturing	Manufacture of food products	4.83
Information and communication	Motion picture, video and sound production and distribution	4.56
Manufacturing	Manufacture of electrical equipment	4.52
Manufacturing	Manufacture of machinery and equipment n.e.c.	4.25
Manufacturing	Manufacture of chemicals and chemical products	4.05
Manufacturing	Manufacture of paper and paper products	3.74
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	3.72
Information and communication	Computer programming, consultancy and related activities	3.40
Professional, scientific and technical activities	Other professional, scientific and technical activities	3.07
Construction	Civil engineering	2.74
Manufacturing	Other manufacturing	2.54
Professional, scientific and technical activities	Scientific research and development	2.46
Manufacturing	Manufacture of beverages	2.42
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	2.04
Agriculture, forestry and fishing	Fishing and aquaculture	1.96
Arts, entertainment and recreation	Sports activities and amusement and recreation activities	1.89
Manufacturing	Manufacture of rubber and plastic products	1.71
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.59
Professional, scientific and technical activities	Veterinary activities	1.43

Financial and insurance activities	Financial service activities, except insurance and pension funding	0.99
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	0.96
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	0.89
Administrative and support service activities	Services to buildings and landscape activities	0.78

Sector	Sub-sector	% assets
Liquid assets	Liquid assets	0.84

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 1.04% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	2.05%
1 January 2023 - 31 December 2023	1.04%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 49.14% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 26.53% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.84% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals. The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**

5. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROLAND

5.1. MANAGEMENT REPORT

5.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 19/04/1998.

Initial subscription price: EUR 123.98.

On 16/12/2001, the shares of the sub-fund were divided by two.

5.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

5.1.3. Aim and main outlines of the investment policy

Objective

The principal objective of this sub-fund is investment in shares of companies having their registered office in one of the Member States of the European Union which has the euro as its national currency, and any securities giving entitlement to the capital of these companies. The following are considered to be equivalent companies: other companies that have a significant proportion of their assets, activities and profit or decision-making centres in the aforementioned countries.

More specifically, at least two-thirds of the sub-fund's investments are invested in stocks of companies which have their registered office or which carry out their primary economic activity in one of the European Union Member States which use the Euro as their national currency and any securities giving entitlement to the capital of these companies.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold cash on an ancillary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests up to 10% of its assets in open-ended collective investment schemes. No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR Regulation 2019/2088.

5.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI EMU Net Return.

This index is representative of the large and mid-cap equity market in developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html.com>.

5.1.5. Policy followed during the year

The sub-fund managed to close 2023 in profit, and this despite a challenging first half of the year. It was mainly cyclical sectors that contributed positively to returns last year. All the sector contributed positively to the performance except for healthcare which lagged. IT, consumer discretionary and Industrials performed particularly well.

Within IT, this can mainly be explained by the strong performance of semiconductor stocks BESI, ASMI and SAP. Despite revenues not yet ameliorating, the advanced packaging businesses sequentially improved order intakes toward the end of the year. BESI in particular saw higher orders for computing, hybrid bonding and photonics applications, partially offset by reduced demand for automotive and industrial applications.

In consumer discretionary, Ferrari continued to post strong results reflected in both solid demand and profitability thanks to its strong model momentum. Stellantis, the other strong contributor, also saw solid orders intake demand last year. In industrials, Schneider, Kingspan and Safran were the main responsible for positive returns. Schneider has successfully repositioned its products and services around 3 megatrends: i) Electrification, ii) Digitization, and iii) Automation, which are the key drivers to decarbonize. Kingspan also benefitted from sustainability trends while in the geopolitical context of last year supported stronger sales than anticipated in Propulsion, Equipment and Interiors. Commercial aftermarket KPI have also been particularly solid. In consumer staples, Beiersdorf drove strong returns as it has demonstrated a successful turnaround following a focus on its winning categories.

Healthcare had a negative contribution as destocking in bioprocessing has been the main topic with weaker than expected production related demand from some customers and as time and magnitude of destocking came up bigger than anticipated.

During 2023, some positions were changed. New holdings in Publicis, Adidas, Unicredit, AB Inbev were added. We like Publicis singular exposure to media and tech and its US leadership in the consumer experience category thanks to its huge data integration strategy. Adidas' improving brand heat and efforts with retailers have driven an improvement in trends from negative to positive through the year as well as in sales. We initiated a position in Unicredit due to good earnings momentum and improved profitability. We also entered a position in AB Inbev as we believe the company has reached an inflection point with lower debt levels, better categories and potential for improved free cash flow generation through margin upside.

Notable additions during 2023: xxx ASR, Getlink, Prysmian, Reply, DSM, EDP.

Notable dis-investments in 2023: Neste, Sampo, Adyen, Teleperformance, Infineon, CRH, UPM, Hera.

5.1.6. Future policy

European growth indicators, although not showing signs of deterioration, remain subdued. The overall decrease in interest rates and energy prices is viewed positively. Despite the disruptive impact of the monetary tightening cycle in various market segments, it has also opened up a broader range of stock picking opportunities. However, the importance of refinancing risks persists. Even with rates experiencing a decline from their peak, lower-quality companies are expected to face a more challenging financial landscape.

Our primary expectation remains an orderly economic slowdown. As the political agenda shifts towards the local level, we anticipate gaining more insights into the region's medium-term potential growth rate. Conversations with companies across sectors reveal advanced stages of destocking, while those aligned with structural trends express optimism about their future.

Given this backdrop, the manager maintains an investment approach with a medium to longer time horizon. The focus is on Eurozone companies with robust business models, steering clear of areas undergoing disruption.

5.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

5.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	101,809,862.04	101,340,762.93	203,150,624.97
Sales	157,723,225.35	383,665,789.33	541,389,014.68
Total 1	259,533,087.39	485,006,552.26	744,539,639.65
Subscriptions	50,467,293.15	71,814,578.34	122,281,871.49
Redemptions	113,630,478.25	368,001,308.66	481,631,786.91
Total 2	164,097,771.40	439,815,887.00	603,913,658.40
Reference average of the total net asset	928,496,059.52	781,047,265.24	854,165,708.43
Rotation Percentage	10.28%	5.79%	16.46%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

5.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B share is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI EMU Net Return	18.78 % (in EUR)	8.30 % (in EUR)	9.54 % (in EUR)	6.36 % (in EUR)	18/04/1998	4.17 % (in EUR)

Class A

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A	19.31 % (in EUR)	6.78 % (in EUR)	10.99 % (in EUR)	7.24 % (in EUR)	18/04/1998	6.03 % (in EUR)

Class B

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B	19.38 % (in EUR)	6.83 % (in EUR)	11.03 % (in EUR)	7.26 % (in EUR)	18/04/1998	6.06 % (in EUR)

Class E

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class E	20.39 % (in EUR)	7.71 % (in EUR)			21/02/2020	6.31 % (in EUR)

Class W

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class W	20.39 % (in EUR)	7.71 % (in EUR)	11.90 % (in EUR)	8.08 % (in EUR)	14/08/2013	8.62 % (in EUR)

5.11. CHARGES

Recurring costs

- Class A - BE0058181786 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.83%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

- Class B - BE0058182792 :

Fee sharing

As at 31 December 2023, 24.78% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

5.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

5.12.1. Gross dividends paid in the financial year

2019	class A 1.67 EUR class V 2.99 EUR class M 2.92 EUR
2020	class A 1.33 EUR class E 1.45 EUR class V 1.58 EUR class M 1.34 EUR
2021	class A 2.62 EUR class E 2.91 EUR class V 2.93 EUR class M 2.66 EUR
2022	class A 4.16 EUR class E 4.31 EUR class V 4.33 EUR class M 4.26 EUR

5.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

5.12.3. Investment restrictions and overruns

Between NAV Dates 10/10/2023 and 11/10/2023 a prospectus technical breach was open in the DPAM B Equities Euroland sub-fund. Indeed, due to a very large redemption (EUR 183 million or over 28% of the assets of the fund) the weight invested in that meet the environmental and social characteristics it promotes totaled 75.70% which was below the 80% minimum limit of the fund's TNA. The breach was caused by a 1-day delay between the sell transactions and the deposit of the redemption amount. The breach was resolved by the 1-day delay in cash outflow booking.

5.12.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

5.12.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES EUROLAND

Legal entity identifier:
549300EBOY9CML3ZK066

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

a) The sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.39%	98.35%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAI are intrinsically linked to DPAM's commitment to reduce the negative impact of the sub-fund's investments by avoiding activities or behaviours that may significantly undermine sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>).

In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
ASML HOLDING	Manufacturing	6.04	Netherlands
SCHNEIDER ELECTRIC	Manufacturing	5.80	France
SAP AG	Information and communication	4.73	Germany
AIR LIQUIDE (PORT)	Manufacturing	4.51	France
BNP PARIBAS	Financial and insurance activities	4.49	France
LVMH	Manufacturing	4.20	France
BEIERSDORF	Manufacturing	3.94	Germany

Largest investments	Sector	% of assets	Country
TOTAL ENERGIES	Mining and quarrying	3.57	France
FERRARI NV	Manufacturing	3.41	Italy
ADIDAS NOM	Manufacturing	2.64	Germany
PIRELLI & C S.P.A.	Manufacturing	2.53	Italy
STELLANTIS	Manufacturing	2.43	Italy
ESSILOR	Manufacturing	2.36	France
EDP ENERGIAS DE PORTUGAL	Electricity, gas, steam and air conditioning supply	2.34	Portugal
IBERDROLA SA	Electricity, gas, steam and air conditioning supply	2.34	Spain

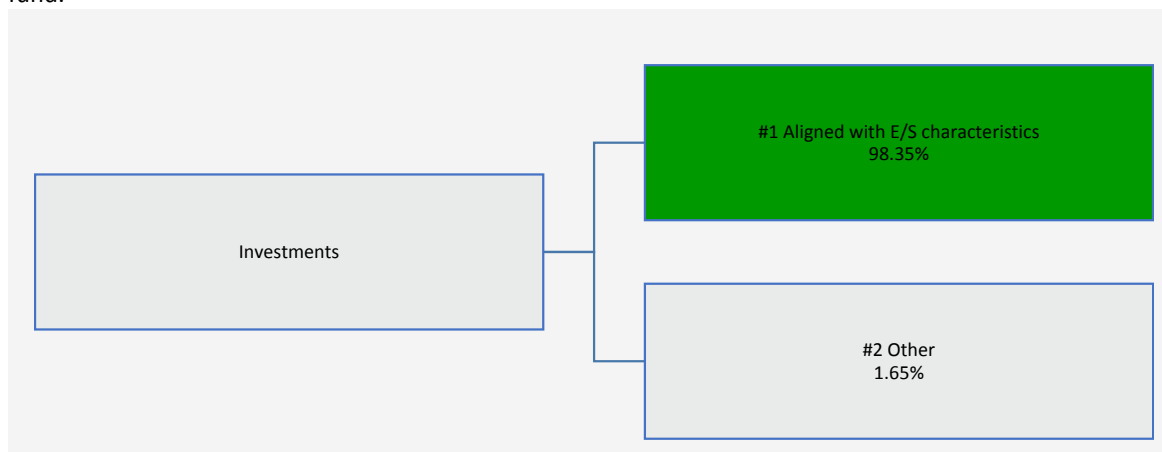

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.35% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	8.97
Manufacturing	Manufacture of chemicals and chemical products	8.44
Manufacturing	Manufacture of electrical equipment	6.80
Information and communication	Publishing activities	6.08

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	6.04
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	5.84
Manufacturing	Manufacture of machinery and equipment n.e.c.	5.61
Manufacturing	Manufacture of wearing apparel	5.50
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.69
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	4.68
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	4.08
Mining and quarrying	Extraction of crude petroleum and natural gas	3.57
Manufacturing	Manufacture of other transport equipment	3.17
Information and communication	Telecommunications	2.88
Manufacturing	Other manufacturing	2.83
Manufacturing	Manufacture of leather and related products	2.64
Manufacturing	Manufacture of rubber and plastic products	2.53
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	2.33
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.92
Manufacturing	Manufacture of beverages	1.72
Information and communication	Computer programming, consultancy and related activities	1.68
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	1.36
Professional, scientific and technical activities	Advertising and market research	1.15
Accommodation and food service activities	Food and beverage service activities	1.03
Transportation and storage	Land transport and transport via pipelines	1.01
Professional, scientific and technical activities	Other professional, scientific and technical activities	0.59
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.47
Real estate activities	Real estate activities	0.30
Other service activities	Other personal service activities	0.28
Manufacturing	Manufacture of food products	0.12
Derivatives	Derivatives	-0.34
Liquid assets	Liquid assets	1.99

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.99% in liquid assets and -0.34% in derivatives. There are no minimum environmental or social guarantees on this allocation.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable

- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**
Not applicable

6. INFORMATION ABOUT THE SUBFUND DPAM B REAL ESTATE EUROPE SUSTAINABLE

6.1. MANAGEMENT REPORT

6.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 27/12/1999.

Initial subscription price: EUR 100.

6.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

6.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders the highest possible long-term return through a balanced management policy, by investing its assets in securities representative of the real estate sector, in its broad sense, in Europe. These securities include but are not limited to shares of REITs, real estate certificates, shares of real estate companies and companies active in real estate promotion and development, shares in real estate debt investment funds etc. These companies are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

More precisely, the sub-fund invests at least two-thirds of its assets in securities representative of the real estate sector issued by companies having their registered office or carrying out their primary economic activity in Europe.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, as well as units in undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR Regulation 2019/2088.

6.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: GPR Europe UK 25% Capped Net Return.

This index is representative of real estate companies listed in developed Europe. The GPR Europe UK 25% Capped Net Return is a tailor-made index for DPAM calculated by Global Property Research. In this index, the weight of the United Kingdom is capped at 25%.

Performance is calculated by reinvesting net dividends (Net Return).

Global Property Research is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare the performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

6.1.5. Policy followed during the year

The year 2023 was characterized by a high volatility in interest rates expectations where macroeconomic elements played a massive important role influencing the fund's strategy. The year started positively with financial markets expecting a rapid decline in interest rates and falling inflation. After two months the narrative completely changed to higher for longer interest rates and further hiking by central banks. At the end of the year inflation data coming in softer than anticipated spurred the markets in a general view of central bank pivot to lower interest rates going forward.

Meanwhile on the real estate market, property values continued their decline, only been partly cushioned by increasing rent levels. Property companies therefore kept their strategy of deleveraging, through asset disposals, dividend cuts or equity injections. None of these actions are popular, albeit necessary. The lowly yielding and/or the highly levered companies were and are the most vulnerable and volatile companies in this landscape. Typically, they were the most affected when markets were in a risk-off mode during periods of increasing rates. But the year-end saw a rally in these companies bringing the total return of the European listed real estate sector close to +17%

In this macroeconomic context, the fund continued stayed disciplined in keeping overweight positions in lower levered companies. On a sector basis, it increased its exposure to the residential sector especially in the second half on valuation grounds but also to the retail subsector over the year, predominantly by increasing the weight in URW. The fund also increased its exposure to student accommodation. On the other hand, the fund reduced its exposure to logistics, following a takeover bid on a significant position in Interinvest and also slightly reduced exposure to offices.

6.1.6. Future policy

For 2024, we expect a continuation of a volatile environment. More visibility on interest rates should allow the investment market to increase volumes of transaction, setting clearance prices that will allow valuers to better assess the true value of assets. The fund will remain defensive as it is positioned most of the time.

Our strategy going forward will depend on the prospects for the companies in this volatile environment. We will continue to maintain a balanced portfolio. On the hand, we opt for companies that have strong balance sheets, strong prospects, and good visibility. These companies come at a price, but we appreciate their stability. On the other hand, we also opt for companies that are challenged but for which we believe that the management should be able to regain better earnings and visibility going forward. These companies trade at a sizeable discount, and therefore offer upside to the share price. One subsector to which we could increase our exposure again is logistics. We remain prudent on offices and constructive on retail.

The investment themes for 2024 are:

- Companies with strong balance sheets that hold quality assets, at the expense of companies with too much leverage;
- Companies evolving in a subsector where there is a supply shortage and thus higher rents rather than in a subsector where there is oversupply and thus lower rent growth;
- Companies with a strong ESG profile;
- Focus on total return, i.e., a combination of sustainable dividends and capital appreciation stemming from rental growth;
- Focus on long leases and quality tenants that enjoy competitive advantages in order to strengthen the cash flows;
- In a highly volatile environment, benefit from excessive market moves (rebuild positions in excessively penalized strong companies and vice versa)
- Companies clearly undervalued compared to industry peers.

6.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

Redemptions	31,664,775.64	21,183,062.91	52,847,838.55
Total 2	52,397,961.81	65,163,013.37	117,560,975.18
Reference average of the total net asset	360,536,371.49	374,728,998.63	367,691,010.92
Rotation Percentage	5.66%	4.22%	9.85%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

6.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

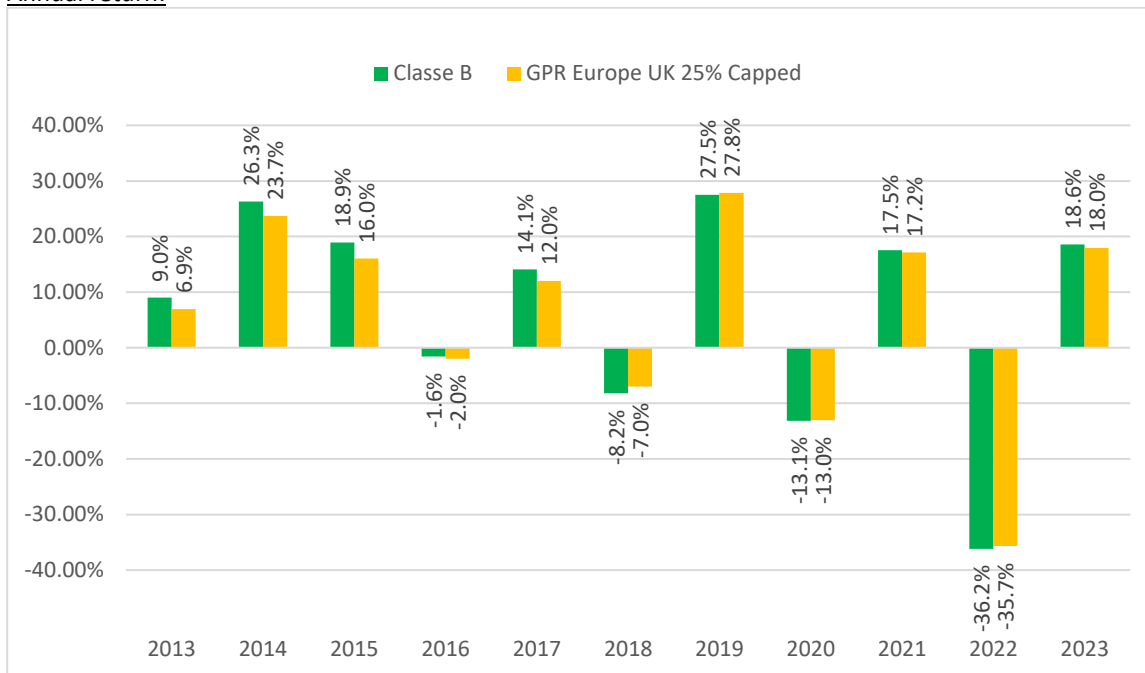

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 46.71% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

6.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

6.11.1. Gross dividends paid in the financial year

2019	class A 5.00 EUR class E 9.18 EUR class V 8.55 EUR class M 8.03 EUR
2020	class E 2.20 EUR (Interim dividends)
2021	class A 7.02 EUR class E 8.11 EUR class V 7.63 EUR class M 7.09 EUR
2022	class A 2.93 EUR class E 6.09 EUR class V 5.76 EUR class M 5.38 EUR

6.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

6.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

6.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B REAL ESTATE EUROPE SUSTAINABLE

Legal entity identifier:
549300W7GDEIEIZPVP86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 97.61% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;

e. As at 31 December 2022, the proportion of issuers with Science Based Targets initiative (SBTi) or equivalent in the Sub-fund's portfolio was 58.99% (by weight of portfolio assets). The target is to reach at least 50% by 2026.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.27%	98.46%
Sustainable Investment	94.35%	97.61%
Other Environmental Investments	2.91%	7.46%
Social	41.38%	27.43%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 55.29	Sub-fund: 58.99

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund aimed to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 97.61% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 15.2% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation)
- 7.46% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 27.43% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 97.61% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engaqement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 97.61% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
VONOVIA	Real estate activities	8.90	Germany
UNIBAIL-RODAMCO	Real estate activities	6.66	France
SEGRE (REIT)	Real estate activities	4.41	United Kingdom
LEG IMMOBILIEN	Real estate activities	4.08	Germany
PSP SWISS PROPERTY (NOM)	Real estate activities	3.91	Switzerland
CASTELLUM	Real estate activities	3.79	Sweden
SWISS PRIME SITE	Real estate activities	3.67	Switzerland
GECINA	Real estate activities	3.41	France
LAND SECURITIES GROUP PLC	Real estate activities	3.32	United Kingdom
WAREHOUSES DE PAUW	Real estate activities	3.19	Belgium
KLEPIERRE	Real estate activities	3.12	France
AEDIFICA	Real estate activities	2.64	Belgium
TAG TEGERNSEE IMMOBILIER	Real estate activities	2.43	Germany
MERLIN PROPERTIES SOCIMI SA	Real estate activities	2.39	Spain
BRITISH LAND	Real estate activities	2.35	United Kingdom

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 98.46% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

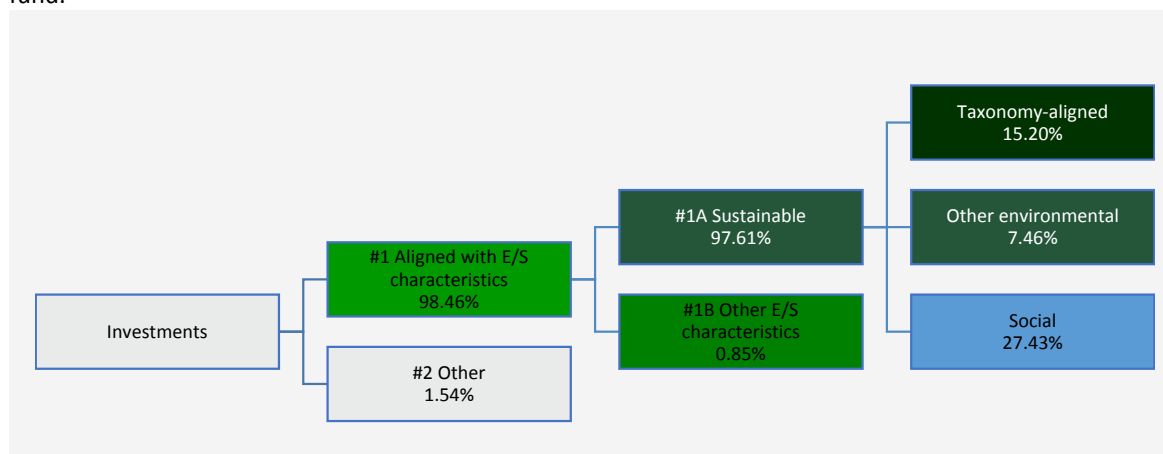

The Sub-fund invested at least 97.61% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Real estate activities	Real estate activities	98.46
Liquid assets	Liquid assets	1.54

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 15.20% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	15.26%
1 January 2023 - 31 December 2023	15.20%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This Sub-fund does not seek to make sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. As at 31/12/2023, however, 7.46% is indicated in the section "What was the asset allocation".

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 27.43% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.54% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**
Not applicable

7. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES WORLD SUSTAINABLE

7.1. MANAGEMENT REPORT

7.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 14/12/2001.

Initial subscription price: EUR 24.79.

F.N.I.C. initial value as at 25/02/1993. On 16/12/2001, the sub-fund received in contribution all the active and passive situation of the investment company F.N.I.C, in a report/ratio of one share F.N.I.C against three shares of DPAM INVEST B EQUITIES WORLD SUSTAINABLE in each class of shares.

The sub-fund has received the entire assets of the DPAM INVEST B Equities World Dividend sub-fund through a merger by absorption that took effect on 26 February 2021.

7.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

7.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer investors exposure to equities and/or equity-equivalent securities, issued by companies without any geographical restrictions, and to all securities giving entitlement to the capital of these companies, selected on the basis of a strict methodology in terms of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund invests mainly in equities and/or equity-equivalent securities issued by companies, without any geographical restrictions, and in all securities giving entitlement to the capital of these companies.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

7.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI AC World Net Return.

This index is representative of the large and mid-cap equity markets of 23 developed countries and 26 emerging countries (as defined by MSCI and mainly according to the country of incorporation and the country of primary listing of its securities) around the world.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the sub-fund's sustainable investment objective. Please refer to the investment strategy above for an explanation of how the sub-fund's sustainable investment objective is achieved.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

7.1.5. Policy followed during the year

At the end of December 2023, the net asset value of DPAM B Equities World Sustainable (F share) amounted to 362.46 EUR. This represents a 22.02% increase since the beginning of the year.

When we exited 2022, we were of the conviction the 2022 valuation reset had run its course. We saw our portfolio as somewhat fairly valued in the light of where interest rates were and considering some more increases to come. From that level, we were of the opinion earnings growth would be the driver of stock price performance looking forward.

However, the first few weeks of the year were marked by lower interest rates pushing higher the higher growth stocks. For some companies, valuation had run ahead of fundamentals. We sold ServiceNow, Align Technologies and reduced the likes of Intuit, Ansys, Autodesk. On the other hand, defensive stocks, which were quite expensive over H2 2022, came back to relatively attractive valuations. We took the opportunity to buy a stake in Procter & Gamble.

Over the first half of 2023, we also decreased our exposure to more cyclical businesses like Transunion or Infineon and reduced industrials like Trane Technologies and Kingspan while increasing the more defensive companies, as the macro-economic and geopolitical context remained blur and tense.

From a sector standpoint, two technological advancements have dominated the spotlight. Generative AI made a grand entrance late last year with the debut of ChatGPT, swiftly becoming integral to many of our professional lives. Later, GLP-1 drugs, initially developed for diabetes management, delivered impressive clinical trial results, demonstrating significant weight loss and improvements in comorbidities like heart disease and sleep apnea. These innovations are not just milestones for humanity; they have also generated hundreds of billions in market value for investors. Among the big winners: Nvidia, AMD (which we owned opportunistically in 2023 from March to Augustus), Microsoft, Alphabet, Novo Nordisk and more broadly the majority of our software and semiconductors companies.

Over the summer, some signs of peak interest rates were emerging. We took a position in some very high quality, higher growth companies like Idexx Laboratories, MSCI and Synopsys. In October, conviction in that changing

environment grew, leading to some opportunities. We bought ServiceNow, and increased the likes of Microsoft, Adobe, Salesforce, ASM International, S&P Global, L'Oréal and Intuitive Surgical as valuations were screening attractive in such context.

The exposure to the biopharma development and production value chain remains a significant component of the fund. These companies have greatly benefited from Covid vaccine production and low-interest funding for biotech firms. However, that cycle has ended. With a sharp decline in Covid vaccine production, a dip in biotech funding and a difficult Chinese market, the industry is undergoing a recalibration. Despite underperforming this year, we are beginning to see stabilization in orders, but visibility remains low. We are confident in these companies' strong barriers to entry, recurring revenue streams, and the need for innovation in the pharmaceutical industry, which should lead to renewed growth. However, we reduced tactically our exposure waiting for some more visibility. We also sold Agilent, due to its significant exposure to China.

Up until the end of October, the performance was mainly driven by earnings growth. As expected, valuation has been less of a factor over that period. However, since November, it became very tangible interest rates were peaking as inflation slowed down and central banks became more dovish. Thus, valuations expanded. In the last couple of months, both higher earnings growth and valuation expansion contributed to the performance, with higher growth stocks faring better.

All over the year, we aim at improving our portfolio by buying very high-quality companies at reasonable valuations with strong ESG credentials. As such, we also took a position in Epiroc, IDEX Corp, Moody's, Atlas Copco, SAP, Linde, Automatic Data Processing and Booking on top of the above-mentioned names. We sold CME Group, UMG, Autodesk, Ansys, Kerry, Teleperformance and Paypal.

7.1.6. Future policy

DPAM B Equities World Sustainable will continue its strategy of investing in high quality large cap companies with strong ESG credentials. These businesses stand to benefit from a variety of long-term growth trends, including personalized and affordable healthcare, digital transformation, energy efficiency, electrical vehicles, responsible consumption, the rising middle class and financial inclusion. Our investment philosophy is grounded in the conviction that sustainable profitable growth drives stock prices over the long-term. Our high-quality approach is differentiated because of a rigorous ESG process and portfolio diversification. This results in a resilient portfolio that aims to perform well in different economic environments.

7.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

7.2. BALANCE SHEET

		31 December 2023 EUR	31 December 2022 EUR
Section 1: Balance Sheet

CHEMICAL PRODUCTS	2.46%
HEALTH CARE & SERVICES	2.30%
BIOTECHNOLOGY	2.22%
INSURANCE COMPANIES	1.98%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

7.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	409,540,887.83	526,641,037.00	936,181,924.83
Sales	571,095,102.35	548,791,373.34	1,119,886,475.69
Total 1	980,635,990.18	1,075,432,410.34	2,056,068,400.52
Subscriptions	182,845,432.90	125,223,703.26	308,069,136.16
Redemptions	341,531,116.94	160,265,077.34	501,796,194.28
Total 2	524,376,549.84	285,488,780.60	809,865,330.44
Reference average of the total net asset	1,811,209,951.07	1,857,472,419.41	1,834,531,304.98
Rotation Percentage	25.19%	42.53%	67.93%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

7.8. EVOLUTION OF SUBSCRIPTIONS, REDEMPTIONS AND THE NET ASSET VALUE

Evolution of the number of shares in circulation

DPAM B
EQUITIES WORLD SUSTAINABLE

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

7.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B share is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI AC World Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI AC World Net Return	18.07 % (in EUR)	9.42 % (in EUR)	12.49 % (in EUR)	10.52 % (in EUR)	25/02/1993	0.00 % (in EUR)

Fee sharing

As at 31 December 2023, 33.24% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

7.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

7.11.1. Gross dividends paid in the financial year

2019	class A 0.48 EUR class V 1.81 EUR class M 1.77 EUR
2020	class 1.14 EUR class V 1.15 EUR class M 1.39 EUR
2021	class A 4.54 EUR

7.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments were valued in the portfolio at the average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid prices and average prices varied significantly during the period, both over time and depending on the nature of the security.

7.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

7.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES WORLD SUSTAINABLE

Legal entity identifier:
549300KYQ8QOYI13OU03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 96.86% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund had a better weighted average ESG profile than its benchmark: 56.72 compared to 52.62 (as at 31/12/2023).

e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 1019.48 tCO₂e/M revenue compared to 1228.13 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	-	98.37%
Sustainable Investment	91.46%	96.86%
Other Environmental Investments	47.22%	63.32%
Social	89.67%	30.59%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 55.06 Benchmark: 51.58	Sub-fund: 56.72 Benchmark: 52.62
Sustainability indicator e.	Sub-fund: 653.02 Benchmark: 1178.04	Sub-fund: 1019.48 Benchmark: 1228.13

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 96.86% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 0.41% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 63.32% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 30.59% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 82.52% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 82.52% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	7.08	United States of America
ALPHABET A	Information and communication	4.90	United States of America
MASTERCARD INCORPORATED CLASS A	Administrative and support service activities	3.99	United States of America
NESTLE (NOM)	Manufacturing	3.06	Switzerland
PROCTER & GAMBLE	Manufacturing	2.88	United States of America
S&P GLOBAL INC.	Administrative and support service activities	2.59	United States of America
NVIDIA CORP.	Manufacturing	2.59	United States of America
STRYKER CORPORATION	Manufacturing	2.52	United States of America
L'OREAL SA	Manufacturing	2.51	France
SALESFORCE.COM, INC.	Information and communication	2.28	United States of America
UNITEDHEALTH GROUP	Financial and insurance activities	2.26	United States of America
THERMO FISHER SCIENTIFIC	Manufacturing	2.23	United States of America
IDEXX LABORATORIES INC	Manufacturing	2.18	United States of America
MSCI INC	Information and communication	2.12	United States of America
BOSTON SCIENTIFIC CORPORATION	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.11	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 98.37% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

The Sub-fund invested at least 96.86% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

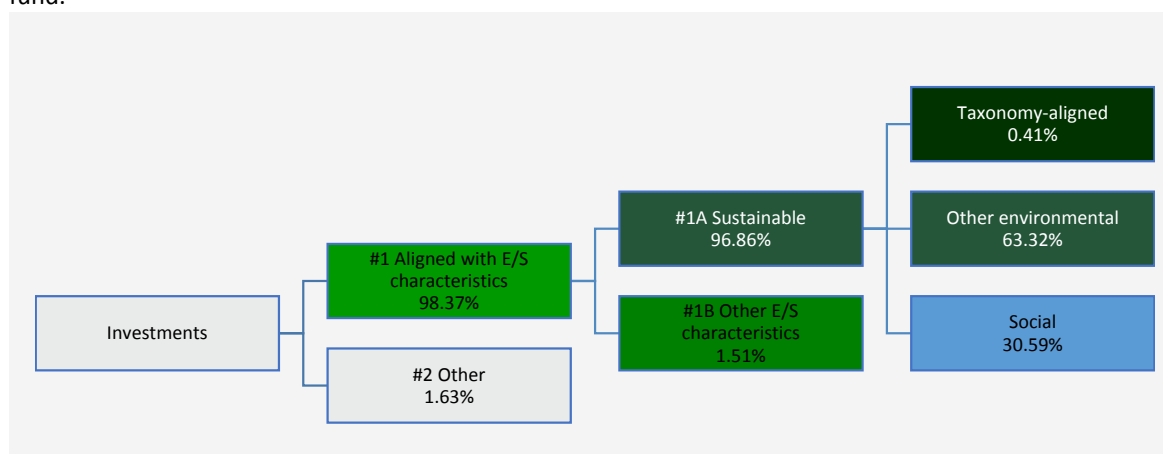

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these

objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Information and communication	Publishing activities	16.62
Manufacturing	Manufacture of computer, electronic and optical products	10.96
Manufacturing	Manufacture of chemicals and chemical products	9.30
Manufacturing	Manufacture of machinery and equipment n.e.c.	8.71

Sector	Sub-sector	% assets
Administrative and support service activities	Office administrative, office support and other business support activities	8.59
Information and communication	Information service activities	7.98
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.68
Manufacturing	Other manufacturing	6.01
Manufacturing	Manufacture of food products	3.06
Financial and insurance activities	Financial service activities, except insurance and pension funding	2.70
Real estate activities	Real estate activities	2.57
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	2.26
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	2.11
Manufacturing	Manufacture of wearing apparel	2.08
Information and communication	Computer programming, consultancy and related activities	2.03
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	1.95
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	1.74
Manufacturing	Manufacture of leather and related products	1.52
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	1.49
Liquid assets	Liquid assets	1.63

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers.

The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 0.41% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomyaligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.064%

Enabling activities: N/A

Enabling activities directly enable other activities to make a

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	1.79%
1 January 2023 - 31 December 2023	0.41%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 63.32% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 30.59% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.63% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

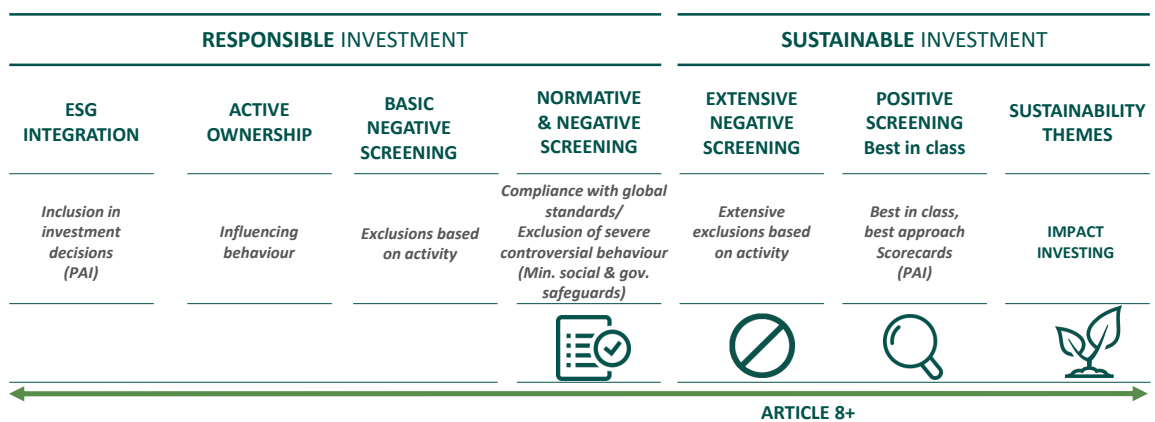

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (25% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable

- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**
Not applicable

8. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROPE DIVIDEND

8.1. MANAGEMENT REPORT

8.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 16/09/2002.

Initial subscription price: EUR 100.

8.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

8.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the equity market.

The portfolio of the sub-fund consists essentially of shares of companies having their registered office in a European country. The following are considered to be equivalent to shares of companies having their registered office in a European country: shares of other companies that have a significant proportion of their assets, activities and profit or decision-making centres in a European country.

The sub-fund may also invest in any other securities giving entitlement to the capital of the companies referred to above.

At least 50% of the portfolio must consist of equities and other securities mentioned above that generate a dividend yield or an expected dividend yield higher than the average represented by the MSCI Europe index.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Shareholders of the sub-fund have no capital protection or guarantee.

Investment policy

The sub-fund invests up to 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold cash on an ancillary or temporary basis in the form of current accounts, deposits or securities as well as in the form of undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or voting rights. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

8.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Net Return.

This index is representative of the large and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe. The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

8.1.5. Policy followed during the year

The strategy of the Europe Dividend fund is to invest in stocks offering a high and sustainable level of free cash flow that enables the payment of a regular and attractive dividend.

The relative underperformance of the fund versus the benchmark MSCI Europe NR comes down to two positions whose shares were hammered by profit warnings: Worldline and ALD. Concerning the former, conviction was high in the team that Worldline would reinstate a dividend policy in the short term as the company made clear it was moving away from M&A as a capital allocation priority. This coupled with value characteristic and diversification into growth area were key in the decision to use the flexibility bucket and build a position in the stock. However, after the profit warning in October 2023, that element of imminent shareholder cash return announcement vanished, and consequently the fund had to exit the stock. Concerning ALD, after finally closing “the deal of the century” with rival Leaseplan, expectations were high that ALD would unleash the potential of the combined group and deliver superior growth and normalized returns that, combined with higher market liquidity, would warrant a re-rating of the shares. However, the company provided underwhelming medium-term targets at the CMD in September mostly because of unexpectedly high IT costs at the acquired company that basically offset most of the merger synergies. Baring these two positions, the fund would have slightly outperformed the benchmark. On the positive side, the fund performance was helped by strong stock selection in Consumer Discretionary (UK housebuilders, Stellantis), Materials (Verallia, RHI and Solvay) and Healthcare (Grifols, Lundbeck). That could more than compensate the headwinds from the structural underweight position (stemming from dividend constraints) in IT, the best performing sector in Europe spurred by the Artificial Intelligence narrative, and negative stock selection within Industrials (small capitalizations Intrum and Coor) and Energy (OMV which is more skewed towards petrochemicals than peers).

Regarding the movements in the fund during the year, we initiated positions in the banks SEB, whose valuation had been under pressure because of the Swedish commercial real estate woes which we saw as an opportunity more than a risk for the bank, and Unicredit to gain exposure to the interest-rate sensitive Italian market. Within insurers, we started positions in Scor and ASR on compelling valuation grounds. We also added British Land in view of the depressed valuation given peaking interest rates. We increased the exposure to the Healthcare and Staples sectors by adding AstraZeneca and Nestlé at interesting entry levels. The fund exited Covestro and Direct Line on dividend rebasing risks, as well as several other companies on valuation grounds (Metso, Vonovia, Sodexo, Iberdrola, RHI). Remaining exposures in Intrum and Forterra were sold given the lack of re-rating potential despite the depressed valuations.

8.1.6. Future policy

After one of the most aggressive monetary tightening cycles in decades in the Western world, and a major yield curve inversion in key geographies pointing to trouble ahead, the macro uncertainty has undoubtedly picked up given typical lag between monetary policy decision and its economic impact. First indications of inflation coming down have been seen though more is needed to see central banks getting comfortable about the trajectory. As for growth, European leading indicators have come down over the past few months with manufacturing sector in recession. At

the same time China macro recovery post covid lock up has so far disappointed expectation though recent actions point to incremental stimulus. This has happened in a context of valuations reaching extreme polarization between growth and value ends of market. Regarding the latter, solid EPS revisions have continued by and large lately, supported by a strong earning season by some of the value segment heavyweights in banking or autos industries. Going forward, the valuation-centric fund managers will continue to focus on resilient business models, solid balance sheets and high cash generation, ensuring good dividend payment capacity.

8.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

8.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	80,723,138.51	53,071,790.27	133,794,928.78
Sales	184,004,563.04	302,272,122.30	486,276,685.34
Total 1	264,727,701.55	355,343,912.57	620,071,614.12
Subscriptions	17,849,172.10	2,896,626.31	20,745,798.41
Redemptions	139,815,089.32	253,738,294.41	393,553,383.73
Total 2	157,664,261.42	256,634,920.72	414,299,182.14
Reference average of the total net asset	478,351,089.08	284,043,058.13	380,398,547.45
Rotation Percentage	22.38%	34.75%	54.09%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

8.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI Europe Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI Europe Net Return	15.83 % (in EUR)	9.47 % (in EUR)	9.84 % (in EUR)	6.46 % (in EUR)	16/09/2002	6.45 % (in EUR)

Fee sharing

As at 31 December 2023, 28.52% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

8.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

8.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

8.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

8.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

a) The sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.04%	99.41%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>).

In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
BNP PARIBAS	Financial and insurance activities	4.99	France
UCB	Manufacturing	4.91	Belgium
ORKLA ASA	Manufacturing	4.39	Norway
OMV AG	Mining and quarrying	4.27	Austria
KBC GROEP	Financial and insurance activities	4.05	Belgium
KONECRANES OYJ	Manufacturing	3.37	Finland
ASTRAZENECA	Manufacturing	3.21	United Kingdom

Largest investments	Sector	% of assets	Country
STELLANTIS	Manufacturing	3.18	Italy
H. LUNDBECK A/S CLASS B	Manufacturing	2.42	Denmark
FRESENIUS SE (ORD)	Manufacturing	2.42	Germany
LEROY SEAFOOD	Manufacturing	2.35	Norway
GRIFOLS B (NEW)	Manufacturing	2.30	Spain
EIFFAGE SA	Professional, scientific and technical activities	2.27	France
ALD SA	Administrative and support service activities	2.27	France
NN GROUP	Financial and insurance activities	2.15	Netherlands

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 99.41% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	15.61
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	14.83
Manufacturing	Manufacture of food products	9.23
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	7.44

Sector	Sub-sector	% assets
Mining and quarrying	Extraction of crude petroleum and natural gas	5.27
Construction	Construction of buildings	4.31
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	4.03
Manufacturing	Manufacture of machinery and equipment n.e.c.	3.37
Manufacturing	Manufacture of chemicals and chemical products	3.18
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	3.18
Information and communication	Telecommunications	3.02
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	2.79
Manufacturing	Manufacture of computer, electronic and optical products	2.42
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	2.27
Administrative and support service activities	Rental and leasing activities	2.27
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	2.26
Manufacturing	Manufacture of basic metals	1.59
Manufacturing	Manufacture of coke and refined petroleum products	1.57
Real estate activities	Real estate activities	1.47
Mining and quarrying	Mining of metal ores	1.37
Transportation and storage	Postal and courier activities	1.35
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	1.29
Information and communication	Computer programming, consultancy and related activities	1.08
Manufacturing	Manufacture of other non-metallic mineral products	1.02
Administrative and support service activities	Services to buildings and landscape activities	1.00
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	0.77
Professional, scientific and technical activities	Scientific research and development	0.67
Manufacturing	Manufacture of rubber and plastic products	0.63
Administrative and support service activities	Security and investigation activities	0.11
Liquid assets	Liquid assets	0.59

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.59% in liquid assets. There are no minimum environmental or social guarantees on these investments.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

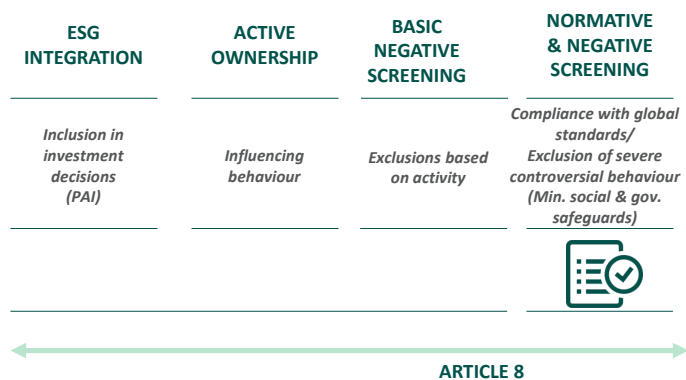

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

9. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROPE SUSTAINABLE

9.1. MANAGEMENT REPORT

9.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 31/12/2002.

Initial subscription price: EUR 100.

On 18 November 2020, the sub-fund received all the assets and liabilities of the DPAM INVEST B Equities Europe sub-fund through a merger by absorption. The merger took effect on 26 November 2020.

9.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

9.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to enable shareholders to benefit from the growth of shares of European companies or other equivalent securities, selected on the basis of a strict methodology in terms of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

To achieve its objective, the sub-fund invests in shares of European companies that meet certain environmental, social and governance criteria (ESG). The following are considered to be equivalent: other companies belonging to the aforementioned universe that have a significant proportion of their assets, activities and profit or decision-making centres in Europe. The sub-fund may also invest in any other securities giving entitlement to the capital of the companies referred to above.

The sub-fund may hold cash on an ancillary or temporary basis in the form of current accounts, deposits or securities.

The sub-fund invests up to 10% of its assets in open-ended collective investment undertakings.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or voting rights. No issue or redemption fees for target funds or management fees may be charged to the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

9.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Net Return.

This index is representative of the large and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the sub-fund's sustainable investment objective. Please refer to the investment strategy above for an explanation of how the sub-fund's sustainable investment objective is achieved.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

9.1.5. Policy followed during the year

The yearly performance ended up in negative territories in a context still of a challenging macro context with many companies digesting post-pandemic and inflation effects. Consumer staples and IT and to a lesser extent, consumer discretionary and energy had positive returns. Beiersdorf and l'Oréal both had a particularly strong year. Beiersdorf has demonstrated a successful turnaround of the company as it focused on its winning categories and strategically de-emphasized losing categories. L'Oréal on the other hand continues to outperform its peers despite the challenging environment due to its successful premiumization strategy and its leading beauty business which digitalization has proven effective. In IT, both BESl and ASMI drove positive returns. Despite revenues not yet ameliorating, the advanced packaging businesses sequentially improved order intakes toward the end of the year. BESl in particular saw higher orders for computing, hybrid bonding and photonics applications, partially offset by reduced demand for automotive and industrial applications. In consumer discretionary, Intercontinental and Amadeus had positive returns driven by a travel sector holding up longer than anticipated.

Financials stocks in the funds experienced a much more difficult 2023. Beazley underperformed insurers after a strong 2022. The company had to shift gears away from the cyber to property market as the war in Ukraine triggered a change in contracts and cooled down the cyber security market.

Materials performed less this year and had a negative contribution. This was mainly due to the positions in DSM-Firmenich and Croda. Both companies suffered from the normalization in the inventory cycle within the food, protein, health and beauty.

During 2023, some positions were changed. In communication services we bought a position in Publicis. In consumer discretionary, we opted for a switch from luxury to sporting goods given the two segments were at opposite part of the demand cycle. We added a position in Adidas and sold our position in Burberry while significantly reducing LVMH and allocating part of it to Moncler. In energy, we sold Neste due to concerns regarding the sustainable aviation strategy execution. In financials, we sold worldline following concerns around the commoditization of the merchant acquiring business and increased competitive pressures. We added a position in BNP and Intesa given better balance sheets and capitalization than peers. KBC was significantly reduced. As such YTD KBC saw its capital return program hampered by one-off elements, while the benefit to NII from higher interest rates was slower because of its replication book. In healthcare, we added Coloplast and Straumann. In industrials, we added DSV and Rotork and exited Nibe. In IT, we added reply and sold Infineon. Finally in materials we added DSM and Sika and in utilities we entered a position in EDP.

9.1.6. Future policy

While European growth indicators currently indicate stability without signs of deterioration, they remain subdued. The overall positive impact of decreasing interest rates and energy prices is noteworthy. Despite the disruptive effects of the ongoing monetary tightening cycle across various market segments, it has concurrently expanded the range of stock-picking opportunities. Nevertheless, the significance of refinancing risks persists, and lower-quality companies are anticipated to face heightened challenges, despite a decline in rates from their peak.

Our fund managers central expectation continues to be an orderly economic slowdown. The evolving political agenda, with a shift towards the local level, is expected to provide more insights into the region's medium-term potential growth rate. Discussions with companies across sectors reveal advanced stages of destocking, while those aligned with structural trends express optimism about their future.

As a sustainable European equity fund, our goal is to lead in our category. We safeguard our ESG profile rigorously, excluding controversial companies and those ranking in the bottom 25% of their sector based on ESG scores. Our fund managers actively consider ESG factors in equity decisions, favoring companies with strong profitability, growth, and resilient business models. We focus on high-quality companies for their potential in delivering robust, risk-adjusted returns. Going forward, our strategy remains centered on high-quality companies, ensuring sector diversification for sustained, long-term returns.

9.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

9.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	293,712,639.65	263,265,386.02	556,978,025.67
Sales	341,605,177.78	450,829,287.68	792,434,465.46
Total 1	635,317,817.43	714,094,673.70	1,349,412,491.13
Subscriptions	265,353,164.97	143,801,242.66	409,154,407.63
Redemptions	335,975,541.54	341,287,584.24	677,263,125.78
Total 2	601,328,706.51	485,088,826.90	1,086,417,533.41
Reference average of the total net asset	1,806,792,252.43	1,686,722,354.20	1,746,263,865.38
Rotation Percentage	1.88%	13.58%	15.06%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

9.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

Fee sharing

As at 31 December 2023, 20.57% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

9.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

9.11.1. Gross dividends paid in the financial year

2019	class A 2.87 EUR class E 4.90 EUR class V 4.63 EUR class M 4.57 EUR
2020	class A 2.49 EUR class E 2.93 EUR class V 2.87 EUR class M 2.51 EUR
2021	class A 5.06 EUR class E 5.46 EUR class V 5.39 EUR class M 5.13 EUR
2022	class A 5.41 EUR class E 6.43 EUR class V 6.34 EUR class M 6.37 EUR

9.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

9.11.3. Investment restrictions and overruns

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 02/01/2023 and 10/03/2023, a breach was noticed in the DPAM B Equities Europe Sustainable fund. Indeed, the fund takes the commitment to be invested at least 30% in assets with a social objective. As of 02/01/2023, the fund was at 27.50%. The breach was closed after adapting the positions.

Following this change of methodology, between NAV dates 21/04/2023 and 15/05/2023, a breach was noticed in the DPAM B Equities Europe Sustainable fund. Indeed, the fund takes the commitment to be invested at least 30% in assets with a social objective. As of 21/04/2023, the fund was at 29.65%. The breach closed after an adaptation of the fund's prospectus.

9.11.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

9.11.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES EUROPE SUSTAINABLE

Legal entity identifier:
549300SV5DKMF2R17Y04

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No	
<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 91.27% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://res.cloudinary.com/degroof-petercam-asset-https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;
- d. The Sub-fund had a better weighted average ESG profile than its benchmark: 62.22 compared to 61.57 (as at 31/12/2023).
- e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 623.40 tCO₂e/M revenue compared to 1181.64 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	0	97.91%
Sustainable Investment	81.47%	91.27%
Other Environmental Investments	52.05%	59.14%
Social	77.41%	29.5%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 60.69 Benchmark: 60.33	Sub-fund: 62.22 Benchmark: 61.57
Sustainability indicator e.	Sub-fund: 718.18 Benchmark: 1125.27	Sub-fund: 623.4 Benchmark: 1181.64

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 91.27% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 2.39% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 59.14% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 29.5% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 68.75% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 68.75% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et
<https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
NOVO NORDISK B	Manufacturing	5.00	Denmark
SCHNEIDER ELECTRIC	Manufacturing	4.49	France
ASTRAZENECA	Manufacturing	4.25	United Kingdom
SAP AG	Information and communication	4.16	Germany
BEIERSDORF	Manufacturing	3.84	Germany
L'OREAL SA	Manufacturing	3.83	France
NESTLE (NOM)	Manufacturing	3.42	Switzerland
AIR LIQUIDE (PORT)	Manufacturing	3.01	France
ATLAS COPCO A	Manufacturing	2.90	Sweden
ADIDAS NOM	Manufacturing	2.81	Germany
DSV	Transportation and storage	2.57	Denmark
ASML HOLDING	Manufacturing	2.55	Netherlands
EPIROC -A-	Manufacturing	2.50	Sweden
BNP PARIBAS	Financial and insurance activities	2.31	France
COMPASS GROUP PLC	Accommodation and food service activities	2.26	United Kingdom

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 97.91% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

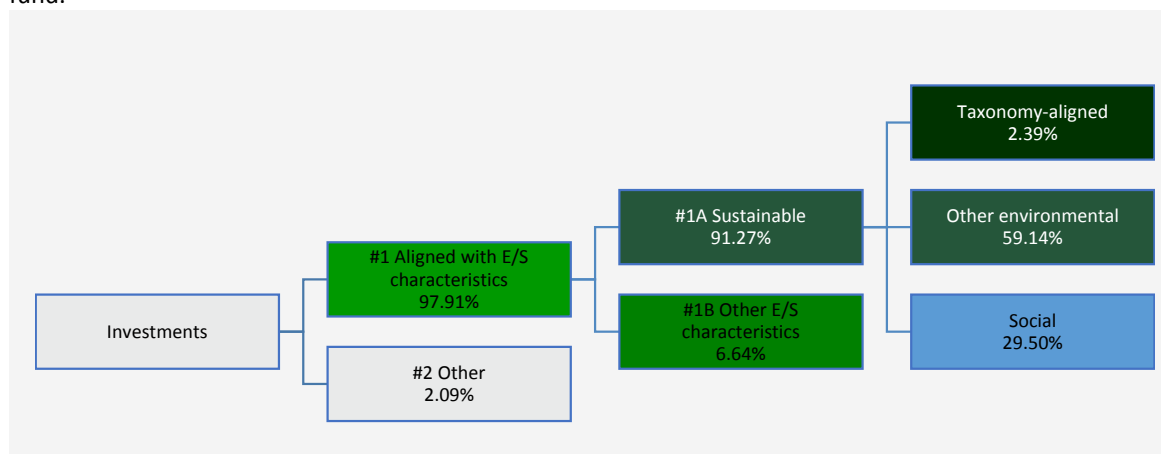

The Sub-fund invested at least 91.27% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	13.55
Manufacturing	Manufacture of chemicals and chemical products	12.24
Manufacturing	Manufacture of machinery and equipment n.e.c.	10.47
Financial and insurance activities	Financial service activities, except insurance and pension funding	8.12
Information and communication	Publishing activities	5.01
Manufacturing	Manufacture of food products	4.64
Manufacturing	Manufacture of electrical equipment	4.49
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.23
Information and communication	Telecommunications	3.68
Manufacturing	Manufacture of computer, electronic and optical products	3.19

Sector	Sub-sector	% assets
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	2.89
Manufacturing	Manufacture of leather and related products	2.81
Manufacturing	Manufacture of wearing apparel	2.75
Transportation and storage	Warehousing and support activities for transportation	2.57
Accommodation and food service activities	Food and beverage service activities	2.26
Manufacturing	Other manufacturing	2.22
Information and communication	Information service activities	1.98
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	1.91
Information and communication	Computer programming, consultancy and related activities	1.75
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.72
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	1.39
Manufacturing	Manufacture of basic metals	1.28
Professional, scientific and technical activities	Advertising and market research	1.26
Accommodation and food service activities	Accommodation	0.68
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.32
Professional, scientific and technical activities	Other professional, scientific and technical activities	0.31
Manufacturing	Manufacture of paper and paper products	0.19
Liquid assets	Liquid assets	2.09

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers.

The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 2.39% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.051%
 Enabling activities: N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	2.99%
1 January 2023 - 31 December 2023	2.39%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 59.14% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 29.50% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 2.09% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

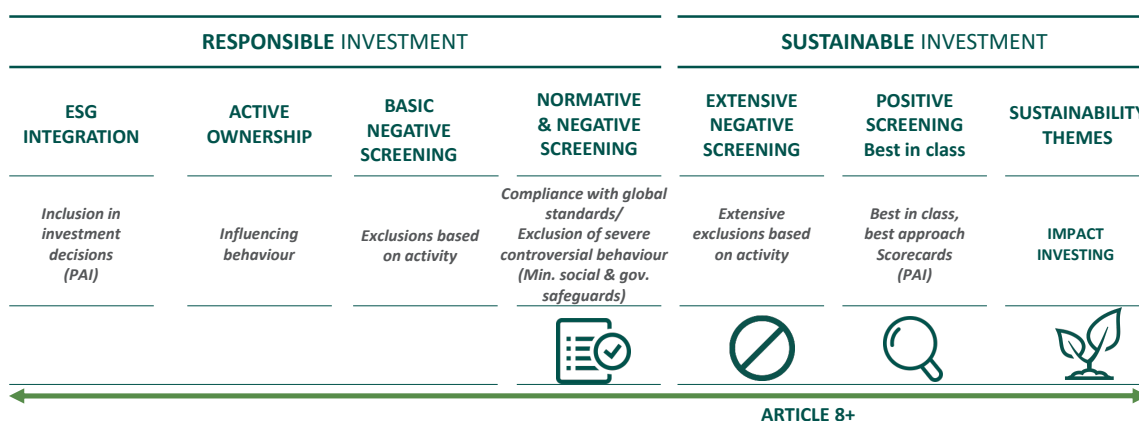

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (25% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable

- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**
Not applicable

10. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES NEWGEMS SUSTAINABLE

10.1. MANAGEMENT REPORT

10.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 02/10/2006.

Initial subscription price: EUR 100.

10.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

10.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors exposure to equities and/or equity-equivalent securities issued by companies without geographical restriction and all securities giving access to the capital of such companies, which are selected on the basis of themes linked to the acronym NEWGEMS (Nanotechnology, Ecology, Well-being, Generation Z, E-society, Manufacturing 4.0, Security) (trends and themes of activities linked to nanotechnology, ecology, wellbeing, generation Z, E-Society, manufacturing 4.0 and security - see investment policy below). These companies are selected on the basis of a strict methodology for compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund invests mainly in equities and/or equity-equivalent securities issued by companies "of the future" without geographical restriction, and in all securities giving access to the capital of such companies.

These companies "of the future" are identified by the acronym NEWGEMS (Nanotechnology, Ecology, Well-being, Generation Z, E-society, Manufacturing 4.0, Security) and include trends and themes of activities related to nanotechnology, ecology, well-being, generation Z, E-society, manufacturing 4.0 and security; activities that can be defined as follows (list is not exhaustive):

- **«Nanotechnology»**: Nanotechnology encompasses companies operating at a nano scale level (production of semiconductor chips, smartphones, industrial machines, medical devices, etc. which require complex miniaturisation) and the companies that make these advances possible.
- **«Ecology»**: Ecology includes companies whose activities relate to the environment and environmental protection.
- **«Well-being»**: Well-being includes any company whose activity involves the well-being of humans and animals.

- **«Generation Z»:** Generation Z refers to the generation after the millennials. In this area, the manager will invest in companies that facilitate the lifestyle of this generation (mobility, social media, online activities, etc.).

- **«E-society»:** E-society includes any company that is engaged in e-commerce, digitalisation and cloud computing and/or that offers this type of services.

- **«Manufacturing 4.0»:** Manufacturing 4.0 includes any company related to the new industrial revolution, robotics, automation, big data, the internet of things and artificial intelligence.

- **«Security»:** Security includes any company that relates to cybersecurity and physical security.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

10.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI World Net Return.

This index is representative of the equity market for large and mid-cap stocks from 23 developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) around the world.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

10.1.5. Policy followed during the year

At the start of 2023, investors feared a recession would impact stock prices. In reality, forecasting a recession is difficult. In contrast, the market's strong returns have been influenced by different catalysts. Moving away from macroeconomic headlines, it was the emergence of breakthrough technologies that propelled stock prices. This

underscores something we've stated since the inception of our strategy: innovation is a key driver of stock market performance.

Two technological advancements have dominated the spotlight. Generative AI made a grand entrance late last year with the debut of ChatGPT, swiftly becoming integral to many of our professional lives. Later in the year, GLP-1 drugs, initially developed for diabetes management, delivered impressive clinical trial results, demonstrating significant weight loss and (potential) improvements for comorbidities like heart disease and sleep apnea. These innovations are not just milestones for humanity; they have also generated hundreds of billions in market value.

The market's return has never been more concentrated in just a handful of stocks, and the dispersion in stock returns is exceptionally wide. The "Magnificent Seven" (Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla) drove most of stock market returns. Meanwhile, many other large caps, and especially small caps, underperformed significantly.

In our portfolio, this year approximately one-fifth was invested in companies with market caps under EUR 10 billion, and another fifth under EUR 30 billion. The former category had flat returns for the year, detracting nearly 7 percentage points from our 2023 performance. Fortunately, our stock selection in large caps was exceptional. On average, large caps above EUR 200 billion returned 62%, largely thanks to Nvidia's remarkable performance, where we significantly increased our stake late last year. Amazon, Microsoft, and Alphabet also made substantial contributions. This success reaffirms the efficacy of our "Barbell approach."

The surge in large cap tech stocks has been fueled by the high expectations for Generative AI. We have been early proponents of this trend and maintain our belief in its revolutionary potential. We've observed rapid adoption among developers and visual creators, with productivity boosts up to 50%, and we anticipate that the recent introduction of Microsoft Copilot will further amplify excitement for this technology.

As innovation-focused investors, we lean into these developments while acknowledging the rapid pace of change in this sector, which keeps us nimble. Our current view is that Generative AI will fortify the competitive edge of Big Tech companies. GenAI is highly compute intensive and as such requires a lot of infrastructure and money, two things the big tech have plenty of. Consequently, we have increased our exposure to these companies. Presently, we are concentrating on the "picks and shovels" of the AI race, namely semiconductor companies and cloud infrastructure providers. We notably increased our semiconductor holdings at the end of last year, including investments in pioneering firms like BE Semiconductor and ASM International.

We are witnessing software companies beginning to integrate Generative AI into their offerings. We've observed many established software firms, such as Adobe, ServiceNow, Synopsys, CrowdStrike, and Datadog, adopting this technology swiftly. Our large position in these companies has been the most significant contributor to this year's performance.

Regarding the GLP-1 weight-loss drugs, we did not hold positions in Eli Lilly or Novo Nordisk. Additionally, some of our holdings faced setbacks as clinical trials revealed positive outcomes for these drugs for other conditions, like cardiovascular events, sleep apnea or orthopedic injuries, affecting companies in our portfolio that provide medical devices for these indications (e.g. Edwards, Inspire, Paragon28). Despite the sell-off, we believe the long-term potential of these companies hasn't been impacted and have thus increased our positions, notably by re-entering Dexcom, the continuous glucose monitoring device maker, which we believe was unduly penalized.

The repercussions extended beyond healthcare, affecting large food companies as the weight-loss drugs could reduce overall calorie consumption. We saw a notable decline in unhealthy food stocks, which benefited us relatively as we do not hold any. However, our ingredient companies, which supply to many food companies, also experienced sharp drawbacks.

One strategic shift we made was to reduce our exposure to clean tech companies, such as solar and heat pump manufacturers (e.g. Enphase, Nibe), anticipating that higher interest rates could impact sales growth and because valuations were inflated by cleantech funds and ETFs. This decision proved prudent, as many of these stocks

plummeted this year. Our move to decrease cleantech exposure while increasing our stake in semi-conductor companies at the start of the year exemplifies the advantages of a flexible multi-thematic strategy.

Lastly, the exposure to the biopharma development and production value chain remains a significant component of the strategy. These companies have greatly benefited from Covid vaccine production and low-interest funding for biotech firms. However, that cycle has ended. With a sharp decline in Covid vaccine production and a dip in biotech funding, the industry is undergoing a recalibration. Despite underperforming this year, we are beginning to see stabilization in orders. We are confident in these companies' strong barriers to entry, recurring revenue streams, and the need for innovation in the pharmaceutical industry, which should lead to renewed growth.

In summary, this year's robust performance has been largely driven by the Generative AI narrative, a trend we continue to endorse. Nonetheless, there were pockets of weakness, particularly within small & mid-cap stocks and the healthcare sector. We remain optimistic about their long-term compounding potential and are strategically reallocating towards them.

In addition to the transactions highlighted earlier, we have added several compelling and diversifying assets to our portfolio throughout the year, such as Roper Technologies, Topicus, London Stock Exchange Group, IMCD, Eurofins and Canadian Pacific Railway. Concurrently, we have trimmed positions where our conviction has waned. Roper Technologies and Topicus stand out as two premier vertical market software entities. They each possess a suite of leading software solutions in specialized, niche markets, backed by a remarkable track record in mergers and acquisitions. London Stock Exchange Group, meanwhile, has curated a distinctive collection of data assets over time and is now channeling investments to enhance their monetization. These companies all exhibit key characteristics: mission-critical services, highly recurring revenue streams, and good capital allocation. These are more mature assets, anchoring the steadier end of our barbell strategy. They should also provide stability in the face of economic headwinds. Very often with a solid positive impact to society as well.

Rest assured that we are actively looking for the smaller, disruptive companies as well. During the year, we've added companies like Fortnox, a dominant ERP system for Swedish SMBs, as well as Onto Innovation and Nordic Semiconductor, both active within the semiconductor value chain. On Holdings and AirBnb were additions in the consumer realm of society.

10.1.6. Future policy

We will not deviate from our strategy to invest in innovative companies. We have therefore identified 7 major themes we invest in: Nanotechnology, Ecology, Wellness, Generation Z, E-Society, Manufacturing 4.0 and Security. Hence, our name, NEWGEMS. With any investment decision, we keep in mind a certain barbell approach between on the one hand, higher growth, relatively expensive and more risky names and on the other hand low(er) growth, less expensive and relatively more defensive names. Additionally, we integrate sustainable ESG KPI's (related to each theme) into our investment process as we are convinced that ESG risks and opportunities should be an integral part of a fundamental process.

10.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

MISCELLANEOUS CONSUMER GOODS	1.17%
ROAD & RAILWAY TRANSPORTS	1.03%
ENERGY SOURCES	0.88%
AGRICULTURE & FISHING	0.82%
UTILITIES	0.72%
PUBLISHING & BROADCASTING	0.52%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

10.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	307,918,775.66	315,757,673.22	623,676,448.88
Sales	368,268,638.75	378,205,608.68	746,474,247.43
Total 1	676,187,414.41	693,963,281.90	1,370,150,696.31
Subscriptions	178,008,178.37	158,921,688.58	336,929,866.95
Redemptions	227,097,038.60	212,160,739.86	439,257,778.46
Total 2	405,105,216.97	371,082,428.44	776,187,645.41
Reference average of the total net asset	1,224,527,557.26	1,292,642,306.42	1,258,864,855.47
Rotation Percentage	22.14%	24.98%	47.18%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

DPAM B
EQUITIES NEWGEMS SUSTAINABLE

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

10.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI World Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI World Net Return	19.60 % (in EUR)	10.99 % (in EUR)	13.58 % (in EUR)	11.54 % (in EUR)	02/10/2006	8.58 % (in EUR)

Class A

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A	28.00 % (in EUR)	3.69 % (in EUR)	14.88 % (in EUR)	12.20 % (in EUR)	02/10/2006	5.83 % (in EUR)

Class B

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B	28.06 % (in EUR)	3.73 % (in EUR)	14.91 % (in EUR)	12.21 % (in EUR)	02/10/2006	5.84 % (in EUR)

Class B USD

Table showing historical performance (actuarial returns):

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.95%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.17%

Fee sharing

As at 31 December 2023, 37.64% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

10.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

10.11.1. Gross dividends paid in the financial year

2019	class A 0.30 EUR
	class V 1.43 EUR
	class M 1.44 EUR
2020	class A 6.05 EUR
	class E 6.14 EUR
	class V 6.05 EUR
2021	class M 6.09 EUR
	class A 7.15 EUR
	class E 7.31 EUR
2022	class V 7.20 EUR
	class M 7.24 EUR
	class A 2.08 EUR
	class E 2.15 EUR
	class V 2.11 EUR
	class M 2.12 EUR

10.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

10.11.3. Investment restrictions and overruns

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 02/01/2023 and 15/05/2023, a breach was noticed in the DPAM B Equities Newgems Sustainable fund. Indeed, the fund takes the commitment to be invested at least 25% in assets with a social objective. As of 02/01/2023, the fund was at 24.15%. The breach closed after an adaptation of the fund's prospectus.

Between NAV Dates 11/10/2023 and 12/10/2023 a legal active breach was open in the DPAM B Equities NewGems Sustainable sub-fund. Indeed, following a redemption with trade date 09/10/2023 and value date 11/10/2023 the cash account deposited at Banque Degroof Petercam Luxembourg was in overdraft of EUR -9,345,599.32 representing -0.757% of the sub-fund's net assets. Sell transactions made to cover this redemption were made on TD 10/10/2023.

10.11.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

10.11.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES NEWGEMS SUSTAINABLE

Legal entity identifier:
54930001NHP87EWOJE18

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90.80% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

- During the Reference Period, the Sub-fund achieved the following sustainability indicators:
- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
 - b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
 - c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund had zero exposure to companies in the bottom 20% on more than 2 of its 4 main environmental, social or governance risks, specific to the company's activity and geographical scope and that, on this basis, there was no breach.

e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 540.86 tCO₂e/M revenue compared to 1199.15 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.25%	98.60%
Sustainable Investment	89.46%	90.80%
Other Environmental Investments	65.89%	74.00%
Social	88.12%	16.79%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 436.6 Benchmark: 1113.06	Sub-fund: 540.86 Benchmark: 1199.15

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund aimed to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 90.80% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 0% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 74.00% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 16.79% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 90.07% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

- o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

- o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf.

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 90.07% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	7.19	United States of America
AMAZON COM	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.79	United States of America
ALPHABET A	Information and communication	4.68	United States of America
VISA A	Administrative and support service activities	3.40	United States of America
THERMO FISHER SCIENTIFIC	Manufacturing	3.10	United States of America
NVIDIA CORP.	Manufacturing	2.78	United States of America
DANAHER CORPORATION	Manufacturing	2.61	United States of America
CELLNEX TELECOM SA	Information and communication	2.44	Spain
ABBOTT LABORATORIES	Manufacturing	2.30	United States of America
UNITEDHEALTH GROUP	Financial and insurance activities	2.26	United States of America
CROWDSTRIKE HOLDINGS, INC. CLASS A	Information and communication	2.05	United States of America
ADOBE SYSTEMS INCORPORATED	Information and communication	2.00	United States of America
ASTRAZENECA	Manufacturing	1.98	United Kingdom
SERVICENOW, INC.	Information and communication	1.94	United States of America
NETFLIX, INC.	Information and communication	1.91	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 98.60% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

The Sub-fund invested at least 90.80% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

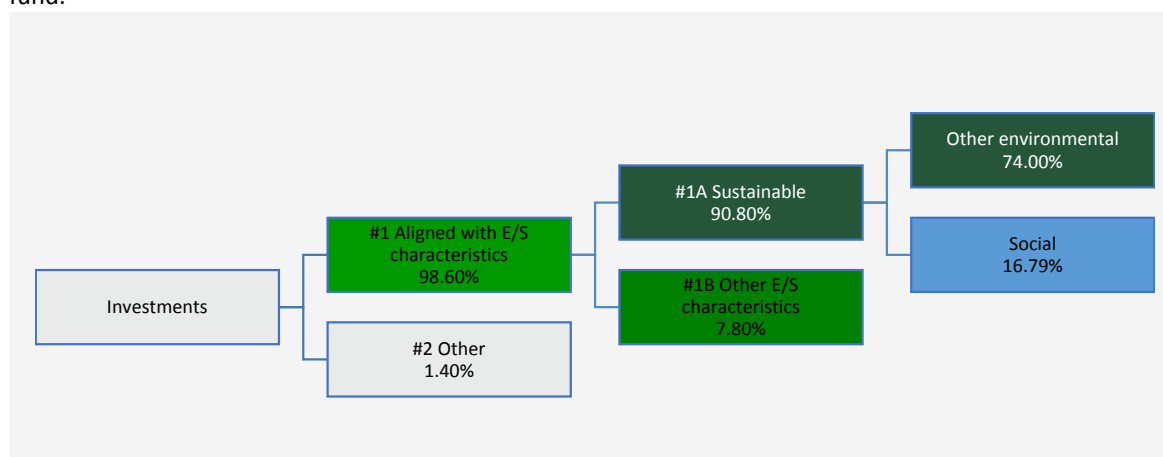

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these

objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Information and communication	Publishing activities	24.08
Manufacturing	Manufacture of computer, electronic and optical products	13.89
Information and communication	Information service activities	8.42

Sector	Sub-sector	% assets
Manufacturing	Other manufacturing	8.08
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	5.51
Manufacturing	Manufacture of machinery and equipment n.e.c.	5.37
Administrative and support service activities	Office administrative, office support and other business support activities	4.94
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.13
Information and communication	Computer programming, consultancy and related activities	3.05
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.69
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	2.47
Information and communication	Telecommunications	2.44
Professional, scientific and technical activities	Other professional, scientific and technical activities	1.79
Professional, scientific and technical activities	Scientific research and development	1.71
Manufacturing	Manufacture of food products	1.63
Manufacturing	Manufacture of chemicals and chemical products	1.51
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.18
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	1.05
Transportation and storage	Land transport and transport via pipelines	1.01
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.98
Financial and insurance activities	Financial service activities, except insurance and pension funding	0.92
Agriculture, forestry and fishing	Fishing and aquaculture	0.81
Real estate activities	Real estate activities	0.52
Manufacturing	Manufacture of leather and related products	0.43
Liquid assets	Liquid assets	1.40

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 0% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

Yes:

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.066%

Enabling activities: N/A

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	0.82%
1 January 2023 - 31 December 2023	0.0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 74.00% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 16.79% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.40% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals. The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

11. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES SUSTAINABLE FOOD TRENDS
--

11.1. MANAGEMENT REPORT

11.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 17/12/2007.

Initial subscription price: EUR 100.

11.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

11.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to provide investors with exposure to equities and/or equity-equivalent securities issued by companies that are active, directly or indirectly, in the food value chains in the broad sense of the term and in related or analogous sectors.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund.

No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The investments of this sub-fund mainly consist, without geographical limits, of shares or securities representing the share capital of companies that are active, directly or indirectly, in the agri-food value chains in the broad sense of the term and in related or analogous sectors. These agri-food value chains range from the production of food, including products and services that contribute to the production of food, to the sale of food products to the consumer. Companies whose activities such as storage, transport, packaging, processing etc., add value to food value chains, fall within the scope of the investment universe. Related sectors include, but are not limited to, plantations, storage, transport, packaging or agricultural businesses in general.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

All other securities giving access to the capital of these companies shall be treated as equivalent to these investments.

The sub-fund invests at least two thirds of its total assets in these investments.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities.

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

11.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

11.1.5. Policy followed during the year

DPAM B Equity Sustainable Food Trends invest throughout the agriculture & food value chain with a minimum exposure of 60% of individual companies to the value chain. The fund invests in selected subthemes based on the macroeconomic and sector specific environment.

During the year the fund sold its positions in SCG Packaging and Marel while adding Yakult Honsha, Bellring Brands and Treatt. We reduced weights in a number of companies such as Hellofresh, Jamieson Wellness, JDE Peet's, Kerry, Leroy Seafood, Sao Martinho, Sovos Brands, Sysco, Genus and Zoetis while adding to others such as Carbios, Tomra, Mowi, Salmar, Lotus Bakeries, Darling Ingredients, Bakkafrost and Colruyt.

The performance of the fund lagged the broader market as the fund is not exposed to the best performing sectors (mainly IT) and the US megacap companies that provided the bulk of the market performance. Best contributors over the year were Colruyt (margin recovery), Sovos Brands (bid by Campbell Soup), Lotus Bakeries (continued to surprise with a strong topline growth), Zoetis and Salmar. On the negative side Nutrien (lower fertilizer prices), DSM-Firmenich (pressure on earnings due to low vitamin prices), Darling Ingredients (pressured by the negative price evolution of renewable certificates), Tomra (cyber attack and several delays to the roll-out of deposit return schemes) and Bakkafrost (operational setback at the Scottish operations) were the largest detractors.

11.1.6. Future policy

Going forward we will continue to invest along the whole value chain from inputs to the final food product including areas which can contribute substantially to a more sustainable food chain such as packaging and paying particular attention to the reduction of food waste.

11.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

11.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	4,286,988.86	2,653,600.30	6,940,589.16
Sales	26,228,086.80	29,127,935.99	55,356,022.79
Total 1	30,515,075.66	31,781,536.29	62,296,611.95
Subscriptions	24,135,865.49	5,334,071.52	29,469,937.01
Redemptions	47,597,332.66	30,797,507.41	78,394,840.07
Total 2	71,733,198.15	36,131,578.93	107,864,777.08
Reference average of the total net asset	145,561,497.78	115,330,346.19	130,321,684.38
Rotation Percentage	-28.32%	-3.77%	-34.97%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

11.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 29.40% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

11.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

11.11.1. Gross dividends paid in the financial year

2019	class A 1.06 EUR class V 2.28 EUR class M 2.20 EUR
2020	class A 1.69 EUR class E 1.70 EUR class V 1.83 EUR class M 1.70 EUR
2021	class A 2.55 EUR class E 2.75 EUR class V 2.85 EUR class M 2.58 EUR
2022	class M 0.33 EUR class E 0.50 EUR class V 0.48 EUR

11.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

11.11.3. Investment restrictions and overruns

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 19/07/2023 and 24/07/2023, a breach was noticed in the DPAM B Equities Sustainable Food Trends fund. Indeed, the fund takes the commitment to be invested at least 10% in assets with an environmental investment objective. As of NAV date 19/07/2023, the fund was at 9.77%. The breach was closed after adapting the positions.

11.11.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

11.11.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES SUSTAINABLE FOOD TRENDS

Legal entity identifier:
549300RTIGL1SBGOOZ17

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.20% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund had zero exposure to companies in the bottom 20% on more than 2 of its 4 main environmental, social or governance risks, specific to the company's activity and geographical scope and that, on this basis, there was no breach;

e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark (DAX Agri [1]): 1363.30 tCO₂e/M revenue compared to 1376.12 tCO₂e/mn revenue (as at 31/12/2023).

[1] The Dax Agri Index is an index of listed companies active in the agriculture and food value chain. The index includes securities across the entire value chain, with the majority concentrated in the upstream side. By sector, the materials side (fertilizer companies and agrochemical producers) represents around 31% while agricultural equipment companies are weighted at around 20%. Consumer stocks account for around 30%, complemented by companies in the healthcare, consumer discretionary and energy sectors. By country, the United States constitutes the major part (57%), followed by Germany, the United Kingdom, Singapore and Canada, whose combined weight represents around 25%, with the weight of the other countries being less than 5%.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	-	96.12%
Sustainable Investment	90.23%	76.20%
Other Environmental Investments	-	14.13%
Social	87.69%	62.02%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 1387.73 Benchmark: 1402.62	Sub-fund: 1363.3 Benchmark: 1376.12

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the objectives of the sustainable investments that the Sub-fund intended to partially achieve were to invest in companies whose core business is aimed at more sustainable agriculture (including more sustainable food production and better preservation of land and biodiversity as well as the development of products, innovations and technologies aimed at promoting sustainable food consumption, facilitating the transition to healthy and sustainable diets and reducing food loss and waste) through:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution* to sustainability goals 2 (zero hunger) and 3 (good health and well-being).

For the Reference Period, the Sub-fund had 76.2% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 0.05% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 14.13% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 62.02% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 71.8% of the Sub-fund's portfolio was invested in companies making a net positive contribution to sustainable development goals 2 (zero hunger) and 3 (good health and well-being).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or making a net positive contribution to Sustainable Development Goals 2 (zero hunger) and 3 (good health and well-being). During the Reference Period, 71.8% of assets aligned with the EU Taxonomy or making a net positive contribution to Sustainable Development Goals 2 (zero hunger) and 3 (good health and well-being).

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at

<https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines

on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
DEERE & COMPANY	Manufacturing	8.62	United States of America
DSM-FIRMENICH LTD	Manufacturing	6.75	Netherlands
CF INDUSTRIES HOLDINGS	Manufacturing	6.42	United States of America
BAKKAFROST	Agriculture, forestry and fishing	5.17	Norway
DARLING INGREDIENTS	Manufacturing	5.15	United States of America
MARINE HARVEST ASA	Manufacturing	4.10	Norway
OCI NV	Manufacturing	3.77	Netherlands
LOTUS BAKERIES	Manufacturing	3.67	Belgium
NUTRIEN LTD.	Manufacturing	3.66	Canada
TOMRA SYSTEMS ASA	Manufacturing	3.33	Norway
COLRUYT	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.24	Belgium
TATE & LYLE PLC	Manufacturing	3.13	United Kingdom
COMPASS GROUP PLC	Accommodation and food service activities	3.07	United Kingdom
KWS SAAT	Administrative and support service activities	2.13	Germany
MIDDLEBY CORP	Manufacturing	2.11	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 96.12% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

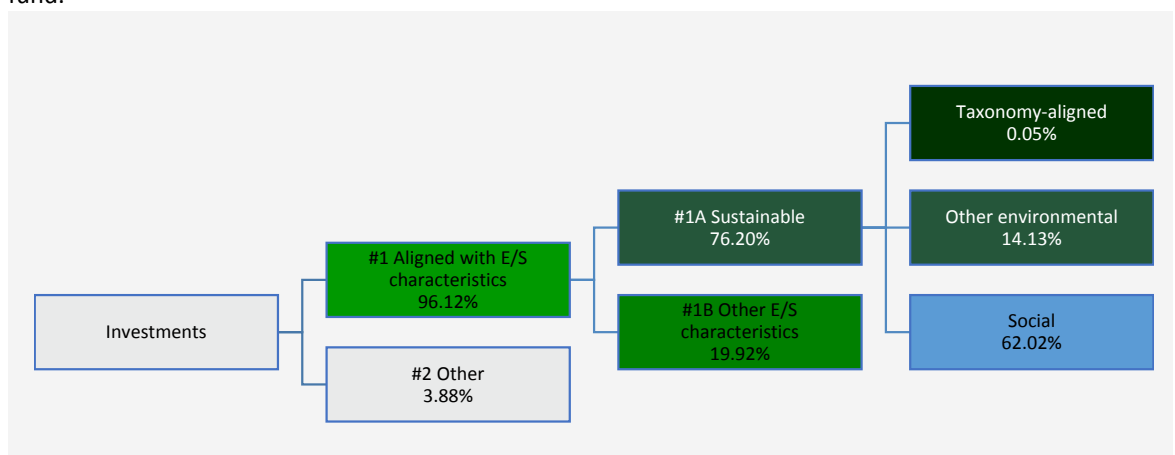

The Sub-fund invested at least 76.20% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Manufacturing	Manufacture of food products	28.36
Manufacturing	Manufacture of chemicals and chemical products	16.33
Manufacturing	Manufacture of machinery and equipment n.e.c.	15.59
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	9.95
Agriculture, forestry and fishing	Fishing and aquaculture	7.19
Accommodation and food service activities	Food and beverage service activities	5.05
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	3.95
Administrative and support service activities	Office administrative, office support and other business support activities	3.10
Agriculture, forestry and fishing	Crop and animal production, hunting and related service activities	2.44
Manufacturing	Manufacture of paper and paper products	1.44
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.44
Agriculture, forestry and fishing	Forestry and logging	1.27
Liquid assets	Liquid assets	3.88

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers.

The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.

- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 0.05% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.083%

Enabling activities: N/A

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	0.13%
1 January 2023 - 31 December 2023	0.05%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 14.13% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 62.02% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 3.88% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

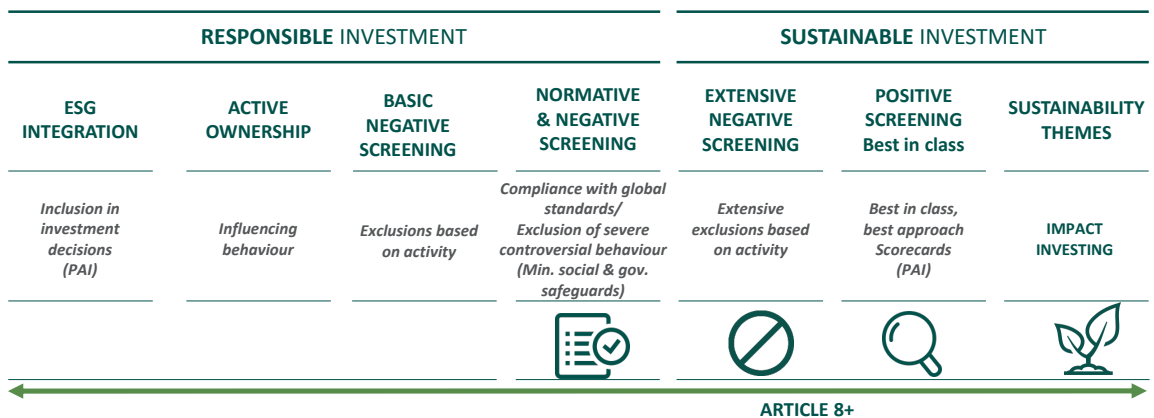

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (25% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

12. INFORMATION ABOUT THE SUBFUND DPAM B BONDS EUR IG

12.1. MANAGEMENT REPORT

12.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 30/06/2010
Initial subscription price: EUR 50.

12.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

12.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of short-, medium- and long-term instruments such as bonds and other debt securities or equivalent securities denominated in EUR, at fixed or floating rates, offering periodic or capitalized income and issued or guaranteed by Member States of the European Union.

The portfolio may also comprise government bonds (fixed-rate and variable-rate) issued by government agencies and by local authorities, government bonds denominated in a currency other than the country's local currency, and supranational agencies.

The issuers of the instruments in which the portfolio is invested must have a minimum rating corresponding to Investment grade* with each ratings agency (including Standards & Poor's, Moody's and Fitch) proposing the monitoring of the issuer.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Shareholders of the sub-fund have no capital protection or guarantee.

* Investment Grade: is an interpretation of the rating of the bond issuer in terms of the financial risks. Rating agencies each use their own scale to evaluate the notion of risk. Investment grade ratings are situated between AAA and BBB according to the Standard & Poor's and Fitch scales and between Aaa and Baa3 according to the Moody's scale.

Investment policy

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed

below (*)) and by its regional public bodies. These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

12.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: JPM EMU Government Investment Grade Total Return.

This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency, rated "investment grade" by each of the three major rating agencies (Standard & Poor's, Moody's and Fitch). Performance is calculated by reinvesting the coupons paid by the debt securities making up the index.

J.P. Morgan Securities PLC is listed on the register maintained by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

12.1.5. Policy followed during the year

Since the second quarter of 2023, we started observing certain red flags in economic data in Europe. From a positive standpoint, China exited its Covid lockdowns, energy prices dropped to almost pre-war levels, and inflation in general also started decreasing.

But still a specific part of the European economy was not rebounding. The manufacturing sector continued deteriorating although all stars were aligned for it to boom. This weakness in manufacturing was mainly driven by weak domestic demand. This first, logically, during the higher inflation regime since the Covid crisis. However, it even continued deteriorating going into the second quarter of the year. Up until then international demand for European goods was still positive, but over the summer, this also started dropping. Consequently, over the summer we decided to fully remove our underweight duration stance to a neutral level when the German 10Y Bund reached 2.5%.

It is of course perfectly possible to have the European economy experiencing a manufacturing trough as long as the services sector makes up for this. This was the case, but August brought a new next red flag. Typically, the summer months are peak tourism season and hence we observe an extremely strong services sector. But in August, even the services sector fell into contractionary territory as indicated by PMI data. At that moment it becomes even more important to thoroughly monitor incoming data as a period of weak activity typically leads to a softening of the labor market. And that lays the biggest risk for the European economy. Once real economic activity consistently falls, the demand for labor will also fall. Consequently, a vicious circle of decreasing activity and increasing unemployment will start appearing. Consequently, we started building up a long duration stance as we believed the next market moves

would be an interest rate rally. However, over September and October, interest rates continued decreasing. As this was not in line with the opposite movement of economic data, we continued adding duration up until the Bund reached 3%. By November, we reached an overweight of almost 1 year in the strategy.

But it has not only been soft data that has consistently deteriorated over the last quarters. When we look at hard economic data, the deterioration is also very clear and broad-based. When looking at bankruptcy data, real retail sales, European import and export data, labor market revisions, etc., they all point towards the possibility that this vicious circle has already started, and Europe is already in a recession. When taking a longer time frame, the only times these data were in this type of a downward trend, was when we were already in a recession. This time could be different, but it typically never is.

As typically a recession goes together with risk aversion, we decided to take significant profit on our allocation to Romania as this country typically underperforms in a rally. We believe an overweight stance on peripheral countries is still appropriate as since the Covid crisis they undertook significant fundamental changes. However, we have started building up an underweight stance on Italy. First as a hedge against the duration overweight, but now also as an outright short.

12.1.6. Future policy

In the end it is very easy to confirm the assertion whether Europe is in a recession and that's by looking at the definition of what a recession is. A recession constitutes two successive quarters of negative real GDP growth. When we assess this definition for all countries that are part of the European Union, already more than 25% is in recession! And if we look at those countries that experienced negative real GDP growth in the third quarter of the year, more than half of European countries experienced negative real GDP! Off course this does not mean that they will also fall in recession, but it is difficult to see a change in momentum given underlying activity data has forcefully continued deteriorating over the past months. To change this type of momentum there are not many solutions. One of them requires the ECB to start actively cutting interest rates. Unfortunately, it is clear that the ECB is not ready for this and is risking a severe policy mistake.

We believe a long duration bias remains very appropriate as once the ECB realizes we moved to the next phase of the economic cycle, they will move to the next phase of their monetary policy cycle. This also means that a curve steepening bias should play out very well as first the anticipation of cuts followed by actual decreases in the policy rate will affect the shorter end of yield curves much more than the longer end.

12.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

PORTUGAL	3.31%
CROATIA (REPUBLIC)	2.96%
NETHERLANDS	2.42%
LUXEMBOURG (GRAND DUCHY)	2.30%
SLOVENIA (REPUBLIC)	2.04%
ROMANIA	1.99%
SLOVAKIA (SLOVAK REPUBLIC)	1.93%
POLAND (REPUBLIC)	0.44%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

12.6. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
STATES	88.85%
BANKS	4.77%
EUROPEAN ORGANIZATIONS	3.01%
PROVINCE	2.88%
COMMERCIAL & PUBLIC SERVICES	0.40%
ROAD VEHICLES	0.09%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

12.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	71,393,786.84	64,860,380.43	136,254,167.27
Sales	7,878,092.59	4,954,907.57	12,833,000.16
Total 1	79,271,879.43	69,815,288.00	149,087,167.43
Subscriptions	73,923,367.26	64,462,634.57	138,386,001.83
Redemptions	10,899,894.78	4,835,135.15	15,735,029.93
Total 2	84,823,262.04	69,297,769.72	154,121,031.76
Reference average of the total net asset	76,004,203.91	142,256,912.80	109,402,829.76
Rotation Percentage	-7.30%	0.36%	-4.60%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

12.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: JPM EMU Government Investment Grade Total Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
JPM EMU Government Investment Grade Total Return	7.00 % (in EUR)	-5.39 % (in EUR)	-0.97 % (in EUR)	1.37 % (in EUR)		

Class A

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A	8.12 % (in EUR)	-4.69 % (in EUR)	-0.84 % (in EUR)	1.22 % (in EUR)		

Class B

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B	7.99 % (in EUR)	-4.76 % (in EUR)	-0.89 % (in EUR)	1.20 % (in EUR)		

Class F

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F	8.37 % (in EUR)	-4.46 % (in EUR)	-0.59 % (in EUR)	1.48 % (in EUR)		

Class M

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class M	8.26 % (in EUR)	-4.52 % (in EUR)	-0.67 % (in EUR)			

Class P

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class P	8.60 % (in EUR)	-4.26 % (in EUR)	-0.38 % (in EUR)	1.69 % (in EUR)	17/09/2013	1.83 % (in EUR)

Class W

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class W	8.38 % (in EUR)	-4.45 % (in EUR)	-0.58 % (in EUR)	1.50 % (in EUR)	14/08/2013	1.57 % (in EUR)

12.11. CHARGES

Recurring costs

- Class A - BE0935123431 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.58%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.15%

- Class B - BE0935124447 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.64%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.15%

- Class E - BE0935125451 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.35%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.15%

- Class F - BE0935126467 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.34%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.15%

- Class J - BE6299418440 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.25%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.15%

- Class L - BE6330740356 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.85%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.15%

- Class M - BE6299419455 :

Fee sharing

As at 31 December 2023, 1.95% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

12.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

12.12.1. Gross dividends paid in the financial year

2019	class A 0.65 EUR
	class M 0.68 EUR
2020	class A 0.62 EUR
	class M 0.74 EUR
2021	class A 0.80 EUR
	class M 0.81 EUR

12.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

12.12.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

12.12.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:
- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
 - not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
 - promoting environmental, social and governance (ESG) best practices.
 - by systematically applying a policy for impact bonds (such as green and social bonds).
 - excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- For investments in corporate bonds:
 - a. The Sub-fund has not been exposed to companies considered to be below Global Standards;

b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c. The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

- For investments in sovereign bonds:

a. The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

b. The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was higher than the benchmark. Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 6.91% while the benchmark was 2.52%.

- **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	95.39%	98.6%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Impact bonds	Sub-fund: 7.35% Benchmark: 0.73%	Sub-fund: 6.91% Benchmark: 2.52%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

- For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption.

Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of gender diversity on the board of directors is addressed primarily through shareholder responsibility by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For investments in sovereign bonds:

During the Reference Period, the Sub-fund took into consideration the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to DPAM's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et

<https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
0.8% SPAIN JUL27 30.07.2027	Public administration	5.46	Spain

ITALY (REPUBLIC OF) 4.5% 01/03/2026	Public administration	2.31	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.6% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	90.82
Financial and insurance activities	Financial service activities, except insurance and pension funding	4.71
Extraterritorial activities	Activities of extraterritorial organisations and bodies	2.97
Construction	Civil engineering	0.09
Derivatives	Derivatives	0.21
Liquid assets	Liquid assets	1.19

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

lowarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomyaligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**
 Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
 Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.19% in liquid assets and 0.21% in derivatives. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For investments in shares or corporate bonds:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For investments in sovereign bonds:

The Sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not

free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

13. INFORMATION ABOUT THE SUBFUND DPAM B REAL ESTATE EUROPE DIVIDEND SUSTAINABLE

13.1. MANAGEMENT REPORT

13.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 28/12/2010.

Initial subscription: EUR 100.

13.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

13.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders the highest long-term return through a balanced management policy by investing its assets in securities representing the real estate sector in the broad sense of the term in Europe, mainly with higher distributable income than the average of the investment universe. These securities include, but are not limited to, shares of Real Estate Investment Trusts (REITs), real estate certificates, real estate companies and companies active in the promotion and development of real estate, as well as shares of real estate debt investment companies, etc. These companies are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

50% of the net assets must be composed of securities with a prospective yield over 3 years higher than the average of the investment universe.

The average is defined as being the dividend yield of the FTSE EPRA/NAREIT Developed Europe index.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or voting rights. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets to the extent of such investments.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

13.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: FTSE EPRA/NAREIT Developed Europe Net Return.

This index is representative of the market for listed real estate companies in developed countries (as defined in the index methodology) in Europe. The performance of this index is calculated by reinvesting net dividends (Net Return).

FTSE International Limited is registered with the European Securities and Markets Authority (ESMA).

The benchmark is used as a means of comparing performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

13.1.5. Policy followed during the year

The year 2023 was characterized by a high volatility in interest rates expectations where macroeconomic elements played a massive important role influencing the fund's strategy. The year started positively with financial markets expecting a rapid decline in interest rates and falling inflation. After two months the narrative completely changed to higher for longer interest rates and further hiking by central banks. At the end of the year inflation data coming in softer than anticipated spurred the markets in a general view of central bank pivot to lower interest rates going forward.

Meanwhile on the real estate market, property values continued their decline, only been partly cushioned by increasing rent levels. Property companies therefore kept their strategy of deleveraging, through asset disposals, dividend cuts or equity injections. None of these actions are popular, albeit necessary. The lowly yielding and/or the highly levered companies were and are the most vulnerable and volatile companies in this landscape. Typically, they were the most affected when markets were in a risk-off mode during periods of increasing rates. But the year-end saw a rally in these companies bringing the total return of the European listed real estate sector close to +17%

In this macroeconomic context, the fund continued stayed disciplined in keeping overweight positions in lower levered companies. On a sector basis, it increased its exposure to the retail subsector over the year, predominantly by increasing the weight in URW. The fund also increased its exposure to student accommodation and healthcare. On the other hand, the fund reduced its exposure to logistics, following a takeover bid on a significant position in Interevest and also reduced exposure to offices.

13.1.6. Future policy

For 2024, we expect a continuation of a volatile environment. More visibility on interest rates should allow the investment market to increase volumes of transaction, setting clearance prices that will allow valuers to better assess the true value of assets. The fund will remain defensive as it is positioned most of the time.

Our strategy going forward will depend on the prospects for the companies in this volatile environment. We will continue to maintain a balanced portfolio. On the hand, we opt for companies that have strong balance sheets, strong prospects, and good visibility. These companies come at a price, but we appreciate their stability. On the other hand, we also opt for companies that are challenged but for which we believe that the management should be able to regain better earnings and visibility going forward. These companies trade at a sizeable discount, and therefore offer upside to the share price. One subsector to which we could increase our exposure again is logistics. We remain prudent on offices and constructive on retail.

The investment themes for 2024 are:

- Companies with strong balance sheets that hold quality assets, at the expense of companies with too much leverage;

- Companies evolving in a subsector where there is a supply shortage and thus higher rents rather than in a subsector where there is oversupply and thus lower rent growth;
- Companies with a strong ESG profile;
- Focus on total return, i.e., a combination of sustainable dividends and capital appreciation stemming from rental growth;
- Focus on long leases and quality tenants that enjoy competitive advantages in order to strengthen the cash flows;
- In a highly volatile environment, benefit from excessive market moves (rebuild positions in excessively penalized strong companies and vice versa);
- Companies clearly undervalued compared to industry peers.

13.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

13.2. BALANCE SHEET

		31 December 2023 EUR	31 December 2022 EUR

13.5. MANAGEMENT FEE OF THE UNDERLYING FUNDS OF THE SECURITIES PORTFOLIO

Description	Management fee	Country of domiciliation
REAL ESTATE CREDIT INVESTMENT LTD E		Guernsey

13.6. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
FRANCE	28.46%
BELGIUM	18.81%
GERMANY (FEDERAL REPUBLIC)	16.34%
UNITED KINGDOM	15.77%
GUERNSEY	7.46%
NETHERLANDS	7.41%
SPAIN	2.83%
SWEDEN	2.48%
JERSEY	0.44%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

13.7. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
REAL ESTATE	90.43%
FINANCIAL SERVICES - HOLDINGS	5.13%
OTHER SERVICES	2.83%
UNIT TRUSTS, UCIT	1.61%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

13.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	42,882,699.52	24,410,364.19	67,293,063.71
Sales	19,890,047.77	58,788,379.73	78,678,427.50
Total 1	62,772,747.29	83,198,743.92	145,971,491.21
Subscriptions	54,521,994.49	26,488,122.54	81,010,117.03
Redemptions	33,468,512.40	63,908,589.84	97,377,102.24
Total 2	87,990,506.89	90,396,712.38	178,387,219.27
Reference average of the total net asset	178,523,390.90	158,384,703.39	168,371,285.42
Rotation Percentage	-14.13%	-4.54%	-19.25%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

13.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 31.86% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

13.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

13.12.1. Gross dividends paid in the financial year

2019	class A 2.36 EUR class E 4.63 EUR class V 3.89 EUR class M 3.84 EUR
2020	class E 1.15 EUR (Interim dividend)
2021	class A 5.31 EUR class E 4.09 EUR class V 5.68 EUR class M 5.37 EUR
2022	class A 5.27 EUR class E 6.24 EUR class V 5.5 EUR class M 5.37 EUR

13.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

13.12.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

13.12.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B REAL ESTATE EUROPE DIVIDEND
SUSTAINABLE

Legal entity identifier:
5493007K2CAGW84OK191

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 95.69% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;
- d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;
- e. As at 31 December 2022, the proportion of issuers with Science Based Targets initiative (SBTi) or equivalent in the Sub-fund's portfolio was 51.40% (by weight of portfolio assets). The target is to reach at least 50% by 2026.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	96.6%	97.01%
Sustainable Investment	84.62%	95.69%
Other Environmental Investments	1.02%	8.48%
Social	34.02%	27.93%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 35.76	Sub-fund: 51.4

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 95.69% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 15.4% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 8.48% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 27.93% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 94.33% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

- o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

- o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 94.33% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
VONOVIA	Real estate activities	6.10	Germany
TAG TEGERNSEE IMMOBILIER	Real estate activities	4.82	Germany
UNIBAIL-RODAMCO	Real estate activities	4.43	France
LEG IMMOBILIEN	Real estate activities	4.41	Germany
ARGAN	Real estate activities	4.18	France
CTP BV	Real estate activities	4.06	Netherlands
MERCIALYS	Real estate activities	3.96	France
SIRIUS REAL ESTATE LIMITED	Real estate activities	3.94	United Kingdom
RETAIL ESTATES SICAFI	Real estate activities	3.74	Belgium
BRITISH LAND	Real estate activities	3.14	United Kingdom
ICADE	Real estate activities	2.84	France
MERLIN PROPERTIES SOCIMI SA	Real estate activities	2.79	Spain
LAND SECURITIES GROUP PLC	Real estate activities	2.79	United Kingdom
XIOR STUDENT HOUSING	Real estate activities	2.74	Belgium
AEDIFICA	Real estate activities	2.56	Belgium

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 97.01% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

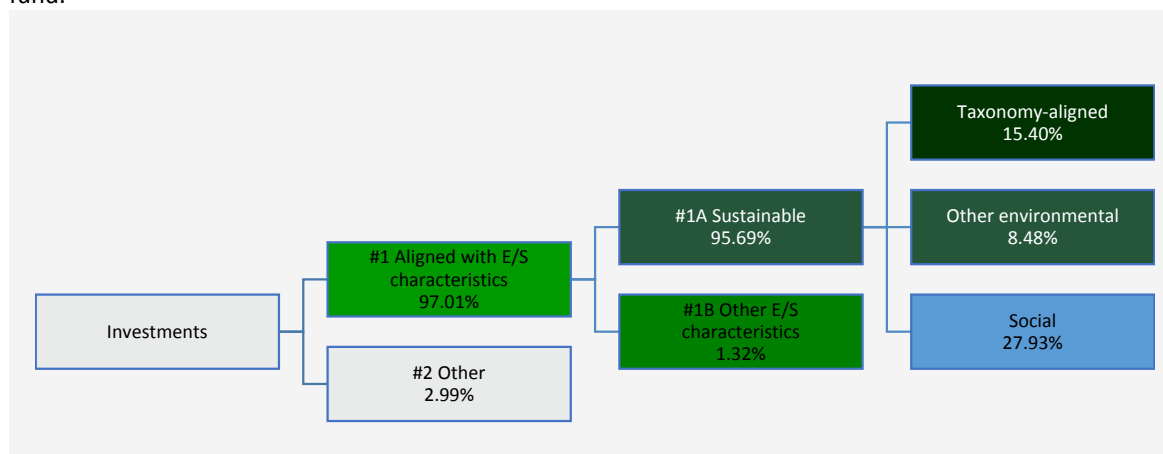

The Sub-fund invested at least 95.69% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Real estate activities	Real estate activities	97.01
Financial and insurance activities	Financial service activities, except insurance and pension funding	1.59
Liquid assets	Liquid assets	1.40

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 15.40% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	16.78%
1 January 2023 - 31 December 2023	15.40%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This Sub-fund does not seek to make sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. As at 31/12/2023, however, 8.48% is indicated in the section "What was the asset allocation".

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 27.93% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.4% in liquid assets and 1.59% in undertakings for collective investment. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**
Not applicable

14. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES DRAGONS SUSTAINABLE
--

14.1. MANAGEMENT REPORT

14.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription period: from 30/11/2020 to 15/12/2020.
Initial subscription price: EUR 100.

14.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

14.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer investors exposure to equities and/or equity-equivalent securities issued by companies whose registered office is located in the Asia-Pacific region or which have a majority of their economic activities in the Asia-Pacific region*, and to all securities giving entitlement to the capital of these companies, selected on the basis of their compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

*Asia-Pacific or APAC is the part of the world located in or near the Western Pacific Ocean. Asia-Pacific includes East Asia, South Asia, Southeast Asia and Oceania.

Investment policy

The sub-fund principally invests in the equities and/or other securities giving access to so-called “companies of the future” located in the Asia-Pacific region.

These “companies of the future” are identified by the acronym DRAGONS for:

- Disruptive Technologies (artificial intelligence, robotics, computer-aided design software, etc.),
- Rising Middle Class (luxury, travel, retail chain, etc.),
- Ageing & Health (healthcare, healthy eating, animal health, etc.),
- Generation Z (social media, cell phones, game consoles, etc.),
- O² & Ecology (renewable energies, water management, energy efficiency, etc.),
- Nanotechnologies (biotechs, advanced materials, semiconductors, etc.),
- Security (physical security, cyber-security, etc.).

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be charged to the Fund's assets to the extent of such investments.

14.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI AC Asia Pacific Net Return.

This index is representative of the large and mid-cap equity markets of 5 developed countries and 9 emerging countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the Asia-Pacific region. The performance of this index is calculated in reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performances.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

14.1.5. Policy followed during the year

2023 was a challenging year which saw continued outperformance of value stocks in most of our markets, particularly in Japan. These value stocks often include “old industries”, such as Energy (mostly coal and oil), Industrial Conglomerates (including Defense related companies) and Metals and Mining. Many of these companies do not represent attractive long-term investments, as they have structurally low returns and operate in industries with few entry barriers or negligible pricing power. They are also more prone to ESG controversy and do not align with our investment approach.

On the other hand, some of the “new industry” names we have in portfolio, such as positions in the Electric Vehicle and Renewable Energy value chain, performed poorly, despite solid earnings growth. Our positions in IT and Communication Services however did perform well.

Performance was also impacted by lower than anticipated economic growth and regulatory change in China. While long-term fundamentals remain intact, an anticorruption drive also triggered a sector-wide sell-off in China Health Care. The impact of these changes is expected to be temporary.

Diversification is ongoing and has already added value in managing our China exposure, funding successful investments in India and Japan. IT and Health Care remain core weights, aligned with our sustainability themes, but are now better diversified by market.

14.1.6. Future policy

We stay the course of focusing on “quality” names that fit our thematic and ESG-focused approach. Given underperformance of their shares in recent years, many of the names we hold in portfolio have become “value” and are attractively priced. We are also continuing to look for good “quality-value” companies in Japan, ASEAN, Taiwan and Australia.

The outlook for Asia remains positive with key markets in good shape, growing robustly. India and ASEAN are prime beneficiaries of supply chain diversification, expanding at 5% or more. While China’s growth is challenged, quality at

attractive valuations is evident. After Japan's value rally, quality-growth opportunities are emerging and offer opportunities to invest.

14.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

14.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	121,786,030.02	120,020,596.73	241,806,626.75
Sales	68,147,024.62	158,162,911.34	226,309,935.96
Total 1	189,933,054.64	278,183,508.07	468,116,562.71
Subscriptions	70,375,879.30	23,655,956.25	94,031,835.55
Redemptions	10,616,166.44	67,572,048.91	78,188,215.35
Total 2	80,992,045.74	91,228,005.16	172,220,050.90
Reference average of the total net asset	267,210,857.30	277,770,961.33	272,534,307.01
Rotation Percentage	40.77%	67.31%	108.57%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

14.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI AC Asia Pacific Net Return.

Fee sharing

As at 31 December 2023, 26.91% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

14.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

14.11.1. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

14.11.2. Investment restrictions and overruns

Following the clarifications provided by the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088, double counting should be avoided when an activity can contribute to several environmental and social objectives. As a result of this change in methodology, between NAV dates 22/05/2023 and 02/06/2023, a breach was noticed in the DPAM B Equities Dragons Sustainable fund. Indeed, the fund takes the commitment to be invested at least 20% in assets with a social objective. As of 22/05/2023, the fund was at 19.99%. The breach was closed after adapting the positions.

As a result of this change in methodology, since NAV date 13/12/2023, a breach was noticed in the DPAM B Equities Dragons Sustainable fund. Indeed, the fund takes the commitment to be invested at least 20% in assets with a social objective. As of 13/12/2023, the fund was at 19.32%.

Between NAV Dates 01/03/2023 and 03/03/2023, a legal passive breach was open in the DPAM B Equities DRAGONS Sustainable sub-fund. Following the settlement of several INR/EUR spots with trade date and value date 01/03/2023 the cash account deposited at Banque Degroof Petercam Luxembourg was in overdraft of EUR -2,707,605.29 (-1.021% of the sub-fund's net assets). The breach was resolved with the necessary cash transfers being made.

Between NAV Dates 13/04/2023 and 02/05/2023 a prospectus active breach was open in the DPAM B Equities DRAGONS Sustainable sub-fund. Investments were made in PRUDENTIAL PLC (2378 HK Equity) while this instrument was not allowed at that time because the company was not incorporated in Asia. A new version of the fund's prospectus - which would also allow companies with a country of risk in Asia - was approved by the PMC but at the time of the investments the new prospectus was not yet published which is necessary before any rules can be changed. The PM and Risk mistakenly already proceeded with the transactions before the publication of the new prospectus. As soon as the mistake came to light, the PM sold his exposure in the instrument.

14.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

14.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES DRAGONS SUSTAINABLE

Legal entity identifier:
549300RTV6DY8R3ZQM25

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90.12% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund had zero exposure to companies in the bottom 20% on more than 2 of its 4 main environmental, social or governance risks, specific to the company's activity and geographical scope and that, on this basis, there was no breach.

e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 502.10 tCO₂e/M revenue compared to 1330.62 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.75%	98.99%
Sustainable Investment	90.17%	90.12%
Other Environmental Investments	61.14%	67.69%
Social	8.823%	18.65%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 800.42 Benchmark: 1382.38	Sub-fund: 502.1 Benchmark: 1330.62

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 90.12% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 3.69% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation)
- 67.69% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 18.65% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 83.83% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

- o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

- o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 83.83% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Manufacturing	3.51	Taiwan
SAMSUNG ELECTRONICS CO. LTD.	Manufacturing	3.36	South Korea
CSL	Manufacturing	3.14	Australia
HDFC BANK -ADR-	Financial and insurance activities	2.88	India
OVERSEA-CHINESE BANKING CORPORATION	Financial and insurance activities	2.65	Singapore
AXIS BANK LTD	Financial and insurance activities	2.59	India
UNI-CHARM	Manufacturing	2.37	Japan
AJINOMOTO CO., INC.	Manufacturing	2.30	Japan
SONY CORPORATION	Manufacturing	2.25	Japan
PRUDENTIAL	Financial and insurance activities	2.25	United Kingdom
PT BANK CENTRAL ASIA TBK	Financial and insurance activities	2.17	Indonesia
AIA GROUP	Financial and insurance activities	2.10	Hong Kong
SMS	Administrative and support service activities	2.03	Japan
HOYA CORP	Manufacturing	1.85	Japan
CHINA YANGTZE POWER CO., LTD. CLASS A	Electricity, gas, steam and air conditioning supply	1.76	China

What was the proportion of sustainability-related investments?

● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 98.99% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

The Sub-fund invested at least 90.12% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

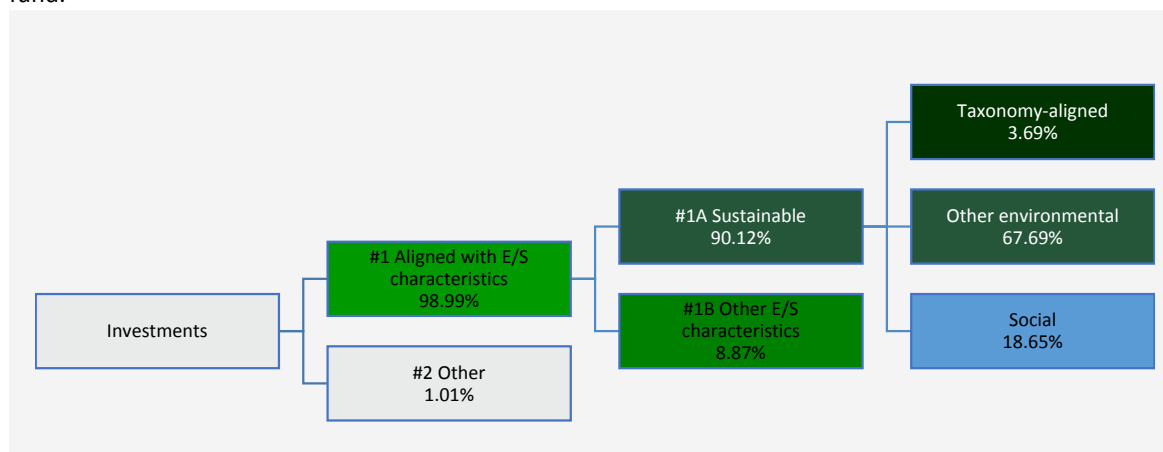

Asset allocation describes the share of investments in specific assets.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	14.56

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	13.03
Manufacturing	Other manufacturing	8.73
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	6.95
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.09
Information and communication	Publishing activities	5.98
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.35
Manufacturing	Manufacture of food products	4.33
Information and communication	Computer programming, consultancy and related activities	3.95
Administrative and support service activities	Employment activities	2.98
Manufacturing	Manufacture of chemicals and chemical products	2.80
Manufacturing	Manufacture of machinery and equipment n.e.c.	2.80
Manufacturing	Printing and reproduction of recorded media	2.64
Manufacturing	Manufacture of paper and paper products	2.37
Manufacturing	Manufacture of electrical equipment	2.29
Information and communication	Information service activities	2.29
Professional, scientific and technical activities	Scientific research and development	2.26
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	1.76
Information and communication	Telecommunications	1.62
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Human health activities	1.31
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.27
Manufacturing	Manufacture of basic metals	1.18
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.14
Administrative and support service activities	Office administrative, office support and other business support activities	0.91
Manufacturing	Manufacture of other transport equipment	0.80
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	0.62
Liquid assets	Liquid assets	1.01

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 3.69% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.080%
 Enabling activities: N/A

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	0.82%
1 January 2023 - 31 December 2023	3.69%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 67.69% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 18.65% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.01% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals. The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

15. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROLAND SUSTAINABLE

15.1. MANAGEMENT REPORT

15.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription period : from 30 November 2020 to 15 December 2020.

Initial subscription : EUR 100.

15.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

15.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to enable shareholders to benefit from the growth of shares of European companies or other equivalent securities having their registered office in one of the Member States of the European Union, which use the euro as their national currency and that are selected on the basis of environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

To achieve this objective, the sub-fund invests mainly in shares of European companies or other equivalent securities, having their registered office in one of the Member States of the European Union, which use the euro as their national currency, and which meet certain environmental, social and governance (ESG) criteria.

Other companies that have a significant proportion of their assets, activities, profit centres or decision-making centres in the aforementioned countries are treated in the same way.

More specifically, at least two-thirds of the sub-fund's investments are invested in stocks of companies which have their registered office or which carry out their primary economic activity in one of the European Union Member States which use the Euro as their national currency and any securities giving entitlement to the capital of these companies.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or voting rights. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets to the extent of such investments.

15.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

This index is representative of the large- and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section of the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

15.1.5. Policy followed during the year

The sub-fund managed to close 2023 in profit, and this despite a challenging first half of the year. It was mainly cyclical sectors that contributed positively to returns last year. All the sector contributed positively to the performance except for healthcare which lagged. IT, consumer discretionary and Industrials performed particularly well.

Within IT, this can mainly be explained by the strong performance of semiconductor stocks BESl, ASMI and SAP. Despite revenues not yet ameliorating, the advanced packaging businesses sequentially improved order intakes toward the end of the year. BESl in particular saw higher orders for computing, hybrid bonding and photonics applications, partially offset by reduced demand for automotive and industrial applications.

In consumer discretionary, Ferrari continued to post strong results reflected in both solid demand and profitability thanks to its strong model momentum. Stellantis, the other strong contributor, also saw solid orders intake demand last year. In industrials, Schneider, Kingspan and Safran were the main responsible for positive returns. Schneider has successfully repositioned its products and services around 3 megatrends: i) Electrification, ii) Digitization, and ii) Automation, which are the key drivers to decarbonize. Kingspan also benefitted from sustainability trends while in the geopolitical context of last year supported stronger sales than anticipated in Propulsion, Equipment and Interiors. Commercial aftermarket KPI have also been particularly solid. In consumer staples, Beiersdorf drove strong returns as it has demonstrated a successful turnaround following a focus on its winning categories.

Healthcare had a negative contribution as destocking in bioprocessing has been the main topic with weaker than expected production related demand from some customers and as time and magnitude of destocking came up bigger than anticipated.

During 2023, some positions were changed. New holdings in Publicis, Adidas and Ferrari were added. We like Publicis singular exposure to media and tech and its US leadership in the consumer experience category thanks to its huge data integration strategy. Adidas' improving brand heat and efforts with retailers have driven an improvement in trends from negative to positive through the year as well as in sales. We initiated a position in Ferrari due to its strong model momentum and demand.

Notable additions during 2023: Intesa, Getlink, Prysmian, Reply, DSM, EDP.

Notable dis-investments in 2023: Puma, Neste, Kerry, Hannover Rueck, Sampo, Worldline, ALD, Teleperformance, Dassault systèmes, Infineon, UPM, Hera.

15.1.6. Future policy

While European growth indicators currently indicate stability without signs of deterioration, they remain subdued. The overall positive impact of decreasing interest rates and energy prices is noteworthy. Despite the disruptive effects of the ongoing monetary tightening cycle across various market segments, it has concurrently expanded the range of stock-picking opportunities. Nevertheless, the significance of refinancing risks persists, and lower-quality companies are anticipated to face heightened challenges, despite a decline in rates from their peak.

Our central expectation continues to be an orderly economic slowdown. The evolving political agenda, with a shift towards the local level, is expected to provide more insights into the region's medium-term potential growth rate. Discussions with companies across sectors reveal advanced stages of destocking, while those aligned with structural trends express optimism about their future.

Against this backdrop, our investment approach maintains a medium to longer time horizon. As a sustainable European equity fund, our aim is to lead in our category. We diligently uphold our ESG profile, excluding controversial companies and those ranking in the bottom 10% of their sector based on ESG scores. Our focus centers on Eurozone companies with robust business models, deliberately steering clear of areas undergoing disruption.

15.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

With the exception of classes (F CHF HEDGED, F USD HEDGED) : 4.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

15.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	53,445,515.48	34,374,060.70	87,819,576.18
Sales	31,080,605.71	121,868,943.82	152,949,549.53
Total 1	84,526,121.19	156,243,004.52	240,769,125.71
Subscriptions	28,013,273.70	22,269,649.54	50,282,923.24
Redemptions	7,973,728.55	112,010,522.41	119,984,250.96
Total 2	35,987,002.25	134,280,171.95	170,267,174.20
Reference average of the total net asset	255,266,560.75	221,709,449.60	238,350,099.24
Rotation Percentage	19.02%	9.91%	29.58%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

15.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 56.24% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

15.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

15.11.1. Gross dividends paid in the financial year

2021 class 0.49 EUR

15.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

15.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

15.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES EUROLAND SUSTAINABLE

Legal entity identifier:
5493000VCZTSGS1H8O84

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 88.15% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund had a better weighted average ESG profile than its benchmark: 65.01 compared to 64.08 (as at 31/12/2023).

e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 1045.24 tCO₂e/M revenue compared to 1198.62 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	97.91%	97.51%
Sustainable Investment	87.22%	88.15%
Other Environmental Investments	53.92%	56.84%
Social	83.28%	25.55%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 61.7 Benchmark: 61.92	Sub-fund: 65.01 Benchmark: 64.08
Sustainability indicator e.	Sub-fund: 688.61 Benchmark: 998.11	Sub-fund: 1045.24 Benchmark: 1198.62

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 88.15% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 5.2% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 56.84% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 25.55% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 69.87% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 69.87% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et
<https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
SCHNEIDER ELECTRIC	Manufacturing	6.11	France
ASML HOLDING	Manufacturing	6.02	Netherlands
AIR LIQUIDE (PORT)	Manufacturing	5.13	France
SAP AG	Information and communication	5.08	Germany
BNP PARIBAS	Financial and insurance activities	4.45	France
L'OREAL SA	Manufacturing	3.51	France
EDP ENERGIAS DE PORTUGAL	Electricity, gas, steam and air conditioning supply	3.38	Portugal
ADIDAS NOM	Manufacturing	3.20	Germany
BEIERSDORF	Manufacturing	3.12	Germany
LVMH	Manufacturing	3.10	France
PIRELLI & C S.P.A.	Manufacturing	3.05	Italy
IBERDROLA SA	Electricity, gas, steam and air conditioning supply	2.92	Spain
STELLANTIS	Manufacturing	2.69	Italy
KBC GROEP	Financial and insurance activities	2.63	Belgium
AMADEUS IT GROUP SA	Information and communication	2.62	Spain

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests a minimum of 97.51% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

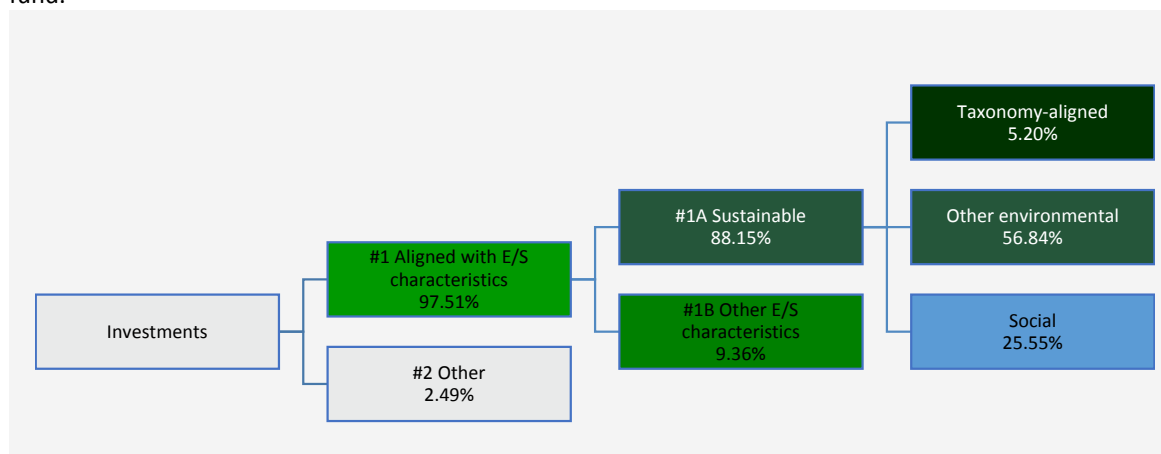

The Sub-fund invested at least 88.15% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Manufacturing	Manufacture of chemicals and chemical products	11.76
Financial and insurance activities	Financial service activities, except insurance and pension funding	10.74
Manufacturing	Manufacture of electrical equipment	7.42
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	6.30
Manufacturing	Manufacture of computer, electronic and optical products	6.02
Manufacturing	Manufacture of machinery and equipment n.e.c.	5.16
Information and communication	Publishing activities	5.08
Manufacturing	Manufacture of wearing apparel	4.81
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	4.41

Sector	Sub-sector	% assets
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	4.32
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.76
Information and communication	Telecommunications	3.61
Manufacturing	Manufacture of leather and related products	3.20
Manufacturing	Manufacture of rubber and plastic products	3.05
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	2.92

Transportation and storage	Postal and courier activities	0.83
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.31
Liquid assets	Liquid assets	2.49

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 5.20% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomyaligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.038%

Enabling activities: 0.000%

Enabling activities directly enable other activities to make a

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	4.16%
1 January 2023 - 31 December 2023	5.2%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 56.84% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 25.55% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 2.49% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

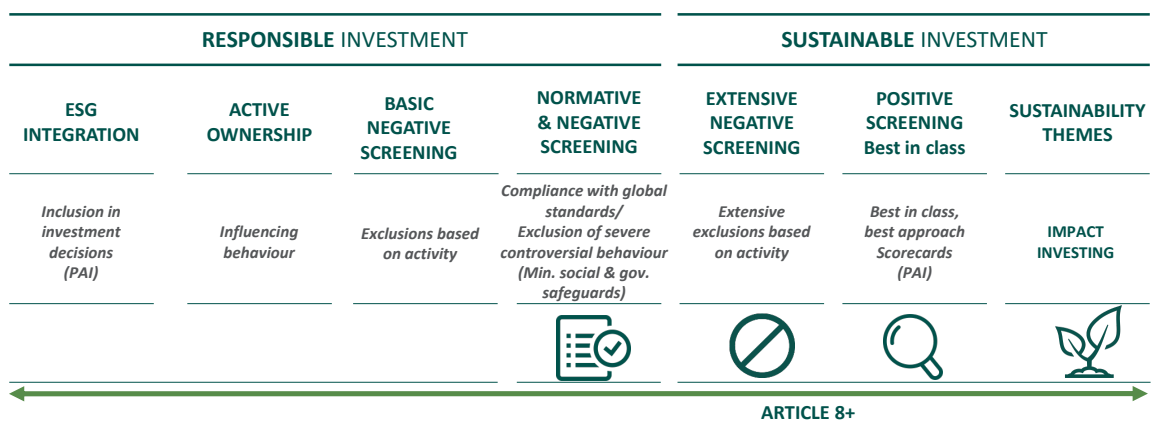

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (10% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable

- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**
Not applicable

16. INFORMATION ABOUT THE SUBFUND DPAM B BONDS EUR CORPORATE SUSTAINABLE

16.1. MANAGEMENT REPORT

16.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription period: 16 August 2021.

Initial subscription: EUR 100.

16.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

16.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to debt securities denominated in euros with at least an investment grade rating 25 These securities are selected on the basis of a strict methodology for compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

* Investment Grade: is an interpretation in terms of financial risk of the quality of the bond's issuer. The rating agencies each use their own scale to assess the notion of risk. Investment grade ratings are between AAA and BBB- on the Standard & Poor's and Fitch scale and between Aaa and Baa3 on the Moody's scale.

Investment policy

The sub-fund invests mainly in bonds and/or other debt securities (including, but not limited to, perpetual bonds and zero-coupon bonds), at a fixed or floating rate, denominated in euro, issued by companies and benefiting (or, failing that, their issuers) from an investment grade rating.

Stock-picking selection is based on economic and financial analyses, as well as a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of Regulation SFDR 2019/2088.

The sub-fund invests up to 10% of its assets in open-ended collective investment undertakings.

The sub-fund may hold cash on an ancillary or temporary basis in the form of current accounts, deposits or securities as well as in the form of undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more

than 10% of the capital or voting rights. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets to the extent of such investments.

16.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: iBoxx Euro Corporate Bond All Maturities index.

This index reflects the market performance of bonds denominated in EUR and issued by companies with an investment grade rating. The performance of the index is calculated by reinvesting gross coupons (Total Return index).

IHS Markit Benchmark Administration Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the sub-fund's environmental and social characteristics. Please refer to the "Investment Strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

16.1.5. Policy followed during the year

Fixed income markets have showcased an impressive rally across the year. Since the start of the year, the net asset value of the capitalization shares increased by 8.18% versus 8.19% for the € Iboxx All Maturities Corporate Bond Index.

During the year we selectively participated in new issues. We prefer the defensive stands, and opt for more A names.

16.1.6. Future policy

Current credit break-even spreads provide a high buffer against further weakness.

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

16.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

16.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	15,935,218.00	25,621,222.50	41,556,440.50
Sales	13,042,951.40	23,643,571.90	36,686,523.30
Total 1	28,978,169.40	49,264,794.40	78,242,963.80
Subscriptions	0.00	140,000.00	140,000.00
Redemptions	0.00	0.00	0.00
Total 2	0.00	140,000.00	140,000.00
Reference average of the total net asset	95,200,228.89	96,677,173.48	95,944,770.82
Rotation Percentage	30.44%	50.81%	81.40%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

16.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: iBoxx Euro Corporate Bond All Maturities index.

16.10. CHARGES

Recurring costs

- Class A - BE6328642713 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.62%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.18%

- Class B - BE6328643729 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.62%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.18%

- Class E - BE6328644735 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.32%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.18%

- Class F - BE6328645740 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.32%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.18%

Fee sharing

As at 31 December 2023, 39.57% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

16.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

16.11.1. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

16.11.2. Investment restrictions and overruns

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 14/02/2023 and 24/02/2023, a breach was noticed in the DPAM B Bonds EUR Corporate Sustainable fund. Indeed, the fund takes the commitment to be invested at least 15% in assets with a social objective. As of 14/02/2023, the fund was at 14.97%. The breach was closed after adapting the positions.

Following this change of methodology, between NAV dates 25/07/2023 and 22/09/2023, a breach was noticed in the DPAM B Bonds EUR Corporate Sustainable fund. Indeed, the fund takes the commitment to be invested at least 15% in assets with a social objective. As of 25/07/2023, the fund was at 14.88%. The breach was closed after adapting the positions.

Following this change of methodology, between NAV dates 27/11/2023 and 28/11/2023, a breach was noticed in the DPAM B Bonds EUR Corporate Sustainable fund. Indeed, the fund takes the commitment to be invested at least 15% in assets with a social objective. As of 27/11/2023, the fund was at 14.61%. The breach was closed after adapting the positions.

16.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

16.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B BONDS EUR CORPORATE SUSTAINABLE

Legal entity identifier:
549300LC2YTG9CBTQK47

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 89.57% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

- During the Reference Period, the Sub-fund achieved the following sustainability indicators:
- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
 - b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
 - c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. For the period from 01/01/2023 to 14/05/2023, the proportion of issuers with Science Based Targets initiative (SBTi) or equivalent in the Sub-fund's portfolio was 83.73% (by weight of portfolio assets). The target was to reach at least 40% by 2026.

Due to a material error in the prospectus, this sustainability indicator has been replaced in the prospectus of 15/05/2023 by the following sustainability indicator: "For the (corporate) credit segment, greater alignment of the portfolio with the Science Based Targets initiative (SBTi) than the benchmark."

During the Reference Period, the proportion of issuers adopting Science Based Targets initiative (SBTi) objectives in the Sub-fund's (corporate) credit portfolio was higher than the benchmark, at 85.82% compared with 63.79%;

e. For the period from 01/01/2023 to 14/05/2023, the greenhouse gas (GHG) emissions intensity of the Sub-fund below the average GHG emissions intensity of the benchmark prior to the application of the ESG and sustainable investment selection methodology. It should be noted that this benchmark is calculated over a rolling three-year period and that, on this basis, there has been no breach.

This sustainability indicator has been deleted and replaced in the prospectus of 15/05/2023 by the following sustainability indicator: "A better weighted average ESG profile than its benchmark, calculated over a rolling three-year period."

During the Reference Period, the Sub-fund had a better weighted average ESG profile than its benchmark: 61.55 compared to 59.91 (as at 31/12/2023). It should be noted that this benchmark is calculated over a rolling three-year period and that, on this basis, there has been no breach.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.98%	100.11%
Sustainable Investment	83.43%	89.57%
Other Environmental Investments	51.53%	66.29%
Social	74.09%	10.54%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 34.4 Benchmark: 26.79	Sub-fund: 85.82 Benchmark: 63.79
Sustainability indicator e.	Sub-fund: 59.48 Benchmark: 58.53	Sub-fund: 61.55 Benchmark: 59.91

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 89.57% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 9.11% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 66.29% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 10.54% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 85.93% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 85.93% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy

(<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at

<https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBEet> <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines

on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests a minimum of 100.11% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

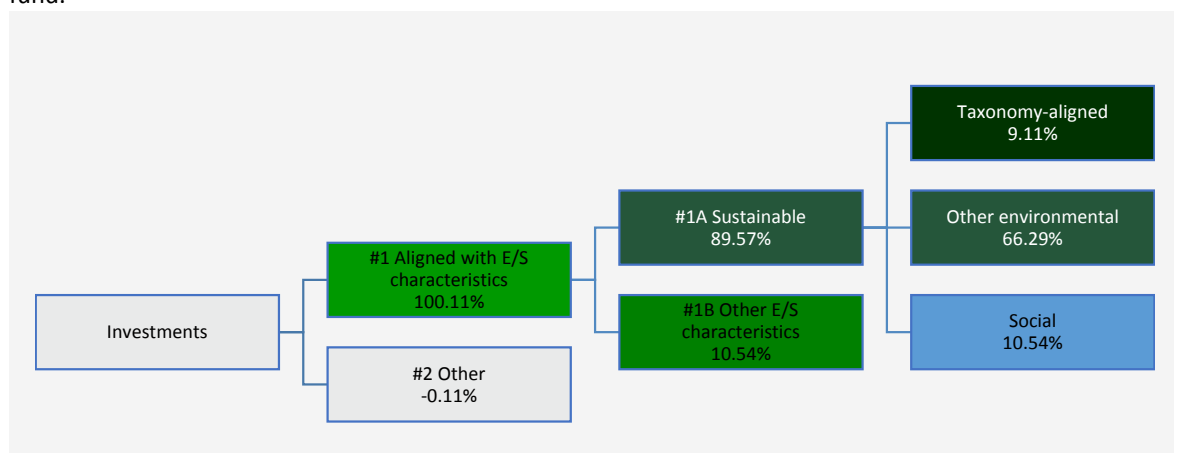

The Sub-fund invested at least 89.57% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	47.13
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	15.23

Manufacturing	Manufacture of beverages	0.46
Manufacturing	Manufacture of rubber and plastic products	0.34
Liquid assets	Liquid assets	-0.11

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 9.11% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -turnover reflecting the share of revenue from green activities of investee companies.
 -capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.047%
 Enabling activities: 0.001%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	6.63%
1 January 2023 - 31 December 2023	9.11%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 66.29% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 10.54% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to -0.11% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (10% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**

17. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES EUROPE INDEX

17.1. MANAGEMENT REPORT

17.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities Europe Index sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities Europe Index sub-fund of the DPAM CAPITAL B SICAV on 1 April 2022.

17.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

17.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in European equities.

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

17.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Net Return.

MSCI Europe Net Return covers approximately 85% of the floating market capitalisation of the countries in EUROPE zone. Additional information on this index and its composition can be found at www.msci.com.

The performance of the benchmark index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The tracking error is of the order of 1.3%.

17.1.5. Policy followed during the year

The benchmark of the DPAM B Equities Europe Index sub-fund is the MSCI Europe Net DTR Index. The MSCI Europe Net DTR Index, dividends net of local withholding tax reinvested, covers European countries and is established by MSCI. All the countries of Europe are included in this index, except Luxembourg given its low market capitalization. Greece was classified as an emerging country by the MSCI index at the end of 2013.

As of the end of the year, the index had 425 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying index. As in the past, full investment continued in this compartment. The level of liquidity, after deduction of futures contracts on stock market indices, was kept at a very low level. The use of futures on the Dow Jones Stoxx 50 index supplemented positions in equities and allowed to be fully invested through liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions.

During the year, the sub-fund closely followed the movement of the index.

17.1.6. Future policy

As in the past, the DPAM B Equities Europe Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the MSCI Europe Net DTR Index published by MSCI.

17.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

Purchases	11,418,624.55	391,454,806.21	402,873,430.76
Sales	12,388,823.75	5,600,342.59	17,989,166.34
Total 1	23,807,448.30	397,055,148.80	420,862,597.10
Subscriptions	22,083,545.63	408,809,730.29	430,893,275.92
Redemptions	28,116,375.86	24,481,257.14	52,597,633.00
Total 2	50,199,921.49	433,290,987.43	483,490,908.92
Reference average of the total net asset	217,609,470.90	494,699,541.45	357,293,232.49
Rotation Percentage	-12.13%	-7.32%	-17.53%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

17.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI Europe Net Return.

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.43%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

- Class P - BE6249809029 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.13%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

Fee sharing

As at 31 December 2023, 26.92% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

17.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

17.12.1. Gross dividends paid in the financial year

2016/2017	2.75 EUR
2018	class A 3.15 EUR class M 3.15 EUR
2019	class A 2.53 EUR class M 2.82 EUR
2021	class A 2.79 EUR class M 2.81 EUR

17.12.2. Transparency in sustainability

Mandatory declaration in accordance with Article 7 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment and amending Regulation (EU) 2019/2088

The investments underlying this sub-fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

Application of art. 7.1.b) of Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) - principal adverse impacts

During the period covered by the periodic report, this sub-fund did not take into account the principal adverse impacts (PINs), as it replicates an index whose methodology is determined by MSCI. methodology is determined by MSCI. Additional information on this index and its composition is available at available at www.msci.com.

17.12.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

18. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES US INDEX

18.1. MANAGEMENT REPORT

18.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities US Index sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger. Initial subscription price: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities US Index sub-fund of the DPAM CAPITAL B SICAV on 1 April 2022.

18.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

18.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in U.S. equities.

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

18.1.4. Index and benchmark

MSCI USA Net Return.

This benchmark is used in the management of the sub-fund.

MSCI USA Net Return covers approximately 85% of the free float market capitalisation of the countries in the USA zone included in the index. Further information on this index and its composition is available at www.msci.com.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The tracking error is about 1.5%.

18.1.5. Policy followed during the year

The benchmark of the Equities US Index sub-fund is the MSCI Daily Net Total Return USA Euro index.

The MSCI Daily Net Total Return USA Euro, dividends net of local withholding tax reinvested, covers the United States and is established by MSCI.

As of the end of the year, the index had 609 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying index (MSCI USA). As in the past, full investment continued in this compartment. The level of cash, after deduction of futures contracts on stock market indices, was kept at a very low level. The use of futures on the S&P 500 index supplemented positions in equities and allowed to be fully invested through liquid instruments without disrupting the portfolio structure during daily subscriptions and redemptions.

During the year, the sub-fund closely followed the movement of the index.

18.1.6. Future policy

As in the past, the Equities US Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the USA index published by MSCI.

18.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and Reward Profile: 4.

18.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	5,976,935.37	10,480,086.50	16,457,021.87
Sales	21,100,702.02	12,464,262.62	33,564,964.64
Total 1	27,077,637.39	22,944,349.12	50,021,986.51
Subscriptions	15,259,761.48	22,108,047.89	37,367,809.37
Redemptions	30,655,160.19	24,927,964.22	55,583,124.41
Total 2	45,914,921.67	47,036,012.11	92,950,933.78
Reference average of the total net asset	221,610,142.64	232,818,344.75	227,260,304.80
Rotation Percentage	-8.50%	-10.35%	-18.89%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

18.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 3.12% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

18.12.2. Transparency in sustainability

Mandatory declaration in accordance with Article 7 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment and amending Regulation (EU) 2019/2088

The investments underlying this sub-fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

Application of art. 7.1.b) of Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) - principal adverse impacts

During the period covered by the periodic report, this sub-fund did not take into account the principal adverse impacts (PINs), as it replicates an index whose methodology is determined by MSCI. methodology is determined by MSCI. Additional information on this index and its composition is available at available at www.msci.com.

18.12.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

19. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES JAPAN INDEX

19.1. MANAGEMENT REPORT

19.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities Japan Index sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities Japan Index sub-fund of the DPAM CAPITAL B SICAV on 1 April 2022.

19.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

19.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in Japanese equities.

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

19.1.4. Index and benchmark

The sub-fund uses the following index as benchmark: MSCI Japan Net Return.

This benchmark is used in managing the sub-fund.

MSCI Japan Net Return covers approximately 85% of the floating market capitalization of the countries in the JAPAN zone included in the index. Additional information on this index and its composition can be found at www.msci.com. The performance of the benchmark index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The tracking error is of the order of 2.0%.

The composition and value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

19.1.5. Policy followed during the year

The benchmark of the DPAM B Equities Japan Index sub-fund is the MSCI Japan Net DTR Index. The MSCI Japan Net DTR Index, Net Dividends Reinvested, covers Japan and is established by MSCI.

As of the end of the year, the index had 226 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying. The use of futures on the Nikkei 225 index supplemented positions in equities and allowed to be fully invested through a liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions. The Nikkei 225 Index correlates well with the MSCI Japan Net DTR Index. The results obtained on these futures are therefore close to those which would have been obtained directly in securities.

During the year, the sub-fund closely followed the movement of the index.

19.1.6. Future policy

The DPAM B Equities Japan Index sub-fund, whose vocation is to be representative of the Japanese market, will continue its investment policy based on broad sector diversification with the MSCI Japan Net DTR Index published by MSCI as a benchmark.

19.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

19.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	2,402,760.11	30,959,804.18	33,362,564.29
Sales	7,664,486.96	22,328,945.86	29,993,432.82
Total 1	10,067,247.07	53,288,750.04	63,355,997.11
Subscriptions	5,478,922.81	36,488,357.40	41,967,280.21
Redemptions	10,023,675.10	30,128,190.20	40,151,865.30
Total 2	15,502,597.91	66,616,547.60	82,119,145.51
Reference average of the total net asset	94,268,552.92	96,542,274.95	95,414,758.00
Rotation Percentage	-5.77%	-13.81%	-19.66%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

19.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI Japan Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI Japan Net Return	16.25 % (in EUR)	4.16 % (in EUR)	7.65 % (in EUR)	7.32 % (in EUR)	02/10/1996	2.54 % (in EUR)

Class A (Dis)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A (Dis)	15.26 % (in EUR)	3.34 % (in EUR)	6.89 % (in EUR)		09/11/2016	4.93 % (in EUR)

Class B (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B (Cap)	15.33 % (in EUR)	3.40 % (in EUR)	6.93 % (in EUR)	6.57 % (in EUR)	02/10/1996	2.11 % (in EUR)

Class F (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F (Cap)	15.68 % (in EUR)	3.69 % (in EUR)	7.24 % (in EUR)	6.83 % (in EUR)	14/12/2007	4.54 % (in EUR)

	1 year	3 year	5 year	10 year	Year	Value
Class P (Cap)	15.98 % (in EUR)	3.96 % (in EUR)	7.51 % (in EUR)	7.05 % (in EUR)	31/03/2013	7.05 % (in EUR)

19.11. CHARGES

Recurring costs

- Class A - BE6289154625 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.77%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class B - BE6278394695 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.71%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class E - BE6289157651 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.42%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class F - BE0947568722 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.42%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class J - BE6299535649 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.29%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class M - BE6299536654 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.52%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class N - BE6299537660 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.46%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

- Class P - BE6249812056 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.15%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.11%

Fee sharing

As at 31 December 2023, 18.09% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

19.12.1. Gross dividends paid in the financial year

2016/2017	1.67 EUR
2018	class A 2.15 EUR class M 2.45 EUR
2019	class A 1.57 EUR class M 1.86 EUR
2021	class A 2.20 EUR class M 2.21 EUR
2022	class A 1.15 EUR class M 1.45 EUR

19.12.2. Transparency in sustainability

Mandatory declaration in accordance with Article 7 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment and amending Regulation (EU) 2019/2088

The investments underlying this sub-fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

Application of art. 7.1.b) of Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) - principal adverse impacts

During the period covered by the periodic report, this sub-fund did not take into account the principal adverse impacts (PINs), as it replicates an index whose methodology is determined by MSCI. methodology is determined by MSCI. Additional information on this index and its composition is available at available at www.msci.com.

19.12.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

20. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES EMU INDEX

20.1. MANAGEMENT REPORT

20.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities EMU Index sub-fund of the DPAM CAPITAL B mutual fund. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: The initial subscription price corresponds to the net asset value of the shares of the DPAM CAPITAL B Equities EMU Index sub-fund of the DPAM CAPITAL B mutual fund on 1 April 2022.

20.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

20.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in equities from European Union member countries participating in the European Monetary Union (EMU).

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

20.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

This benchmark is used in managing the sub-fund.

MSCI EMU Net Return covers approximately 85% of the floating market capitalization of the countries in the EMU zone included in the index. Additional information on this index and its composition can be found at www.msci.com.

The performance of the benchmark index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The tracking error is of the order of 0.80%.

20.1.5. Policy followed during the year

The benchmark of the DPAM B Equities EMU Index sub-fund is the MSCI EMU Net DTR Index. The MSCI EMU Net DTR Index, dividends net of local withholding tax reinvested, covers Eurozone countries and is established by MSCI. All the countries of Eurozone are included in this index, except Luxembourg given its low market capitalization. Greece was classified as an emerging country by the MSCI index at the end of 2013.

As of the end of the year, the index had 228 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying index. As in the past, full investment continued in this compartment. The level of cash, after deduction of futures contracts on stock market indices, was kept at a very low level. The use of futures on the Dow Jones EuroStoxx 50 index supplemented positions in equities and allowed to be fully invested through liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions.

During the year, the sub-fund closely followed the movement of the index.

20.1.6. Future policy

As in the past, the DPAM B Equities EMU Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the MSCI EMU Net DTR Index published by MSCI.

20.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

20.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	1,744,356.98	59,195,010.49	60,939,367.47
Sales	3,875,182.24	12,604,971.31	16,480,153.55
Total 1	5,619,539.22	71,799,981.80	77,419,521.02
Subscriptions	5,582,840.31	61,100,560.04	66,683,400.35
Redemptions	8,255,252.82	16,251,676.20	24,506,929.02
Total 2	13,838,093.13	77,352,236.24	91,190,329.37
Reference average of the total net asset	105,838,121.16	133,501,796.18	119,783,645.01
Rotation Percentage	-7.77%	-4.16%	-11.50%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

20.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI EMU Net Return	18.78 % (in EUR)	8.30 % (in EUR)	9.54 % (in EUR)	6.36 % (in EUR)	15/04/1998	4.18 % (in EUR)

Class A (Dis)

- Class N - BE6299529584 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.44%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.09%

- Class P - BE6249813062 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.14%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.09%

Fee sharing

As at 31 December 2023, 15.88% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

20.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

20.12.1. Gross dividends paid in the financial year

2016/2017	2.53 EUR
2018	class A 3.55 EUR class M 3.90 EUR
2019	class A 2.40 EUR class M 2.73 EUR
2021	class A 2.55 EUR class M 2.55 EUR
2022	class A 2.76 EUR class M 3.07 EUR

20.12.2. Transparency in sustainability

Mandatory declaration in accordance with Article 7 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment and amending Regulation (EU) 2019/2088

The investments underlying this sub-fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

Application of art. 7.1.b) of Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) - principal adverse impacts

During the period covered by the periodic report, this sub-fund did not take into account the principal adverse impacts (PINs), as it replicates an index whose methodology is determined by MSCI. methodology is determined by MSCI. Additional information on this index and its composition is available at available at www.msci.com.

20.12.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

21. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES WORLD EX JAPAN, EUROPE & USA INDEX
--

21.1. MANAGEMENT REPORT

21.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities World ex Japan, Europe & USA Index sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger. Initial subscription price: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities World ex Japan, Europe & USA Index sub-fund of the DPAM CAPITAL B SICAV on 1 April 2022.

21.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

21.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in equities from Pacific Basin countries (ex-Japan), Canada and Israel.

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

21.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI World ex JEU Net Return.

MSCI World ex JEU Net Return: Composite index based on the MSCI [Daily Total Return Net] Australia, Canada, Hong Kong, New Zealand, Singapore and Israel indices of MSCI Inc. This benchmark is used for the management of the sub-fund.

MSCI World ex JEU Net Return covers approximately 85% of the free float market capitalization of the countries in the zone Australia, Canada, Hong Kong, New Zealand, Singapore and Israel included in the index.

Additional information on the index and its composition is available at www.msci.com.

The performance of the benchmark is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The "tracking error" is of the order of 1.4%.

21.1.5. Policy followed during the year

The benchmark of the DPAM B Equities World Ex-JEU Index sub-fund is the MSCI Daily Net Total Return Index Australia, Canada, Hong Kong, New Zealand, Singapore and Israel. The benchmark, dividends net of local withholding tax reinvested, is based on the market capitalization of the MSCI indices for Australia, Canada, Hong Kong, New Zealand, Singapore and Israel.

As of the end of the year, the index had 221 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents

The objective of the fund is to physically and fully replicate the composition of the underlying index. As in the past, full investment continued in this compartment. The level of cash was kept at a very low level.

During the year, the sub-fund closely followed the movement of the index.

21.1.6. Future policy

As in the past, the DPAM B Equities World Ex-JEU Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the same.

21.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

21.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	2,622,296.32	1,488,624.46	4,110,920.78
Sales	19,780,085.17	17,689,666.82	37,469,751.99
Total 1	22,402,381.49	19,178,291.28	41,580,672.77
Subscriptions	2,291,677.60	1,286,032.79	3,577,710.39
Redemptions	20,720,634.56	21,091,160.03	41,811,794.59
Total 2	23,012,312.16	22,377,192.82	45,389,504.98
Reference average of the total net asset	98,293,012.45	79,629,772.28	88,884,694.12
Rotation Percentage	-0.62%	-4.02%	-4.29%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

21.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI World ex JEU Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI World ex JEU Net Return	7.09 % (in EUR)	8.22 % (in EUR)	8.94 % (in EUR)	6.53 % (in EUR)	28/03/2001	6.70 % (in EUR)

Class A (Dis)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A (Dis)	5.82 % (in EUR)	7.21 % (in EUR)	8.06 % (in EUR)		09/11/2016	5.66 % (in EUR)

Class B (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B (Cap)	5.77 % (in EUR)	7.20 % (in EUR)	8.04 % (in EUR)	5.76 % (in EUR)	28/03/2001	5.81 % (in EUR)

Class F (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F (Cap)	6.11 % (in EUR)	7.55 % (in EUR)	8.39 % (in EUR)	6.03 % (in EUR)	26/12/2007	4.39 % (in EUR)

Class N (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class N (Cap)	6.09 % (in EUR)	7.53 % (in EUR)	8.37 % (in EUR)		29/12/2017	5.24 % (in EUR)

Class P (Cap)

Table showing historical performance (actuarial returns):

2016/2017	2.51 EUR
2018	class A 3.90 EUR class M 4.35 EUR
2019	class A 3.39 EUR
2021	class A 3.99 EUR
2022	class A 4.52 EUR

21.12.2. Investment restrictions and overruns

Between NAV Dates 03/07/2023 and 04/07/2023 a legal technical breach was open in the DPAM B Equities World ex Japan, Europe & USA Index sub-fund. Indeed, as at NAV date 03/07/2023, the cash account CA02EUR and CA02SGD held with Banque Degroof Petercam Luxembourg were respectively in overdraft of EUR -795,735 (representing -0.916% of the Sub-fund's net assets) and SGD -108,407 (representing -0.085% of the sub-fund's net assets). The total represents -1.001% of total net assets. This overdraft on the NAV was caused by 2 redemptions. The breach was resolved by the 1-day delay in cash outflow booking.

Between NAV Dates 31/08/2023 and 04/09/2023, a prospectus active breach was open in the DPAM B Equities World ex Japan, Europe & USA Index sub-fund. The PM purchased shares of SEMBCORP INDUSTRIES LTD (SG1R50925390) after an index reshuffle. The issuer was actually on the exclusion and blacklist for index funds due to its revenues from coal power generation. The purchase passed the Pre-Trade control due to human error but was alerted by the ex-post control the next day. After doublechecking with the SRI team, the PM sold the instrument on 04/09/2023.

21.12.3. Transparency in sustainability

Mandatory declaration in accordance with Article 7 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment and amending Regulation (EU) 2019/2088

The investments underlying this sub-fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

Application of art. 7.1.b) of Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) - principal adverse impacts

During the period covered by the periodic report, this sub-fund did not take into account the principal adverse impacts (PINs), as it replicates an index whose methodology is determined by MSCI. methodology is determined by MSCI. Additional information on this index and its composition is available at available at www.msci.com.

21.12.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

22. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES EMU BEHAVIORAL VALUE
--

22.1. MANAGEMENT REPORT

22.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities EMU Behavioral Value sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities EMU Behavioral Value sub-fund of the DPAM CAPITAL B SICAV on 1 April 2022.

22.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

22.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide the shareholders with as high a global return as possible. The sub-fund invests at least 50% in listed equities (without sector limitation) from the European Union member countries participating in the European Monetary Union (EMU). The investment policy embraces the principles of Behavioral Finance, a psychology-based academic field that analyses the financial markets.

The sub-fund invests in equities which are deemed undervalued and exhibit a good price momentum. The fund will continue to widely spread the risks, mainly by a large sector diversification.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

22.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

This index is representative of the market for large- and mid-cap equities in developed countries (as defined by MSCI and mainly according to the country of incorporation and the country of primary listing of its securities) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The benchmark is used as a means of comparing performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not tailored to promote the environmental and social characteristics of the sub-fund. The "Investment Strategy" section of the prospectus explains how the sub-fund promotes environmental and social characteristics.

22.1.5. Policy followed during the year

After a weak 2022, 2023 was still quite volatile as bond yields rose in the first half of the year on stickier inflation and rather hawkish central banks narrative. Though, markets finished the year on a very positive footing as inflation finally seem to fall for the earnest and bond yields fell materially. Defensive sectors underperformed (health care, staples and the utilities) while cyclicals shined. Information technology benefited from the AI frenzy while energy suffered from very weak oil prices and were not impacted by middle east geopolitical tensions. Value as a factor fluctuated over the course of the year. It suffered over the first semester as market were supported by technologies and AI thematics. Value recovered over the last quarter as cheap and previous losers recovered some luster. Over the entire period, the style has been matching the performance of the broad market. This year, the valuation metrics used to screen the universe and select stock has been complemented by incorporating an estimation of intangibles into the book value of companies.

Over the course of 2023, the fund maintained a small overweight in the cheaply valued sectors like financials and energy so as into quality defensive such as health care while keeping a underweight in the consumer discretionary, information technologies, and materials. Exposure to real estate has been reinforced from mid - November as bond yields has been peaking amid expectation of ECB's rate cut next year. The overweight in health care and underweight in technologies have been detracting performance over the year while stock selection in financials, materials, and energy (Totalenergies, ENI) helped the most. The most positive contributors to the performance were found in information technologies with stocks like SAP, Infineon, and STMicroelectronics, in the materials and capital goods with Heidelberg Materials, Siemens Saint-Gobain, in the utilities with ENEL, and in financials with Unicredit, BNP, and Banco Santander. The worst contributors were CNH Industrial, Kering, Teleperformance, Fresenius Medical Care, Deutsche Lufthansa, and Siemens Energy while lost dearly after unexpected heavy profit warning from its Spanish renewable energy entity. The latter stock has been sold since then.

22.1.6. Future policy

Value style should continue to benefit from cheap relative valuation as well as relatively good earnings growth and momentum. We will continue to implement the behavioral value systematic strategy by replacing relatively more expensive stocks within sectors by cheaper ones, avoiding value trapped, more financially challenged stocks, as well as highly controversial companies in terms of ESG, still paying close attention to the balance sheet quality and leverage as economic momentum could stay soft and impact of higher bond yields will start to have material impact on refinancing needs. The funds will keep a diversified sector and fairly neutral sector allocation.

22.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

22.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	232,132,657.62	69,014,325.07	301,146,982.69
Sales	484,908,004.02	302,726,863.11	787,634,867.13
Total 1	717,040,661.64	371,741,188.18	1,088,781,849.82
Subscriptions	13,359,776.81	537,368.57	13,897,145.38
Redemptions	272,377,403.44	236,617,783.21	508,995,186.65
Total 2	285,737,180.25	237,155,151.78	522,892,332.03
Reference average of the total net asset	370,800,390.01	174,022,848.16	271,602,944.26
Rotation Percentage	116.32%	77.34%	208.35%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

22.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI EMU Net Return	18.78 % (in EUR)	8.30 % (in EUR)	9.54 % (in EUR)	6.36 % (in EUR)	13/02/2002	4.40 % (in EUR)

Class A (Dis)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value

Class W (Cap)	18.00 % (in EUR)	8.52 % (in EUR)	8.70 % (in EUR)		13/12/2016	5.63 % (in EUR)

22.10. CHARGES

Recurring costs

- Class A - BE6289166744 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.93%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class B - BE0948777207 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.90%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class E - BE6289167759 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.02%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class F - BE0948779229 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.01%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class J - BE6299523520 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.62%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class L - BE0948778213 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	2.61%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class M - BE6299524536 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.12%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class N - BE6299525541 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.10%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class P - BE6249815083 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.21%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class V - BE6289168765 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.14%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

- Class W - BE6289169771 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.02%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.67%

Fee sharing

As at 31 December 2023, 36.10% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

22.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

22.11.1. Gross dividends paid in the financial year

2016/2017	2.21 EUR
2018	-
2019	class A 1.66 EUR class M 2.16 EUR
2021	class A 1.47 EUR class M 1.49 EUR

22.11.2. Investment restrictions and overruns

Between NAV Dates 23/03/2023 and 24/03/2023 a prospectus technical breach was open in the DPAM B Equities EMU Behavioral Value sub-fund. Indeed, due to a redemption the weight invested in EMU Equities totaled 78.852% which was below the 80% minimum limit of the fund's TNA. The breach was caused by a 1-day delay between the sell transactions and the deposit of the redemption amount. The breach was resolved by the 1-day delay in cash outflow booking.

Between NAV Dates 10/10/2023 and 11/03/2023 a prospectus technical breach was open in the DPAM B Equities EMU Behavioral Value sub-fund. Indeed, sub-fund invests at least 50% in listed equities (without sector limitation) from the European Union member countries participating in the European Monetary Union (EMU). At NAV date 10/10/2023 the weight was 23.55%. This was the result of a very large redemption (EUR 198 million or over 76% of the assets of the fund) on TD 10/10/2023 and VD 12/10/2023. The breach was caused by a 1-day delay between the sell transactions and the withdrawal of the redemption amount. The breach was resolved by the 1-day delay in cash outflow booking.

Between NAV Dates 10/10/2023 and 11/10/2023 a prospectus technical breach was open in the DPAM B Equities EMU Behavioral Value sub-fund. Indeed, due to a very large redemption (EUR 198 million or over 76% of the assets of the fund) the weight invested in EMU Equities totaled 23.55% which was below the 80% minimum limit of the fund's TNA. The breach was caused by a 1-day delay between the sell transactions and the deposit of the redemption amount. The breach was resolved by the 1-day delay in cash outflow booking.

22.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

22.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES EMU BEHAVIORAL VALUE

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

a) The sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.66%	97.63%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>).

In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
TOTAL ENERGIES	Mining and quarrying	4.02	France
SAP AG	Information and communication	4.01	Germany
SIEMENS (NOM)	Manufacturing	3.99	Germany
INFINEON TECHNOLOGIES (NOM)	Manufacturing	2.96	Germany
BNP PARIBAS	Financial and insurance activities	2.78	France
STMICROELECTRONICS	Manufacturing	2.36	France

Largest investments	Sector	% of assets	Country
SANOFI	Manufacturing	2.34	France
DANONE	Manufacturing	2.30	France
IBERDROLA SA	Electricity, gas, steam and air conditioning supply	2.17	Spain
HUGO BOSS	Manufacturing	2.11	Germany
HENKEL AG	Manufacturing	2.09	Germany
KERRY GROUP A	Manufacturing	2.05	Ireland
STELLANTIS	Manufacturing	1.93	Italy
INTESA SANPAOLO (ORD)	Financial and insurance activities	1.93	Italy
UNICREDIT SPA	Financial and insurance activities	1.92	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 97.63% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	9.33
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	7.81
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	6.74

Sector	Sub-sector	% assets
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	6.57
Manufacturing	Manufacture of computer, electronic and optical products	6.35
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.11
Manufacturing	Manufacture of machinery and equipment n.e.c.	4.57
Manufacturing	Manufacture of food products	4.35
Mining and quarrying	Extraction of crude petroleum and natural gas	4.02
Information and communication	Publishing activities	4.01
Manufacturing	Manufacture of electrical equipment	3.28
Manufacturing	Manufacture of chemicals and chemical products	3.17
Information and communication	Telecommunications	3.09
Manufacturing	Manufacture of wearing apparel	2.11
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.91
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	1.74
Manufacturing	Other manufacturing	1.71
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	1.62
Manufacturing	Manufacture of coke and refined petroleum products	1.60
Manufacturing	Manufacture of other transport equipment	1.53
Manufacturing	Manufacture of other non-metallic mineral products	1.48
Information and communication	Computer programming, consultancy and related activities	1.48
Information and communication	Motion picture, video and sound production and distribution	1.39
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.29
Professional, scientific and technical activities	Scientific research and development	1.23
Manufacturing	Manufacture of paper and paper products	1.22
Real estate activities	Real estate activities	1.21
Accommodation and food service activities	Accommodation	1.08
Construction	Civil engineering	1.04
Administrative and support service activities	Office administrative, office support and other business support activities	1.03
Manufacturing	Manufacture of rubber and plastic products	1.00
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	0.94
Other service activities	Other personal service activities	0.89
Transportation and storage	Air transport	0.74

Sector	Sub-sector	% assets
Liquid assets	Liquid assets	2.37

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomyaligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 2.37% in liquid assets. There are no minimum environmental or social guarantees on these investments.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

23. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES US BEHAVIORAL VALUE

23.1. MANAGEMENT REPORT

23.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities US Behavioral Value sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: The initial subscription price corresponds to the net asset value of the shares of the DPAM CAPITAL B Equities US Behavioral Value sub-fund of the DPAM CAPITAL B SICAV on 1 April 2022.

23.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

23.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide the shareholders with as high a global return as possible. The sub-fund invests in listed American equities. The investment policy embraces the principles of Behavioral Finance, a psychology-based academic field that analyses the financial markets.

The sub-fund invests in equities which are deemed undervalued and exhibit a good price momentum. The fund will continue to widely spread the risks, mainly by a large sector diversification.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

23.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI USA Net Return.

This index is representative of the market for large- and mid-cap equities in developed countries (as defined by MSCI and mainly according to the country of incorporation and the country of primary listing of its securities) in the United States.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment strategy" section of the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

The composition and value of the benchmark, if any, can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

23.1.5. Policy followed during the year

The year 2023 was a very strong year for US equities. If we look under the hood, we see that the market has been driven by a small number of large companies (the magnificent 7). Value has strongly underperformed the broader market and the growth style as did the fund. The best performing sectors were IT, consumer discretionary and communication services. In relative terms the fund lost the most in IT, health care, consumer discretionary and communication services. In IT not owning Nvidia and owning Cisco, Corning and SolarEdge Technologies were the most detrimental. In healthcare not owning Eli Lilly and owning Catalent and Pfizer were most detrimental to the performance in that sector. Not owning Tesla and owning Advanced Auto Parts was the most negative in consumer discretionary. In communication services not owning Meta was the most detrimental to the performance. The stock selection in energy was positive in absolute and relative terms with Marathon Petroleum and Halliburton the most positive. In industrials the fund outperformed by owning General Electric, Carrier Global and Ingersoll Rand. Some other names that benefited the performance were Salesforce in IT, JP Morgan and Bank of America in financials and Booking Holdings in consumer discretionary.

23.1.6. Future policy

We will continue to implement the behavioral value systematic strategy by replacing relatively more expensive stocks (within industry group) by cheaper ones, avoiding value trapped, more financially challenged stocks, as well as highly controversial companies, paying close attention to the quality of the balance sheet as to the Environmental, Social, and Governance dimensions. The funds will keep a diversified and close to neutral allocation at the sector level.

23.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and Reward Profile : 4.

OTHER SERVICES	0.69%
FOREST PRODUCTS & PAPER INDUSTRY	0.42%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

23.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	408,902,813.91	241,673,864.06	650,576,677.97
Sales	512,876,243.38	367,788,147.71	880,664,391.09
Total 1	921,779,057.29	609,462,011.77	1,531,241,069.06
Subscriptions	15,373,597.80	11,091,085.60	26,464,683.40
Redemptions	132,045,617.75	144,456,287.88	276,501,905.63
Total 2	147,419,215.55	155,547,373.48	302,966,589.03
Reference average of the total net asset	637,986,297.42	521,949,818.67	579,491,195.80
Rotation Percentage	121.38%	86.97%	211.96%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

23.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 15.10% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

23.11.2. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

23.11.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

a) The sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.72%	99.38%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption.

Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>).

In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	5.51	United States of America
ALPHABET A	Information and communication	3.08	United States of America
AMAZON COM	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.75	United States of America

Largest investments	Sector	% of assets	Country
INTEL CORP	Manufacturing	2.52	United States of America
JP MORGAN CHASE	Financial and insurance activities	2.22	United States of America

KEYSIGHT TECHNOLOGIES INC W/I	Manufacturing	1.44	United States of America

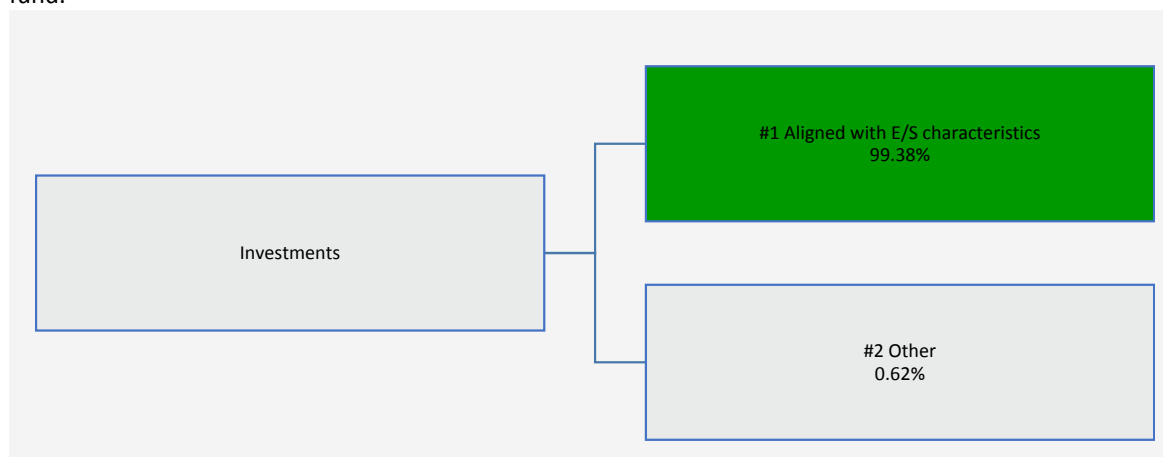

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 99.38% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	14.48
Information and communication	Publishing activities	9.54
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	6.85
Manufacturing	Manufacture of machinery and equipment n.e.c.	6.57
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.52
Financial and insurance activities	Financial service activities, except insurance and pension funding	6.15
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	5.97
Manufacturing	Manufacture of coke and refined petroleum products	4.84
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	4.27
Information and communication	Information service activities	4.04
Real estate activities	Real estate activities	2.92
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	2.73
Manufacturing	Manufacture of food products	2.17
Manufacturing	Manufacture of other non-metallic mineral products	1.99
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	1.89
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.55
Information and communication	Telecommunications	1.52
Information and communication	Programming and broadcasting activities	1.50
Administrative and support service activities	Office administrative, office support and other business support activities	1.23
Information and communication	Motion picture, video and sound production and distribution	1.18
Construction	Construction of buildings	1.14
Information and communication	Computer programming, consultancy and related activities	1.14
Manufacturing	Manufacture of beverages	1.10
Mining and quarrying	Mining of metal ores	1.08

Sector	Sub-sector	% assets
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.04
Manufacturing	Manufacture of other transport equipment	1.02
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Human health activities	1.00
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	1.00
Manufacturing	Manufacture of textiles	0.85
Manufacturing	Manufacture of chemicals and chemical products	0.76
Transportation and storage	Land transport and transport via pipelines	0.52
Manufacturing	Manufacture of electrical equipment	0.48
Transportation and storage	Air transport	0.32
Liquid assets	Liquid assets	0.62

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**
Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.62% in liquid assets. There are no minimum environmental or social guarantees on these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

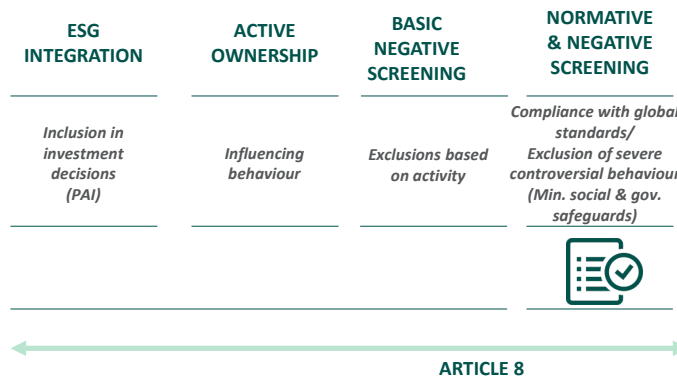

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

24. INFORMATION ABOUT THE SUB-FUND DPAM B REAL ESTATE EMU DIVIDEND SUSTAINABLE

24.1. MANAGEMENT REPORT

24.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022. On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Real Estate EMU Dividend Sustainable sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Real Estate EMU Dividend Sustainable sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

24.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

24.1.3. Aim and main outlines of the investment policy

Objective

The objective of this sub-fund is to offer shareholders the highest long-term return by investing its assets in securities representative of the real estate sector in the broad sense in the EMU zone.

The weighted average dividend yield of the sub-fund's assets must be higher than the dividend yield of the FTSE EPRA/NAREIT Eurozone Capped Net Return Index. These companies are selected on the basis of their compliance with environmental, social and governance (ESG) criteria. The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may not invest more than 10% of its assets in units of other undertakings for collective investment.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

24.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: FTSE EPRA/NAREIT Eurozone Capped Net Return index.

This index is representative of the market for listed real estate companies in developed countries (as defined in the index methodology) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

FTSE International Limited is registered with ESMA (European Securities and Markets Authority).

The composition and value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

24.1.5. Policy followed during the year

The B share class increased by 17.76% in 2023. The year 2023 was characterized by a high volatility in interest rates expectations where macroeconomic elements played a massive important role influencing the fund's strategy. The year started positively with financial markets expecting a rapid decline in interest rates and falling inflation. After two months the narrative completely changed to higher for longer interest rates and further hiking by central banks. At the end of the year inflation data coming in softer than anticipated spurred the markets in a general view of central bank pivot to lower interest rates going forward.

Meanwhile on the real estate market, property values continued their decline, only been partly cushioned by increasing rent levels. Property companies therefore kept their strategy of deleveraging, through asset disposals, dividend cuts or equity injections. None of these actions are popular, albeit necessary. The lowly yielding and/or the highly levered companies were and are the most vulnerable and volatile companies in this landscape. Typically, they were the most affected when markets were in a risk-off mode during periods of increasing rates. But the year-end saw a rally in these companies bringing the total return of the Eurozone listed real estate sector close to +16%

In this macroeconomic context, the fund continued stayed disciplined in keeping overweight positions in lower levered companies. On a sector basis, it increased its exposure to the retail subsector over the year, predominantly by increasing the weight in URW. The fund also increased its exposure to student accommodation and healthcare. On the other hand, the fund reduced its exposure to logistics, following a takeover bid on a significant position in Interwest and reduced exposure to offices.

24.1.6. Future policy

For 2024, we expect a continuation of a volatile environment. More visibility on rates will allow the investment market to increase volumes of transaction, setting clearance prices that will allow valuers to better assess the true value of assets. The fund will remain defensive as it is positioned most of the time.

Our strategy going forward will depend on the prospects for the companies in this volatile environment. We will continue to maintain a balanced portfolio. On one hand, we opt for companies that have strong balance sheets, strong prospects, and good visibility. These companies come at a price, but we appreciate their stability. On the other hand, we also opt for companies that are challenged but of which we believe that the management should be able to regain better earnings and visibility going forward. These companies trade at a sizeable discount, and therefore offer upside to the share price. One subsector to which we could increase our exposure is logistics. We remain prudent on offices and constructive on retail.

The investment themes for the first half of 2024 are:

- Companies with strong balance sheets that hold quality assets, at the expense of companies with too much leverage;
- Companies evolving in a subsector where there is a supply shortage and thus higher rents rather than in a subsector where there is oversupply and thus lower rent growth;
- Companies with a strong ESG profile;
- Focus on total return, i.e., a combination of sustainable dividends and capital appreciation stemming from rental growth;
- Focus on long leases and quality tenants that enjoy competitive advantages in order to strengthen the cash flows;
- In a highly volatile environment, benefit from excessive market moves (rebuild positions in excessively penalized strong companies and vice versa)
- Companies clearly undervalued compared to industry peers.

24.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

24.5. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
FRANCE	35.98%
BELGIUM	23.35%
GERMANY (FEDERAL REPUBLIC)	21.45%
NETHERLANDS	7.30%
SPAIN	4.85%
LUXEMBOURG (GRAND DUCHY)	3.94%
GUERNSEY	2.54%
FINLAND	0.59%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

24.6. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
REAL ESTATE	91.40%
OTHER SERVICES	4.85%
FINANCIAL SERVICES - HOLDINGS	3.75%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

24.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	23,197,779.77	18,426,325.49	41,624,105.26
Sales	23,326,074.48	15,105,124.39	38,431,198.87
Total 1	46,523,854.25	33,531,449.88	80,055,304.13
Subscriptions	13,791,832.40	10,533,204.15	24,325,036.55
Redemptions	16,553,045.70	9,081,432.01	25,634,477.71
Total 2	30,344,878.10	19,614,636.16	49,959,514.26
Reference average of the total net asset	82,138,192.73	88,575,237.55	85,383,168.75
Rotation Percentage	19.70%	15.71%	35.25%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

24.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: FTSE EPRA/NAREIT Eurozone Capped Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
FTSE EPRA/NAREIT Eurozone Capped Net Return	15.41 % (in EUR)	-6.11 % (in EUR)	-2.05 % (in EUR)	3.82 % (in EUR)		

Class B (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B (Cap)	16.71 % (in EUR)	-4.44 % (in EUR)	-1.63 % (in EUR)	3.23 % (in EUR)		

Class E (Dis)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class E (Dis)	17.76 % (in EUR)	-3.69 % (in EUR)	-0.94 % (in EUR)			

Class F (Cap)

Table showing historical performance (actuarial returns):

Fee sharing

As at 31 December 2023, 62.13% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

24.11.2. Investment restrictions and overruns

Between NAV Dates 07/02/2023 and 09/02/2023 a legal passive breach was open in the DPAM B Real Estate EMU Dividend Sustainable sub-fund. Indeed, due to a large redemption (2.73% of the AUM) on TD 03/02/2023 and VD 07/02/2023, several transactions were made to cover this. The sell order for 20,550 shares of Shurgard was only partially executed on 03/02/2023 creating a negative cash amount. The remaining shares were sold the following day. The partial execution was caused by market conditions due to the illiquidity of the market. The breach stayed open for a consecutive day due to market fluctuations. The breach was resolved the following day as the instruments were automatically sold.

Between NAV Dates 05/04/2023 and 06/04/2023 a legal technical breach was open in the DPAM B Real Estate EMU Dividend Sustainable sub-fund. Indeed, due to a subscription the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. The total weight attributed to 57.747%. The breach was caused by a 1-day delay between the buy transactions and the reception of the subscription amount which has caused the instrument weights within the fund to be inflated. The breach was resolved by the 1-day delay in cash inflow booking.

Between NAV Dates 09/05/2023 and 10/05/2023 a prospectus passive breach was open in the DPAM B Real Estate EMU Dividend Sustainable sub-fund. A breach of the constraint "The weighted average dividend yield of the sub-fund's assets must exceed the dividend yield of the FTSE EPRA/ NAREIT Eurozone Capped Net Return Index", the weighted average dividend yield for the fund was 7.032 while the dividend yield for the benchmark was 7.114. This was caused by market fluctuations. The breach was resolved by adapting the positions in question.

Between NAV Dates 12/05/2023 and 15/05/2023 a legal passive breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. This was created by market fluctuations. The total weight attributed to 43.731%. The breach was resolved by adapting the positions in question.

Between NAV Dates 05/06/2023 and 06/06/2023 a legal technical breach was open in the DPAM B Real Estate EMU Dividend Sustainable sub-fund. Indeed, due to a subscription the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. The total weight attributed to 43.169%. The breach was caused by a

1-day delay between the buy transactions and the reception of the subscription amount which has caused the instrument weights within the fund to be inflated. The breach was resolved by the 1-day delay in cash inflow booking.

24.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

24.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B REAL ESTATE EMU DIVIDEND SUSTAINABLE

Legal entity identifier:
549300XZ4Z1DCG9U4G65

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 97.94% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;
- d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;
- e. As at 31 December 2022, the proportion of issuers with Science Based Targets initiative (SBTi) or equivalent in the Sub-fund's portfolio was 62.83% (by weight of portfolio assets). The target is to reach at least 50% by 2026.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	97.56%	99.97%
Sustainable Investment	94.96%	97.94%
Other Environmental Investments	0%	8.94%
Social	44.25%	31.57%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 56.84	Sub-fund: 62.83

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 97.94% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 15.67% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 8.94% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 31.57% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 97.94% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

- o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

- o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 97.94% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et
<https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
VONOVIA	Real estate activities	8.90	Germany
UNIBAIL-RODAMCO	Real estate activities	8.56	France
LEG IMMOBILIEN	Real estate activities	7.80	Germany
KLEPIERRE	Real estate activities	6.67	France
GECINA	Real estate activities	5.96	France
MERLIN PROPERTIES SOCIMI SA	Real estate activities	4.85	Spain
COFINIMMO	Real estate activities	4.70	Belgium
TAG TEGERNSEE IMMOBILIER	Real estate activities	4.41	Germany
WAREHOUSES DE PAUW	Real estate activities	4.24	Belgium
COVIVIO	Real estate activities	3.59	France
AEDIFICA	Real estate activities	3.25	Belgium
MONTEA	Real estate activities	3.23	Belgium
ICADE	Real estate activities	2.97	France
MERCIALYS	Real estate activities	2.93	France
RETAIL ESTATES SICAFI	Real estate activities	2.86	Belgium

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 99.97% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

The Sub-fund invested at least 97.94% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Real estate activities	Real estate activities	99.97
Liquid assets	Liquid assets	0.03

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 15.67% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	16.04%
1 January 2023 - 31 December 2023	15.67%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This Sub-fund does not seek to make sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. As at 31/12/2023, however, 8.94% is indicated in the section "What was the asset allocation".

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 31.57% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.03% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

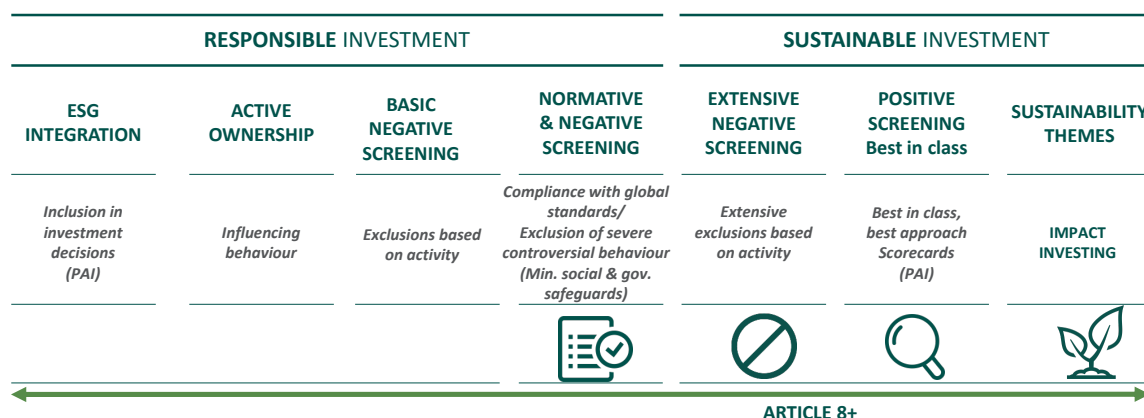

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**
Not applicable

25. INFORMATION ABOUT THE SUB-FUND DPAM B BONDS EUR MEDIUM TERM

25.1. MANAGEMENT REPORT

25.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Bonds EUR Medium Term sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Bonds EUR Medium Term sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

25.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

25.1.3. Aim and main outlines of the investment policy

Objective

The objective is to provide shareholders with as high a global return as possible, with an accent on investments in bonds (without sector limitation) denominated in one or more European currencies and issued or guaranteed by debtors with "Investment Grade" quality.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

25.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: JPM EMU Government Investment Grade 1-10 years.

This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency, rated "investment grade" by each of the three major rating agencies (Standard & Poor's, Moody's and Fitch). The performance is calculated by reinvesting the coupons paid by the debt securities included in the index. The index contains bonds with a residual maturity between a minimum of 1 year and a maximum of 10 years.

J.P. Morgan Securities PLC is registered with the European Securities and Markets Authority (ESMA).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

The composition and value of the benchmark, if any, can be found at <https://www.funds.dpaminvestments.com/funds.html>.

25.1.5. Policy followed during the year

Since the second quarter of 2023, we started observing certain red flags in economic data in Europe. From a positive standpoint, China exited its Covid lockdowns, energy prices dropped to almost pre-war levels, and inflation in general also started decreasing.

But still a specific part of the European economy was not rebounding. The manufacturing sector continued deteriorating although all stars were aligned for it to boom. This weakness in manufacturing was mainly driven by weak domestic demand. This first, logically, during the higher inflation regime since the Covid crisis. However, it even continued deteriorating going into the second quarter of the year. Up until then international demand for European goods was still positive, but over the summer, this also started dropping. Consequently, over the summer we decided to fully remove our underweight duration stance to a neutral level when the German 10Y Bund reached 2.5%.

It is of course perfectly possible to have the European economy experiencing a manufacturing trough as long as the services sector makes up for this. This was the case, but August brought a new next red flag. Typically, the summer months are peak tourism season and hence we observe an extremely strong services sector. But in August, even the services sector fell into contractionary territory as indicated by PMI data. At that moment it becomes even more important to thoroughly monitor incoming data as a period of weak activity typically leads to a softening of the labor market. And that lays to biggest risk for the European economy. Once real economic activity consistently falls, the demand for labor will also fall. Consequently, a vicious circle of decreasing activity and increasing unemployment will start appearing. Consequently, we started building up a long duration stance as we believed the next market moves would be an interest rate rally. However, over September and October, interest rates continued decreasing. As this was not in line with the opposite movement of economic data, we continued adding duration up until the Bund reached 3%. By November, we reached an overweight of almost 1 year in the strategy.

But it has not only been soft data that has consistently deteriorated over the last quarters. When we look at hard economic data, the deterioration is also very clear and broad-based. When looking at bankruptcy data, real retail sales, European import and export data, labor market revisions, etc., they all point towards the possibility that this vicious circle has already started, and Europe is already in a recession. When taking a longer time frame, the only times these data were in this type of a downward trend, was when we were already in a recession. This time could be different, but it typically never is.

As typically a recession goes together with risk aversion, we decided to take significant profit on our allocation to Romania as this country typically underperforms in a rally. We believe an overweight stance on peripheral countries is still appropriate as since the Covid crisis they undertook significant fundamental changes. However, we have started building up an underweight stance on Italy. First as a hedge against the duration overweight, but now also as an outright short.

25.1.6. Future policy

In the end it is very easy to confirm the assertion whether Europe is in a recession and that's by looking at the definition of what a recession is. A recession constitutes two successive quarters of negative real GDP growth. When we assess this definition for all countries that are part of the European Union, already more than 25% is in recession! And if we look at those countries that experienced negative real GDP growth in the third quarter of the year, more than half of European countries experienced negative real GDP! Off course this does not mean that they will also fall in recession, but it is difficult to see a change in momentum given underlying activity data has forcefully continued deteriorating over the past months. To change this type of momentum there are not many solutions. One of them requires the ECB to start actively cutting interest rates. Unfortunately, it is clear that the ECB is not ready for this and is risking a severe policy mistake.

We believe a long duration bias remains very appropriate as once the ECB realizes we moved to the next phase of the economic cycle, they will move to the next phase of their monetary policy cycle. This also means that a curve steepening bias should play out very well as first the anticipation of cuts followed by actual decreases in the policy rate will affect the shorter end of yield curves much more than the longer end.

25.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

AUSTRIA	8.02%
CROATIA (REPUBLIC)	5.13%
NETHERLANDS	4.66%
PORTUGAL	3.99%
SLOVENIA (REPUBLIC)	3.92%
IRELAND	3.83%
BELGIUM	3.26%
LUXEMBOURG (GRAND DUCHY)	2.67%
ROMANIA	2.03%
FINLAND	1.73%
SLOVAKIA (SLOVAK REPUBLIC)	0.73%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

25.6. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
STATES	78.43%
BANKS	16.29%
COMMERCIAL & PUBLIC SERVICES	1.91%
PROVINCE	1.71%
EUROPEAN ORGANIZATIONS	1.48%
ROAD VEHICLES	0.18%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

25.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	31,938,014.72	15,625,986.50	47,564,001.22
Sales	103,338,468.98	73,867,480.54	177,205,949.52
Total 1	135,276,483.70	89,493,467.04	224,769,950.74
Subscriptions	7,295,087.22	8,696,438.12	15,991,525.34
Redemptions	82,481,609.86	67,679,331.86	150,160,941.72
Total 2	89,776,697.08	76,375,769.98	166,152,467.06
Reference average of the total net asset	224,139,963.61	166,299,266.55	194,981,913.58
Rotation Percentage	20.30%	7.89%	30.06%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

25.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: JPM EMU Government Investment Grade 1-10 years.

Fee sharing

As at 31 December 2023, 1.35% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

25.12.2. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

25.12.3. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.
- excluding countries that do not respect a minimum of democratic requirements.
- by systematically applying a policy for impact bonds (such as green and social bonds).

Derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- For investments in corporate bonds:
 - a. The Sub-fund has not been exposed to companies considered to be below Global Standards;

b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c. The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

- For investments in sovereign bonds:

a. The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

b. The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was higher than the benchmark.

Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 8.55% while the benchmark was 1.29%.

- **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	98.69%	98.03%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Impact bonds	Sub-fund: 4.7% Benchmark: 0%	Sub-fund: 8.55% Benchmark: 1.29%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of gender diversity on the board of directors is addressed primarily through shareholder responsibility by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

• For investments in sovereign bonds:

During the Reference Period, the Sub-fund took into consideration the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/enqagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
1.4% SPAIN JUL28 30.07.2028	Public administration	7.99	Spain
3 1/2 OAT APR26 25.04.2026	Public administration	6.21	France
1.6% BTP JUN26 01.06.2026	Public administration	5.29	Italy
0.9% AUSTRIA FEB32 20.02.2032	Public administration	5.22	Austria

1.1% IRELAND T/BOND MAY29 15.05.2029	Public administration	1.79	Ireland

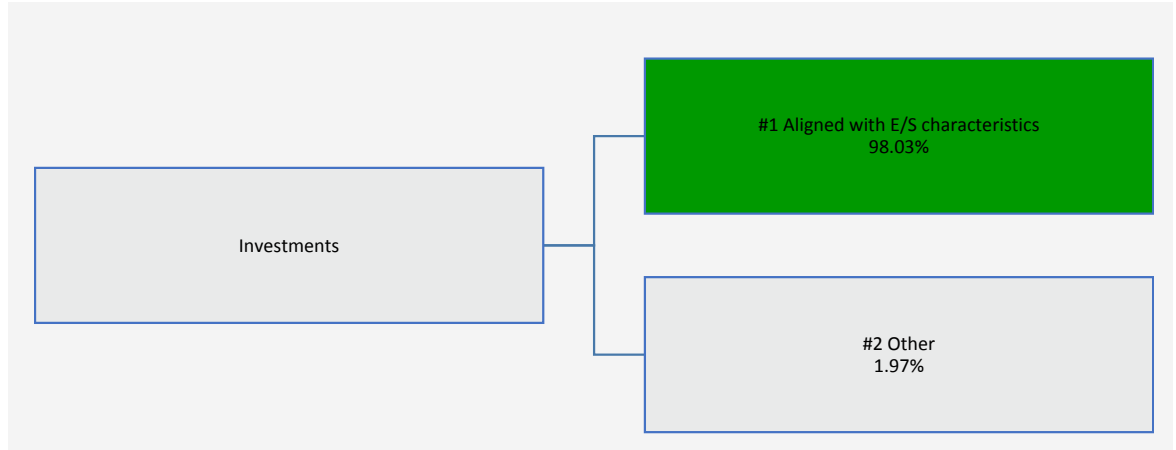

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.03% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	79.89
Financial and insurance activities	Financial service activities, except insurance and pension funding	16.52
Extraterritorial activities	Activities of extraterritorial organisations and bodies	1.45
Construction	Civil engineering	0.17
Derivatives	Derivatives	-0.27
Liquid assets	Liquid assets	2.24

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 2.24% in liquid assets and -0.27% in derivatives. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For investments in shares or corporate bonds:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For investments in sovereign bonds:

The Sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

26. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES US DIVIDEND SUSTAINABLE

26.1. MANAGEMENT REPORT

26.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities US Dividend Sustainable sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities US Dividend Sustainable sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

26.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

26.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to provide the shareholders with as high a global return as possible. The sub-fund invests in American listed equities as well as any security giving entitlement to the capital of these companies, selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

The risks are widely spread, among others by a broad sector diversification. The allocation of the portfolio will change depending on the assessment of the macroeconomic outlook and the situation on the financial markets. The sub-fund can for example prefer or avoid certain sectors or investment styles based among others on the economic outlook.

At least 50% of the portfolio must be composed of equities and other securities referred to above generating a higher actual or expected dividend yield than the market average.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

26.1.4. Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI USA Net Return.

This index is representative of the large- and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the United States. The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

The composition and value of the benchmark, if any, can be found at <https://www.funds.dpaminvestments.com/funds.html>.

26.1.5. Policy followed during the year

DPAM US Dividend Sustainable is an equity fund that invests exclusively in US dividend-paying and publicly traded companies. The objective of the strategy is to find good quality companies with a strong dividend profile, and a solid balance-sheet and cash flow generation to maintain and grow the dividend over time.

The fund is diversified and invested across most sectors, with the exception of the energy sector, which is excluded due to ESG reasons. Some other industries (such as tobacco, gambling etc.) are also excluded for the same reasons. The fund has a quantitative best-in-class ESG screening based on third-party data and integrates ESG elements all along the investment process. Stock selection is based on qualitative fundamental analysis integrating elements such as competitive position, balance sheet quality and cash flow generation, complemented with quantitative elements.

In a year dominated by the strong outperformance of the IT sector, driven by the excitement around artificial intelligence, the fund managed to perform relatively well, given its non-exposure to several key players of the industry, due to its dividend commitment.

The allocation effect was flat over the year, with a positive contribution coming from our underweight in energy (crude oil and gas prices fell during the year), the overweight in IT, and the underweight in Consumer Staples (suffering from negative volume growth and a normalizing pricing environment).

On the selection side, the fund benefited from the strong performance of Broadcom, Microsoft, Intel Oracle, and Applied Materials, all benefiting from the enthusiasm around AI, as well as Eaton, and Hubbell, both well exposed to the growing theme of electrification. On the negative side, we can mention the underperformance of Pfizer (penalized by the end of Covid era), Nextera (penalized by elevated interest rates and high inflation), and Zions Bancorp and Huntington Bancshares (penalized during the Silicon Valley Bank bankruptcy, both exited in 2023).

Among transactions of note, we exited our position in Verizon in 2023. We took a position in Amdocs, which is also exposed to the telecommunication industry, providing IT services to major telecommunication providers in the US and in Europe.

The fund also entered in Graphic Packaging, a leading consumer packaging company, focused on fiber-based packaging for the food and beverage industry. We exited John Wiley (publishing) and Target (retail) due to a lack of confidence after months of poor execution and adverse macroeconomic environment. We also started a position in Eli Lilly, with a positive view on their contribution in obesity, after very encouraging results from their GLP1 drug.

Additionally, we divested Emerson, CDW, Gentex as they did not match anymore with our ESG quantitative screening.

26.1.6. Future policy

For the first half of the new year, we plan to remain selective on the stock selection. The fund will continue to be invested in a diversified way, with a focus on resilient companies with strong business model, solid balance-sheet, and good cash-flow generation. We aim to maintain our holdings between 60 and 70 positions, with a midrange target, and we will continue to monitor valuation to invest opportunistically. We will also continue the work on the sustainable profile of the fund with continuous monitoring of the positions but also with engagements with the companies on environmental, social and governance topics and by investing in companies contributing positively to the society.

26.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and Reward Profile : 4.

BIOTECHNOLOGY	1.25%
PACKAGING INDUSTRY	1.21%
ROAD VEHICLES	1.11%
ROAD & RAILWAY TRANSPORTS	0.98%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

26.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	39,726,203.95	19,996,828.66	59,723,032.61
Sales	159,248,969.55	122,033,409.92	281,282,379.47
Total 1	198,975,173.50	142,030,238.58	341,005,412.08
Subscriptions	63,706,441.72	42,676,632.41	106,383,074.13
Redemptions	190,407,078.21	150,262,188.37	340,669,266.58
Total 2	254,113,519.93	192,938,820.78	447,052,340.71
Reference average of the total net asset	707,137,408.71	614,872,764.14	660,625,916.65
Rotation Percentage	-7.80%	-8.28%	-16.05%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

26.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI USA Net Return.

	Average cumulated returns				Since

2022	class A 6.5 EUR class E 6.5 EUR class M 6.5 EUR class V 6.5 EUR

26.11.2. Investment restrictions and overruns

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 09/05/2023 and 10/05/2023, a breach was noticed in the DPAM B Equities US Dividend Sustainable fund. Indeed, the fund takes the commitment to be invested at least 25% in assets with a social objective. As of 09/05/2023, the fund was at 24.93%. The breach was closed after adapting the positions.

26.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

26.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES US DIVIDEND SUSTAINABLE

Legal entity identifier:
549300OK4RXZO8XKEC20

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90.64% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

- During the Reference Period, the Sub-fund achieved the following sustainability indicators:
- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
 - b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
 - c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund had a better weighted average ESG profile than its benchmark: 55.05 compared to 51.26 (as at 31/12/2023).

e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 1146.94 tCO₂e/M revenue compared to 1165.01 tCO₂e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	97.74%	97.95%
Sustainable Investment	89.99%	90.64%
Other Environmental Investments	58.87%	63.49%
Social	84.88%	24.37%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 53.69 Benchmark: 50.65	Sub-fund: 55.05 Benchmark: 51.26
Sustainability indicator e.	Sub-fund: 961.24 Benchmark: 985.62	Sub-fund: 1146.94 Benchmark: 1165.01

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 90.64% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 1.26% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 63.49% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 24.37% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 81.57% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 81.57% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	8.77	United States of America
APPLE	Manufacturing	7.94	United States of America
BROADCOM INC	Manufacturing	2.60	United States of America
JP MORGAN CHASE	Financial and insurance activities	2.53	United States of America
UNITEDHEALTH GROUP	Financial and insurance activities	2.41	United States of America
MERCK & CO	Manufacturing	2.12	United States of America
PROCTER & GAMBLE	Manufacturing	2.11	United States of America
ABBVIE	Manufacturing	2.05	United States of America
PEPSICO	Manufacturing	1.82	United States of America
EATON CORP PUBLIC	Manufacturing	1.75	United States of America
APPLIED MATERIALS	Manufacturing	1.71	United States of America
DEERE & COMPANY	Manufacturing	1.67	United States of America
ACCENTURE A	Information and communication	1.66	United States of America
AMERICAN EXPRESS	Financial and insurance activities	1.64	United States of America
WASTE MANAGEMENT	Water supply; sewerage; waste management and remediation activities	1.57	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests a minimum of 97.95% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

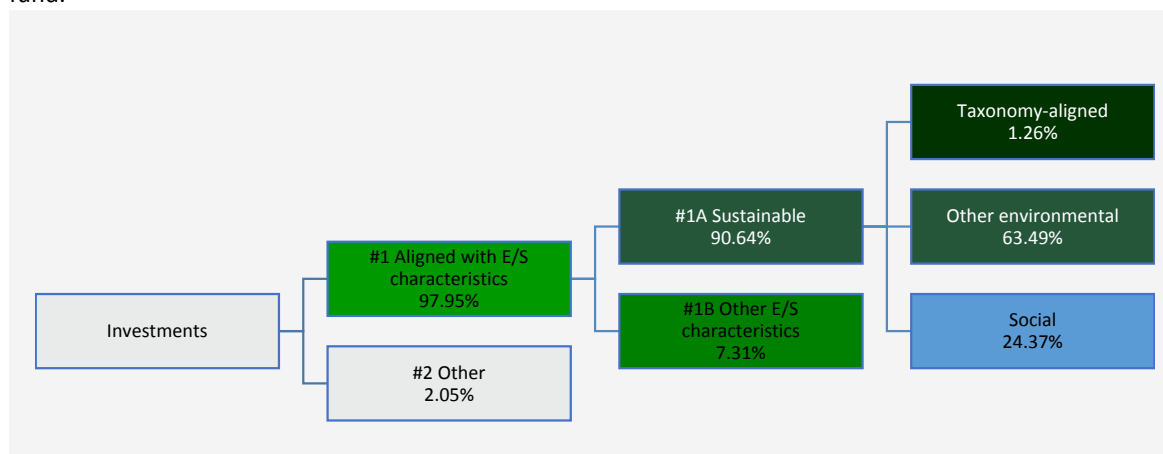

The Sub-fund invested at least 90.64% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	18.61

Sector	Sub-sector	% assets
Information and communication	Publishing activities	11.36
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	7.62
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	6.95
Manufacturing	Manufacture of machinery and equipment n.e.c.	6.53
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	5.78
Financial and insurance activities	Financial service activities, except insurance and pension funding	4.81
Manufacturing	Manufacture of chemicals and chemical products	4.47
Manufacturing	Other manufacturing	4.13
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	3.96
Real estate activities	Real estate activities	2.73
Information and communication	Computer programming, consultancy and related activities	2.54
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	2.53
Manufacturing	Manufacture of beverages	1.82
Manufacturing	Manufacture of electrical equipment	1.75
Water supply; sewerage; waste management and remediation activities	Waste collection, treatment and disposal activities; materials recovery	1.57
Information and communication	Programming and broadcasting activities	1.48
Manufacturing	Manufacture of food products	1.47
Accommodation and food service activities	Food and beverage service activities	1.23
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.20
Manufacturing	Manufacture of paper and paper products	1.18
Accommodation and food service activities	Accommodation	1.18
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	1.06
Administrative and support service activities	Employment activities	1.00
Transportation and storage	Postal and courier activities	0.96
Liquid assets	Liquid assets	2.05

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 1.26% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **What was the share of investments made in transitional and enabling activities?**
 Transitional activities: 0.017%
 Enabling activities: N/A

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	1.33%
1 January 2023 - 31 December 2023	1.26%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 63.49% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 24.37% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 2.05% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (25% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

- **How did this financial product perform compared with the broad market index?**

27. INFORMATION ABOUT THE SUB-FUND DPAM B REAL ESTATE EMU SUSTAINABLE
--

27.1. MANAGEMENT REPORT

27.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Real Estate EMU sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Real Estate EMU Sustainable sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

27.1.2. Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

27.1.3. Aim and main outlines of the investment policy

Objective

The objective is to provide its shareholders with the highest possible overall return over the long term, with a focus on representative investments in the real estate sector in the euro zone. The sub-fund will not invest more than 40% of its assets in receivables of any kind. The companies in which the sub-fund invests are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund will not invest more than 10% of its assets in units of other collective investment schemes.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

27.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: FTSE EPRA/NAREIT Eurozone Capped Net Return index.

This index is representative of the market for listed real estate companies in developed countries (as defined in the index methodology) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

FTSE International Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

The composition and value of the benchmark, if any, can be found at <https://www.funds.dpaminvestments.com/funds.html>.

27.1.5. Policy followed during the year

The year 2023 was characterized by a high volatility in interest rates expectations where macroeconomic elements played a massive important role influencing the fund's strategy. The year started positively with financial markets expecting a rapid decline in interest rates and falling inflation. After two months the narrative completely changed to higher for longer interest rates and further hiking by central banks. At the end of the year inflation data coming in softer than anticipated spurred the markets in a general view of central bank pivot to lower interest rates going forward.

Meanwhile on the real estate market, property values continued their decline, only been partly cushioned by increasing rent levels. Property companies therefore kept their strategy of deleveraging, through asset disposals, dividend cuts or equity injections. None of these actions are popular, albeit necessary. The lowly yielding and/or the highly levered companies were and are the most vulnerable and volatile companies in this landscape. Typically, they were the most affected when markets were in a risk-off mode during periods of increasing rates. But the year-end saw a rally in these companies bringing the total return of the Eurozone listed real estate sector close to +16%

In this macroeconomic context, the fund continued stayed disciplined in keeping overweight positions in lower levered companies. On a sector basis, it increased its exposure to the retail subsector over the year, predominantly by increasing the weight in URW. The fund also increased its exposure to student accommodation and healthcare. On the other hand, the fund reduced its exposure to logistics, following a takeover bid on a significant position in Interwest and reduced exposure to offices.

27.1.6. Future policy

For 2024, we expect a continuation of a volatile environment. More visibility on rates will allow the investment market to increase volumes of transaction, setting clearance prices that will allow valuers to better assess the true value of assets. The fund will remain defensive as it is positioned most of the time.

Our strategy going forward will depend on the prospects for the companies in this volatile environment. We will continue to maintain a balanced portfolio. On one hand, we opt for companies that have strong balance sheets, strong prospects, and good visibility. These companies come at a price, but we appreciate their stability. On the other hand, we also opt for companies that are challenged but of which we believe that the management should be able to regain better earnings and visibility going forward. These companies trade at a sizeable discount, and therefore offer upside to the share price. One subsector to which we could increase our exposure is logistics. We remain prudent on offices and constructive on retail.

The investment themes for the first half of 2024 are:

- Companies with strong balance sheets that hold quality assets, at the expense of companies with too much leverage;
- Companies evolving in a subsector where there is a supply shortage and thus higher rents rather than in a subsector where there is oversupply and thus lower rent growth;
- Companies with a strong ESG profile;
- Focus on total return, i.e., a combination of sustainable dividends and capital appreciation stemming from rental growth;
- Focus on long leases and quality tenants that enjoy competitive advantages in order to strengthen the cash flows;
- In a highly volatile environment, benefit from excessive market moves (rebuild positions in excessively penalized strong companies and vice versa)
- Companies clearly undervalued compared to industry peers.

27.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

27.2. BALANCE SHEET

		31 December 2023 EUR	31 December 2022 EUR
Section 1: Balance Sheet

27.5. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
FRANCE	35.53%
GERMANY (FEDERAL REPUBLIC)	22.55%
BELGIUM	20.90%
NETHERLANDS	7.36%
SPAIN	5.70%
LUXEMBOURG (GRAND DUCHY)	3.58%
GUERNSEY	2.43%
IRELAND	1.02%
FINLAND	0.93%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

27.6. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
REAL ESTATE	90.49%
OTHER SERVICES	4.85%
FINANCIAL SERVICES - HOLDINGS	4.66%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

27.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	20,266,143.78	23,580,435.20	43,846,578.98
Sales	16,628,991.06	40,823,106.27	57,452,097.33
Total 1	36,895,134.84	64,403,541.47	101,298,676.31
Subscriptions	16,716,497.18	6,379,558.18	23,096,055.36
Redemptions	15,882,018.39	26,472,495.21	42,354,513.60
Total 2	32,598,515.57	32,852,053.39	65,450,568.96
Reference average of the total net asset	123,400,256.01	115,210,829.07	119,271,887.36
Rotation Percentage	3.48%	27.39%	30.06%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

27.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B (Cap)

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: FTSE EPRA/NAREIT Eurozone Capped Net Return index.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
FTSE EPRA/NAREIT Eurozone Capped Net Return index	15.41 % (in EUR)	-6.11 % (in EUR)	-2.05 % (in EUR)	3.93 % (in EUR)		

Class A (Dis)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A (Dis)	18.56 % (in EUR)	-4.79 % (in EUR)	-1.28 % (in EUR)			

Class B (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B (Cap)	18.61 % (in EUR)	-4.76 % (in EUR)	-1.26 % (in EUR)	4.30 % (in EUR)		

Class F (Cap)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F (Cap)	19.61 % (in EUR)	-4.04 % (in EUR)	-0.59 % (in EUR)	4.80 % (in EUR)		

Class M (Dis)

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class M (Dis)	19.65 % (in EUR)	-4.07 % (in EUR)	-0.64 % (in EUR)

27.11.2. Investment restrictions and overruns

Between NAV Dates 12/01/2023 and 13/01/2023 a legal technical breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, due to a subscription the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. The total weight attributed to 40.16%. The breach was caused by a 1-day delay between the buy transactions and the reception of the subscription amount which has caused the instrument weights within the fund to be inflated. The breach was resolved by the 1-day delay in cash inflow booking.

Between NAV Dates 02/02/2023 and 03/02/2023 a legal technical breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, due to a redemption the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. The total weight attributed to 40.05%. The breach was caused by a 1-day delay between the sell transactions and the outflow of the redemption amount which has caused the instrument weights within the fund to be inflated. The breach was resolved by the 1-day delay in cash outflow booking.

Between NAV Dates 30/03/2023 and 31/03/2023 a legal technical breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, due to a subscription the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. The total weight attributed to 45.618%. The breach was caused by a 1-day delay between the buy transactions and the reception of the subscription amount which has caused the instrument weights within the fund to be inflated. The breach was resolved by the 1-day delay in cash inflow booking.

Between NAV Dates 06/06/2023 and 07/06/2023 a legal passive breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, the sum of issuers representing more than 5% each represented more than 40% of the fund's TNA. This was created by market fluctuations. The total weight attributed to 43.847%. The breach was resolved by adapting the positions in question.

Between NAV Dates 27/06/2023 and 29/06/2023 a legal passive breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, the sum of issuers representing more than 5% each represented more than 40% (40.135%) of the fund's TNA. The breach was caused by market fluctuations. The breach was resolved by adapting the positions in question.

Between NAV Dates 27/07/2023 and 28/07/2023 a legal passive breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, the sum of issuers representing more than 5% each represented more than 40% (40.035%) of the fund's TNA. The breach was caused by market fluctuations. The breach was resolved by adapting the positions in question.

Between NAV Dates 21/09/2023 and 22/09/2023 a legal passive breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, the sum of issuers representing more than 5% each represented more than 40% (40.006%) of the fund's TNA. The breach was caused by market fluctuations. The breach was resolved by adapting the positions in question.

Between NAV Dates 01/12/2023 and 05/12/2023 a legal passive breach was open in the DPAM B Real Estate EMU Sustainable sub-fund. Indeed, the sum of issuers representing more than 5% each represented more than 40%

(40.194%) of the fund's TNA. The breach was caused by market fluctuations. The breach was resolved by adapting the positions in question.

27.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

27.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B REAL ESTATE EMU SUSTAINABLE

Legal entity identifier:
549300L2M0EZOL2I9H08

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 97.72% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;

e. As at 31 December 2022, the proportion of issuers with Science Based Targets initiative (SBTi) or equivalent in the Sub-fund's portfolio was 62.28% (by weight of portfolio assets). The target is to reach at least 50% by 2026.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.25%	100.02%
Sustainable Investment	95.83%	97.72%
Other Environmental Investments	-	9.06%
Social	48.64%	34.57%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 57.1	Sub-fund: 62.28

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 97.72% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 15.53% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 9.06% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 34.57% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 97.72% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
 - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
 - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engaqement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf.
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 97.72% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et
<https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
VONOVIA	Real estate activities	9.27	Germany
UNIBAIL-RODAMCO	Real estate activities	7.79	France
GECINA	Real estate activities	7.73	France
LEG IMMOBILIEN	Real estate activities	7.57	Germany
KLEPIERRE	Real estate activities	6.01	France
MERLIN PROPERTIES SOCIMI SA	Real estate activities	4.86	Spain
TAG TEGERNSEE IMMOBILIER	Real estate activities	4.75	Germany
COFINIMMO	Real estate activities	4.27	Belgium
WAREHOUSES DE PAUW	Real estate activities	4.10	Belgium
COVIVIO	Real estate activities	3.50	France
AEDIFICA	Real estate activities	3.36	Belgium
CTP BV	Real estate activities	2.94	Netherlands
MONTEA	Real estate activities	2.93	Belgium
EUROCOMMERCIAL PPTY	Real estate activities	2.71	Netherlands
XIOR STUDENT HOUSING	Real estate activities	2.52	Belgium

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

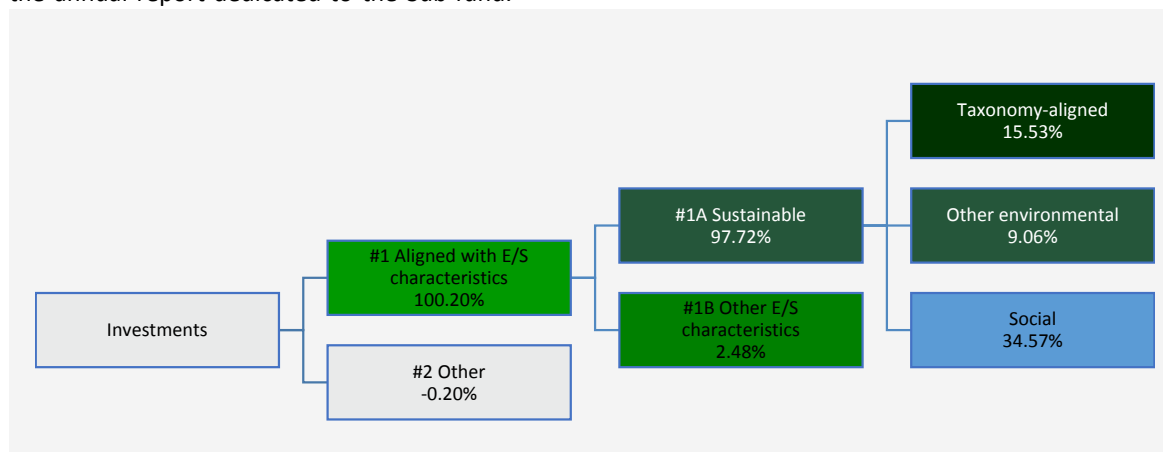

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 100.20% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

The Sub-fund invested at least 97.72% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches". Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Real estate activities	Real estate activities	100.20
Liquid assets	Liquid assets	-0.20

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.

- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 15.53% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	15.95%
1 January 2023 - 31 December 2023	15.53%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This Sub-fund does not seek to make sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. As at 31/12/2023, however, 9.06% is indicated in the section "What was the asset allocation".

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 34.57% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to -0.20% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

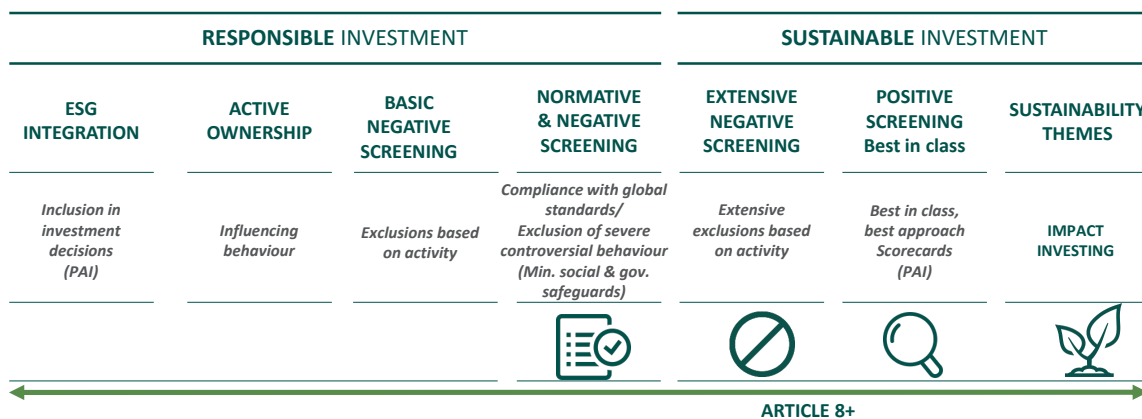

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**

28. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES US ESG LEADERS INDEX

28.1. MANAGEMENT REPORT

28.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities US ESG Leaders Index sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price of units: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM B Equities US ESG Leaders Index sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

28.1.2. Stock exchange listing

The shares of the sub-fund are not listed on the stock exchange.

28.1.3. Aim and main outlines of the investment policy

Objective

The objective is to obtain the highest possible overall return for shareholders, with emphasis on investments in US equities.

The sub-fund is a tracker fund implementing a passive investment management strategy whose objective is to replicate physically and not synthetically the “Net Dividends Reinvested” performance of the MSCI USA ESG LEADERS Index in Euro.

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

28.1.4. Index and benchmark

MSCI USA ESG Leaders Net Return

This benchmark is used in the management of the sub-fund.

Further information on the Index, its composition, calculation and the rules governing its periodic review and rebalancing, as well as on the general methodology of the MSCI indices, is available at www.msci.com.

The performance of the benchmark index is calculated with net dividends reinvested (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The tracking error is around 1.5%.

The composition and value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

28.1.5. Policy followed during the year

The benchmark of the Equities US ESG Index sub-fund is the MSCI Daily Net Total Return USA ESG Leaders Euro index.

The MSCI Daily Net Total Return USA ESG Leaders Euro index, Net Dividends Reinvested, provides exposure to companies with a high ESG performance in the United States and is established by MSCI.

As of the end of the year, the index had 283 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The almost full physical replication policy has been followed throughout the year.

During the year, the sub-fund closely followed the movement of the index.

28.1.6. Future policy

The Equities US ESG Leaders Index sub-fund, whose vocation is to be representative of American companies with a high ESG performance, will continue its investment policy based on broad sector diversification with the USA ESG Leaders index published by MSCI as a benchmark.

28.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

With the exception of classes (A USD, B USD, M USD, N USD) : 4.

28.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	129,784,328.73	30,005,701.85	159,790,030.58
Sales	141,714,391.98	50,471,310.41	192,185,702.39
Total 1	271,498,720.71	80,477,012.26	351,975,732.97
Subscriptions	61,369,790.19	43,861,675.08	105,231,465.27
Redemptions	75,505,947.19	69,732,771.23	145,238,718.42
Total 2	136,875,737.38	113,594,446.31	250,470,183.69
Reference average of the total net asset	978,176,643.30	1,065,753,684.85	1,022,325,069.72
Rotation Percentage	13.76%	-3.11%	9.93%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

28.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B USD

Annual return:

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI USA ESG Leaders Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI USA ESG Leaders Net Return	28.78 % (in EUR)	10.29 % (in EUR)			23/01/2020	13.23 % (in EUR)

Class A

Table showing historical performance (actuarial returns):

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.10%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.03%

Fee sharing

As at 31 December 2023, 0.02% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

28.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

28.11.1. Gross dividends paid in the financial year

2021	class A 1.66 EUR
	class A USD 2.04 USD
	class M 1.67 EUR
	class M USD 2.05 USD
2022	class A 1.8 EUR
	class A 1.77 EUR
	class M 1.8 EUR
	class M 1.77 EUR

28.11.2. Investment restrictions and overruns

Between NAV Dates 07/07/2023 and 10/07/2023 a prospectus passive breach was open in the DPAM B Equities US ESG Leaders Index sub-fund. Indeed, the sub-fund must be invested only in issues within the MSCI US ESG Leaders Index. AS of NAV date 07/07/2023, following a spinoff the fund received shares in FORTREA HOLDINGS INC which is not within the index. The PM sold the shares as soon as they arrived in the fund.

Between NAV Dates 10/07/2023 and 11/07/2023 a prospectus passive breach was open in the DPAM B Equities US ESG Leaders Index sub-fund. Indeed, the sub-fund must be invested only in issues within the MSCI US ESG Leaders Index. AS of NAV date 10/07/2023, following a spinoff the fund received shares in PHINIA INC which is not within the index. The PM sold the shares as soon as they arrived in the fund.

Between NAV Dates 05/10/2023 and 09/10/2023 a prospectus passive breach was open in the DPAM B Equities US ESG Leaders Index sub-fund. Indeed, the sub-fund must be invested only in issues within the MSCI US ESG Leaders Index. AS of NAV date 05/10/2023, following a spinoff the fund received shares in VERALTO which is not within the index. The PM sold the shares but due to a mismatch between the NAV and AIM not all shares were sold the following day.

28.11.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific

European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

28.11.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES US ESG LEADERS INDEX

Legal entity identifier:
5493008QFMVCVNMS2O91

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund was passively managed and aimed to physically replicate the MSCI USA ESG Leaders Index in Euro ("the Index").

The Index provides exposure to American large and mid-cap companies with high ESG performance relative to their peers in the same sector ("Best-in-Class" 50%).

By construction of the Replicated Index, the Sub-fund aimed to improve the environmental and social characteristics compared to the starting universe, the parent index, the MSCI USA ("Parent Index").

In addition, the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

During the Reference Period, the sustainability indicators used to measure the attainment of all of the environmental and social characteristics promoted by the Sub-fund corresponded to the binding investment restrictions of the Index it aims to replicate (some of the indicators are compared to the Parent Index):

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has zero exposure to companies involved in controversial economic activities, based on the exposure limits imposed by the index construction methodology;
- c. Zero exposure to companies involved in severe ESG controversies;

The methodologies used to construct the indices are available on the MSCI.com website: <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

Further information, including methodologies for calculating ESG scores and controversy levels, can be found on the MSCI website: www.msci.com.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.92%	99.88%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicates passively:

1) Firstly, with regard to environmental PAI:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the environmental PAIs.

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments).

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at www.msci.com.

The methodologies used to construct the indices are available on the website: <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	12.38	United States of America
NVIDIA CORP.	Manufacturing	5.71	United States of America
ALPHABET A	Information and communication	3.85	United States of America
ALPHABET C	Information and communication	3.43	United States of America
TESLA MOTORS INC.	Manufacturing	3.31	United States of America
ELI LILLY & CO	Manufacturing	2.19	United States of America
VISA A	Administrative and support service activities	1.94	United States of America

Largest investments	Sector	% of assets	Country
JOHNSON & JOHNSON	Manufacturing	1.75	United States of America
MASTERCARD INCORPORATED CLASS A	Administrative and support service activities	1.66	United States of America
HOME DEPOT	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.61	United States of America
PROCTER & GAMBLE	Manufacturing	1.60	United States of America
MERCK & CO	Manufacturing	1.28	United States of America
ADOBE SYSTEMS INCORPORATED	Information and communication	1.26	United States of America
SALESFORCE.COM, INC.	Information and communication	1.19	United States of America
COCA-COLA CO	Manufacturing	1.13	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, the Sub-fund invested 99.88% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Information and communication	Publishing activities	19.24

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	10.56
Information and communication	Information service activities	8.07
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	7.97
Administrative and support service activities	Office administrative, office support and other business support activities	4.64
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	4.30
Manufacturing	Manufacture of chemicals and chemical products	3.93
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	3.88
Manufacturing	Manufacture of machinery and equipment n.e.c.	3.79
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	3.51
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	2.91
Real estate activities	Real estate activities	2.65
Manufacturing	Manufacture of beverages	2.37
Financial and insurance activities	Financial service activities, except insurance and pension funding	1.97
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	1.75
Information and communication	Computer programming, consultancy and related activities	1.73
Transportation and storage	Land transport and transport via pipelines	1.58
Manufacturing	Other manufacturing	1.42
Accommodation and food service activities	Food and beverage service activities	1.17
Information and communication	Programming and broadcasting activities	0.94
Manufacturing	Manufacture of coke and refined petroleum products	0.91
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	0.79
Manufacturing	Manufacture of food products	0.77
Information and communication	Motion picture, video and sound production and distribution	0.77
Information and communication	Telecommunications	0.73
Manufacturing	Manufacture of leather and related products	0.69
Mining and quarrying	Mining support service activities	0.67
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	0.58
Transportation and storage	Postal and courier activities	0.54
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Human health activities	0.45

Sector	Sub-sector	% assets
Manufacturing	Manufacture of paper and paper products	0.45
Manufacturing	Manufacture of electrical equipment	0.45
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	0.43
Water supply; sewerage; waste management and remediation activities	Waste collection, treatment and disposal activities; materials recovery	0.33
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	0.29
Accommodation and food service activities	Accommodation	0.26
Other service activities	Other personal service activities	0.25
Mining and quarrying	Mining of metal ores	0.22
Construction	Construction of buildings	0.22
Manufacturing	Manufacture of basic metals	0.21
Administrative and support service activities	Rental and leasing activities	0.20
Professional, scientific and technical activities	Legal and accounting activities	0.18
Construction	Specialised construction activities	0.16
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	0.16
Mining and quarrying	Other mining and quarrying	0.15
Professional, scientific and technical activities	Advertising and market research	0.13
Transportation and storage	Warehousing and support activities for transportation	0.13
Agriculture, forestry and fishing	Crop and animal production, hunting and related service activities	0.07
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.06
Manufacturing	Manufacture of other non-metallic mineral products	0.06
Administrative and support service activities	Employment activities	0.05
Manufacturing	Manufacture of furniture	0.05
Manufacturing	Manufacture of wearing apparel	0.04
Manufacturing	Manufacture of textiles	0.04
Transportation and storage	Air transport	0.03
Liquid assets	Liquid assets	0.12

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.12% in liquid assets. There are no minimum environmental or social guarantees on these investments.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the Reference Period, the Replicated Index was constructed in particular by applying a combination of securities-based exclusions and a Best-in-Class selection process to companies in the MSCI USA Parent Index:

a) The exclusion process focused on:

- Companies that do not have an MSCI ESG rating of 'BB' or above. Companies must maintain an MSCI ESG rating of 'BB' or above to remain in the index.
- Companies that are not in compliance with Global Standards and prevention of corruption
- Companies involved in economic sectors and activities that are subject to debate as to whether or not they are ethical and sustainable (e.g. alcohol, gambling, nuclear energy production, tobacco etc.).
- Companies involved in severe ESG controversies: securities must have a score (according to the MSCI ESG Research methodology) of at least 3 to be eligible for inclusion.

b) The MSCI Best-in-Class selection process was applied to the remaining eligible securities in the selection universe:

The Index targets sector weights consistent with those of the Parent Index to limit the systematic risk introduced by the ESG selection process. The methodology aims to include the securities of companies with the highest ESG ratings making up 50% of the market capitalisation of the Parent Index.

Additional information on this index and its composition can be found at www.msci.com. The weight of stocks included in the index will depend on their market capitalisation adjusted for free float.

In addition to the investment restrictions related to Index replication, the Sub-fund adopted the following constraints: On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

During the Reference Period, the DPAM B Equities US ESG Leaders Index sub-fund consisted of a full physical replication of the MSCI USA ESG Leaders Index (benchmark).

The MSCI ESG Leaders indices target sector weights that mirror the relative sector weights of the underlying MSCI Global Investable Market indices (Parent Indices) in order to limit the systematic risk introduced by the ESG selection process.

The Replicated Index was constructed by applying a process combining exclusions (Global Standards compliance filter, involvement in severe controversies, controversial activities) and a best-in-class selection of companies from the MSCI USA Parent Index. In order to be included and maintained in the MSCI ESG Leaders indices, companies had to have an MSCI ESG rating of 'BB' or above.

The methodologies used to construct the indices are available on the MSCI.com website: <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the benchmark.

● How did this financial product perform compared with the reference benchmark?

	<i>Sub-fund</i>	<i>MSCI USA ESG Leaders Index</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

● **How did this financial product perform compared with the broad market index?**

	<i>Sub-fund</i>	<i>Parent Index- MSCI USA</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

29. INFORMATION ABOUT THE SUB-FUND DPAM B BALANCED GROWTH
--

29.1. MANAGEMENT REPORT

29.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Growth sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: The initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Balanced Growth sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

29.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

29.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors, by means of a balanced managed portfolio, a long-term capital gain by investing in equity securities and/or debt securities of issuers throughout the world. No formal guarantee has been given either to the sub-fund or to its investors.

The sub-fund is actively managed. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

Investment policy

The sub-fund invests mainly, without sector or geographical restriction, but mainly in Europe in (i) shares and/or other securities giving access to capital of companies and (ii) in fixed or floating rate short, medium and long-term bonds and/or debt securities.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

29.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

29.1.5. Policy followed during the year

The year started off with a bearish positioning as markets were expecting the unfolding of a recession somewhere in the 1st half of the year. It did not happen. Instead, after a number of ups and downs we concluded 2023 with more visibility after a slew of "Goldilocks" data followed by the long awaited "Fed Pivot". It is remarkable how much has changed - the S&P ended up 24%, NASDAQ up 44%, STOXX 50 up 19%, FTSE up 4%, and Hang Seng down 14%, while the Nikkei is up 28% (all in lcc). The path to these results was anything but linear as markets engaged in key debates... global economic strength, earnings sustainability, increased geopolitical conflict, and many other knock-on effects. Yet, perhaps most monumental of all was the notion of "higher for longer" and the unknown lagged effects thereof.

While the outperformance of the so called “Magnificent 7” helped the US market keep its spot as the best performing market, it is encouraging to have seen the recent “broadening out” continue as healthier markets should support the underperforming and under owned pockets of the market both in the US and internationally. Of course, some markets like China and the UK remain under owned for debatable reasons, and it remains to be seen whether government policy combined with cheaper valuations could help turn the tide and entice investors to partake.

It's no secret that 2023 saw the emergence of exciting secular themes that led to perceived winners and losers. AI helped big tech come back from its fall from grace in 2022 while perceived AI challenged names declined this year. Moreover, GLP-1s helped catapult healthcare darlings Novo Nordisk and Eli Lilly & Co. Of course, not all companies can navigate the market and consumer names underperformed significantly as many investors continue to determine the long-term impacts of these drugs. The jury is still out and this creates opportunities.

During the rally that started somewhere around November we kept on seizing opportunities and fine-tuning the portfolio. The new positions carry a rather defensive nature (On Holding, KPN, Chipotle Mexican Grill, Dexcom, Reckitt, Thermo Fisher, ...). The positions that exited the fund was a mix between valuation, cyclicals, technicals ... In bonds we decided to maintain the duration as we are convinced that we have seen the peak in interest rates. We further reduced the cyclicalities and reinvested more into companies with defensive qualities.

29.1.6. Future policy

Markets navigated the quickest rate hike cycle in recent history, the never-ending debate on the state of the consumer, questions around the stickiness of inflation, and Fed uncertainty, all while eventually getting back, after some erratic ups and downs, to the top.

As the push and pull between bulls and bears will inevitably continue, it remains to be seen if 2024 will deliver another volatile year. Although inflation has been trending in the right direction, the central banks are far from claiming victory. Market focus will expand to include micro drivers of earnings and profitability.

We feel tempted to take some profits after the recent run. We continue to focus on equities that will be able to protect margins, maintain operational leverage, and growth top line growth. Still too early to consume the risk budget yet.

29.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile: 4.

29.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	4,186,506.24	5,115,811.94	9,302,318.18
Sales	1,951,586.52	2,933,073.74	4,884,660.26
Total 1	6,138,092.76	8,048,885.68	14,186,978.44
Subscriptions	0.00	0.00	0.00
Redemptions	0.00	0.00	0.00
Total 2	0.00	0.00	0.00
Reference average of the total net asset	33,049,754.54	32,753,117.39	32,900,216.91
Rotation Percentage	18.57%	24.57%	43.12%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

29.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

No benchmark is used in the management of the sub-fund.

29.11. CHARGES

Recurring costs

- Class A - BE0171618250 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.41%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.10%

- Class B - BE0171619266 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.48%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.10%

Fee sharing

As at 31 December 2023, 0.07% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

29.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

29.12.1. Gross dividends paid in the financial year

2019 class A 192.97 EUR
2020 class A 189.37 EUR
2021 class A 227.02 EUR
2022 class A 236.99 EUR

29.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

29.12.3. Transparency in sustainability

Mandatory declaration in accordance with Article 7 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment and amending Regulation (EU) 2019/2088.

The investments underlying this sub-fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

Application of art. 7, 1, b) of Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) - main negative impacts negative impacts

During the period covered by the periodic report, the sub-fund has taken into consideration all the main negative impacts on sustainability factors (hereinafter "PINs") listed in Table 1 of Annex I of the Commission Delegate (EU) 2022/1288 of 6 April 2022, as amended. The SIPs are intrinsically linked to DPAM's commitment to reduce the negative impact of the fund's/sub-fund's investments by avoiding any activities or behaviours that may significantly undermine sustainable and inclusive growth.

This commitment is incorporated into the entire research and investment process from its inception.

The way in which the sub-fund takes these SIPs into account is based on DPAM's commitment to systematically integrate several SIPs into the management of the sub-fund.

1) Certain PINs related to environmental issues are monitored:

a) by assessing controversies relating to these issues and in which issuers are involved (in accordance with DPAM's Controversial Activities Policy) ;

b) by analysing the performance of issuers with regard to, among other things, their greenhouse gas emissions and/or their water consumption (analysis by the Task Force on Climate-Related Financial Disclosure and/or fundamental research).

2) Certain PINs relating to social issues, staffing, respect for human rights and the fight against corruption are also monitored.

a) by an assessment of controversies relating to these issues and in which issuers are involved (in accordance with DPAM's Controversial Activities Policy);

b) by analysing the performance of issuers with regard to, among other things, their compliance with the principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises, gender diversity within governance bodies and/or the governance bodies and/or the unadjusted gender pay gap (fundamental research).

29.12.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

30. INFORMATION ABOUT THE SUB-FUND DPAM B BALANCED FLEXIBLE

30.1. MANAGEMENT REPORT

30.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Flexible sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Balanced Flexible sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

30.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

30.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors a long-term capital gain by investing in equity securities, fixed income securities of issuers from all parts of the world or undertakings for collective investment.

This is an actively managed sub-fund.

No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund invests principally in shares and/or other securities giving access to capital of companies (to a maximum amount of 60% of its net assets) and in bonds and/or other fixed-rate or floating-rate debt securities with an investment grade* rating on the scale used by one of the three rating agencies, Standard & Poor's (S&P)/Moody's/Fitch, and offering a periodic or capitalised yield. The sub-fund invests a maximum of 3% of its net assets in bonds and/or other fixed-rate or floating-rate debt securities with an inferior rating to investment grade.

In the event that the aforementioned investment criteria are exceeded passively, an adjustment will be made, taking into consideration the interests of the investors.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits, money market instruments and/or short-term instruments with an investment grade rating. Liquid assets are considered to be fixed rate.

The sub-fund may invest up to 10% of its assets in open-ended undertakings for collective investment in EUR in order to indirectly achieve the objectives listed above or to invest its liquidity.

*Investment Grade: is an interpretation of the rating of the bond issuer in terms of the financial risks. Rating agencies use their own scale to assess the notion of risk. Investment grade ratings are situated between AAA and BBB- according to the Standard & Poor's (S&P) and Fitch scale and between Aaa and Baa3 according to the Moody's scale.

For bonds without an external rating, the manager is responsible for determining whether the issuer satisfies the requirements of an investment grade rating.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

30.1.4. Index and benchmark

No benchmark is used in the management of the sub-fund.

30.1.5. Policy followed during the year

The year started off with a bearish positioning as markets were expecting the unfolding of a recession somewhere in the 1st half of the year. It did not happen. Instead, after a number of ups and downs we concluded 2023 with more visibility after a slew of “Goldilocks” data followed by the long awaited “Fed Pivot”. It is remarkable how much has changed – the S&P ended up 24%, NASDAQ up 44%, STOXX 50 up 19%, FTSE up 4%, and Hang Seng down 14%, while the Nikkei is up 28% (all in lcc). The path to these results was anything but linear as markets engaged in key debates ... global economic strength, earnings sustainability, increased geopolitical conflict, and many other knock-on effects. Yet, perhaps most monumental of all was the notion of “higher for longer” and the unknown lagged effects thereof. While the outperformance of the so called “Magnificent 7” helped the US market keep its spot as the best performing market, it is encouraging to have seen the recent “broadening out” continue as healthier markets should support the underperforming and under owned pockets of the market both in the US and internationally. Of course, some markets like China and the UK remain under owned for debatable reasons, and it remains to be seen whether government policy combined with cheaper valuations could help turn the tide and entice investors to partake.

It's no secret that 2023 saw the emergence of exciting secular themes that led to perceived winners and losers. AI helped big tech come back from its fall from grace in 2022 while perceived AI challenged names declined this year. Moreover, GLP-1s helped catapult healthcare darlings Novo Nordisk and Eli Lilly & Co. Of course, not all companies can navigate the market and consumer names underperformed significantly as many investors continue to determine the long-term impacts of these drugs. The jury is still out and this creates opportunities.

During the rally that started somewhere around November we kept on seizing opportunities and fine-tuning the portfolio. The equity positioning was altered in two waves. The first was based on the steep rise in the long-term interest rates. The outflow in December was also used as a means to further reposition the fund. The new positions carry a rather defensive nature (On Holding, Dexcom, Reckitt, Thermo Fisher, Eli Lilly, ...). We also build a position in real estate as we are convinced interest rates have peaked and the sector is dirt cheap (Land Securities, British Land, Tritax Big Box, ...). The positions that exited the fund was a mix between valuation, cyclicals, technicals ... In bonds we decided to maintain the duration that was increased during the previous spike in long term interest rates. The shorter duration government and credit bonds were reduced/sold in November to fund part of the required outflow. This way the duration has further increased as we are convinced that we have seen the peak in interest rates. We further reduced the cyclicity and reinvested more into companies with defensive qualities.

30.1.6. Future policy

Markets navigated the quickest rate hike cycle in recent history, the never-ending debate on the state of the consumer, questions around the stickiness of inflation, and Fed uncertainty, all while eventually getting back, after some erratic ups and downs, to the top.

As the push and pull between bulls and bears will inevitably continue, it remains to be seen if 2024 will deliver another volatile year. Although inflation has been trending in the right direction, the central banks are far from claiming victory. Market focus will expand to include micro drivers of earnings and profitability.

We feel tempted to take some profits after the recent run. We continue to focus on equities that will be able to protect margins, maintain operational leverage, and growth top line growth. Still too early to consume the risk budget yet.

30.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

30.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	6,785,965.05	6,843,400.53	13,629,365.58
Sales	4,532,447.97	21,581,130.67	26,113,578.64
Total 1	11,318,413.02	28,424,531.20	39,742,944.22
Subscriptions	0.00	276,937.22	276,937.22
Redemptions	52,728.94	15,866,147.30	15,918,876.24
Total 2	52,728.94	16,143,084.52	16,195,813.46
Reference average of the total net asset	67,113,817.03	64,188,099.15	65,638,934.59
Rotation Percentage	16.79%	19.13%	35.87%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

30.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

No benchmark is used in the management of the sub-fund.

Class B

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B	8.90 % (in EUR)	-0.84 % (in EUR)	2.32 % (in EUR)	2.90 % (in EUR)	07/04/2003	4.56 % (in EUR)

Class F

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F	9.94 % (in EUR)	0.08 % (in EUR)	3.27 % (in EUR)	3.86 % (in EUR)	02/04/2013	3.97 % (in EUR)

30.11. CHARGES

Recurring costs

- Class B - BE0940785794 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.25%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.09%

- Class F - BE6248455063 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.30%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.09%

- Class L - BE6335356927 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.76%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.09%

Fee sharing

As at 31 December 2023, 14.50% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

30.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

30.12.1. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

30.12.2. Investment restrictions and overruns

Between NAV Dates 23/11/2023 and 27/11/2023 a legal active breach was open in the DPAM B Balanced Flexible sub-fund. Indeed, following a redemption with trade date 21/11/2023 and value date 23/11/2023 the cash account deposited at Banque Degroof Petercam Luxembourg was in overdraft of -3,485,961.86 EUR representing -5.845% of the sub-fund's net assets. Sell transactions made to cover this redemption were made on TD 22/11/2023.

30.12.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

30.12.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B BALANCED FLEXIBLE

Legal entity identifier:
549300281G10EYPYZ773

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.
- excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● How did the sustainability indicators perform?

1) For direct investments (in shares or corporate bonds):

- a) The sub-fund has not been exposed to companies considered to be below Global Standards;
- b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments (in sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	98.36%	97.90%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at

<https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
6 1/2 ITALY NOV27 01.11.2027	Public administration	3.88	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 97.9% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	37.85
Financial and insurance activities	Financial service activities, except insurance and pension funding	10.70
Manufacturing	Manufacture of computer, electronic and optical products	4.96
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	4.12
Information and communication	Publishing activities	3.88
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	3.24
Manufacturing	Manufacture of machinery and equipment n.e.c.	3.07
Real estate activities	Real estate activities	3.06
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	2.72
Manufacturing	Manufacture of leather and related products	1.95
Manufacturing	Manufacture of chemicals and chemical products	1.79
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.72
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.42
Information and communication	Telecommunications	1.22
Manufacturing	Manufacture of beverages	1.11
Information and communication	Motion picture, video and sound production and distribution	0.96
Manufacturing	Manufacture of electrical equipment	0.90

Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	0.31
Manufacturing	Manufacture of wearing apparel	0.27
Transportation and storage	Warehousing and support activities for transportation	0.26
Arts, entertainment and recreation	Gambling and betting activities	0.25
Manufacturing	Manufacture of coke and refined petroleum products	0.24
Arts, entertainment and recreation	Sports activities and amusement and recreation activities	0.22
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.21
Liquid assets	Liquid assets	2.10

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets (excluding treasury bills)
- Derivative instruments
- Issuers (including UCI) that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The sub-fund may invest in or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 2.1% in liquid assets. There are no minimum environmental or social guarantees on these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

31. INFORMATION ABOUT THE SUB-FUND DPAM B BONDS GLOBAL INFLATION LINKED
--

31.1. MANAGEMENT REPORT

31.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Bonds Global Inflation Linked sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM HORIZON Bonds Global Inflation Linked sub-fund of the DPAM HORIZON B SICAV dated 1 April 2022.

31.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

31.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors exposure to debt securities denominated in any currency, whose interest payments and/or capital redemption depend on the movement in inflation in a given country or geographical region.

No formal guarantee has been given either to the sub-fund or to its investors.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund invests principally, without any form of sector restriction, a minimum of 75% of its net assets, in fixed or floating rate bonds and/or other debt securities, denominated in any currency and for which the payment of interest and/or redemption of capital depends on the movement in inflation in a given country or a geographical region, which may include, but is not limited to the following list: credit-linked notes* and fiduciary notes** with underlying instruments that have identical characteristics.

The sub-fund may, on an ancillary basis, invest in money market instruments such as for example, certificates of deposit, treasury notes and/or promissory notes, and bonds and/or other debt securities, including fixed or floating rate credit-linked notes and fiduciary notes denominated in any currency and on which the payment of interest and/or the redemption of principal is not dependent on the movement in inflation in a given country or geographical region.

In order to be eligible, those marketable securities forming the principal part and the ancillary part of the portfolio, must be (i) issued or guaranteed by a country, including, where applicable, its regional public authorities or by international or supranational public bodies, or (ii) issued by (governmental, public, semi public or private) institutions held or financed by one or several public players, such as countries, regional public authorities or public international law or supranational bodies and undertakings entrusted with the provision of services of public or general interest, or (iii) benefit from a mechanism guaranteeing a priority redemption in the event of default by the issuer.

The payment flows from bonds and/or other debt or equivalent securities, whose interest payments and/or redemption of principle are determined by inflation, generally have the following configuration:

Coupon payment = coupon in % * nominal amount * (Index t/Index°)

Reimbursement = nominal amount * (Index T/Index°) in which:

Coupon in % = fixed coupon of the bond (which is normally equal to the actual yield on the issue date of the bond)

Index° = a 3-month inflation index before the issue date of the bond (base index)

Index T = a 3-month inflation index before the payment date

Index T = a 3-month inflation index before the due date

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund may invest a maximum of 10% of its assets in open-ended undertakings for collective investment in order to indirectly achieve the above-mentioned target or place its liquidity.

* Credit-Linked Note: financial instrument issued by a financial institution in the form of a debt security on which the payment is connected to another bond or loan. ** Fiduciary Note: differs from a credit linked note in that the buyer does not bear risk of the financial institution which issues it.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

31.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: Bloomberg Barclays Universal Inflation Linked GDP Weighted IG.

This index is representative of the global inflation-linked bond market. It is a custom index for DPAM calculated by Bloomberg Index Services Limited. The index includes inflation-linked bonds issued by countries with an investment grade rating. Countries are weighted according to their GDP (gross domestic product). Performance is calculated by reinvesting the coupons paid by the debt securities making up the index.

Bloomberg Index Services Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark. The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

31.1.5. Policy followed during the year

In 2023, inflation was volatile. The pace of inflation normalization was slower than anticipated in the first months of the year. However, inflation decelerated quicker than expected in the last months of 2023. During the final Federal Reserve meeting of 2023, Chair Powell stated that further tightening is likely unnecessary as inflation is falling faster than expected. As a result, a discussion of rate cuts is now on the table, marking a clear shift in rhetoric from 'rates higher for longer' towards rate cuts. During the meeting, the Fed acknowledged that the current policy rate is restrictive. The faster-than-expected deceleration of inflation and Powell's dovish comments contributed to a strong year-end rally and a decrease in inflation expectations.

The compartment was underweight duration in the first nine months of the year. This contributed positively as rates continued to sell off until mid-October. When the 10-year rate in the US reached 5%, we added duration and moved

our fund towards an overweight duration stance of around 0.2 years. This addition had a positive impact on the performance until year-end.

In 2023, we also started to initiate a curve steepener. We believe that as the hiking cycle ends, the curve will start to steepen. Cuts will have a greater impact on the short end of the curve than the long end. In the last few months of 2023, we experienced a bull steepening, which added to the fund's relative performance.

The fund's performance in 2023 was negatively impacted by our underweight position in Italy and the Japanese market in general. However, our strong security selection on the French inflation-linked bond and the Spanish 2030 bond helped to offset these losses.

We added nominal bonds in Mexico that were not part of the benchmark. These bonds had the potential for significant spread contraction and had a positive impact on our allocation. The spread compression outweighed the loss of inflation carry. Due to consistently high inflation carry, we avoided investing in treasury bills or short-term nominal instruments throughout the year.

31.1.6. Future policy

Looking ahead to 2024, we expect markets to remain volatile. It is uncertain whether a soft or hard landing will occur. Both scenarios are expected to cause a repricing of interest rates. Even if the US returns to the neutral interest rate, currently estimated at around 3%, interest rates will still be significantly lower than current levels. If the likelihood of a hard landing increases, interest rate changes may be quicker and more pronounced than expected.

The US labor market has started to show signs of easing and the services PMI has fallen, although it remains in expansionary territory. Other indicators of a cooling economy include wage deceleration and rising delinquency rates in credit cards and auto loans.

Inflation will remain a key focus for central banks and investors. We believe that central banks will shift towards a more forward-looking approach, rather than relying solely on data dependency as they have done in the past. Inflation breakevens will remain volatile as the inflation normalization may be slower and more erratic than some expect. If inflation normalizes even faster, breakevens will further decrease. During 2022/2023 having nominal exposure in a linker portfolio was costly (except during the last months of 2023) as you lose the inflation carry. Although we expect inflation carry to be lower over 2024, it will still play an important role as a source of return. In terms of breakevens, US breakevens look more appealing than the European breakevens in historical terms.

A curve steepening is usually a significant performance factor at the end of the tightening cycle and the beginning of the cutting cycle. In that context, we are increasing our curve steepener position, which we believe will be another important relative performance driver.

Central banks are expected to implement cuts, and as markets are forward looking these cuts are expected to create a rally in rates.

We are cautious about spread products, particularly in Italy, as they tend to underperform core rates during slowdowns or recessions. On the other hand, we have a positive outlook on emerging markets such as Mexico and Chile. We anticipate that Mexico's central bank will align its cutting cycle with those of the United States in 2024 due to the close economic ties between the two countries.

In summary, we are optimistic that inflation will normalise, and we will start the year with an overweight duration and a curve steepener position. Given the high expected volatility, we will need to be flexible and adapt the strategy as necessary. One possibility is that we will range trade duration, essentially by selling duration following a strong rally and adding duration following a sell-off.

31.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

31.5. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
UNITED STATES OF AMERICA	39.70%
JAPAN	8.32%
SPAIN	7.56%
UNITED KINGDOM	7.07%
CANADA	4.98%
MEXICO	4.58%
SOUTH KOREA (REPUBLIC)	4.56%
AUSTRALIA	4.55%
GERMANY (FEDERAL REPUBLIC)	4.26%
FRANCE	4.15%
NEW ZEALAND	2.63%
SWEDEN	2.60%
CHILE	2.14%
ITALY	1.82%
THAILAND	1.08%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

31.6. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
STATES	100.00%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

31.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	23,638,047.57	10,556,730.27	34,194,777.84
Sales	81,708,117.77	21,053,994.68	102,762,112.45
Total 1	105,346,165.34	31,610,724.95	136,956,890.29
Subscriptions	11,132,543.45	11,344,240.61	22,476,784.06
Redemptions	76,817,881.14	22,553,040.35	99,370,921.49
Total 2	87,950,424.59	33,897,280.96	121,847,705.55
Reference average of the total net asset	159,411,695.65	111,058,822.45	135,036,548.61
Rotation Percentage	10.91%	-2.06%	11.19%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

31.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performances.

Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: Bloomberg Universal Inflation Linked GDP Weighted IG.

DPAM B

Fee sharing

As at 31 December 2023, 10.39% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

31.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

31.12.3. Investment restrictions and overruns

Between NAV Dates 21/02/2023 and 22/02/2023, a prospectus passive breach was open in the DPAM B Bonds Global Inflation Linked sub-fund. Indeed, the hedging ratio of non-EUR currencies must be between 95% and 105%. At NAV date 21/02/2023, the hedging towards CAD was of 105.39%. This was caused by market fluctuations. The breach was resolved by adapting the hedging positions in question.

Between NAV Dates 24/03/2023 and 27/03/2023, a prospectus technical breach was open in the DPAM B Bonds Global Inflation Linked sub-fund. Indeed, the hedging ratio of non-EUR currencies must be between 95% and 105%. At NAV date 24/03/2023, the hedging towards CLP was of 124.64%. This was caused by a conversion of the CLP cash (received from a coupon 2 week prior) to USD by the custodian. Which is not done automatically for coupons. The breach was resolved by adapting the hedging positions in question.

Between NAV Dates 25/05/2023 and 26/05/2023, a prospectus passive breach was open in the DPAM B Bonds Global Inflation Linked sub-fund. Indeed, the hedging ratio of non-EUR currencies must be between 95% and 105%. At NAV date 25/05/2023, the hedging towards CAD was of 105.17%. This was caused by fluctuations. The breach was resolved by adapting the hedging positions in question.

Between NAV Dates 15/06/2023 and 16/06/2023, a prospectus passive breach was open in the DPAM B Bonds Global Inflation Linked sub-fund. Indeed, the hedging ratio of non-EUR currencies must be between 95% and 105%. At NAV date 15/06/2023, the hedging towards AUD was of 94.81%, towards CAD was of 94.22%, towards CLP was of 94.30%, towards GBP was of 94.59%, towards MXN was of 94.66%, towards NZD was of 94.36%, towards YHB was of 94.99%, towards USD was of 94.12%. This was caused by an outflow of EUR 11.5 million from the hedged share classes.

Between NAV Dates 03/08/2023 and 04/08/2023, a prospectus passive breach was open in the DPAM B Bonds Global Inflation Linked sub-fund. Indeed, the hedging ratio of non-EUR currencies must be between 95% and 105%. At NAV

Indeed, the hedging ratio of non-EUR currencies must be between 95% and 105%. At NAV date 15/12/2023, the hedging towards CLP was of 94.50%. This was caused by market fluctuations. The breach was resolved by adapting the hedging positions in question.

31.12.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

31.12.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B BONDS GLOBAL INFLATION LINKED

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- excluding countries that do not respect a minimum of democratic requirements.
- by systematically applying a policy for impact bonds (such as green and social bonds).

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- a. The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.
- b. The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was not higher than the benchmark. Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 4.71% while the benchmark was 0.12%.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.82%	98.88%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Impact bonds	Sub-fund: 4.15% Benchmark: 0.10%	Sub-fund: 4.71% Benchmark: 0.12%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
Not applicable
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
Not applicable
- *How were the indicators for adverse impacts on sustainability factors taken into account?*
Not applicable
- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*
Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

During the Reference Period, the sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAI") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.88% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	98.88
Derivatives	Derivatives	-0.03
Liquid assets	Liquid assets	1.15

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **What was the share of investments made in transitional and enabling activities?**
Not applicable

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bills);
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.15% in liquid assets and -0.03% in derivatives. There are no minimum environmental or social guarantees on this allocation.

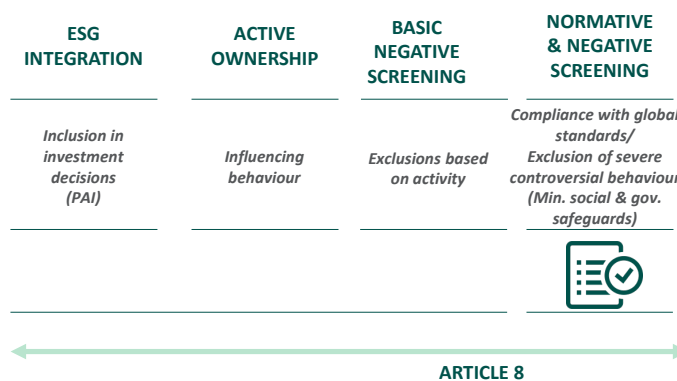

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not free") and The Economist Intelligence Unit ("authoritarian regime"). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

32. INFORMATION ABOUT THE SUB-FUND DPAM B BONDS EUR QUALITY SHORT TERM

32.1. MANAGEMENT REPORT

32.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Bonds EUR Quality Short Term sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM HORIZON B Bonds EUR Quality Short Term sub-fund of the DPAM HORIZON B SICAV dated 1 April 2022.

32.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

32.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors exposure to debt securities denominated in euros, whose issuers have (i) a minimum investment grade rating* and (iii) a residual term of no more than three years.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal guarantee has been given either to the sub-fund or to its investors.

* Investment Grade: is an interpretation of the rating of the bond issuer in terms of the financial risks. Rating agencies use their own scale to assess the notion of risk. "Investment grade" ratings are situated between AAA and BBB- according to the Standard & Poor's (S&P) scale and between Aaa and Baa3 according to the Moody's scale.

Investment policy

The sub-fund invests mainly, without sector or geographical restriction, in fixed or floating rate bonds and/or debt securities, or equivalents denominated in euros. The securities or, failing this, the issuers, must have a minimum rating of BBB-/Baa3 ('investment grade') on the scale used by S&P and Moody's rating agencies and the residual term of which does not exceed 3 years at the time of acquisition.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts and deposits in a maximum of 25%.

The sub-fund may invest a maximum of 10% of its assets in open-ended undertakings for collective investment in order to indirectly achieve the above-mentioned target or place its liquidity.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the Regulation SFDR 2019/2088.

32.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

32.1.5. Policy followed during the year

The Fund aims to provide investors with a predictable yield through an exposure to the European Investment Grade Corporate market with a maximum maturity of 3 Years.

The Investment Process is mainly based on a bottom-up approach. Our credit research team adopts a fundamental and value approach to credit management. Our resources are geared towards identifying fundamentally sound credits, while avoiding low or deteriorating ones. The Fund invests in a diversified portfolio of Corporate bonds rated between AAA and BBB3.

32.1.6. Future policy

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

32.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 2.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

32.7. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	4,229,759.00	2,073,915.00	6,303,674.00
Sales	1,649,931.00	1,336,305.50	2,986,236.50
Total 1	5,879,690.00	3,410,220.50	9,289,910.50
Subscriptions	3,742,235.06	1,838,299.35	5,580,534.41
Redemptions	1,495,977.29	2,038,903.80	3,534,881.09
Total 2	5,238,212.35	3,877,203.15	9,115,415.50
Reference average of the total net asset	8,223,866.83	8,932,933.47	8,581,314.12
Rotation Percentage	7.80%	-5.23%	2.03%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

32.9. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Fee sharing

As at 31 December 2023, 99.04% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

32.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

32.11.1. Gross dividends paid in the financial year

2019 class A 0.90 EUR
class M 1.06 EUR
2020 class A 0.80 EUR
class M 0.15 EUR

32.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

32.11.3. Investment restrictions and overruns

Between NAV Dates 08/03/2023 and 10/03/2023 a legal active breach was open in the DPAM B Bonds EUR Quality Short Term sub-fund. Indeed, due to a large amount of sell transactions on TD 06/03/2023 and VD 08/03/2023 (16% of the sub-fund's net assets) the amount of cash deposited at the same entity (Banque Degroof Petercam Luxembourg) exceeded 20% (2.106.877,28 EUR or 22.947% of the sub-fund's net assets). The breach was resolved by adapting the positions in question.

32.11.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

32.11.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B BONDS EUR QUALITY SHORT TERM

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:
- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
 - not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
 - promoting environmental, social and governance (ESG) best practices.
 - excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- 1) For direct investments (in corporate bonds):
 - a) The sub-fund has not been exposed to companies considered to be below Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments (in sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	98.22%	97.9%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For direct investments (in corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection.

Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to DPAM's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
3/4 BBVA JUN25 REGS 04.06.2025	Financial and insurance activities	4.27	Spain

1 1/2 BNP NOV25 17.11.2025	Financial and insurance activities	3.21	France

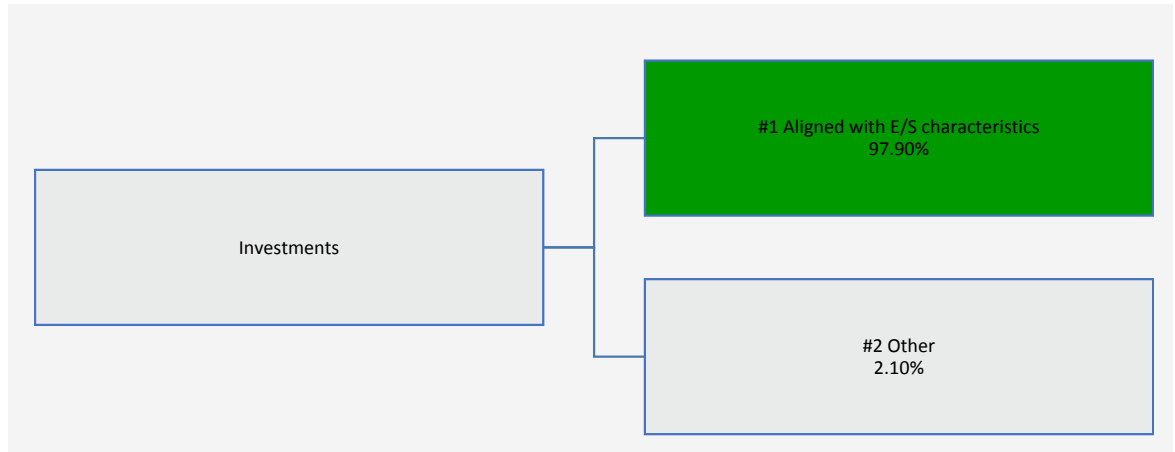

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 97.9% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	57.78
Administrative and support service activities	Rental and leasing activities	6.31
Manufacturing	Manufacture of food products	5.52
Manufacturing	Manufacture of computer, electronic and optical products	3.41
Manufacturing	Manufacture of electrical equipment	3.39
Manufacturing	Manufacture of beverages	3.31
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	3.23
Real estate activities	Real estate activities	3.21
Manufacturing	Other manufacturing	3.13
Manufacturing	Manufacture of wearing apparel	2.26
Information and communication	Telecommunications	2.22
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Social work activities without accommodation	2.13
Manufacturing	Manufacture of other transport equipment	2.00
Liquid assets	Liquid assets	2.10

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 2.1% in liquid assets. There are no minimum environmental or social guarantees on these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

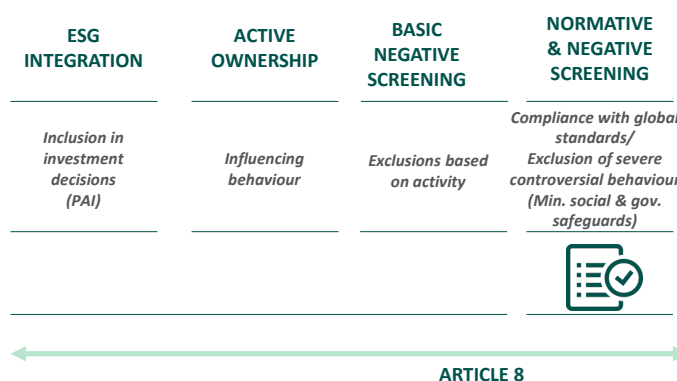

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

33. INFORMATION ABOUT THE SUB-FUND DPAM B DEFENSIVE STRATEGY

33.1. MANAGEMENT REPORT

33.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Defensive Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Defensive Strategy sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

33.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

33.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities a medium-term capital gain by investing in debt securities of issuers from throughout the world.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal capital protection or guarantee is given to the investors of the sub-fund.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bond investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment (undertakings for collective investment in marketable securities and/or other undertakings for collective investment)).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 30% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

33.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

33.1.5. Policy followed during the year

2023 started as a mirror image of 2022. Investment-light investors pushed up both equity and bond markets with European equities leading the rally as economic surprises improved quickly. We decided to increase the equity weight, looking for value in the UK market and Emerging markets, as such seeking direct and indirect exposure to the unexpected re-opening in China. In Europe we looked for European small caps.

As central banks continued to tighten rates, a strong jobs report in the US pushed interest rate expectations higher. With the pressure on the rate market, we decided to turn to European high yield. A way to invest in short term maturities keeping duration low while yields had increased to above average spread levels.

The positive momentum in the equity markets changed on March 10th when Silicon Valley Bank was shut down by regulators. Liquidity problems also hit Credit Swiss which was quickly absorbed by UBS to avoid a bank run. We reduced exposure towards European value stocks, an investment style highly exposed to banks. We also started to increase the duration within the fund.

Going into the second quarter of 2023, economic growth momentum remained resilient in the wake of higher interest rates and tighter credit conditions. Declining energy prices will continue to push down headline inflation, which is expected to translate into lower core inflation. Yet again, central banks maintained their hawkish stance, giving pushback to market expectations. We continued to increase duration, investing in European Government bond funds. The view was also implemented on the equity side where we reduced value and increased growth stocks seeking more interested sensitive corporate cash flows.

Positive surprises on GDP increased the conviction of a soft-landing scenario in the US over the second half of the year. While on the European side the picture continued to deteriorate. On the central bank side, wait and see remained the stance over the summer. This led to markets pricing in higher for longer, leading both fixed income and equity markets to correct. Within these markets, we noticed the valuation discounts on European Real estate were exaggerated. We decided to increase the holdings in real estate equities.

As yields continued to drift higher, we further increased the rate sensitivity in September. According to our view, the flattening of the yield curve made no economic sense given expected macro regime and hence this move was rather seen an opportunity. Seeing rate markets starting to rally in November, we increased the equity weight of the portfolio. Lower rates are expected to be beneficial for equity valuations which had corrected heavily in October. We pre-dominantly increased European equities.

33.1.6. Future policy

Leading indicators continue to point towards a global economic slowdown in 2024. The US economy is holding up well so far with a strong Q3 GDP print and resilient PMIs. Labor markets remain tight but are cooling down. We can expect the FED to start cutting policy rates in 2024, but the timing and the magnitude of the cuts are still unclear. European economic activity continues to be muted and a recession is by no means off the table. The disinflationary trend remains intact, but base effects could turn into a headwind again as of Q2 2024. Short-term we remain cautiously optimistic on equities, but volatility will surely pick up again in 2024 either due to faster economic deceleration or changing inflation dynamics. Some of the investments made in 2023 will need to be revisited (eg. Real estate equities) as market environment changes quickly. Otherwise, some opportunities may be found within small caps as valuations are relatively cheap when compared to 20-year history and sentiment indicators might bottom in 2024. In fixed income markets, focus has shifted to duration positioning but increasingly important income generation. As government bonds market are re-pricing rate expectations, good balance between short term instruments, sensitive to monetary policy and longer-term instruments needs to be sought. On the credit side, yield pickup via credit spreads should be possible to deliver an attractive return as corporate fundamentals still look strong.

33.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

33.6. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
LUXEMBOURG (GRAND DUCHY)	49.11%
BELGIUM	44.30%
IRELAND	3.38%
UNITED STATES OF AMERICA	2.05%
SPAIN	1.16%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

33.7. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
UNIT TRUSTS, UCIT	95.01%
STATES	3.21%
REAL ESTATE	1.78%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

33.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	74,682,468.55	7,465,175.51	82,147,644.06
Sales	81,994,599.33	17,353,071.45	99,347,670.78
Total 1	156,677,067.88	24,818,246.96	181,495,314.84
Subscriptions	5,404,096.63	2,400,871.88	7,804,968.51
Redemptions	10,994,516.58	13,503,235.24	24,497,751.82
Total 2	16,398,613.21	15,904,107.12	32,302,720.33
Reference average of the total net asset	137,015,019.42	130,350,954.81	133,655,600.55
Rotation Percentage	102.38%	6.84%	111.62%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

33.11. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

- Class V - BE6309888384 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.79%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.21%

- Class W - BE6309889390 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.79%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.21%

Fee sharing

As at 31 December 2023, 12.63% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

33.13. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

33.13.1. Gross dividends paid in the financial year

2019	class A 0.89 EUR class M 1.39 EUR
2020	class A 0.85 EUR class M 0.85 EUR
2021	class A 1.37 EUR class M 1.38 EUR
2022	class A 0.76 EUR class M 1.23 EUR

33.13.2. Valuation of financial instruments

Bonds, other debt instruments and money market instruments have been valued at the average price in the portfolio. No adjustment has been made to the valuations to obtain an approximation of the purchase prices, as the difference between the purchase prices and the average prices has varied significantly over the period, both in terms of time and in relation to the security's features.

33.13.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

33.13.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B DEFENSIVE STRATEGY

Legal entity identifier:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Over the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the sub-fund promoted environmental and social characteristics by investing at least 75% of its net assets in (1) undertakings for collective investment or their sub-funds (hereinafter collectively referred to as "UCIs"), managed by DPAM or by third-party managers, which promote, among other things, environmental or social characteristics within the meaning of the Regulation 2019/2088 and/or which have a sustainable investment objective within the meaning of the Regulation 2019/2088 (indirect investments); and/or (2) securities that meet the environmental and social characteristics it promotes (direct investments).

Finally, by incorporating ESG factors into its investment process, the sub-fund has promoted environmental, social and governance (ESG) best practices.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

1) For direct investments (in shares or corporate bonds):

- a) The sub-fund has not been exposed to companies considered to be below Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments in sovereign bonds:

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

3) For investments in UCIs:

The sub-fund has invested in sub-funds that promote, among other things, environmental or social characteristics within the meaning of Regulation 2019/2088 and/or sub-funds of UCIs that have a sustainable investment objective within the meaning of Regulation 2019/2088.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	84.81%	95.65%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

For direct investments (in shares or corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

For investments in UCIs:

Yes, the sub-fund has taken into account, over the Reference Period, the PAI only to the extent and according to the consideration of the PAI by the underlying UCI.

As mentioned above, the Sub-fund's ESG investments may include investments in UCIs which are classified as financial products that promote, inter alia, environmental and/or social characteristics within the meaning of Regulation 2019/2088 and/or have a sustainable investment objective within the meaning of Regulation 2019/2088.

As a result of their classification, these UCIs could possibly take into account certain PAI on sustainability factors listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

What was the proportion of sustainability-related investments?

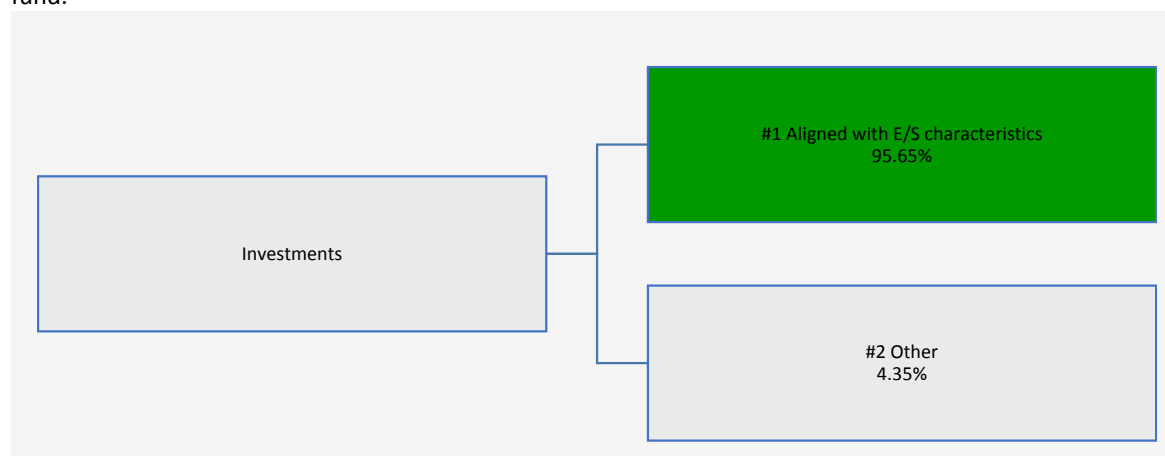

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Over the Reference Period, the sub-fund has invested a minimum of 75% of its assets:

- in securities that meet the environmental and social characteristics it promotes; or
- in UCIs which promote, inter alia, environmental or social characteristics within the meaning of Article 8 of Regulation 2019/2088 or have a sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	93.96

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	3.15
Real estate activities	Real estate activities	0.38
Derivatives	Derivatives	0.16
Liquid assets	Liquid assets	2.35

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets (excluding treasury bills)
- Derivative instruments
- Issuers (including UCI) that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The sub-fund may invest in or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 2.35% in liquid assets, 0.16% in derivatives and 1.84% in undertakings for collective investment. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

For investments in UCIs:

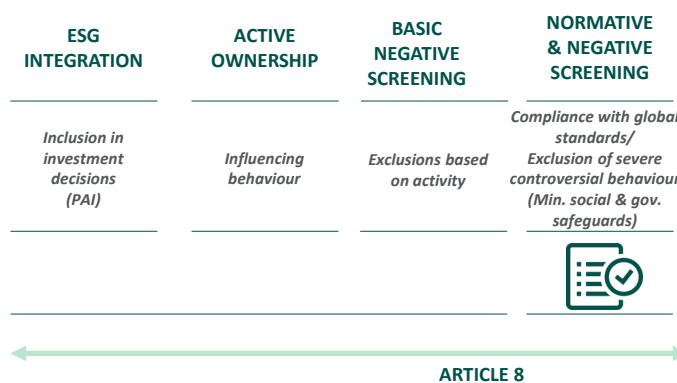

Among its ESG investments, the sub-fund has invested in UCIs that are classified as UCIs that promote, among other things, environmental and/or social characteristics as defined in Regulation 2019/2088 and/or have a sustainable investment objective as defined in Regulation 2019/2088.

In its selection of these UCIs for the sub-fund, DPAM has therefore taken into account the integration of environmental, social and/or governance criteria by the third party manager in the management of these UCIs. The investment strategy and methodology for selecting ESG and/or sustainable investments by third-party managers may vary from one UCI to another.

The list of collective investment schemes in which the Sub-fund may invest is updated on a regular basis by DPAM and on an ad hoc basis in the event of deterioration. At least once a year, DPAM conducts an analysis of the underlying collective investment schemes to verify the extent to which their selection methodology is aligned with the environmental and/or social characteristics that the Sub-fund aims to promote.

In addition, DPAM is in regular dialogue with the managers of these funds. If a UCI no longer has the above-mentioned classification (Article 8 or Article 9 according to Regulation 2019/2088) according to the information declared in the Sub-fund’s prospectus, DPAM will sell the investment in the UCI concerned in the interest of the Sub-fund’s shareholders within six months if such sale is necessary in order to comply, at the overall level of the Sub-fund, with the promoted environmental and social characteristics.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

34. INFORMATION ABOUT THE SUB-FUND DPAM B BALANCED LOW STRATEGY
--

34.1. MANAGEMENT REPORT

34.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Low Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM HORIZON B Balanced Low Strategy sub-fund of the DPAM HORIZON B SICAV dated 1 April 2022.

34.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

34.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities, through an actively managed portfolio, a moderate medium-term and long-term capital gain by investing in equities and/or debt securities of issuers from throughout the world.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal capital protection or guarantee is given to the investors of the sub-fund.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bonds and equities investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment (undertakings for collective investment in marketable securities and/or other undertakings for collective investment)).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 50% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

34.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

34.1.5. Policy followed during the year

2023 started as a mirror image of 2022. Investment-light investors pushed up both equity and bond markets with European equities leading the rally as economic surprises improved quickly. We decided to increase the equity weight, looking for value in the UK market and Emerging markets, as such seeking direct and indirect exposure to the unexpected re-opening in China. In Europe we looked for European small caps.

As central banks continued to tighten rates, a strong jobs report in the US pushed interest rate expectations higher. With the pressure on the rate market, we decided to turn to European high yield. A way to invest in short term maturities keeping duration low while yields had increased to above average spread levels.

The positive momentum in the equity markets changed on March 10th when Silicon Valley Bank was shut down by regulators. Liquidity problems also hit Credit Swiss which was quickly absorbed by UBS to avoid a bank run. We reduced exposure towards European value stocks, an investment style highly exposed to banks. We also started to increase the duration within the fund.

Going into the second quarter of 2023, economic growth momentum remained resilient in the wake of higher interest rates and tighter credit conditions. Declining energy prices will continue to push down headline inflation, which is expected to translate into lower core inflation. Yet again, central banks maintained their hawkish stance, giving pushback to market expectations. We continued to increase duration, investing in European Government bond funds. The view was also implemented on the equity side where we reduced value and increased growth stocks seeking more interested sensitive corporate cash flows.

Positive surprises on GDP increased the conviction of a soft-landing scenario in the US over the second half of the year. While on the European side the picture continued to deteriorate. On the central bank side, wait and see remained the stance over the summer. This led to markets pricing in higher for longer, leading both fixed income and equity markets to correct. Within these markets, we noticed the valuation discounts on European Real estate were exaggerated. We decided to increase the holdings in real estate equities.

As yields continued to drift higher, we further increased the rate sensitivity in September. According to our view, the flattening of the yield curve made no economic sense given expected macro regime and hence this move was rather seen an opportunity. Seeing rate markets starting to rally in November, we increased the equity weight of the portfolio. Lower rates are expected to be beneficial for equity valuations which had corrected heavily in October. We pre-dominantly increased European equities.

34.1.6. Future policy

Leading indicators continue to point towards a global economic slowdown in 2024. The US economy is holding up well so far with a strong Q3 GDP print and resilient PMIs. Labor markets remain tight but are cooling down. We can expect the FED to start cutting policy rates in 2024, but the timing and the magnitude of the cuts are still unclear. European economic activity continues to be muted and a recession is by no means off the table. The disinflationary trend remains intact, but base effects could turn into a headwind again as of Q2 2024. Short-term we remain cautiously optimistic on equities, but volatility will surely pick up again in 2024 either due to faster economic deceleration or changing inflation dynamics. Some of the investments made in 2023 will need to be revisited (eg. Real estate equities) as market environment changes quickly. Otherwise, some opportunities may be found within small caps as valuations are relatively cheap when compared to 20-year history and sentiment indicators might bottom in 2024. In fixed income markets, focus has shifted to duration positioning but increasingly important income generation. As government bonds market are re-pricing rate expectations, good balance between short term instruments, sensitive to monetary policy and longer-term instruments needs to be sought. On the credit side, yield pickup via credit spreads should be possible to deliver an attractive return as corporate fundamentals still look strong.

34.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile: 3.

34.6. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
BELGIUM	51.59%
LUXEMBOURG (GRAND DUCHY)	41.88%
IRELAND	5.37%
UNITED STATES OF AMERICA	1.16%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

34.7. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
UNIT TRUSTS, UCIT	96.18%
REAL ESTATE	2.66%
STATES	1.16%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

34.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	59,454,522.70	7,352,397.87	66,806,920.57
Sales	73,235,830.67	18,175,690.47	91,411,521.14
Total 1	132,690,353.37	25,528,088.34	158,218,441.71
Subscriptions	3,619,293.07	2,027,887.50	5,647,180.57
Redemptions	16,609,363.87	13,694,333.12	30,303,696.99
Total 2	20,228,656.94	15,722,220.62	35,950,877.56
Reference average of the total net asset	128,900,441.38	115,604,760.24	122,197,961.03
Rotation Percentage	87.25%	8.48%	100.06%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

34.11. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Fee sharing

As at 31 December 2023, 10.93% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

34.13. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

34.13.1. Gross dividends paid in the financial year

2019 class A 0.64 EUR
class M 1.18 EUR
2020 class A 0.57 EUR
class M 0.57 EUR
2021 class A 1.12 EUR
class M 1.13 EUR
2022 class A 0.77 EUR
class E 0.38 EUR
class M 1.36 EUR

34.13.2. Valuation of financial instruments

Bonds, other debt instruments and money market instruments have been valued at the average price in the portfolio. No adjustment has been made to the valuations to obtain an approximation of the purchase prices, as the difference between the purchase prices and the average prices has varied significantly over the period, both in terms of time and in relation to the security's features.

34.13.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

34.13.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B BALANCED LOW STRATEGY

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Over the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the sub-fund promoted environmental and social characteristics by investing at least 75% of its net assets in (1) undertakings for collective investment or their sub-funds (hereinafter collectively referred to as "UCIs"), managed by DPAM or by third-party managers, which promote, among other things, environmental or social characteristics within the meaning of the Regulation 2019/2088 and/or which have a sustainable investment objective within the meaning of the Regulation 2019/2088 (indirect investments); and/or (2) securities that meet the environmental and social characteristics it promotes (direct investments).

Finally, by incorporating ESG factors into its investment process, the sub-fund has promoted environmental, social and governance (ESG) best practices.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

1) For direct investments (in shares or corporate bonds):

- a) The sub-fund has not been exposed to companies considered to be below Global Standards;
- b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments (in sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

3) For investments in UCIs:

The sub-fund has invested in sub-funds that promote, among other things, environmental or social characteristics within the meaning of Regulation 2019/2088 and/or sub-funds of UCIs that have a sustainable investment objective within the meaning of Regulation 2019/2088.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	82.32%	93.48%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For direct investments (in shares or corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

Principal adverse impacts are the most significant negative impacts of investment decisions on

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption.

Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

For investments in UCIs:

Yes, the sub-fund has taken into account, over the Reference Period, the PAI only to the extent and according to the consideration of the PAI by the underlying UCI.

As mentioned above, the Sub-fund's ESG investments may include investments in UCIs which are classified as financial products that promote, inter alia, environmental and/or social characteristics within the meaning of Regulation 2019/2088 and/or have a sustainable investment objective within the meaning of Regulation 2019/2088.

As a result of their classification, these UCIs could possibly take into account certain PAI on sustainability factors listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
DPAM B BONDS EUR - P	Financial and insurance activities	17.11	Belgium
DPAM L BONDS EUR QUALITY SUSTAINABLE - P	Financial and insurance activities	8.33	Luxembourg
DPAM L BONDS CORPORATE EUR - P	Financial and insurance activities	7.20	Luxembourg
DPAM B EQUITIES WORLD SUSTAINABLE - P	Financial and insurance activities	5.22	Belgium
DPAM B EQUITIES EUROPE SUSTAINABLE - P	Financial and insurance activities	5.02	Belgium
DPAM B EQUITIES NEWGEMS SUSTAINABLE - P	Financial and insurance activities	3.16	Belgium
DPAM L BONDS EMERGING MARKETS SUSTAINABLE - P	Financial and insurance activities	2.98	Luxembourg
DPAM L BONDS EUR HIGH YIELD SHORT TERM - P	Financial and insurance activities	2.93	Luxembourg
DPAM B EQUITIES US DIVIDEND SUSTAINABLE - P	Financial and insurance activities	2.85	Belgium
DPAM B EQUITIES US ESG LEADERS INDEX - P	Financial and insurance activities	2.81	Belgium
DPAM L BONDS CLIMATE TRENDS SUSTAINABLE - P	Financial and insurance activities	2.78	Luxembourg

Largest investments	Sector	% of assets	Country
DPAM L BONDS GOVERNMENT GLOBAL - P	Financial and insurance activities	2.38	Luxembourg
DPAM B EQUITIES EUROPE SMALL CAPS SUSTAINABLE - P	Financial and insurance activities	2.36	Belgium
DPAM L BONDS UNIVERSALIS UNCONSTRAINED - P	Financial and insurance activities	2.18	Luxembourg
DPAM B EQUITIES US BEHAVIORAL VALUE - P	Financial and insurance activities	2.06	Belgium

What was the proportion of sustainability-related investments?

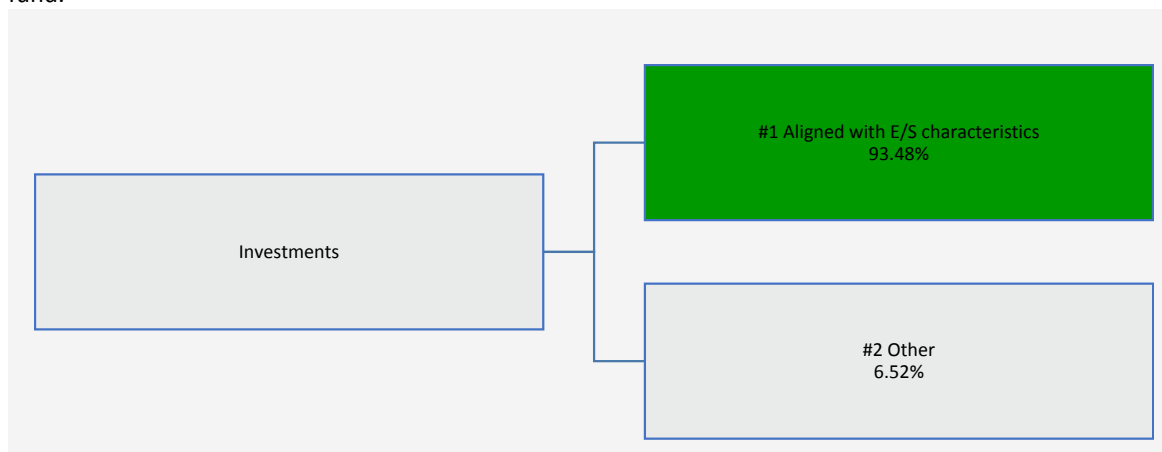

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Over the Reference Period, the sub-fund has invested a minimum of 75% of its assets:

- in securities that meet the environmental and social characteristics it promotes; or
- in UCIs which promote, inter alia, environmental or social characteristics within the meaning of Article 8 of Regulation 2019/2088 or have a sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	94.87
Public administration	Public administration and defence; compulsory social security	1.12
Real estate activities	Real estate activities	0.43
Derivatives	Derivatives	0.18
Liquid assets	Liquid assets	3.41

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 -**turnover** reflecting the share of revenue from green activities of investee companies.
 -**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -**operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets (excluding treasury bills)
- Derivative instruments
- Issuers (including UCI) that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The sub-fund may invest in or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 3.41% in liquid assets, 0.18% in derivatives and 2.93% in undertakings for collective investment. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

For investments in UCIs:

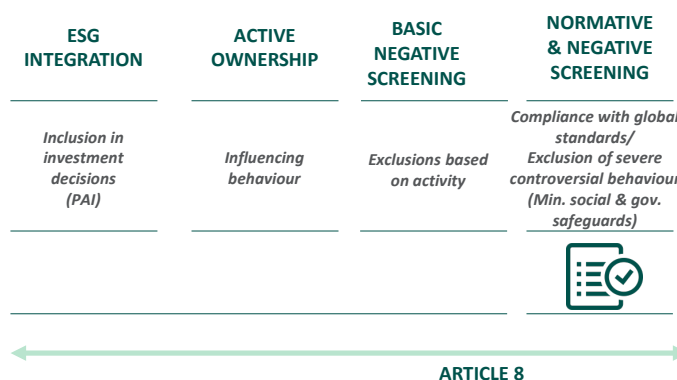

Among its ESG investments, the sub-fund has invested in UCIs that are classified as UCIs that promote, among other things, environmental and/or social characteristics as defined in Regulation 2019/2088 and/or have a sustainable investment objective as defined in Regulation 2019/2088.

In its selection of these UCIs for the sub-fund, DPAM has therefore taken into account the integration of environmental, social and/or governance criteria by the third party manager in the management of these UCIs. The investment strategy and methodology for selecting ESG and/or sustainable investments by third-party managers may vary from one UCI to another.

The list of collective investment schemes in which the Sub-fund may invest is updated on a regular basis by DPAM and on an ad hoc basis in the event of deterioration. At least once a year, DPAM conducts an analysis of the underlying collective investment schemes to verify the extent to which their selection methodology is aligned with the environmental and/or social characteristics that the Sub-fund aims to promote.

In addition, DPAM is in regular dialogue with the managers of these funds. If a UCI no longer has the above-mentioned classification (Article 8 or Article 9 according to Regulation 2019/2088) according to the information declared in the Sub-fund’s prospectus, DPAM will sell the investment in the UCI concerned in the interest of the Sub-fund’s shareholders within six months if such sale is necessary in order to comply, at the overall level of the Sub-fund, with the promoted environmental and social characteristics.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

How does the reference benchmark differ from a broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

35. INFORMATION ABOUT THE SUB-FUND DPAM B BALANCED STRATEGY
--

35.1. MANAGEMENT REPORT

35.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Balanced Strategy sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

35.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

35.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities a moderate medium-term and long-term capital gain by investing in equities and/or debt securities of issuers from throughout the world.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal capital protection or guarantee is given to the investors of the sub-fund.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bonds and equities investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment (undertakings for collective investment in marketable securities and/or other undertakings for collective investment)).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 65% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

35.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

35.1.5. Policy followed during the year

2023 started as a mirror image of 2022. Investment-light investors pushed up both equity and bond markets with European equities leading the rally as economic surprises improved quickly. We decided to increase the equity weight, looking for value in the UK market and Emerging markets, as such seeking direct and indirect exposure to the unexpected re-opening in China. In Europe we looked for European small caps.

As central banks continued to tighten rates, a strong jobs report in the US pushed interest rate expectations higher. With the pressure on the rate market, we decided to turn to European high yield. A way to invest in short term maturities keeping duration low while yields had increased to above average spread levels.

The positive momentum in the equity markets changed on March 10th when Silicon Valley Bank was shut down by regulators. Liquidity problems also hit Credit Swiss which was quickly absorbed by UBS to avoid a bank run. We reduced exposure towards European value stocks, an investment style highly exposed to banks. We also started to increase the duration within the fund.

Going into the second quarter of 2023, economic growth momentum remained resilient in the wake of higher interest rates and tighter credit conditions. Declining energy prices will continue to push down headline inflation, which is expected to translate into lower core inflation. Yet again, central banks maintained their hawkish stance, giving pushback to market expectations. We continued to increase duration, investing in European Government bond funds. The view was also implemented on the equity side where we reduced value and increased growth stocks seeking more interested sensitive corporate cash flows.

Positive surprises on GDP increased the conviction of a soft-landing scenario in the US over the second half of the year. While on the European side the picture continued to deteriorate. On the central bank side, wait and see remained the stance over the summer. This led to markets pricing in higher for longer, leading both fixed income and equity markets to correct. Within these markets, we noticed the valuation discounts on European Real estate were exaggerated. We decided to increase the holdings in real estate equities.

As yields continued to drift higher, we further increased the rate sensitivity in September. According to our view, the flattening of the yield curve made no economic sense given expected macro regime and hence this move was rather seen an opportunity. Seeing rate markets starting to rally in November, we increased the equity weight of the portfolio. Lower rates are expected to be beneficial for equity valuations which had corrected heavily in October. We pre-dominantly increased European equities.

35.1.6. Future policy

Leading indicators continue to point towards a global economic slowdown in 2024. The US economy is holding up well so far with a strong Q3 GDP print and resilient PMIs. Labor markets remain tight but are cooling down. We can expect the FED to start cutting policy rates in 2024, but the timing and the magnitude of the cuts are still unclear. European economic activity continues to be muted and a recession is by no means off the table. The disinflationary trend remains intact, but base effects could turn into a headwind again as of Q2 2024. Short-term we remain cautiously optimistic on equities, but volatility will surely pick up again in 2024 either due to faster economic deceleration or changing inflation dynamics. Some of the investments made in 2023 will need to be revisited (eg. Real estate equities) as market environment changes quickly. Otherwise, some opportunities may be found within small caps as valuations are relatively cheap when compared to 20-year history and sentiment indicators might bottom in 2024. In fixed income markets, focus has shifted to duration positioning but increasingly important income generation. As government bonds market are re-pricing rate expectations, good balance between short term instruments, sensitive to monetary policy and longer-term instruments needs to be sought. On the credit side, yield pickup via credit spreads should be possible to deliver an attractive return as corporate fundamentals still look strong.

35.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

35.6. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
BELGIUM	51.52%
LUXEMBOURG (GRAND DUCHY)	39.41%
IRELAND	7.70%
SPAIN	0.83%
UNITED STATES OF AMERICA	0.54%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

35.7. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
UNIT TRUSTS, UCIT	96.01%
REAL ESTATE	2.62%
STATES	1.37%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

35.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	495,539,798.38	90,493,924.00	586,033,722.38
Sales	543,925,705.79	153,493,670.30	697,419,376.09
Total 1	1,039,465,504.17	243,987,594.30	1,283,453,098.47
Subscriptions	40,879,354.82	53,003,134.22	93,882,489.04
Redemptions	85,785,540.54	136,968,092.51	222,753,633.05
Total 2	126,664,895.36	189,971,226.73	316,636,122.09
Reference average of the total net asset	1,277,102,382.51	1,218,360,041.36	1,247,489,805.06
Rotation Percentage	71.47%	4.43%	77.50%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

35.11. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.26%

Fee sharing

As at 31 December 2023, 17.57% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

35.13. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

35.13.1. Gross dividends paid in the financial year

2019	class A 0.95 EUR class M 1.72 EUR
2020	class A 0.80 EUR class M 0.80 EUR
2021	class A 1.52 EUR class M 1.54 EUR
2022	class A 1.68 EUR class M 2.07 EUR

35.13.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

35.13.3. Investment restrictions and overruns

Between NAV Dates 06/03/2023 and 10/03/2023 a legal active breach was open in the DPAM B Balanced Strategy sub-fund. Indeed, due to transactions made by the PM the limit of 25% control ratio in another UCI was exceeded. After an automated control by Risk, it was discovered that the control ratio of DPAM B Bonds EUR (BE6254408428) was of 25.25%. Another transaction of 100,000 shares caused the ratio to increase to 27.35% on NAV date 07/03/2023. The PM was notified and made the necessary corrections. The breach was resolved by adapting the positions in question.

35.13.4. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

35.13.5. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B BALANCED STRATEGY

Legal entity identifier:
5493000IO6AZUTR35M03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Over the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the sub-fund promoted environmental and social characteristics by investing at least 75% of its net assets in (1) undertakings for collective investment or their sub-funds (hereinafter collectively referred to as "UCIs"), managed by DPAM or by third-party managers, which promote, among other things, environmental or social characteristics within the meaning of the Regulation 2019/2088 and/or which have a sustainable investment objective within the meaning of the Regulation 2019/2088 (indirect investments); and/or (2) securities that meet the environmental and social characteristics it promotes (direct investments).

Finally, by incorporating ESG factors into its investment process, the sub-fund has promoted environmental, social and governance (ESG) best practices.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● **How did the sustainability indicators perform?**

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

1) For direct investments (in shares or corporate bonds):

- a) The sub-fund has not been exposed to companies considered to be below Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments in sovereign bonds:

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

3) For investments in UCIs:

The sub-fund has invested in sub-funds that promote, among other things, environmental or social characteristics within the meaning of Regulation 2019/2088 and/or sub-funds of UCIs that have a sustainable investment objective within the meaning of Regulation 2019/2088.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	81.33%	93.74%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

For direct investments (in shares or corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

For investments in UCIs:

Yes, the sub-fund has taken into account, over the Reference Period, the PAI only to the extent and according to the consideration of the PAI by the underlying UCI.

As mentioned above, the Sub-fund's ESG investments may include investments in UCIs which are classified as financial products that promote, inter alia, environmental and/or social characteristics within the meaning of Regulation 2019/2088 and/or have a sustainable investment objective within the meaning of Regulation 2019/2088.

As a result of their classification, these UCIs could possibly take into account certain PAI on sustainability factors listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
DPAM B BONDS EUR - P	Financial and insurance activities	9.79	Belgium

What was the proportion of sustainability-related investments?

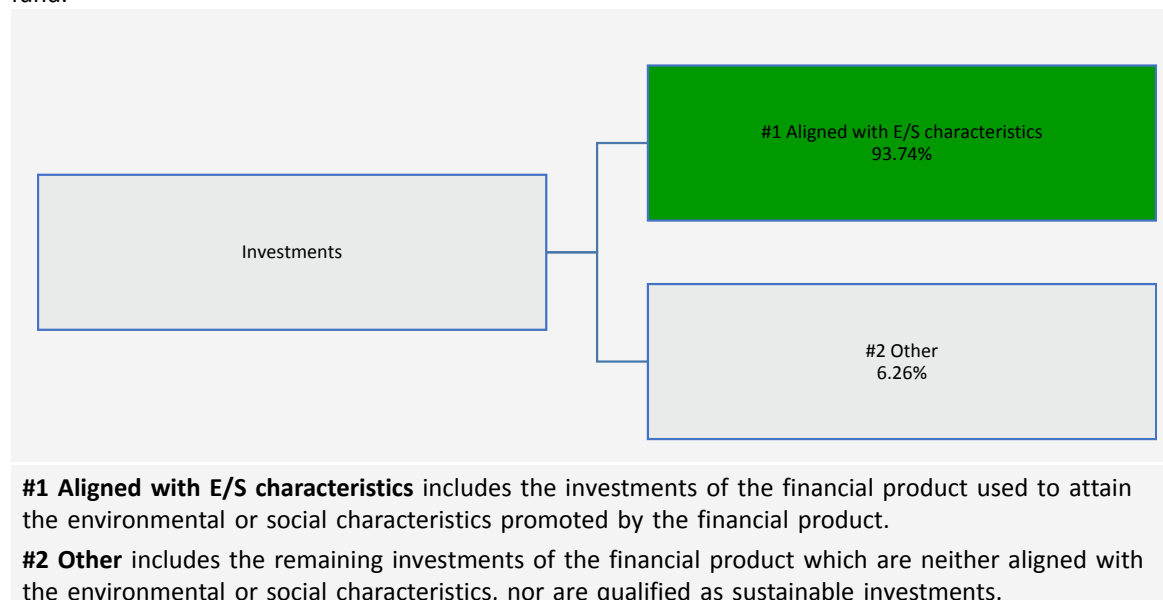

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Over the Reference Period, the sub-fund has invested a minimum of 75% of its assets:

- in securities that meet the environmental and social characteristics it promotes; or
- in UCIs which promote, inter alia, environmental or social characteristics within the meaning of Article 8 of Regulation 2019/2088 or have a sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	95.39

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	1.34
Real estate activities	Real estate activities	0.20
Derivatives	Derivatives	0.19
Liquid assets	Liquid assets	2.88

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets (excluding treasury bills)
- Derivative instruments
- Issuers (including UCI) that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The sub-fund may invest in or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 2.88% in liquid assets, 0.19% in derivatives and 3.19% in undertakings for collective investment. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

For investments in UCIs:

Among its ESG investments, the sub-fund has invested in UCIs that are classified as UCIs that promote, among other things, environmental and/or social characteristics as defined in Regulation 2019/2088 and/or have a sustainable investment objective as defined in Regulation 2019/2088.

In its selection of these UCIs for the sub-fund, DPAM has therefore taken into account the integration of environmental, social and/or governance criteria by the third party manager in the management of these UCIs. The investment strategy and methodology for selecting ESG and/or sustainable investments by third-party managers may vary from one UCI to another.

The list of collective investment schemes in which the Sub-fund may invest is updated on a regular basis by DPAM and on an ad hoc basis in the event of deterioration. At least once a year, DPAM conducts an analysis of the underlying collective investment schemes to verify the extent to which their selection methodology is aligned with the environmental and/or social characteristics that the Sub-fund aims to promote.

In addition, DPAM is in regular dialogue with the managers of these funds. If a UCI no longer has the above-mentioned classification (Article 8 or Article 9 according to Regulation 2019/2088) according to the information declared in the Sub-fund’s prospectus, DPAM will sell the investment in the UCI concerned in the interest of the Sub-fund’s shareholders within six months if such sale is necessary in order to comply, at the overall level of the Sub-fund, with the promoted environmental and social characteristics.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

36. INFORMATION ABOUT THE SUB-FUND DPAM B ACTIVE STRATEGY

36.1. MANAGEMENT REPORT

36.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription day: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Active Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Initial subscription price: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Active Strategy sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

36.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

36.1.3. Aim and main outlines of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities a medium-term capital gain by investing in equities and/or debt securities of issuers from throughout the world. No formal capital protection or guarantee is given to the investors of the sub-fund.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in equity investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment (undertakings for collective investment in marketable securities and/or other undertakings for collective investment)).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 85% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

36.1.4. Index and benchmark

No benchmarks are used in the management of the sub-fund.

36.1.5. Policy followed during the year

2023 started as a mirror image of 2022. Investment-light investors pushed up both equity and bond markets with European equities leading the rally as economic surprises improved quickly. We decided to increase the equity weight, looking for value in the UK market and Emerging markets, as such seeking direct and indirect exposure to the unexpected re-opening in China. In Europe we looked for European small caps.

As central banks continued to tighten rates, a strong jobs report in the US pushed interest rate expectations higher. With the pressure on the rate market, we decided to turn to European high yield. A way to invest in short term maturities keeping duration low while yields had increased to above average spread levels.

The positive momentum in the equity markets changed on March 10th when Silicon Valley Bank was shut down by regulators. Liquidity problems also hit Credit Swiss which was quickly absorbed by UBS to avoid a bank run. We reduced exposure towards European value stocks, an investment style highly exposed to banks. We also started to increase the duration within the fund.

Going into the second quarter of 2023, economic growth momentum remained resilient in the wake of higher interest rates and tighter credit conditions. Declining energy prices will continue to push down headline inflation, which is expected to translate into lower core inflation. Yet again, central banks maintained their hawkish stance, giving pushback to market expectations. We continued to increase duration, investing in European Government bond funds. The view was also implemented on the equity side where we reduced value and increased growth stocks seeking more interested sensitive corporate cash flows.

Positive surprises on GDP increased the conviction of a soft-landing scenario in the US over the second half of the year. While on the European side the picture continued to deteriorate. On the central bank side, wait and see remained the stance over the summer. This led to markets pricing in higher for longer, leading both fixed income and equity markets to correct. Within these markets, we noticed the valuation discounts on European Real estate were exaggerated. We decided to increase the holdings in real estate equities.

As yields continued to drift higher, we further increased the rate sensitivity in September. According to our view, the flattening of the yield curve made no economic sense given expected macro regime and hence this move was rather seen an opportunity. Seeing rate markets starting to rally in November, we increased the equity weight of the portfolio. Lower rates are expected to be beneficial for equity valuations which had corrected heavily in October. We pre-dominantly increased European equities.

36.1.6. Future policy

Leading indicators continue to point towards a global economic slowdown in 2024. The US economy is holding up well so far with a strong Q3 GDP print and resilient PMIs. Labor markets remain tight but are cooling down. We can expect the FED to start cutting policy rates in 2024, but the timing and the magnitude of the cuts are still unclear. European economic activity continues to be muted and a recession is by no means off the table. The disinflationary trend remains intact, but base effects could turn into a headwind again as of Q2 2024. Short-term we remain cautiously optimistic on equities, but volatility will surely pick up again in 2024 either due to faster economic deceleration or changing inflation dynamics. Some of the investments made in 2023 will need to be revisited (eg. Real estate equities) as market environment changes quickly. Otherwise, some opportunities may be found within small caps as valuations are relatively cheap when compared to 20-year history and sentiment indicators might bottom in 2024. In fixed income markets, focus has shifted to duration positioning but increasingly important income generation. As government bonds market are re-pricing rate expectations, good balance between short term instruments, sensitive to monetary policy and longer-term instruments needs to be sought. On the credit side, yield pickup via credit spreads should be possible to deliver an attractive return as corporate fundamentals still look strong.

36.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile: 3.

36.6. GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
BELGIUM	57.97%
LUXEMBOURG (GRAND DUCHY)	31.28%
IRELAND	9.80%
ITALY	0.69%
UNITED STATES OF AMERICA	0.26%
Total	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

36.7. ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
UNIT TRUSTS, UCIT	96.35%
REAL ESTATE	2.70%
STATES	0.95%
TOTAL	100.00%

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

36.8. CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	75,340,567.97	22,066,508.63	97,407,076.60
Sales	73,642,501.76	24,853,394.48	98,495,896.24
Total 1	148,983,069.73	46,919,903.11	195,902,972.84
Subscriptions	13,067,483.39	16,365,388.60	29,432,871.99
Redemptions	10,659,999.50	20,900,498.13	31,560,497.63
Total 2	23,727,482.89	37,265,886.73	60,993,369.62
Reference average of the total net asset	263,337,056.21	265,451,711.81	264,403,074.37
Rotation Percentage	47.56%	3.64%	51.02%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and www.beama.be. This information is also available at the counters of the financial services department.

36.11. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

Class B

Annual return:

No benchmark is used in the management of the sub-fund.

Class A

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A	10.08 % (in EUR)	2.10 % (in EUR)	6.82 % (in EUR)	5.57 % (in EUR)	02/11/2011	6.26 % (in EUR)

Fee sharing

As at 31 December 2023, 31.22% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

36.13. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

36.13.1. Gross dividends paid in the financial year

2019	class A 0.94 EUR class M 1.91 EUR
2020	class A 0.73 EUR class M 0.73 EUR
2021	class A 1.77 EUR class M 1.79 EUR
2022	class A 2.5 EUR class M 2.54 EUR

36.13.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

36.13.3. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

36.13.4. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B ACTIVE STRATEGY

Legal entity identifier:
549300DJFYHUH856S724

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Over the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the sub-fund promoted environmental and social characteristics by investing at least 75% of its net assets in (1) undertakings for collective investment or their sub-funds (hereinafter collectively referred to as "UCIs"), managed by DPAM or by third-party managers, which promote, among other things, environmental or social characteristics within the meaning of the Regulation 2019/2088 and/or which have a sustainable investment objective within the meaning of the Regulation 2019/2088 (indirect investments); and/or (2) securities that meet the environmental and social characteristics it promotes (direct investments).

Finally, by incorporating ESG factors into its investment process, the sub-fund has promoted environmental, social and governance (ESG) best practices.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

1) For direct investments (in shares or corporate bonds):

- a) The sub-fund has not been exposed to companies considered to be below Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments in sovereign bonds:

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

3) For investments in UCIs:

The sub-fund has invested in sub-funds that promote, among other things, environmental or social characteristics within the meaning of Regulation 2019/2088 and/or sub-funds of UCIs that have a sustainable investment objective within the meaning of Regulation 2019/2088.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	82.49%	89.20%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and bribery matters.

For direct investments (in shares or corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

For investments in UCIs:

Yes, the sub-fund has taken into account, over the Reference Period, the PAI only to the extent and according to the consideration of the PAI by the underlying UCI.

As mentioned above, the Sub-fund's ESG investments may include investments in UCIs which are classified as financial products that promote, inter alia, environmental and/or social characteristics within the meaning of Regulation 2019/2088 and/or have a sustainable investment objective within the meaning of Regulation 2019/2088.

As a result of their classification, these UCIs could possibly take into account certain PAI on sustainability factors listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Over the Reference Period, the sub-fund has invested a minimum of 75% of its assets:

- in securities that meet the environmental and social characteristics it promotes; or
- in UCIs which promote, inter alia, environmental or social characteristics within the meaning of Article 8 of Regulation 2019/2088 or have a sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	93.44

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	0.90
Derivatives	Derivatives	0.18
Liquid assets	Liquid assets	5.47

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomyaligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

Enabling activities directly enable other activities to make a

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets (excluding treasury bills)
- Derivative instruments
- Issuers (including UCI) that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The sub-fund may invest in or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 5.47% in liquid assets, 0.18% in derivatives and 5.15% in undertakings for collective investment. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For direct investments (in shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

For direct investments (in sovereign bonds):

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

For investments in UCIs:

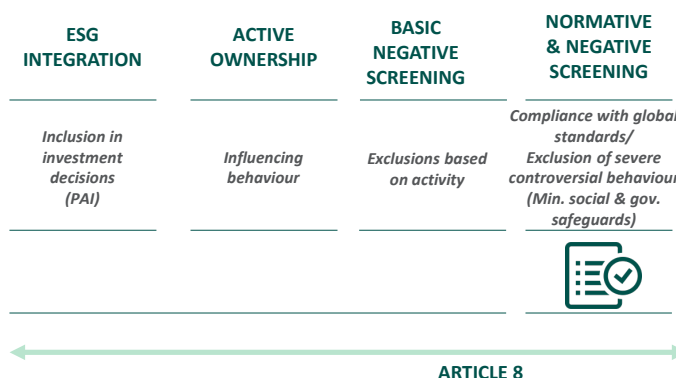

Among its ESG investments, the sub-fund has invested in UCIs that are classified as UCIs that promote, among other things, environmental and/or social characteristics as defined in Regulation 2019/2088 and/or have a sustainable investment objective as defined in Regulation 2019/2088.

In its selection of these UCIs for the sub-fund, DPAM has therefore taken into account the integration of environmental, social and/or governance criteria by the third party manager in the management of these UCIs. The investment strategy and methodology for selecting ESG and/or sustainable investments by third-party managers may vary from one UCI to another.

The list of collective investment schemes in which the Sub-fund may invest is updated on a regular basis by DPAM and on an ad hoc basis in the event of deterioration. At least once a year, DPAM conducts an analysis of the underlying collective investment schemes to verify the extent to which their selection methodology is aligned with the environmental and/or social characteristics that the Sub-fund aims to promote.

In addition, DPAM is in regular dialogue with the managers of these funds. If a UCI no longer has the above-mentioned classification (Article 8 or Article 9 according to Regulation 2019/2088) according to the information declared in the Sub-fund’s prospectus, DPAM will sell the investment in the UCI concerned in the interest of the Sub-fund’s shareholders within six months if such sale is necessary in order to comply, at the overall level of the Sub-fund, with the promoted environmental and social characteristics.

The stages of the investment process are outlined below:

How did this financial product perform compared with the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable

37. INFORMATION ABOUT THE SUB-FUND DPAM B EQUITIES JAPAN ESG LEADERS INDEX

37.1. MANAGEMENT REPORT

37.1.1. Launch date of the sub-fund and subscription price of the shares

Initial subscription date : 21 August 2023.

Initial subscription price: EUR 100.

37.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

37.1.3. Aim and main outlines of the investment policy

Objective

The objective is to provide shareholders with as high a total return as possible, with an emphasis on investments in Japanese equities.

The sub-fund is a tracker-type fund whose objective is to replicate, physically and not synthetically, the "Net Dividends Reinvested" performance of the cap-weighted 39MSCI Japan ESG Leaders index in Euro.

It is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

37.1.4. Index and benchmark

MSCI Japan ESG Leaders Net Total Return index. This benchmark is used in the management of the sub-fund.

Further information on the Index, its composition, calculation and the rules governing its periodic review and rebalancing, as well as on the general methodology of the MSCI indices, is available at www.msci.com.

The performance of the benchmark index is calculated with net dividends reinvested (Net Return).

MSCI Inc is registered with ESMA (European Securities and Markets Authority).

The tracking error relative to the benchmark is around 1.50%.

37.1.5. Policy followed during the year

The benchmark of the DPAM B Equities Japan ESG Leaders Index sub-fund is the MSCI Japan ESG Leaders Net DTR Index. The MSCI Japan ESG Leaders Net DTR Index, Net Dividends Reinvested, covers Japan and is established by MSCI.

As of the end of the year, the index had 117 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying. The use of futures on the Nikkei 225 index supplemented positions in equities and allowed to be fully invested through a liquid instrument

without disrupting the portfolio structure during daily subscriptions and redemptions. The Nikkei 225 Index correlates well with the MSCI Japan ESG Leaders Net DTR Index. The results obtained on these futures are therefore close to those which would have been obtained directly in securities.

During the year, the sub-fund closely followed the movement of the index.

37.1.6. Future policy

The DPAM B Equities Japan ESG Leaders Index sub-fund, whose vocation is to be representative of the Japanese market, will continue its investment policy based on broad sector diversification with the MSCI Japan ESG Leaders Net DTR Index published by MSCI as a benchmark.

37.1.7. Synthetic risk indicator

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

	1st semester	2nd semester	Total
Purchases	0.00	82,927,356.88	82,927,356.88
Sales	0.00	4,648,446.37	4,648,446.37
Total 1	0.00	87,575,803.25	87,575,803.25
Subscriptions	0.00	89,733,699.80	89,733,699.80
Redemptions	0.00	11,381,466.63	11,381,466.63
Total 2	0.00	101,115,166.43	101,115,166.43
Reference average of the total net asset	0.00	0.00	0.00
Rotation Percentage	0.00%	0.00%	0.00%

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

37.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Table showing historical performance (actuarial returns):

- Class P - BE6344910433 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.17%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.34%

37.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

37.12.1. Transparency in sustainability

Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

37.12.2. Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
DPAM B EQUITIES JAPAN ESG LEADERS INDEX

Legal entity identifier:
213800G7LZYL7YN1RT37

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 21/08/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund was passively managed and aimed to physically replicate the MSCI Japan ESG Leaders Index in Euro ("the Index").

The Index provides exposure to Japanese large and mid-cap companies with high ESG performance relative to their peers in the same sector ("Best-in-Class" 50%).

By construction of the Replicated Index, the Sub-fund aimed to improve the environmental and social characteristics compared to the starting universe, the parent index, the MSCI Japan ("Parent Index").

In addition, the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

● **How did the sustainability indicators perform?**

During the Reference Period, the sustainability indicators used to measure the attainment of all of the environmental and social characteristics promoted by the Sub-fund corresponded to the binding investment restrictions of the Index it aims to replicate (some of the indicators are compared to the Parent Index):

- a. The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- b. The Sub-fund has zero exposure to companies involved in controversial economic activities, based on the exposure limits imposed by the index construction methodology;
- c. Zero exposure to companies involved in severe ESG controversies;

The methodologies used to construct the indices are available on the MSCI.com website: <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

Further information, including methodologies for calculating ESG scores and controversy levels, can be found on the MSCI website: www.msci.com.

● **...and compared to previous periods?**

Not applicable

Reference period	2022	2023
E/S characteristics	N.A.	99.73%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicates passively:

1) Firstly, with regard to environmental PAI:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the environmental PAIs.

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments).

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at www.msci.com.

The methodologies used to construct the indices are available on the website:

<https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
SONY CORPORATION	Manufacturing	6.00	Japan
TOKYO ELECTRON LTD.	Manufacturing	4.25	Japan
SHIN-ETSU CHEMICAL	Manufacturing	3.84	Japan
HITACHI, LTD.	Manufacturing	3.34	Japan
SUMITOMO MITSUI FINANCIAL	Financial and insurance activities	3.09	Japan
RECRUIT HOLDINGS	Administrative and support service activities	3.03	Japan
NINTENDO	Manufacturing	2.70	Japan
DAIICHI SANKYO COMPANY, LIMITED	Manufacturing	2.54	Japan
ITOCHU CORPORATION	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.42	Japan

Largest investments	Sector	% of assets	Country
KDDI CORPORATION	Information and communication	2.37	Japan
TOKIO MARINE HOLDINGS, INC.	Financial and insurance activities	2.25	Japan
HOYA CORP	Manufacturing	2.21	Japan
FAST RETAILING	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.18	Japan
DAIKIN INDUSTRIES	Manufacturing	2.14	Japan
MIZUHO FINANCIAL GROUP	Financial and insurance activities	2.05	Japan

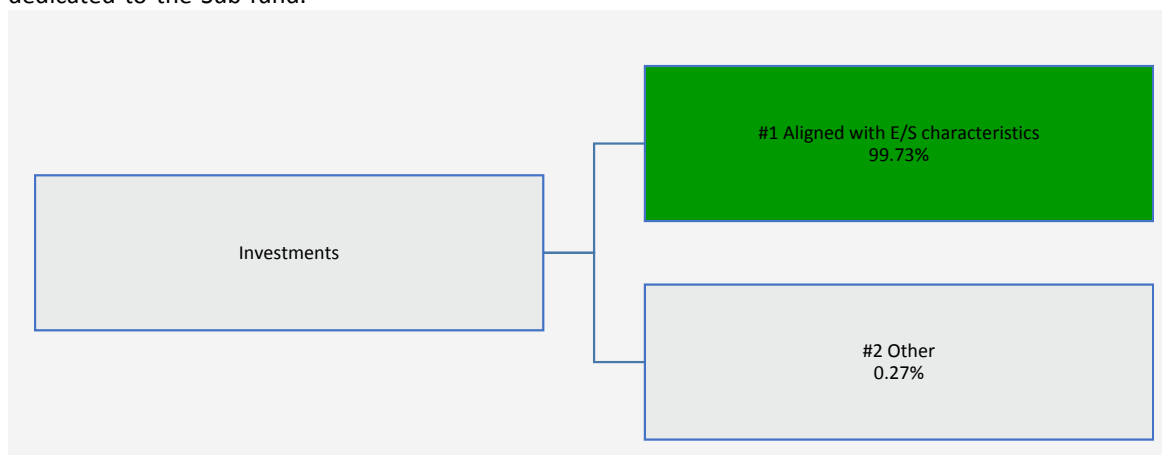

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

During the Reference Period, the Sub-fund invested 99.73% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics"). Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	14.42
Manufacturing	Manufacture of machinery and equipment n.e.c.	13.95
Financial and insurance activities	Financial service activities, except insurance and pension funding	6.89
Manufacturing	Manufacture of chemicals and chemical products	6.44
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	5.95
Manufacturing	Other manufacturing	5.85

Sector	Sub-sector	% assets
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	5.48
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.24
Information and communication	Telecommunications	4.17
Real estate activities	Real estate activities	3.59
Administrative and support service activities	Employment activities	3.03
Information and communication	Computer programming, consultancy and related activities	2.87
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	2.42
Arts, entertainment and recreation	Sports activities and amusement and recreation activities	2.02
Manufacturing	Manufacture of food products	1.90
Manufacturing	Manufacture of electrical equipment	1.63
Manufacturing	Manufacture of rubber and plastic products	1.45
Transportation and storage	Land transport and transport via pipelines	1.42
Construction	Construction of buildings	1.19
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.14
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	1.13
Agriculture, forestry and fishing	Crop and animal production, hunting and related service activities	1.12
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	0.82
Administrative and support service activities	Security and investigation activities	0.74
Manufacturing	Manufacture of paper and paper products	0.72
Mining and quarrying	Extraction of crude petroleum and natural gas	0.65
Professional, scientific and technical activities	Other professional, scientific and technical activities	0.61
Information and communication	Information service activities	0.49
Manufacturing	Manufacture of coke and refined petroleum products	0.46
Transportation and storage	Postal and courier activities	0.46
Manufacturing	Manufacture of other transport equipment	0.41
Manufacturing	Manufacture of basic metals	0.39
Manufacturing	Manufacture of textiles	0.35
Manufacturing	Printing and reproduction of recorded media	0.34
Manufacturing	Manufacture of beverages	0.25
Accommodation and food service activities	Food and beverage service activities	0.21
Transportation and storage	Warehousing and support activities for transportation	0.19
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	0.19

Sector	Sub-sector	% assets
Transportation and storage	Air transport	0.16
Liquid assets	Liquid assets	0.27

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomyaligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.27% in liquid assets. There are no minimum environmental or social guarantees on these investments.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the Reference Period, the Replicated Index was constructed in particular by applying a combination of securities-based exclusions and a Best-in-Class selection process to companies in the MSCI Japan Parent Index:

- a) The exclusion process focused on:

- Companies that do not have an MSCI ESG rating of 'BB' or above. Companies must maintain an MSCI ESG rating of 'BB' or above to remain in the index.
- Companies that are not in compliance with Global Standards and prevention of corruption
- Companies involved in economic sectors and activities that are subject to debate as to whether or not they are ethical and sustainable (e.g. alcohol, gambling, nuclear energy production, tobacco etc.).
- Companies involved in severe ESG controversies: securities must have a score (according to the MSCI ESG Research methodology) of at least 3 to be eligible for inclusion.

b) The MSCI Best-in-Class selection process was applied to the remaining eligible securities in the selection universe:

The Index targets sector weights consistent with those of the Parent Index to limit the systematic risk introduced by the ESG selection process. The methodology aims to include the securities of companies with the highest ESG ratings making up 50% of the market capitalisation of the Parent Index.

Additional information on this index and its composition can be found at www.msci.com. The weight of stocks included in the index will depend on their market capitalisation adjusted for free float.

In addition to the investment restrictions related to Index replication, the Sub-fund adopted the following constraints: On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

During the Reference Period, the DPAM B Equities Japan ESG Leaders Index sub-fund consisted of a full physical replication of the MSCI Japan ESG Leaders Index (benchmark).

The MSCI ESG Leaders indices target sector weights that mirror the relative sector weights of the underlying MSCI Global Investable Market indices (Parent Indices) in order to limit the systematic risk introduced by the ESG selection process.

The Replicated Index was constructed by applying a process combining exclusions (Global Standards compliance filter, involvement in severe controversies, controversial activities) and a best-in-class selection of companies from the MSCI Japan Parent Index. In order to be included and maintained in the MSCI ESG Leaders indices, companies had to have an MSCI ESG rating of 'BB' or above.

The methodologies used to construct the indices are available on the MSCI.com website: <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the benchmark.

● How did this financial product perform compared with the reference benchmark?

	<i>Sub-fund</i>	<i>MSCI JAPAN ESG Leaders Index</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0

	<i>Sub-fund</i>	<i>MSCI JAPAN ESG Leaders Index</i>
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

● **How did this financial product perform compared with the broad market index?**

	<i>Sub-fund</i>	<i>Parent Index- MSCI JAPAN</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0.2
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0.2
