Equity Small Mid Cap Europe, a Sub-Fund of Eurizon Fund

Class Unit: **Z (EUR Accumulation, ISIN: LU0335986534)**

This Sub-Fund is managed by Eurizon Capital S.A., a company of Intesa Sanpaolo Group

OBJECTIVES AND INVESTMENT POLICY

Objectives The Sub-Fund's Investment Manager, Eurizon Capital SGR S.p.A., will seek to achieve over time an average return in excess of the return of a portfolio of small and medium capitalised European stocks represented by the benchmark.

Benchmark MSCI Europe Mid Cap Index® (Net Total Return). *For designing portfolio, measuring performance and calculating performance fee.*

Investment Policy This Sub-Fund's net assets are invested mainly in equity and equity-related instruments issued by small- and medium-sized companies or institutions listed on the leading securities markets of the European countries or traded on another regulated market in these countries.

Investments are selected on the basis of the fundamental and strategic analysis of the individual companies, with the objective to identify those instruments with the greatest potential for appreciation, compared to the market as a whole or the industry in which the issuers operate. This Sub-Fund does not specialize but can invest in a wide range of sectors and industries.

On an ancillary basis, the Sub-Fund's net assets may be invested in any other instruments, such as but not limited to debt and debt-related instruments and cash, including term deposits with credit institutions.

The Sub-Fund may use derivatives financial instruments aiming at hedging risks, ensuring efficient portfolio management and/or investing according to the Investment Policy. The use of derivatives financial instruments for investment purposes may amplify the up and down fluctuations of the Sub-Fund's Net Asset Value per Unit.

Strategy In actively managing the fund, the investment manager uses strategic and fundamental company analysis to select securities that appear to offer above average growth and income potential. The majority of the fund's securities will be components of and may have similar weightings to the benchmark depending on the investment manager's strategic or tactical views. Quantitative deviation limitations underlying the investment approach will restrict the extent to which the performance of the fund may deviate from the benchmark. The fund's exposure to securities, and thus its performance, are likely to slightly differ from those of the benchmark.

Redemption You may sell your units on demand at any time. The redemption orders are executed on the basis of the Net Asset Value per Unit of the day when the request is received in Luxembourg before the dealing deadline. The Net Asset Value per Unit is calculated daily.

Distribution Policy This Unit Class is not distributing dividends. Income from investments is reinvested.

RISK AND REWARD PROFILE

Potentially lower reward Potentially higher reward

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the sub-fund.
- The risk and reward category indicated is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest category does not mean a risk free investment.

This Class of Unit is placed in the category 6 based on a simulated historical performance over the last five years.

This category reflects the exposure of the Sub-Fund to small and medium capitalization equity instruments issued by issuers located in developed markets and denominated in local currencies.

Other materially relevant risks for this Sub-Fund that are not adequately captured in this synthetic indicator:

- counterparty risk: risk that a third-party with which the Sub-Fund entered into contracts in order to perform some operations may default on its obligations.
- liquidity risk: risk that the sale of the financial instruments in which the Sub-Fund invests may be difficult depending on the features of these instruments themselves and/or on the market conditions when the sale is to be executed or on the lack of a sufficient number of potential buyers. The selling price may then be less than the value of a financial instrument.

In the last calendar year the performance fee paid was 0.29% of the fund.

- The ongoing charges figure (of which management fees 0.60%) is based on the last year's expenses, for the year ending December 2019.
