## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## OBJECTIVE AND INVESTMENT POLICY

### Objective

The fund's objective is capital appreciation, measured in U.S. dollars.

### Investment Policy

The fund normally focuses its investments in equity securities of issuers located in developed and emerging market countries, however the fund may invest without limit in debt instruments of corporate and government issuers, including below investment grade debt instruments, as well as cash and cash-equivalent instruments, based on its view of the relative value of different types of securities and/or other market conditions. The fund generally focuses its equity investments in companies it believes to be undervalued compared to their perceived worth (value companies). The fund may invest a relatively large percentage of its assets in a small number of issuers. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

The fund's benchmarks, MSCI World Index (USD) and BofA Merrill Lynch U.S. Dollar LIBOR (3 M Constant Maturity), are indicated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The

fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

### Distributions

Income will not be distributed to shareholders but reflected in the assets of the fund.

### Redeeming Shares

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

### Terms to Understand

**Equity securities** represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

**Debt instruments** represent obligations of corporations, governments, and other entities to repay money borrowed.

**Derivatives** are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

## RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years compared to the fund's current asset mix. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

### Lower risk

Typically lower rewards

### Higher risk

Typically higher rewards

The fund is in category 4 because there has been medium fluctuations in the fund's return historically.

**Equity Risk:** Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, and regulatory conditions. This risk may be higher where the fund invests in a small number of companies.

**Debt Instruments Risk:** Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of

its investments, and to issuer, market, economic, industry, political, and regulatory conditions. These risks may be higher where the fund invests in below investment grade debt instruments.

**Emerging Markets Risk:** Emerging markets can be more volatile and less liquid than more developed markets.

**Currency Risk:** Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

**Derivatives Risk:** Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

### Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.

## CHARGES
