Objectives and Investment Policy

Objective: Seeks to increase the value of your investment over the recommended holding period.

Portfolio securities: The Sub-Fund mainly invests in derivatives whose value is linked to various UBS and other commodity market indices. The indices are provided by financial institutions specialised in commodity futures indices. The Sub-Fund will expose at least two-thirds of its assets to the performance of two or more commodity market indices. The Sub-Fund may also invest in bonds, convertible bonds, bonds with attached warrants, other fixed interest securities, zero-coupon bonds and money market securities. Further information relating to the indices used is provided in the Prospectus. The Sub-Fund may also use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (either long or short) to various assets, markets or income streams.

Risk and Reward Profile

Lower Risk (not-risk free)
Lower Potential Reward

Higher Risk
Higher Potential Reward

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the fact that as an asset class, commodities tend to be more volatile than bonds or money market securities. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks:

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Counterparty risk: Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.

Credit risk: The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due.

Operational risk: Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk: Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
