Calamos U.S.Growth Fund

A sub-fund of Calamos Global Funds plc (the "Company") Class I U.S. $ Accumulating IE00B296TP01

Objectives and Investment Policy

The Fund seeks a long term gain on the amount invested.

The Fund aims to select securities that offer the best opportunities for high, sustainable growth using a multi-factor screening process. The Fund expects to invest primarily in Equities, Common and Preferred Stocks and up to 5% in Warrants of US companies with market capital values of over US$1 billion. The Fund may also invest up to 25% of its assets in securities of non-US issuers.

As well as individual security selection, the Fund will seek diversification by industry and company.

The Fund may use Derivatives to reduce risk, or manage the Fund more effectively by reducing cost or to generate additional income.

Any income less expenses earned by the Fund will not be distributed to investors but will be accumulated in the net asset value per share of the Fund.

For full investment objective and policy details as well as subscription and redemption policies please refer to the prospectus.

Investors can redeem shares in the Fund on a weekday that is not a public holiday in Ireland or New York.

Recommendation: investment in the Fund may not be appropriate for investors planning to withdraw their money within 3 to 5 years.

Equity(ies): securities that represent an ownership stake in a company (e.g. stocks).

Common Stocks: instruments that represent partial ownership in a company that have voting rights in relation to company matters and often enjoy rights which allow their holders to maintain proportional ownership.

Preferred Stocks: instruments which represent partial ownership in a company that do not have voting rights but usually pay a fixed dividend.

Warrants: Derivatives issued by companies that entitle the holder to buy the underlying stock at a fixed price until the expiry date.

Derivatives: instruments whose value is based on the performance of another financial asset, index or investment such as forward contracts (agreeing to buy or sell an asset at certain dates and prices) and Options.

Options: A Derivative that represents a contract sold by one party to another. The contract offers the buyer the right, but not the obligation to buy or sell a security or other financial asset at an agreed upon price during a certain period of time.

Risk and Reward Profile

1	2	3	4	5	**6**	7

Lower risk (Not risk free) **Higher risk**

Typically lower rewards **Typically higher rewards**

The Fund is in category 6 as it mostly invests in Equities, Common and Preferred Stocks and Warrants which typically experience higher levels of price fluctuations than Debt Securities. Additionally, the Fund's investments are concentrated in the US market, making it more sensitive to price fluctuations than a fund investing on a more globally diversified basis. The categorisation is based on historical data and may not be a reliable indicator of the future.

The risk profile of the Fund may change due to unusual market conditions or unpredicted events which could result in losses or fluctuations in price significantly greater than the rating may indicate.

In pursuing its investment objective, the Fund will be exposed to additional risks including without limitation:

> there may be insufficient buyers or sellers to allow the Fund to sell or buy certain types of securities readily;

> a party with whom the Fund contracts for securities or to safekeep the Fund's assets may fail to meet its obligations or become bankrupt which may expose the Fund to a financial loss; and

> Derivatives may fluctuate in value rapidly and certain derivatives may introduce leverage which may result in losses that are greater than the original amount invested.

For more information in relation to these other risks, please refer to the "Investment Risks" section of the prospectus.

For non-US Dollar classes, including those set out below in the "Representative Share Classes" section, while the Fund may attempt to hedge against currency fluctuations, there can be no guarantee that the value of such classes will not be affected by the fluctuations in the US Dollar against the relevant currency.
