- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the sub-fund.
- The risk and reward category indicated is not guaranteed to remain unchanged and the categorisation may shift over time.

This Class of Unit is placed in the category 3 based on its annual price volatility over the last five years, considering the annualized volatility of the returns of the asset mix corresponding to the current asset allocation as well as the risk budget of the Sub-Fund.

This category reflects the nature of the portfolio of the Sub-Fund that may represent a combination of high and low risk investments.

Other materially relevant risks for this Sub-Fund that are not adequately captured in this synthetic indicator:

- counterparty risk: risk that a third-party with which the Sub-Fund entered into contracts in order to perform some operations may default on its obligations.
- credit risk: risk that the issuer of debt instruments fails to pay to the Sub-Fund interests and principal, even only in part.
- geopolitical risk: risk related to the investments in geographic areas that may be sensitive to any event of economic, geopolitical or regulatory nature or any other events beyond the control of the Management Company that could expose the Sub-Fund to losses.
- liquidity risk: risk that the sale of the financial instruments in which the Sub-Fund invests may be difficult depending on the features of these instruments themselves and/or on the market conditions when the sale is to be executed or on the lack of a sufficient number of potential buyers. The selling price may then be less than the value of a financial instrument.
- operational risk: risk of loss resulting from human errors, inadequate or failed internal or external systems and processes - including those related to the safekeeping of the assets of the Sub-Fund - or from external events.
